

LIGHT in
PROJECT

ABOUT US

Ghidini lighting is an Italian company founded in 1974 by Gianpietro Ghidini which is specialized in the design and production of technical outdoor lighting fixtures. Lucitalia Milano was founded in 1966 as "LUCI interior lighting" and quickly established itself as one of the most original and innovative manufacturing Companies in modern design. In 2018 Lucitalia was incorporated into Ghidini Lighting, while maintaining its brand identity. The union of the two companies allows designers to be able to use a single source in the development of projects in both outdoor and indoor environments. The products are manufactured using top quality materials and components that guarantee reliability and efficiency over time.

VISION & MISSION

Ghidini and Lucitalia contribute to improving people's well-being by enhancing environments and spaces through light and form.

The company produces contemporary architectural design lighting fixtures which are functional and integrate harmoniously into different design contexts, ensuring maximum visual comfort.

LIGHTING DESIGN

The lighting design service is a key support element for all designers and specifiers. Starting from your 2D or 3D project files, our lighting designers will identify the most suitable luminaires for the different environments, taking into account the required lighting functional aspects. Once the luminaires have been selected, our office will be able to provide you with photorealistic 3D room renderings and lighting calculations using some of the most advanced lighting calculation software available. The lighting design project and quotation will also be accompanied by detailed product data sheets.

LET'S DESIGN!

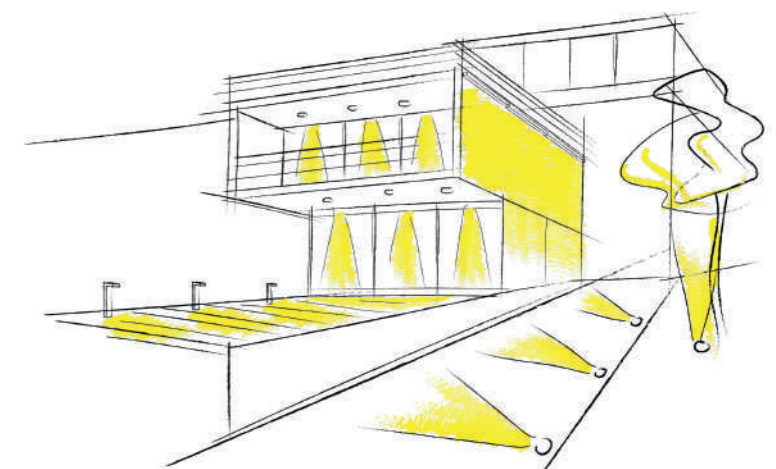

Here is what we need in order to give you a project that is as *realistic* as possible:

- Plans, sections, elevations in .dwg format
- 3D model in .3ds / .obj / .skp / .ifc / .rvt format
- Photos of the room to be lit
- Photos of the room finishes

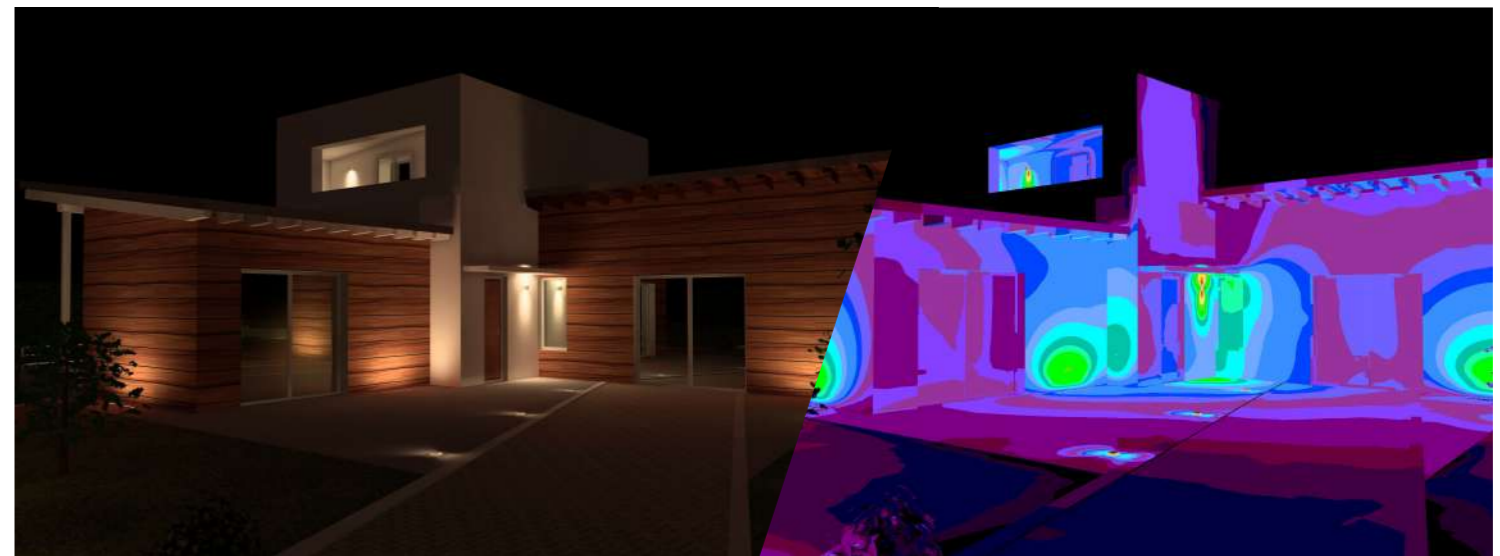

The fidelity of the project depends on the quality of the material supplied.
