Cloud Re-platforming

Data Insights

IoT

AI & ML

CLOUD

Servers

- ❑ Data is processed on a central cloud server far away from the source of information
- ❑ Preferred for for storing, analyzing, and processing data if not required real-time information and business resilience
- ❑ It requires 24/7 internet availability

FOG

- ❑ Not depending on Internet availability
- ❑ Higher level of data security vs Cloud
- ❑ Near real time elaboration of huge stream of data

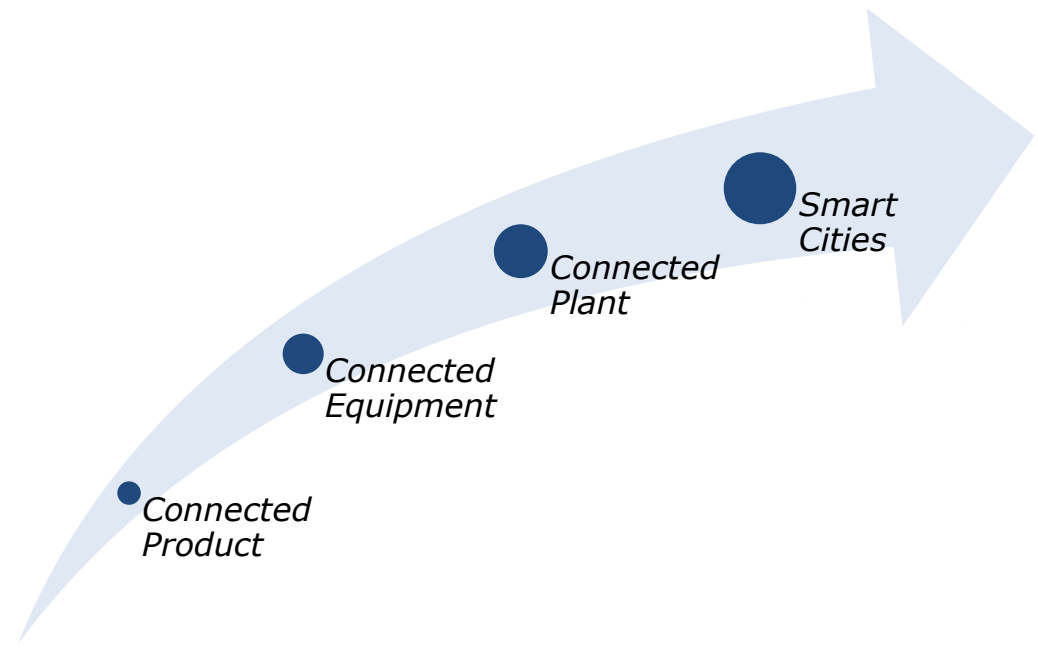

EDGE

- ❑ Shift processing of data closer to the source of data generation
- ❑ Not depending on Internet availability
- ❑ Guarantee business resilience
- ❑ Highest level of data security
- ❑ Responsiveness

