COLLI Euganei NATURAL PARK

Thermal water, bees and medicinal plants together to give you true natural beauty

In the heart of the Euganean Hills Regional Park, the precious gifts of the beehive meet the ancient thermal waters of Abano, merging into a combination of tradition and innovation that results in an exclusive cosmetic line that wants to enhance the territory in which it was born.

**THERMAE
ABANO
MONTEGROTTO**
COLLI EUGANEI NATURAL PARK

Natural beauty was born in a natural park

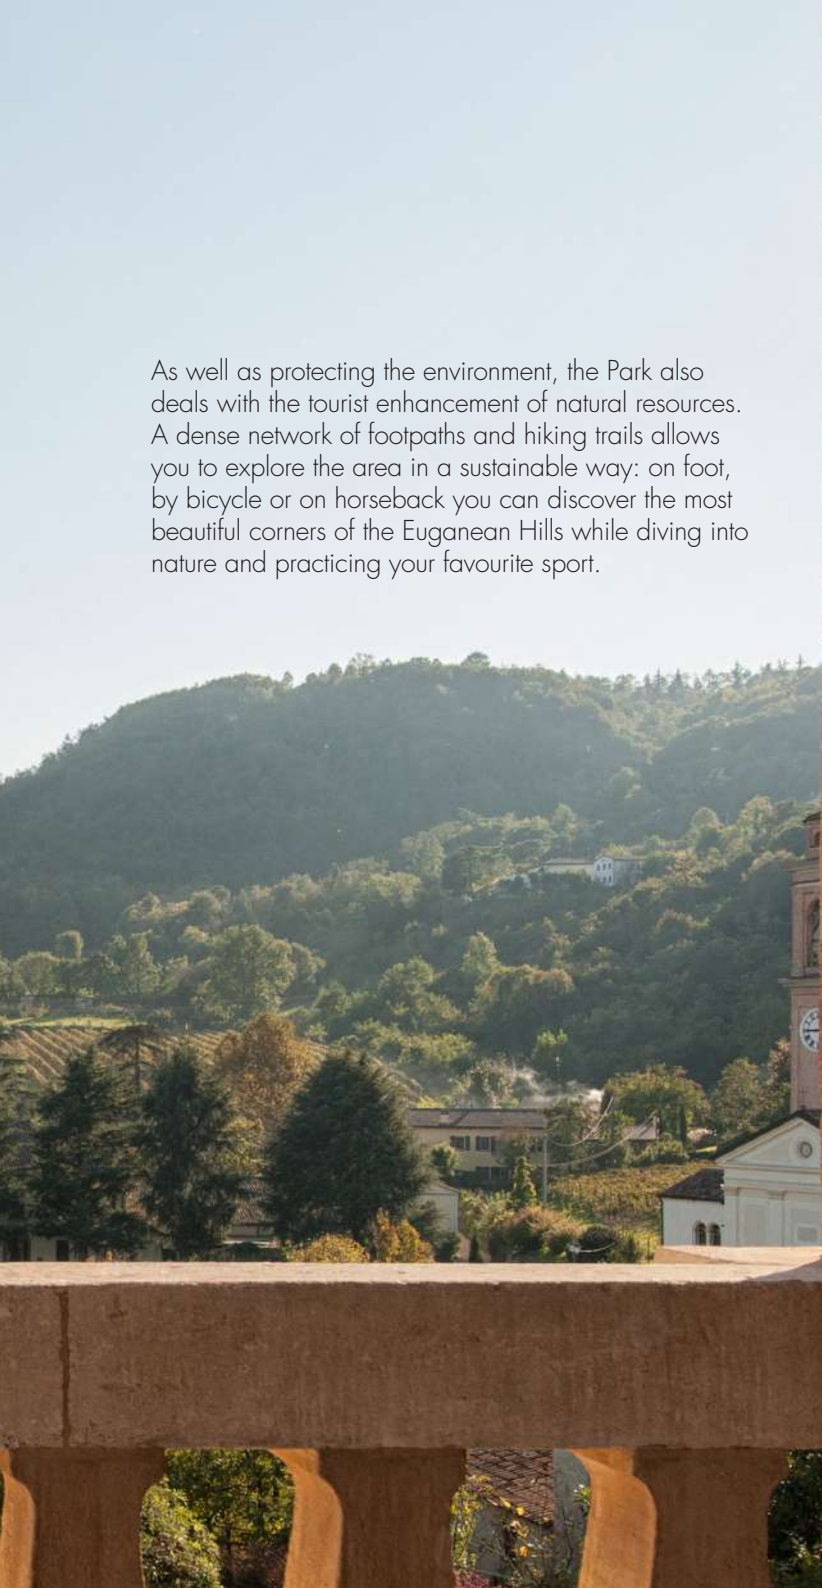

Apitaly® comes to life in the **Euganean Hills Regional Park**: a fascinating territory with a luxuriant nature, a landscape permeated with the mysterious charm of the Middle Ages and the Renaissance, a complex microcosm rich in excellence in which the pace of life seems to slow down to leave room for peace, wonder and and a rediscovery of Tradition.

The Park covers a hilly area of volcanic origin of around 19 thousand hectares, comprising 15 municipalities in whole or in part. The Park protects a vast and surprisingly rich territory in which more than 1400 botanical species are concentrated, equal to about 1/6 of the Italian flora.

The fascinating landscape and corners of uncontaminated nature are complemented by a remarkable wealth of cultural heritage: ancient villages, medieval castles, hermitages, and refined architecture that recount centuries of history, art and tradition.

THERMAE
ABANO
MONTEGROTTO
COLLI EUGANEI NATURAL PARK

As well as protecting the environment, the Park also deals with the tourist enhancement of natural resources. A dense network of footpaths and hiking trails allows you to explore the area in a sustainable way: on foot, by bicycle or on horseback you can discover the most beautiful corners of the Euganean Hills while diving into nature and practicing your favourite sport.

Thermal waters of Abano and Montegrotto

Known and appreciated since protohistory, the thermal waters of Abano and Montegrotto are even today a source of health and well-being.

The thermal water of the Euganean Spas originates from the rains that fall on the Lessini Mountains near Verona, and must flow underground for about 80 km at a depth of 3000 metres before reaching the precious springs.

During this journey underground, which lasts about 30 years, the waters, thanks to the geothermal gradient and under strong pressure, reach temperatures of 200°C in some places, enriching themselves with some mineral salts (sodium, potassium, magnesium, iodine, bromine and silicon) contained in the rocks through which they flow and then cooling down during the ascent to the ground where they gush out at 87°C.

Thermal waters are used in a wide range of remise en forme treatments/programs and are used for swimming pools, thermal balneotherapy, respiratory tract affections and, above all, are the basis of the maturation, preservation and regeneration process of thermal mud, unparalleled for its thermo-mineral properties and anti-inflammatory and pain-relieving abilities.

The benefits of thermal water

The waters of the Abano thermal basin belong to the deep groundwater category and are chemically classified as hyperthermal **saline-bromine-iodine**.

Some studies carried out on this type of water have shown that they are a **useful remedy against recurrent and chronic rhinosinus pathologies**.

