What about Pietra di Matraia

Pietra di Matraia is a sandstone quarried in the hills surrounding the city of Lucca, in Tuscany.

Its qualities are unique and its use dates back to ancient times: in the **Middle Ages** this stone was already being used for cladding and for quality decorative elements.

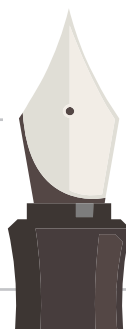

Pietra di Matraia stone is **unique in its kind**, with features that distinguish it from other sandstones:

- negligible water absorption that prevents its degradation (**0,20%** of weight);
- resistant material as far as scientific parameters and applicability in difficult contexts;
- great versatility of the material that allows for countless types of finishing processes, among which the mirror-effect polish, absolute particularity of Matraia stone.

Pietra di Matraia's features have been tested by Pisa University and Bologna University, using UNI EN methods.

Pietra di Matraia is a Made-in-Italy excellence does not degrade... It evolves slowly in the course of time without compromising the functionality and the value of the object.

What about Us

Today, Pietra di Matraia is extracted from the proprietary quarries of the Mugnani family, heir to a stone processing tradition dating back to the **Renaissance**.

The company **Mugnani Giovanni & Germano** processes and customizes Matraia stone, operating both in Italy and abroad, in traditional and vanguard environmental contexts, spurred by the constant pursuit to unite the vocation for artisan craftsmanship with the most demanding and innovative market demands.