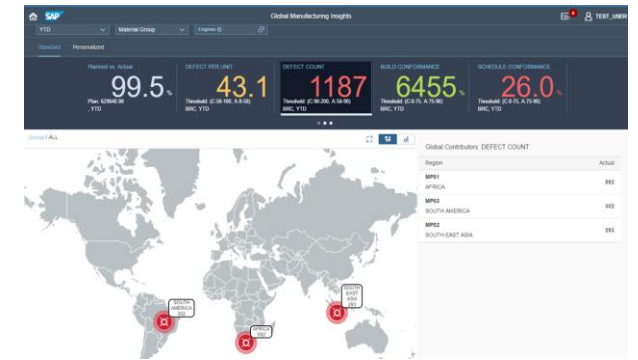

Application Areas through Business Cases

- Big Data analysis
- Machine Learning
- Predictive Models

Predictive Maintenance tool

- Big Data analysis
- Machine Learning

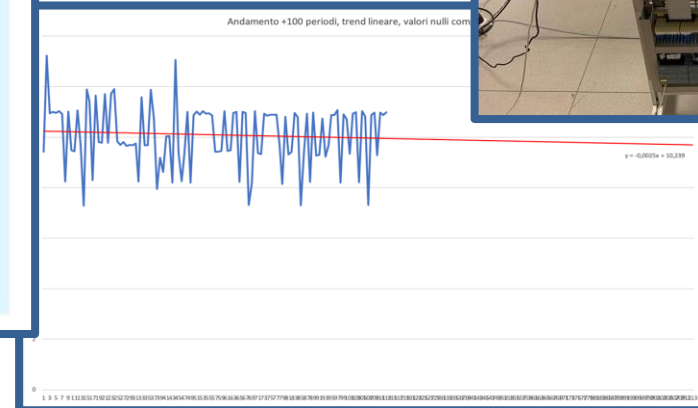

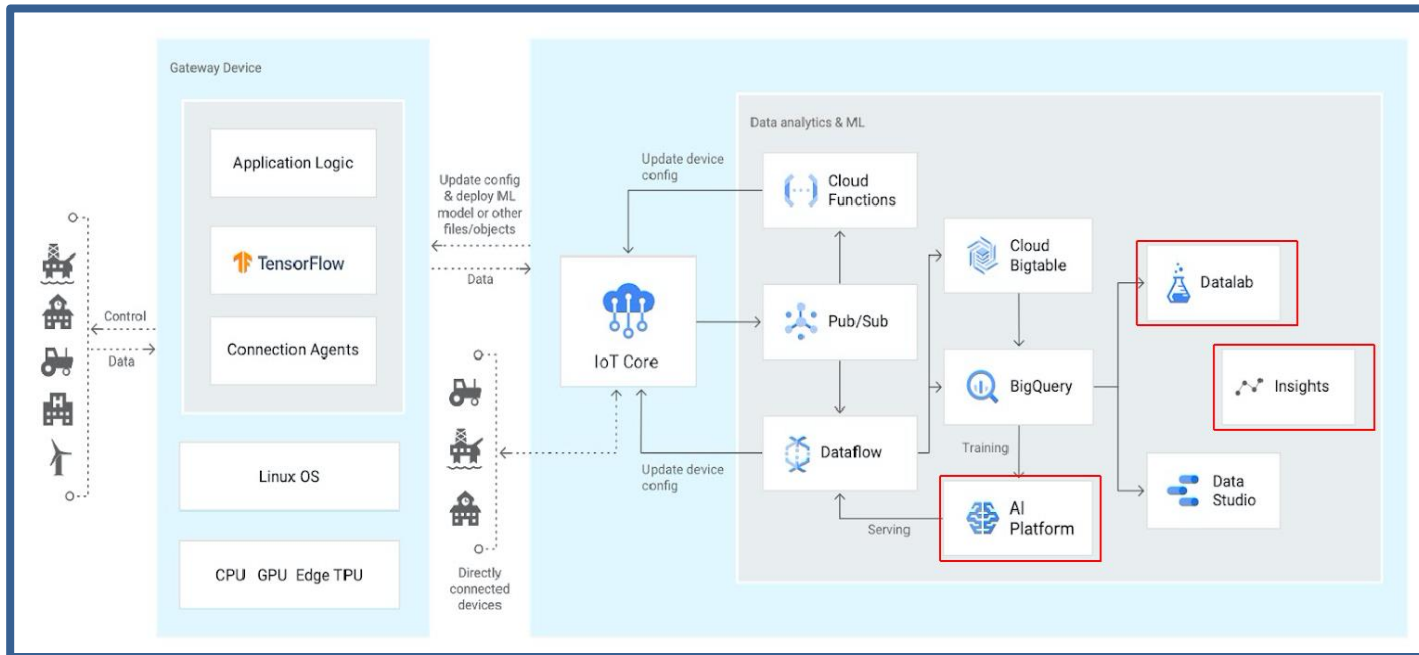

Tensor Flow
Coral
Vision API
Auto ML

AI Platform
Datalab
Insights

- ❑ Production progress
- ❑ Workload Distribution
- ❑ Set up and Downtime
- ❑ Overall Efficiency (OEE)

- ❑ Emissions
- ❑ Detection points (quality/ risk assessment)
- ❑ Environmental impact