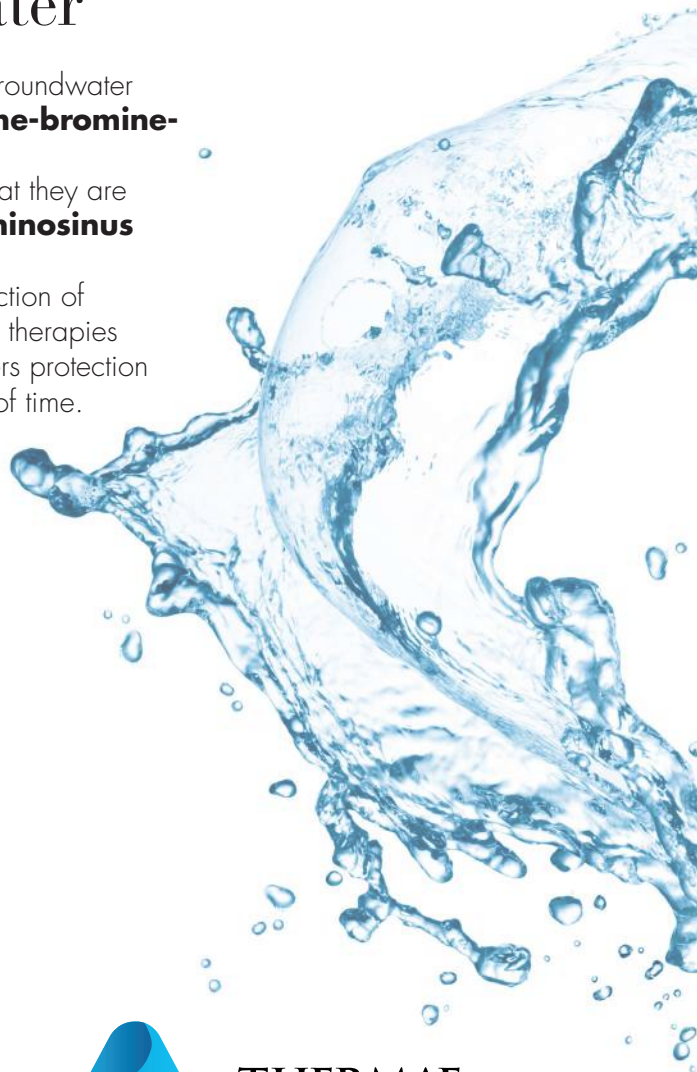

The disinfectant (against bacteria and fungi) and antiseptic action of our thermal waters is also very interesting; their use in various therapies spontaneously resolves certain types of inflammation and offers protection against external and internal pathogens for a certain period of time.

Cosmetic properties

The hyperthermal water of Abano is an authentic **gift of Nature** for the care, health and beauty of the skin; a panacea, especially for the most sensitive skins and those with an easy tendency to reddening, because its active principles are able to give the epidermis great benefits.

It is a veritable elixir of youth capable of giving a smoother, more toned and more radiant face.

Unique in the world for its qualitative and quantitative composition of macro and micro elements, the hyperthermal water of Abano Terme has **moisturising, soothing, mineralising, restructuring and antioxidant properties** that revitalise the skin and protect it from environmental aggression.

The benefits of hive products

Bees and **their gifts** are our **main source of inspiration**.

Even after many years of experience and study, the wonder and amazement of these insects is renewed every day.

The **products** they provide us with through their tireless work are **real treasures** whose applications range from food to cosmetics and beyond. Let's discover them together!

Honey

The most famous product given by bees is without doubt honey. Honey is produced by the foraging bee by processing sugary substances gathered from nature. The main sources are nectar, produced by flowering plants.

Cosmetic properties

Honey is rich in **fructose**, it moisturises the upper layers of the epidermis and soothes sensitive skin. Thanks to its antibacterial properties, it purifies oily skin without drying it out. Rich in **antioxidants** and **enzymes**, it is also a beauty ally against the signs of ageing. It helps limit skin ageing by regenerating the tissues and preserving elasticity.

Propolis

Bees collect this substance from flower buds and plants and use it both as a building material to coat the inside walls of the cells, both as an antiseptic to "sterilize" the hive.

Cosmetic properties

Propolis also has numerous benefits for the skin. It is used in cosmetics for its **regenerating, antibacterial** and **cicatrizing action**, it envelops the skin in a gentle soothing caress, presenting valuable virtues in the treatment of skin conditions such as acne, psoriasis, eczema, burns, fungal infections and cracked hands. Propolis is also renowned for its purifying action, making this natural ingredient an ideal ally in removing make-up.

Bees wax

Beeswax is secreted by worker bees in order to build honeycombs. The process of wax production is very expensive: the bees must consume around 10 kg of honey to produce 1 kg of wax!

Cosmetic properties

Beeswax is made up of fatty compounds that make it useful in the formulation of products for very dry and chapped skin. It contains a large amount of **carotenes** which are the main **source of vitamin A**, this vitamin performs a function of cell regeneration, strengthens the skin's defenses against the aggression of germs, bacteria and atmospheric agents. The wax has **antiseptic, emollient, anti-inflammatory** and **healing properties**, thus resulting in a valid ally even in the presence of impure or acne-prone skin.

Fresh royal jelly

Royal jelly is a jelly synthesized exclusively by nurse worker bees to feed the young larvae and bees intended to become queens. It is precisely because of the properties and effects found on the bee that man began to consider gelatine as a possible foodstuff and discovered its important benefits.

Cosmetic properties

Royal jelly has an important anti-aging function resulting from its **amino acid, minerals** and **vitamins** content.

The most well-known virtues recognised in cosmetics are its stimulating action on epidermal cell metabolism, normalisation of sebaceous secretion (acne), prevention of skin senescence (anti-wrinkle effect), improvement of skin hydration and elasticity (anti-stretch marks, firming, elasticising action).

