Union B.I.O.
SOLUZIONE NATURA

HORSE line

CARE - HYGIENE - BEAUTY - PROTECTION

Union B.I.O.[®] S.r.l. was founded in 2000 gathering the result of the scientific research of the **Labor Chimica S.r.l. - Labor Group** Institute of Analysis and Research. The scientific team is mainly made up of women who decided to slow down and to devote more attention to the environment, with an eye to the future.

“THINKING ENVIRONMENT”

An attitude that leads **Union B.I.O.**[®] in setting our company policies, in the selection of materials for the production and in our daily way of life.

SCIENTIFIC RESEARCH

Union B.I.O.[®] **natural products** are not assembled but formulated, as result of continued cooperation among **scientific research, innovation and knowledge of plants and their active principles**. **Union B.I.O.**[®] is proudly and continuously in collaboration with the most important Italian Universities for all its projects of Research.

MATRICE U.B.[®]

It is a **registered trademark**, result of **Union B.I.O.**[®] scientific research. It is a **phyto-complex**, extracted from the olive tree, able to boost the properties of different officinal herbs.

PRESERVATION OF NATURAL AND ANIMAL HERITAGE

Do not kill, you can keep away. **Union B.I.O.**[®] respects all the animals, even those unwelcome as mice, moles, reptiles, insects, etc. Our products keep them away.

Our research has the aim to find practical and specific solutions. We aspire to develop products inspired by life for the well-being of animals and respect for the environment.

Humans, animals and nature are the witnesses of an uninterrupted evolution and they represent an expression of a dynamic interaction of a collective project. Union B.I.O. products are inspired by the Nature, plants traits and the human wit. Our commitment reflects on the transparency of our label.

The information in the catalogue are not absolute and do not represent therapeutic indications, they are studied for the animal well-being, according to our world view. The law establishes high standards to preserve our health and the planet.

The scientific research is our vocation as well as the animal care.

pHiloGASTRO®

Health / homeostasis for the horse

- It is a **complementary feed** made up of **plant extracts**
- This formulation is specific to **restore the acid/base balance** of the **gastric and duodenal areas**
- It acts through **modulated and cooperative activity** even in the onset of gastro-intestinal disorders
- Helpful to **reduce the effects of stress on the stomach and on the body**

From Union B.I.O. natural laboratory:

pHiloGASTRO®

- Gastric soothe and protection
- Fortifying action towards the gastric mucous
- Stomach burning relief and it soothes feelings of discomfort of the horse
- Beneficial in case of EGUS (Equine Gastric Ulcer Syndrome)
- Immune booster
- Essential care for foal and athlete horse

HOMEOSTASIS

In a healthy horse, the gastric homeostasis is a balance between aggressive and protective factors ensuring the anatomical and functional integrity of the digestive system. When external or physical factors affect this balance, the aggressive substances take over, they attack the stomach lining and in the most severe cases they can cause the stomach perforation. An altered gastric homeostasis means the onset of the ulcer (EGUS - Equine Gastric Ulcer Syndrome) which is due to a combination of factors, including nutrition, race, lifestyle, the management of the stable, stress and the abuse of anti-inflammatory drugs. The disease can affect horses at any age, but mainly foals during the first months of life and athletes horses, in particular gallopers.

● INFORMATION - EGUS (Equine Gastric Ulcer Syndrome)

For "ulcer" is meant an erosion, a lack of tissue characterized by slow, difficult or lack of healing.

Peptic ulcer is an injury of the inner tissue of the stomach or of the bowel; it is named gastric ulcer when it affects the stomach, duodenal ulcer when it affects the duodenum and esophageal ulcer when it affects the lining of the esophagus.

The contributing factors are chronic stress, abuse of anti-inflammatory drugs without the support of gastroprotection, irritant toxins in the feeding stuff, poor nutrition prolonged fasting, sugar rush (in concentrated feed), lack of fiber and intensive training.

The peptic ulcer disease is insidious and difficult to diagnose due to non-specific symptoms common to many other disorders.

The horse with this syndrome presents lack of appetite, constant pain with consequent sign of aggressivity, irritability, weight loss, opaque and rough coat and reduced activity. In foals, the symptoms can be dysentery, bruxism, excessive salivation and duodenal lesions.

THE EFFICACY OF pHiloGASTRO®

The efficacy of **pHiloGASTRO®** has been demonstrated in the treatment of EGUS in a population of 19 horses (F. Bonelli et al., 2016, Journal of Equine Veterinary Science). The animals were subjected of gastroscopy before the use of the phytoterapeutic treatment and after six weeks. The gastric lesions of the animals treated with **pHiloGASTRO®** (10/19) have improved compared to those of the placebo group (9/19). **pHiloGASTRO®** is effective on gastric lesions actively.

OLEA EUROPAEA¹
water extract

ALOE BARBADENSIS¹
soothing properties

ECHINACEA ANGUSTIFOLIA¹
immune booster

MALVA SYLVESTRIS¹
anti-inflammatory properties

HOW TO USE:

Adults: administer 60 mL twice a day at feeding time at least for one month. As a prevention care and / or maintenance administer 60 mL once a day.

Colts: administer 60 mL once daily with a meal for a period of not less than one month.

COMPOSITION:

Aqua, Glucose, Potassium sorbate, Xanthan gum, Glycerin, Polysorbate 80, Sodium benzoate, Sodium chloride, *Olea europaea*, Citric acid, *Aloe barbadensis*, *Althaea officinalis*, *Foeniculum vulgare*, *Hordeum vulgare*, *Glycyrrhiza glabra*, *Echinacea angustifolia*, *Malva sylvestris*, *Solum fullonum*.