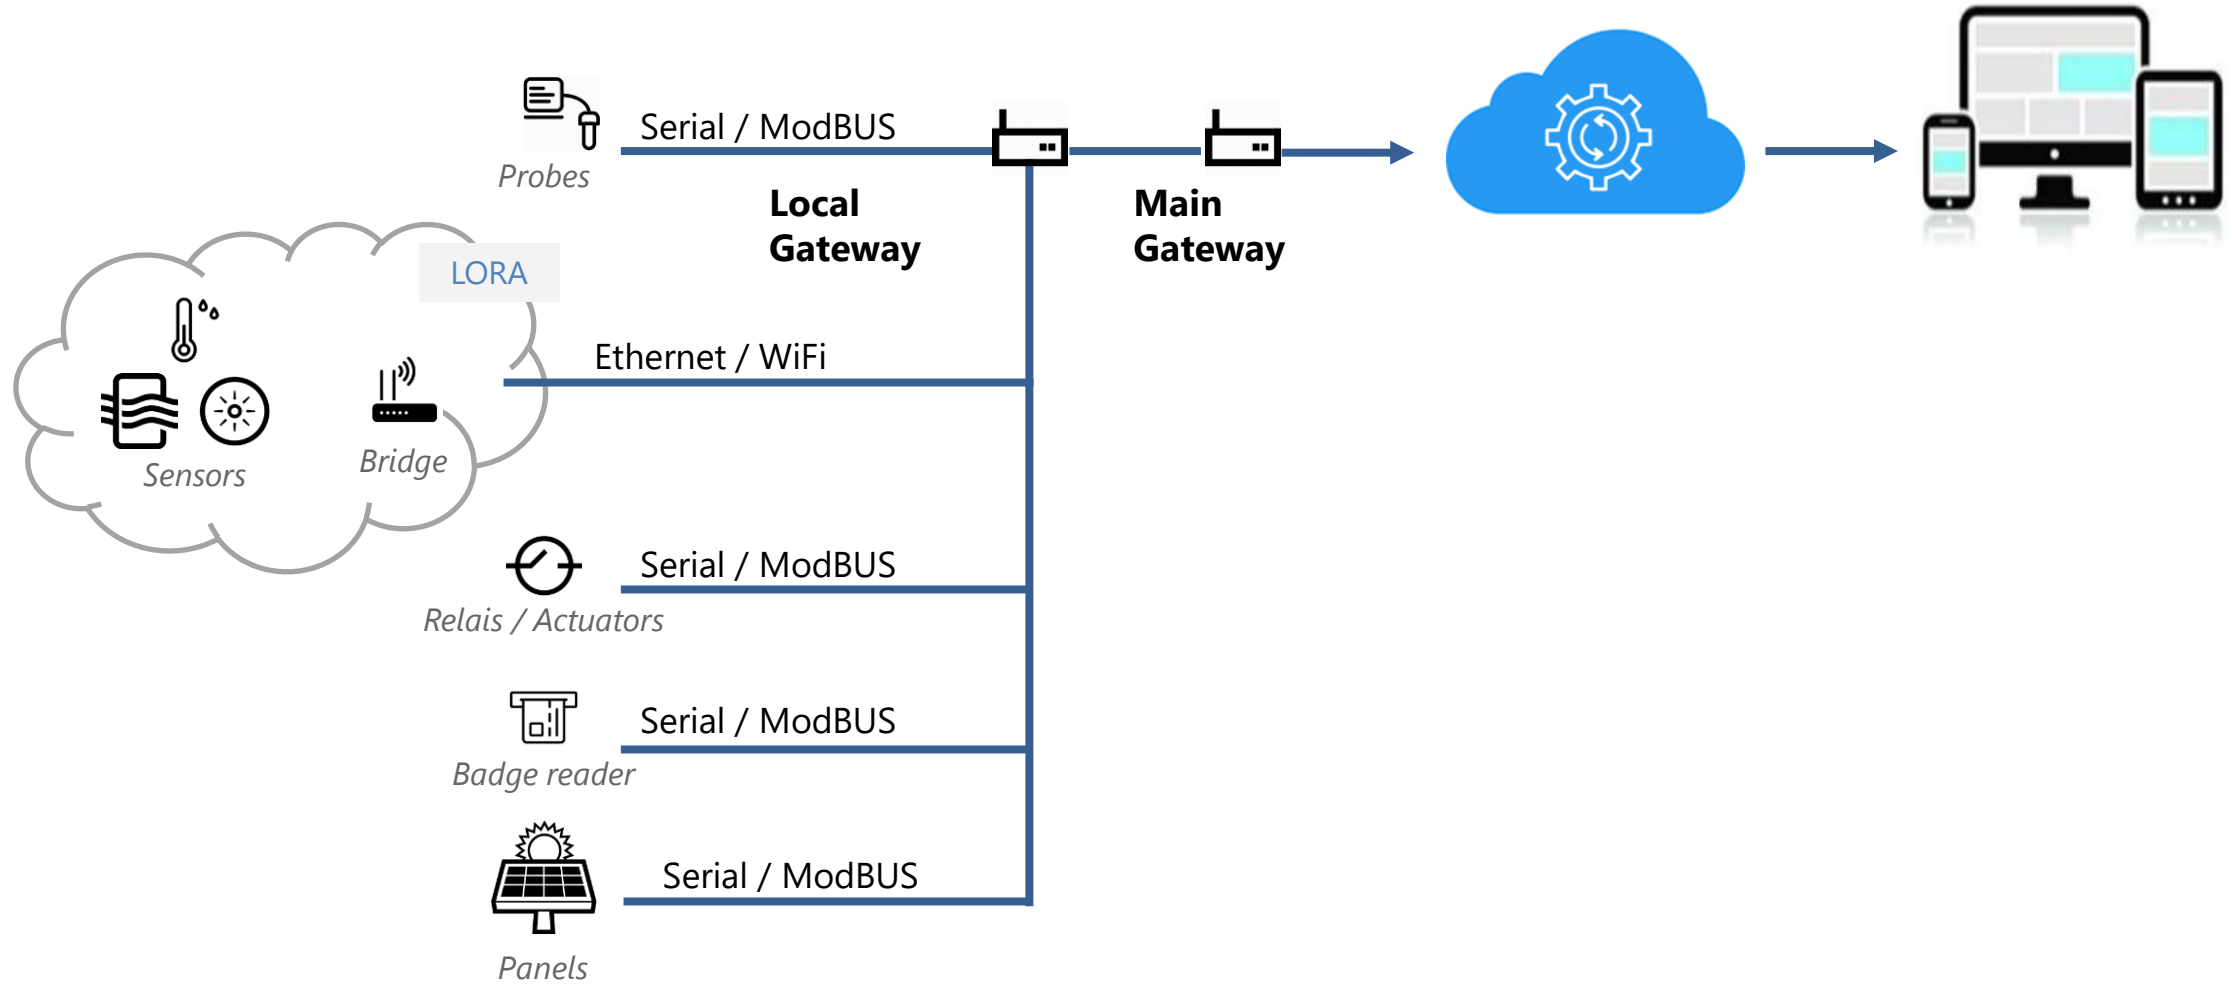

- ❑ Energy vectors measurement
- ❑ Consumption analysis
- ❑ Environmental Balance