Apitaly

The benefits of medicinal plants

Medicinal plants have been known and used since ancient times for their many properties.

Let's now discover the properties of lavender and calendula, whose extracts contribute to enrich the formulations of our natural thermal cosmetics!

Lavender

Lavender is a plant native to the Mediterranean and it was widely used in ancient times to cleanse the body.

The ancient Romans used it to perfume the water in public and its use for cleansing purposes was revived in medieval times for the ritual of washing. It is also widely used in the perfume industry to produce essences for use in perfumes or soaps.

There are many varieties of lavender but for our products we have decided to grow **Lavandula Officinalis** or **Angustifolia**, which is rich in essential oil and of excellent quality.

Cosmetic properties

Lavender has **cleansing, anti-inflammatory, anti-bacterial** and **healing properties**.

Cosmetic products containing lavender extract fight the signs of ageing and have a soothing effect. Its lightening properties help combat dark spots on the skin caused by the passage of time, while its anti-inflammatory and astringent action is useful against pimples and acne.

Calendula

Calendula flowers, which are also used in the preparation of the mother tincture, have **soothing properties** on irritations, speed up the healing process of damaged skin and have **antioxidant action** against free radicals. Calendula is therefore particularly suitable for sensitive or irritated, dry and cracked skin, small wounds, eczema, psoriasis, couperose, sunburn, itching caused by hives or insect bites. It optimises the blood supply to the skin, thus improving its health and appearance.

Cosmetic properties

Calendula flowers, which are also used in the preparation of the mother tincture, have **soothing properties** on irritations, speed up the healing process of damaged skin and have **antioxidant action** against free radicals.

Our mission

Quality

The guarantee of high quality standards is an essential value for us.

Every day we engage in continuous research in order to guarantee our customers a safe and effective product.

The treasures of the beehive are produced using artisanal methods to preserve their natural properties and by following strict technical process/product specifications in full respect of the bees, the environment and biodiversity.

The harvest of beehive gifts and medicinal plants, together with Abano thermal water, is delivered to the best Italian laboratories for transformation into **exclusive and innovative** products.

100%

Made in Italy

The enhancement of the territory is an essential fundamental principle.

Buying one of our products means breathing the Nature of the Euganean Hills Regional Park and the Abano Spa.

We personally follow, with artisanal methods, every phase of the process of working the beehive products.

We create cosmetic formulations in collaboration with the most renowned laboratories specialised in the natural and thermal sphere.

Every day we work with passion for you, for your well-being and that of future generations.

Biodiversity

The protection of flora and the conservation of fauna are issues to which we pay particular attention, as beekeeping is at the heart of our business. Before honey, royal jelly and other hive products comes the well-being of the bees.

Our true mission is to be at the service of this extraordinary insect and of Nature.

Without bees, biodiversity would be compromised and the world would wither away.

Respecting nature also means respecting animals.

We ensure that none of our treatments are tested on animals.

Sustainability

Sustainability is an integral part of the quality of our products, we think and work in accordance with the rhythms dictated by Nature, we use clean electricity from renewable sources, all production and transformation processes are respectful of the planet and the packaging of our products is reasoned and conscious.

Natural Products

Our **natural thermal cosmetics** are formulated without petrolatum, parabens, PEG and silicones. They are conceived and created starting from the gifts offered by Nature: the thermal water of Abano, the officinal plants and the harvest of our bees obtained with artisanal methods. The beehives are managed exclusively with organic practices.

Moisturizing face cream

Thermal water, honey and lavender

Face cream with precious emollient, regenerating and protective components. Its formula, enriched with Abano's thermal water, honey and lavender, makes it ideal for all skin types that need intense hydration and protection from external agents.

Use

Apply morning and evening on carefully cleansed face and neck skin.

Ingredients

Aqua *, macadamia ternifolia seed oil, coco-caprylate/caprate, dicaprylyl carbonate, glycerin, glyceryl stearate, cetearyl alcohol, sodium stearoyl lactylate, polyglyceryl-3 stearate, lavandula angustifolia extract, cera alba, mel, phenoxyethanol, parfum, benzyl alcohol, xanthan gum, sodium dehydroacetate, ethylhexylglycerin, lecithin, dehydroacetic acid, tocopherol, ascorbyl palmitate, alpha-isomethyl ionone, citric acid, benzyl salicylate, coumarin, eugenol, cinnamal, limonene, linalool.

