

# Brand Profile

# Who Are We?

*"The energy emanating from the sun is what gives us life"*

Suntronic was born by the studies of Dr. Franco Donadelli, the forerunner of electrocosmetology®, a discipline that deals with using electrically charged cosmetics to treat aesthetic skin problems. The Suntronic products, in combination with the AS43 generator, are able to restore energy to the skin in order to **promote its regeneration** in a natural way.

# Vision

Our vision is that people can feel good about their bodies and their skin, without having to resort to surgical or invasive methods. They can do this in beauty centres, continuing the treatment also from home, for results that go beyond the immediate and momentary effect.

# Mission

Our beauty treatments have been specially tested and designed to give the skin more energy, helping it regenerate in cases of blemishes. Treatments that do not stop at sessions in special centres, but can be carried out at home with specific products.

# Our Products

We have 10 solutions grouping 44 cosmetic products divided in professional and home use.

To complement the **professional treatment**, performed with the AS43 generator, according to the appropriate protocol, the person can use the range of **maintenance products at home** to improve and maintain the results over time.

# AS43 Generator

The AS43 generator emits a variable **biofrequency** that interacts with the range of **electrically charged professional cosmetics**.

The formulas of the charged cosmetics emit a specific spectrum for each cosmetic problem, so that their energy and activities are transmitted to the skin cells.

# Professional Line

## Step 1: Cleansing and Preparation

### Affinity Milk

Cleansing milk for all skin types

### Affinity Tonic

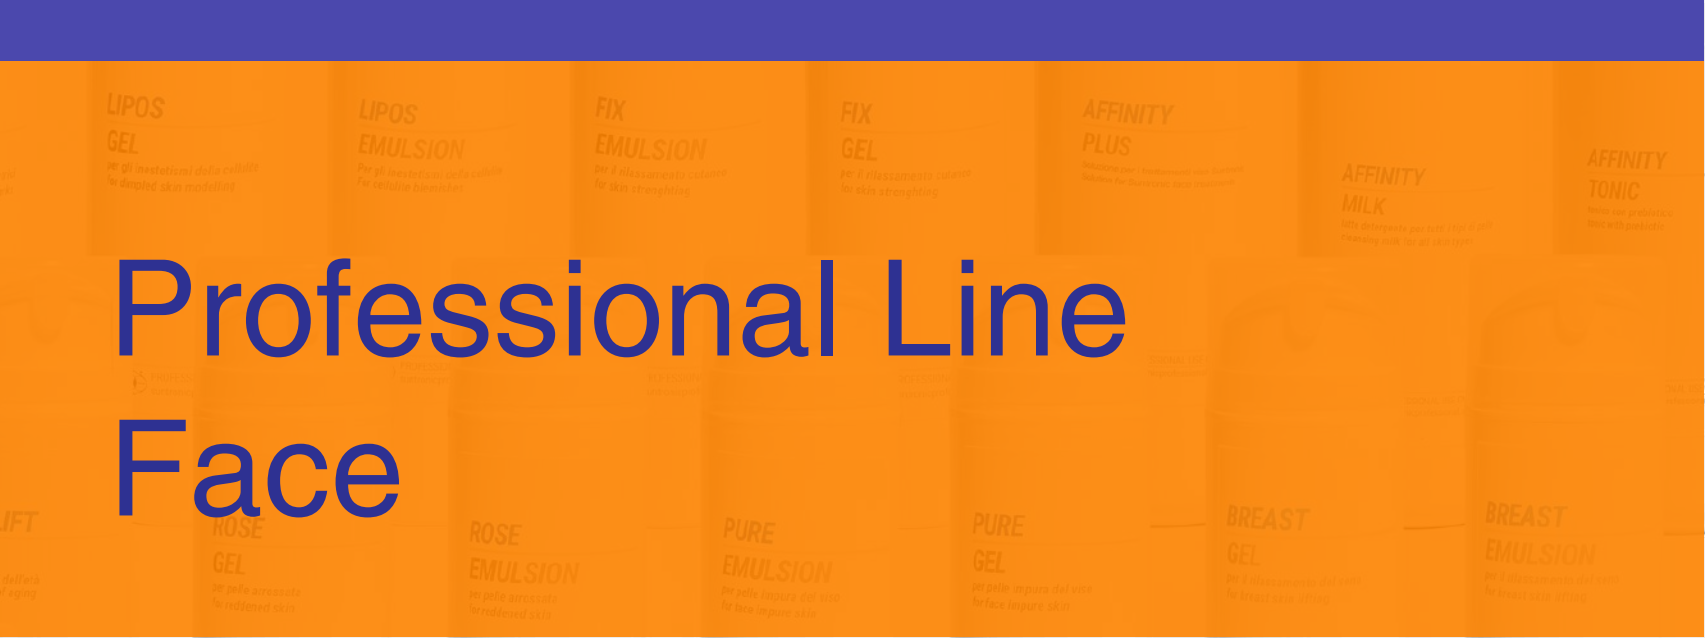

Toning lotion

### Affinity Plus

Facial Treatment Booster

# Professional Line Face

**Pure Gel**