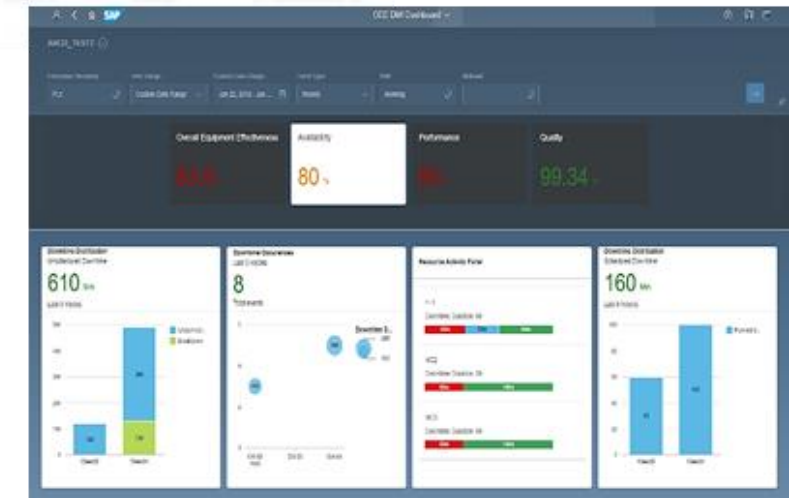

- ❑ Environmental parameters
- ❑ People flow management

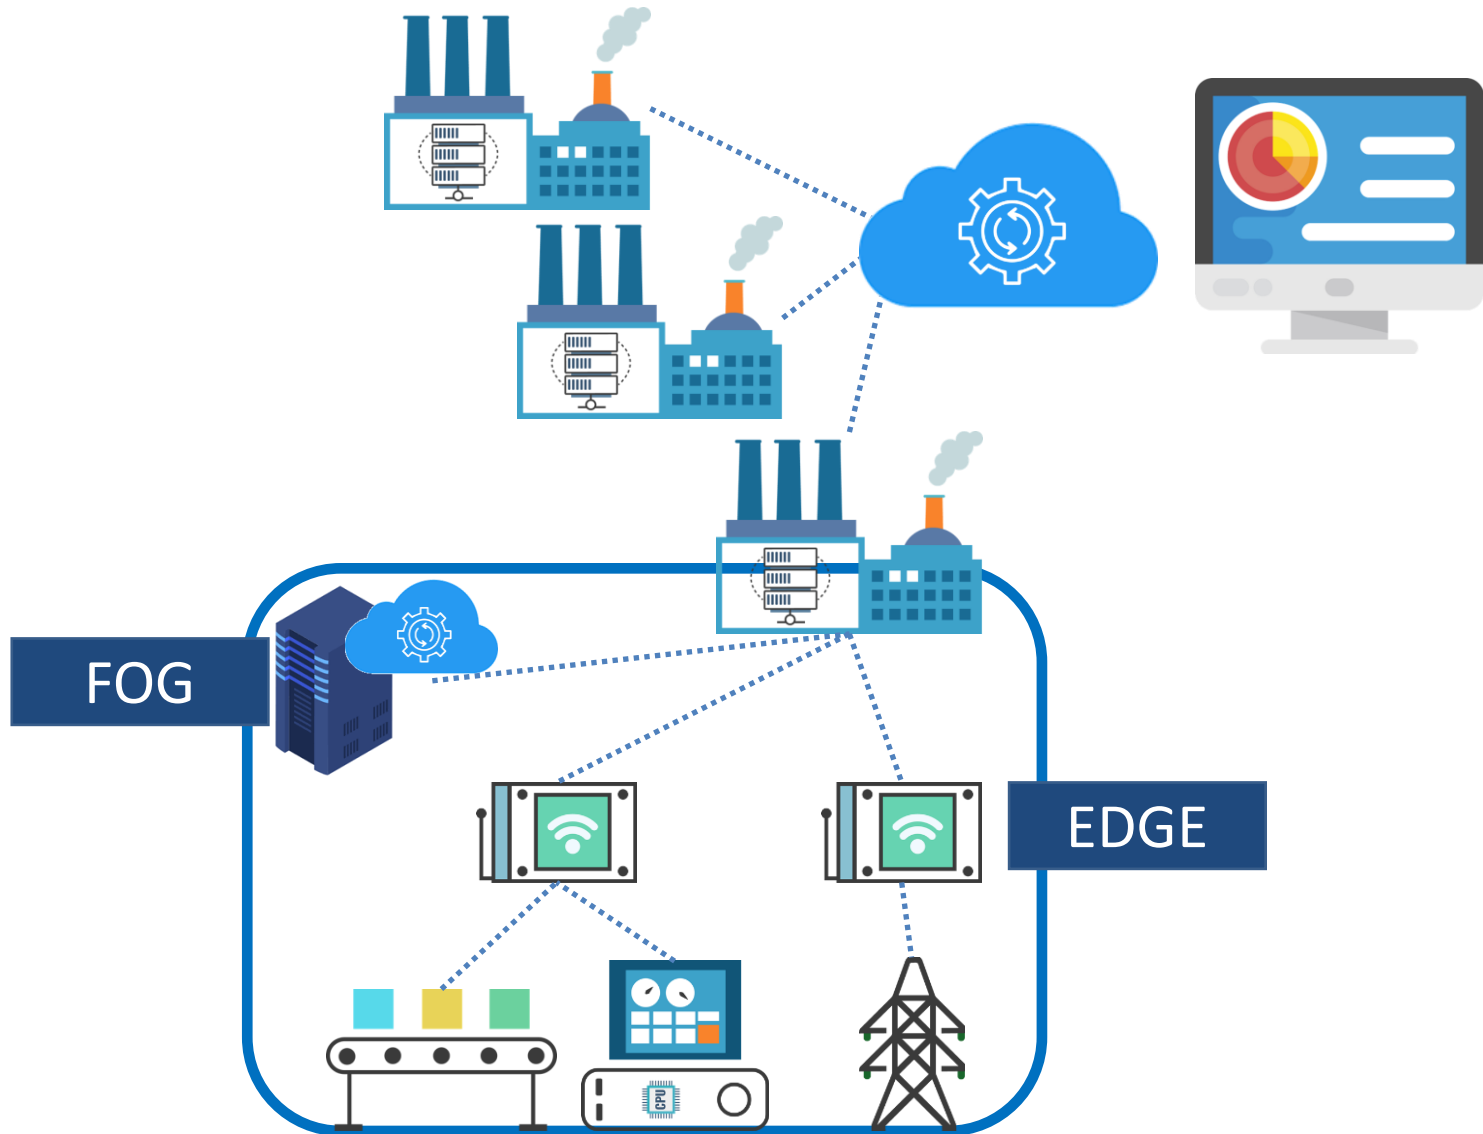

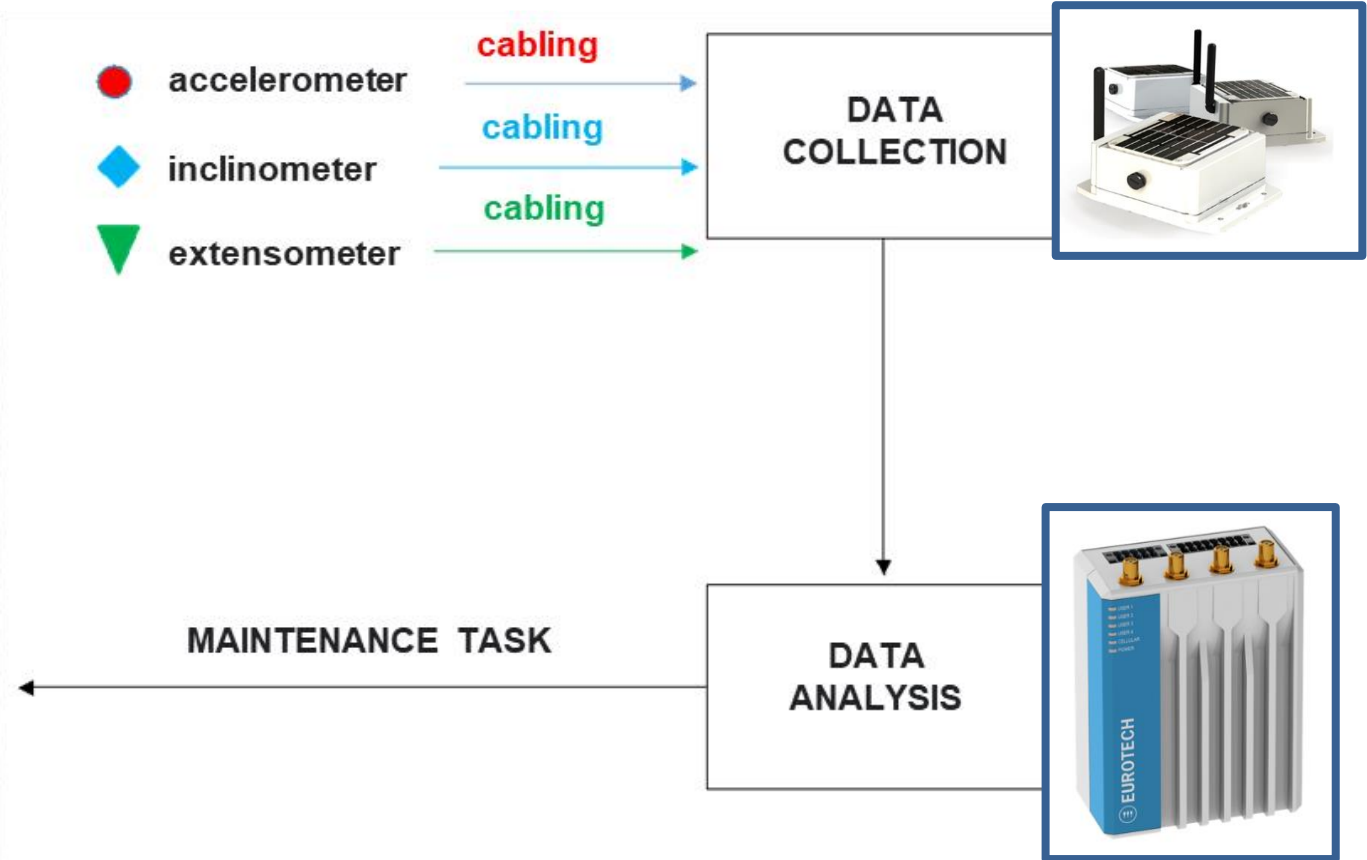

- Big Data analysis
- Machine Learning
- Predictive Models

- Multitenant Data Segregation
- Aggregated data analysis
- Overall Performance indicators
- Servitization

- Overall Efficiency
- Manufacturing Execution Systems
- Maintenance
- Energy Management
- Local Data Elaboration / Storage

Cloud Platform

- Truck & containers GPS tracking

LoRa™
SIGFOX