Size

50 ml

* With hyperthermal salsobromiodic water from Abano Terme

**Softening
effect**

Hand cream

Thermal water, propolis and calendula

Light hand cream enriched with Abano thermal water, propolis and calendula with well-known moisturising, soothing and regenerating properties. Ideal in any situation and in any time of the year.

Use

Apply on the hands several times a day if necessary and massage until it has been absorbed.

Ingredients

Aqua *, prunus amygdalus dulcis oil, isopropyl myristate, glycerin, coco-caprylate/caprate, glyceryl stearate, stearyl alcohol, sodium stearyl lactylate, polyglyceryl-3 stearate, phenoxyethanol, mel, cera alba, calendula officinalis flower extract, propolis extract, ethylhexylglycerin, allantoin, tocopherol, sodium dehydroacetate, parfum, linalool, hexyl cinnamal, benzyl salicylate, alpha-isomethyl ionone, geraniol, citronellol, limonene, benzyl alcohol, citral.

Size

50 ml

* With hyperthermal salsobromoiodic water from Abano Terme

**Vitalizing
effect
on your skin**

Lavender face and body tonic

Thermal water, lavender and hyaluronic acid

The synergic action of Abano thermal water, lavender hydrolate and hyaluronic acid favours the natural hydration and freshness of the skin, giving it comfort and vitality.
Ideal in all seasons, at all ages and for all skin types.

Use

Spray on hands and then apply on face and body: in the morning to tone and refresh the skin; in the evening to keep your skin clean, smooth and moisturised.

Ingredients

Aqua*, lavandula angustifolia water, sodium hyaluronate, polyglyceryl-6 caprylate, polyglyceryl-4 caprate, lavandula angustifolia herb oil, phenoxyethanol, ethylhexylglycerin, linalool, limonene, geraniol, coumarin.

Gives skin
freshness
and vitality

Damascene rose face and body tonic

Thermal water, damascene rose hydrolate and hyaluronic acid

The combined action of Abano thermal water, damascene rose hydrolate and hyaluronic acid, gives the skin an instantaneous freshness and wellbeing sensation, helping to keep it toned and firm.

Use

Spray onto the hand and distribute over face and body: in the morning to purify and refresh your skin; in the evening to give the skin a toned appearance and prevent signs of skin exhaustion. Wait for full absorption.

Ingredients

Aqua*, rosa damascena flower water, sodium hyaluronate, polyglyceryl-6 caprylate, polyglyceryl-4 caprate, phenoxyethanol, ethylhexylglycerin, parfum.

Size

100 ml

* With hyperthermal salsobromiodic water
from Abano Terme

A boost
of properties

Body mask with moisturising and nutrient ingredients

Thermal water, beeswax, calendula and shea butter

The combined action of Abano thermal water, shea butter, almond oil, Mallow, Marigold and Yarrow extract gives a real boost of properties as these ingredients have well-known elasticising, emollient, purifying and antioxidant properties. Beeswax also increases skin moisture because its components retain water loss, thus making it more available to the skin. Kaolin, finally, is a faithful ally for the body because it is known for its softening, purifying and sebum-regulating properties.

Use

Spread an even layer on the skin of the body. Leave on for 10 minutes, then rinse with lukewarm water.

Ingredients

Aqua*, malva sylvestris leaf water, isopropyl myristate, kaolin, prunus amygdalus dulcis oil, cetearyl alcohol, butyrospermum parkii butter, glyceryl stearate, glycerin, polyglyceryl-3 stearate, sodium stearoyl lactylate, mel, phenoxyethanol, calendula officinalis flower extract, achillea millefolium extract, cera alba, tocopherol, olea europaea oil unsaponifiables, benzyl alcohol, lavandula angustifolia oil, sodium dehydroacetate, xanthan gum, linalool, ethylhexylglycerin, cananga odorata flower oil, dehydroacetic acid, geraniol, benzyl salicylate, benzyl benzoate, farnesol, limonene, coumarin.

Size

200 ml e 500 ml

* With hyperthermal salsobromoiodic water
from Abano Terme

Apitaly

**Ideal
for mature
skin**

Antiage face cream

Thermal water and royal jelly

Nourishing and moisturizing anti-aging face cream. Its formula, enriched with Abano's thermal water and fresh royal jelly, helps to counteract the aging processes of the skin, making the skin firmer and softer. Ideal for mature and dry skin.

