

# BLOCK | FIRE

FIREPROOF MOBILE | SHELVING

## CONSULTATION

Easy. Opening only one corridor at a time

## OPTIMIZATION

Doubling the storage capacity

## FIRE RESISTANT

It closes and compacts in case of fire

## ACCESS CONTROL

The Operators' access to the various corridors can be limited through the establishment of authorization levels and domains

## ZERO FIRE LOADING

Fire loading reduces to Zero within Blockfire® therefore it is possible to exceed conventional space density limits

## FIRE RESISTANT

Blockfire® is the only mobile shelving with a passive protection system, patented and E120 certified

## AIR QUALITY

A humidity and temperature control system, guarantees the optimal conservation of all material it contains

## TEMPERATURE

Each compartment is equipped with sensors detecting temperature over time to check for fluctuations greater than  $\pm 2^{\circ}\text{C}$

## LIGHTING

Can be equipped with a selective lighting system for the opening corridors, consisting of LED lamps with low UV radiation

## CUSTOMISABLE FOR ARCHIVE

BLOCK|FIRE

BlockFire has various accessories and can be equipped with tools and devices to control the temperature and humidity inside for perfect preservation of library material.

### BOOKS

Fits any size of book

### DOCUMENTS

Frames for hanging folders and pull-out shelves

### FOLDERS

Specific shelves for any folders

## STORAGE and WORKS OF ART

It can be structured with accessories to hold hanging garments, hanging and folded garments, and boxes of all sizes.

Whether pulled out or simply moved to the side, hanging artwork can be properly stored on a grid with no positioning limits. By means of temperature and humidity detection devices, environmental conditions are monitored.

### FRAMEWORK

An interior grid for hanging pictures

### CLOTHES

Shelves adaptable to even the bulkiest clothes

### SCULPTURES

Adaptable shelves for any size