3G/4G

INTERNET

- RFID readers for tracking containers
- GPS for trucks tracking

- RFID for tracking containers:
- Level of saturation
- Humidity
- Temperature

Dashboards

Recharge Around provides information of thousands of charging station

Valutazioni e recensioni

4,3 su 5

26 valutazioni

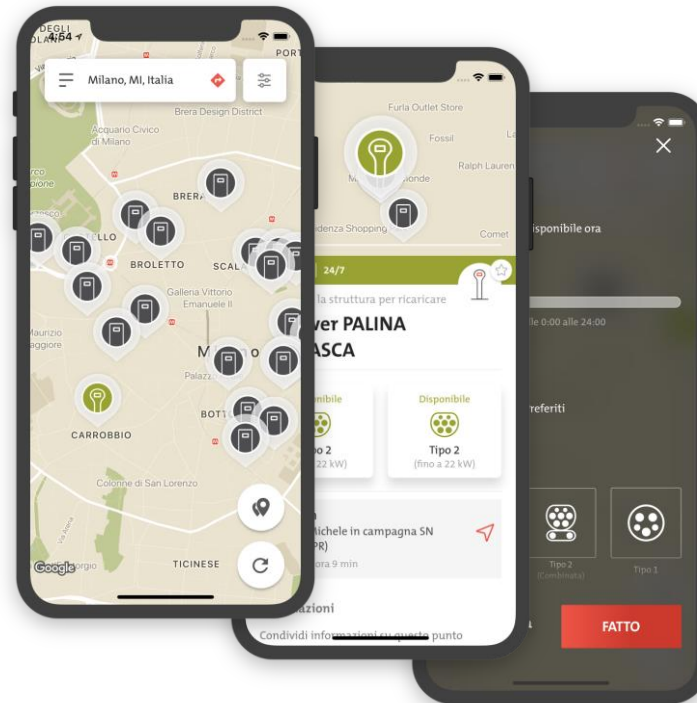

paolosini, 12/02/2020

Ottimo servizio per navigazione
È ormai un punto di riferimento per trovare ovunque un punto di ricarica utilizzabile in strutture pubbliche o private in tutta Italia. Consigliato.