Use

Apply morning and evening on carefully cleansed face and neck skin.

Ingredients

Aqua *, isopropyl myristate, decyl oleate, simmondsia chinensis seed oil, butyrospermum parkii butter, glycerin, cetearyl glucoside, royal jelly, stearyl alcohol, cetearyl alcohol, sodium stearoyl lactylate, mel, cera alba, phenoxyethanol, tocopherol, xanthan gum, parfum, benzyl alcohol, sodium hyaluronate, sodium dehydroacetate, ethylhexylglycerin, dehydroacetic acid, alpha-isomethyl ionone, benzyl salicylate, coumarin, eugenol, cinnamal, limonene, linalool.

Size

50 ml

* With hyperthermal salsobromiodic water from Abano Terme

Eye contour serum

Thermal water, royal jelly and honey

The eye contour serum, thanks to the combined action of thermal water from Abano, royal jelly and honey, moisturizes, nourishes and protects the delicate area around the eyes that needs a specific moisturizing and smoothing treatment.

Use

Apply morning and evening around your eye contour area.

Ingredients

Aqua*, isopropyl myristate, simmondsia chinensis seed oil, butyrospermum parkii butter, cetearyl alcohol, glyceryl stearate, royal jelly, polyglyceryl-3 stearate, glycerin, sodium stearyl lactylate, panthenol, mel, aesculus hippocastanum extract, phenoxyethanol, tocopherol, ethylhexylglycerin, benzyl alcohol, sodium dehydroacetate, sodium hyaluronate, dehydroacetic acid.

Size

15 ml

* With hyperthermal salsobromoiodic water from Abano Terme

Nourishing effect
for young and
mature skin

Face serum

Thermal water, royal jelly and hyaluronic acid

Face serum with a light texture formulated with high quality functional ingredients. The precious combination of fresh royal jelly, hyaluronic acid and Abano thermal water has a highly nourishing and moisturising action for your skin. It is ideal for both young and mature skin. Also excellent as an after-sun.

Use

Apply morning and evening to the skin of the face and neck thoroughly cleansed, before the usual face cream.

Ingredients

Aqua*, royal jelly, mel, glycerin, phenoxyethanol, sodium hyaluronate, xanthan gum, benzyl alcohol, hydrolyzed hyaluronic acid, ethylhexylglycerin, dehydroacetic acid.

Size

30 ml

* With hyperthermal salsobromiodic water
from Abano Terme

**Exfoliating
and nourishing
effect**

Face scrub

Thermal water, honey and calendula

The face scrub, formulated with thermal water from Abano, calendula officinalis and honey, carries out a very important cleansing action, nourishing the skin in depth. The microgranules, obtained from the shells of almonds and hazelnuts, guarantee gentle exfoliation, removing impurities and leaving the skin smooth, velvety and radiant. Suitable for all skin types.

Use

Apply twice or three times a week on your facial skin with a light massage. Rinse thoroughly with water.

Ingredients

Aqua*, ethylhexyl stearate, prunus amygdalus dulcis oil, glycerin, butyrospermum parkii butter, cetearyl alcohol, corylus avellana shell powder, glyceryl stearate, prunus amygdalus dulcis shell powder, calendula officinalis flower extract, mel, polyglyceryl-3 stearate, titanium dioxide, cera alba, sodium stearoyl lactylate, phenoxyethanol, panthenol, tocopherol, xanthan gum, parfum, benzyl alcohol, sodium dehydroacetate, ethylhexylglycerin, dehydroacetic acid, alpha-isomethyl ionone, benzyl salicylate, coumarin, eugenol, cinnamal, limonene, linalool.

Size

50 ml

* With hyperthermal salsobromiodic water from Abano Terme

To remove
makeup and
impurity

Facial cleansing tonic milk

Thermal water, honey and lavender

Thanks to the combined action of honey, lavender and thermal water from Abano, the facial cleansing tonic milk gently removes makeup residues and impurities, restoring freshness, firmness and brightness to the face. Ideal for all skin types.

Use

Apply the product morning and evening on dry face, massaging gently with your fingertips or with a cotton pad. Treat the entire face with circular movements. Remove any residue with a cotton ball or with water.