piro gna, 28/07/2020

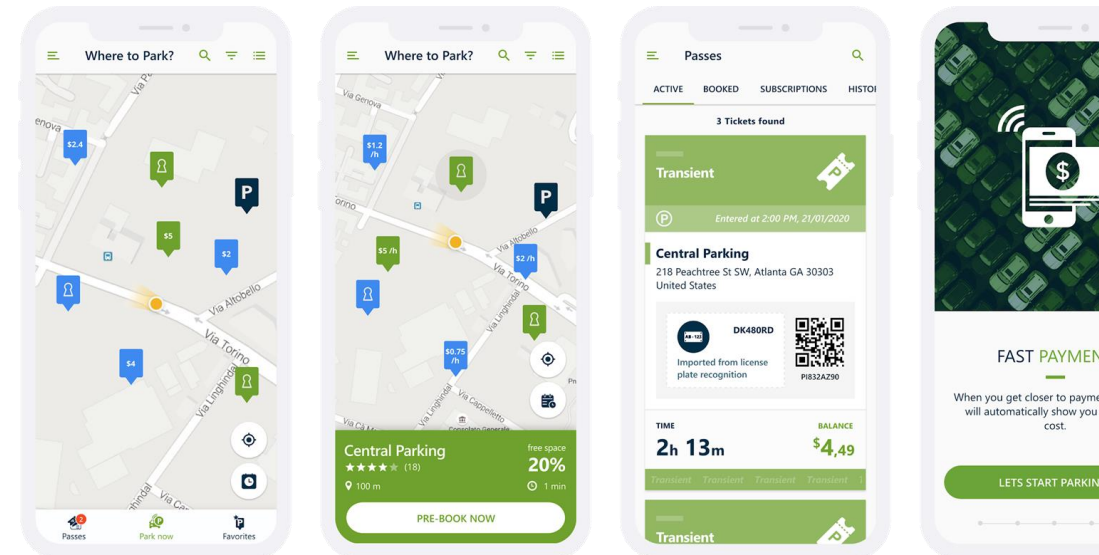

Utilissima
Utilissima per l'utilizzo dei voucher per avviare la carica.

- Search charging points by position, provider, socket...
- Identify them visually on the map by energy provider and status/availability
- Show charging point details (socket, accessibility, working hours, feedback...)
- Manage directions to charging points
- Manage charging points reservations
- Manage Start&Stop of charging points
- Manage Payments & Invoices & Reports

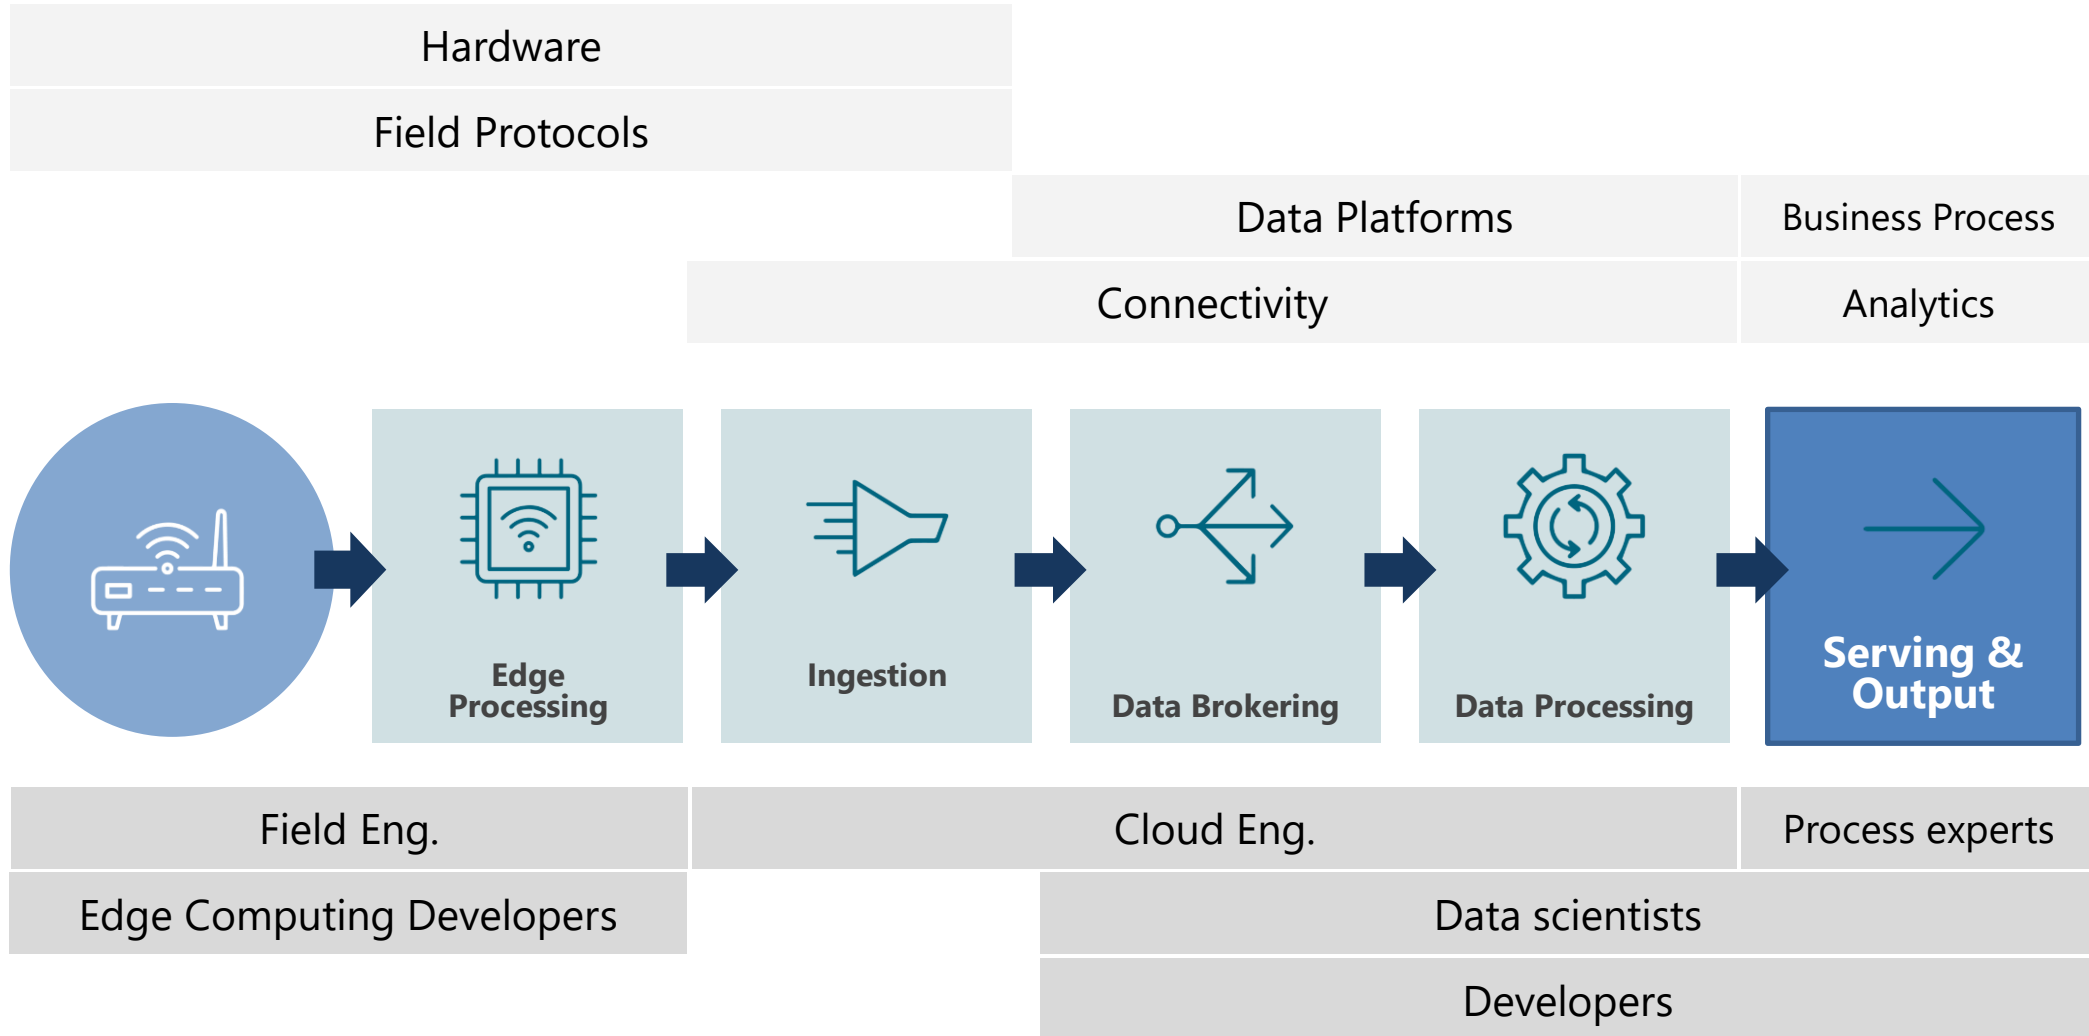

JPass allows users to easily, smoothly and securely **book, find, enter, pay** and **exit** a designated parking garage by simply using a smartphone:

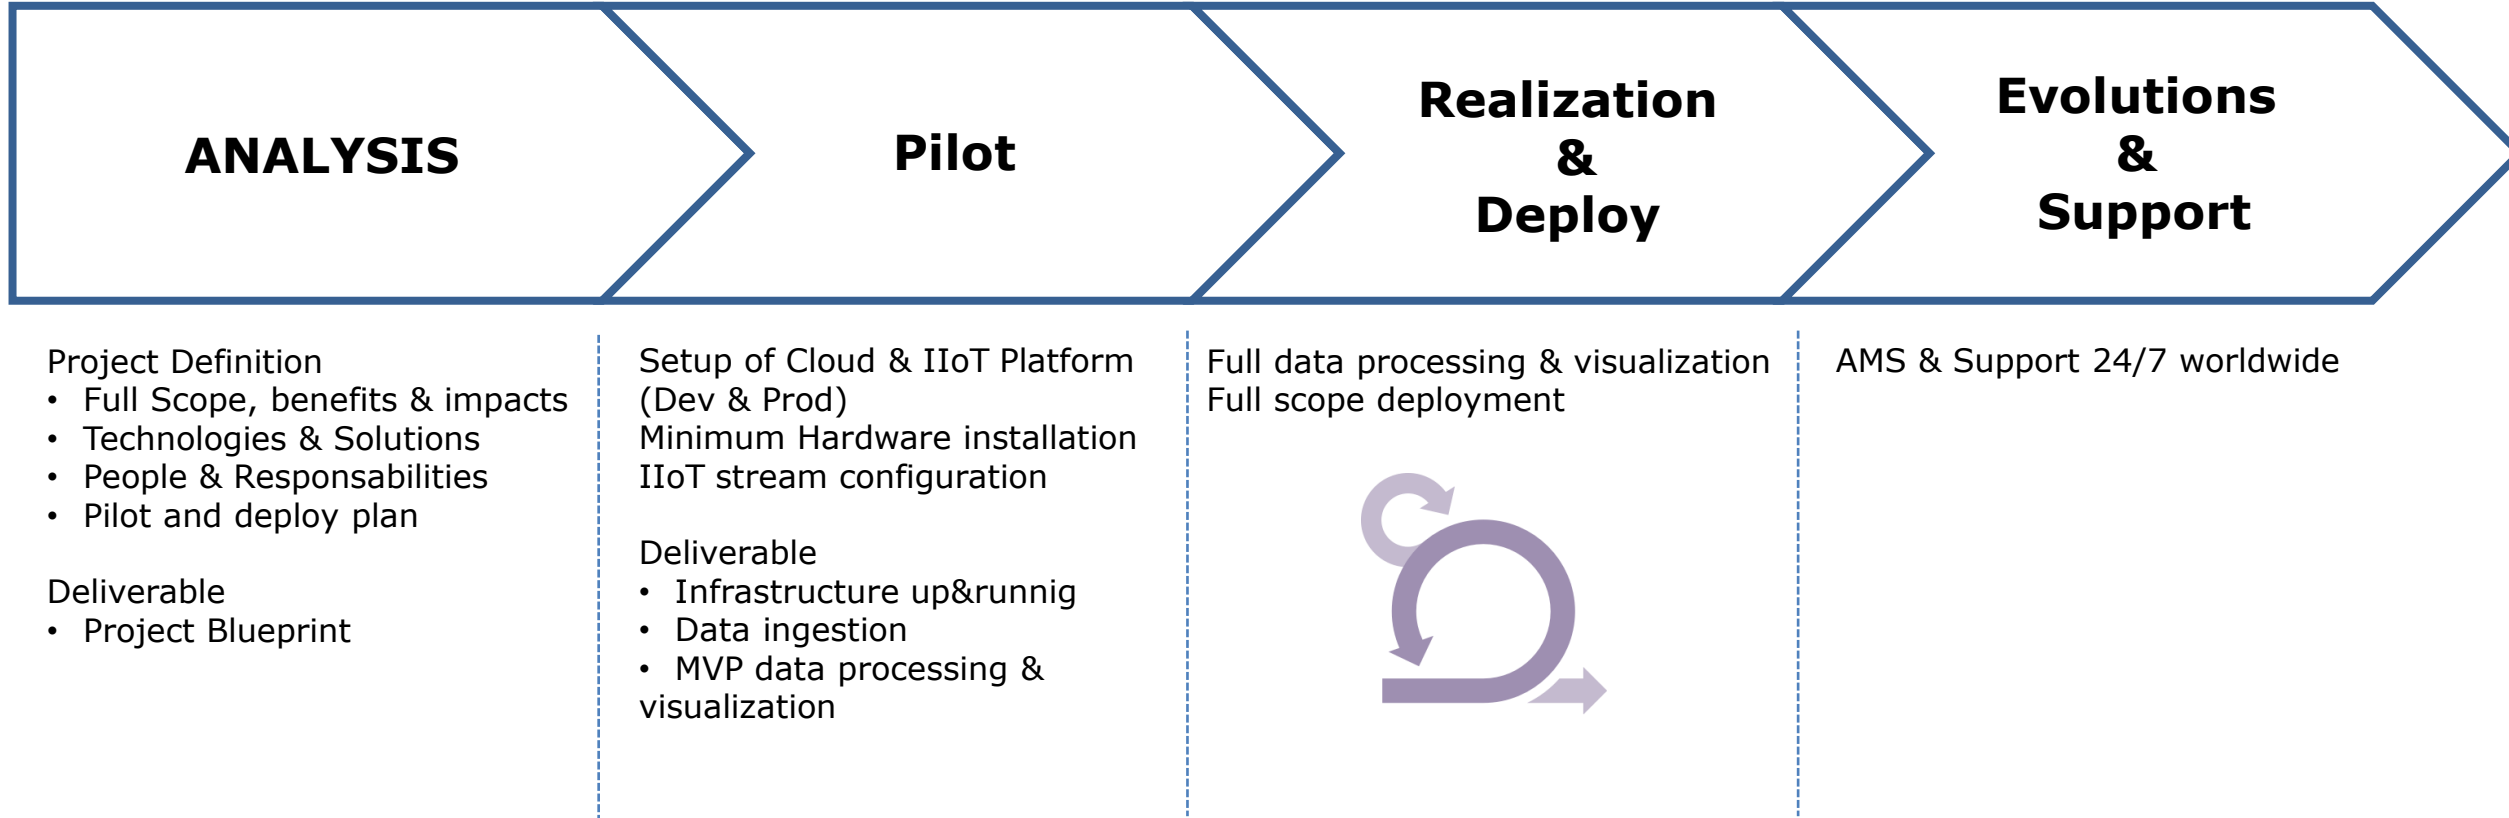

- Frictionless user experience using **Bluetooth** technology, **License Plate recognition** or **QR** for entry and exit the parking.
- Find parking sites
- Booking a parking session
- Subscription management
- Smart Ticketing
- Fast Payment
- Passes wallet
- ON & OFF street parking