Ingredients

Aqua*, isopropyl myristate, persea gratissima oil, cetearyl alcohol, glycerin, lavandula angustifolia extract, glyceryl stearate, mel, sodium stearoyl lactylate, palmitoyl hydrolyzed wheat protein, phenoxyethanol, panthenol, tocopherol, cera alba, parfum, benzyl alcohol, sodium dehydroacetate, xanthan gum, ethylhexylglycerin, dehydroacetic acid, alpha-isomethyl ionone, benzyl salicylate, coumarin, eugenol, cinnamal, limonene, linalool.

Face mask with purifying and soothing ingredients

Thermal water, lime blossom, honey and lavender

Face mask with normalising action for oily, mixed and blemished skin. The combination of functional ingredients such as Abano thermal water, honey, lime blossom and lavender, cleanses the skin and rebalances your hydration level, leaving a clean complexion without a shiny effect.

Use

Apply a rich layer of product to the cleansed face, avoiding the eye area. Leave on for 10 minutes, then rinse thoroughly. Use twice a week.

Ingredients

Aqua*, isopropyl myristate, kaolin, prunus amygdalus dulcis oil, glycerin, cetearyl alcohol, butyrospermum parkii butter, glyceryl stearate, polyglyceryl-3 stearate, sodium stearoyl lactylate, tilia vulgaris flower extract, mel, phenoxyethanol, tocopherol, olea europaea oil unsaponifiables, cera alba, benzyl alcohol, lavandula angustifolia oil, xanthan gum, sodium dehydroacetate, linalool, ethylhexylglycerin, cananga odorata flower oil, dehydroacetic acid, geraniol, farnesol, benzyl salicylate, benzyl benzoate, limonene, coumarin, isoeugenol, citral, eugenol, benzyl cinnamate, cinnamyl alcohol.

Size

50 ml - 200 ml

* With hyperthermal salsobromiodic water from Abano Terme

For soft
and silky
skin

Intensive body scrub cream

Thermal water, linden blossom, honey and argan granules

Body scrub with a creamy texture. Argan granules and microgranules obtained from almond and hazelnut shells strongly exfoliate the outermost layer of the epidermis, stimulating natural cell turnover. The synergic action of lime blossom, honey and Abano thermal water nourishes and softens the skin, making it soft and silky.

Use

Apply twice or three times a week on your body skin, massaging gently. Rinse thoroughly with water.

Ingredients

Aqua*, prunus amygdalus dulcis oil, corylus avellana shell powder, prunus amygdalus dulcis shell powder, argania spinosa shell powder, glycerin, octyldodecanol, stearyl alcohol, cetearyl glucoside, cetearyl alcohol, tilia vulgaris flower extract, mel, sodium stearyl lactylate, phenoxyethanol, parfum, benzyl alcohol, xanthan gum, sodium dehydroacetate, ethylhexylglycerin, lecithin, dehydroacetic acid, linalool, hexyl cinnamal, tocopherol, benzyl salicylate, alpha-isomethyl ionone, ascorbyl palmitate, geraniol, citronellol, citric acid, limonene, citral.

Size

200 ml e 500 ml

* With hyperthermal salsobromoiodic water from Abano Terme

Apitaly

For soft and
velvety
skin

Soft body scrub cream

Thermal water, linden blossom, honey and quartz crystals

A body scrub with a creamy texture. The mechanical action of quartz crystals and microgranules obtained from almond and hazelnut shells gently purifies and smoothes the skin, stimulating natural cell turnover and favouring the elimination of the most mature cells. The synergic action of lime blossom, honey and Abano Terme thermal water nourishes and softens the skin, making it soft and velvety.

Use

Apply twice or three times a week on your body skin, massaging gently. Rinse thoroughly with water.

Ingredients

Aqua*, prunus amygdalus dulcis oil, silica, glycerin, octyldodecanol, corylus avellana shell powder, prunus amygdalus dulcis shell powder, stearyl alcohol, cetearyl glucoside, cetearyl alcohol, tilia vulgaris flower extract, sodium stearyl lactylate, mel, phenoxyethanol, parfum, benzyl alcohol, xanthan gum, sodium dehydroacetate, ethylhexylglycerin, lecithin, dehydroacetic acid, linalool, hexyl cinnamal, tocopherol, benzyl salicylate, alpha-isomethyl ionone, ascorbyl palmitate, geraniol, citronellol, citric acid, limonene, citral.