Keep in a cool and dry place away from heat and light sources.

DEPURplus

Detoxify - Drain - Purify

- It is a **complementary feed helpful to restore and maintain the acid/base balance**, essential for the homeostasis of the organism
- Useful in case of **blood urea nitrogen, kidney and liver failure**
- Its administration improves and quicken the draining process during rest right after an intense physical activity
- **Immune booster** and protective against oxidative stress
- Effective support in case of **cystitis and oedema**
- It is **not doping**

The **PROGRESS** of **PHYTOTHERAPY**
gives an **IMMEDIATE** and **SAFE RESPONSE**

INFORMAZIONI - **DEPUR plus**

Particular environmental conditions and intensive physical and psychological stress can increase the accumulation of toxins and waste products, effect of metabolic processes (endogenous) or effect of external factors (exogenous) as poor nutrition, environmental pollution or prolonged drug therapies.

DEPUR plus improves the physiological purifying function of the body and helps the excretory organs to perform their functions even under stressful conditions or with an ongoing pathology.

PHYTO-BIBLIOGRAPHY

The plant extracts contained in **DEPUR plus** possesses well-known hepatoprotective (*Curcuma longa* and *Cynara scolymus*) and antioxidant properties. The essential oil of oregano (*Origanum vulgare*) has antibacterial properties and helps in case of cystitis reducing burning and itching.

Vitamin C (*Malpighia punicifolia*) helps to reduce tiredness and fatigue.

OLEA EUROPAEA^{*1}

SINERGY

ENERGY - RESISTANCE - HEALTH

Liquid complementary feed

- It is a liquid complementary feed formulated with synergistic plant extracts useful to stimulate **the energetic metabolism** and the **immune system** of the animal, helpful in case of stress
- It contains a **supplement of vitamin** useful to **restore the physiological homeostasis**
- Containing plant extracts with **antioxidant properties**
- Containing minerals and trace elements useful to the animal's daily life
- Essential in the **pre-race training**
- It is not doping**

INFORMAZIONI - SINERGY

There is a strong correlation among the ageing process, free radicals in excess, weakened immune and endocrine system, and the onset of degenerative diseases.

SYNERGY is a natural formulation helpful to counteract the aging to preserve the homeostasis of the horse, and also to support the energy level and its endurance.

The health cannot be achieved only by treating the symptoms, rather identifying the causes and acting on them.

PHYTO-BIBLIOGRAPHY

SINERGY is a **complementary feed** rich in plant extract and synergistic nutrient

Aloe barbadensis: well-known antioxidant, anti-ageing antibacterial, antifungal, antiviral and depurative

Ginkgo biloba: has antioxidant properties, it promotes vascular circulation, microcirculation and cognitive brain functions

Echinacea angustifolia: immune booster

Panax ginseng: stimulant and tonic helpful to contrast fatigue and stress

Melaleuca alternifolia*, *Origanum vulgare*, *Laurus nobilis: immunostimulant, antibacterial and antifungal extracts

noBITE THERAPY

Natural Immunomodulator
Antifeeding protection

- Complementary feed rich in plants extracts well known for their natural immunomodulator and soothing properties
- It creates an antifeeding barrier towards culicoides and insects by sweating
- Natural immune booster and body's defence enhancer
- Containing vitamins and minerals to improve performance and endurance
- It reduces eases the discomfort after the bite
- Useful in case of summer dermatitis
- Dye free
- It is not doping

noBITE THERAPY

can act alone or as booster in combination
with other remedies even for long periods

● INFORMATION

Sandflies, culicoides and ticks represent an element of stress for the animal and they represent a risk for their health. Indeed these ectoparasites are carriers of serious diseases such as West-Nile fever, equine piroplasmiasis and anaplasmosis. They are the main cause of the **Summer Relapsing Dermatitis**, a seasonal condition characterized by an overactive immune reaction to bites.

It is essential to keep away these carriers to ensure the health of the animal.

PHYTO-BIBLIOGRAPHY

Aloe barbadensis: soothing and natural immunomodulatory properties

Allium porrum: unpleasant to insects

Echinacea angustifolia: natural immunostimulant

Malpighia punicifolia (Acerola): natural immunostimulant and source of vitamin C

GREEN D.O.L ACT

HEALTH AND RELIEF Rich in synergistic plant extracts with natural analgesic properties

- Complementary feed rich in synergistic plant extracts, such as **Clove** and **Calendula**, with natural analgesic properties
- **Adjuvant in case of pain**
- Easy to administer
- Dye free
- Animal extracts-free
- **It is not doping**

GREEN D.O.L ACT can work alone or as booster of other remedies

Neurogenic phase (1): initial phase involving the first transmission routes of pain

Vessel phase (2): the phase involving the blood vessel routes, if they are compressed or damaged they can interrupt the continuity of the circulatory system

Interstitial phase (3): the phase affecting the lymphatic system, e.g. the drainage system, which is able to absorb interstitial fluids and redirect them towards the circulatory route

Neutrophilic Phase (4): a neutrophilic decrease reduces the body defences

Lymphocyte Phase (5): activation of lymphocytes, indicative of inflammation

● INFORMATION - GREEN D.O.L ACT

Awareness to pain is a process in constant growth thanks to increased empathy, but also through increased veterinary specialization and better diagnostic tools. The pain control is now one of the primary focus of the owner and the Vet, because it is a fundamental condition for animal health.

The pain is not just a sensory problem, but it is a general status involving the whole body, altering the fundamental physiological processes.

In case of pain the body activates alternative processes, with muscle groups usually static, altering the center of gravity, reducing the quality of life and eventual performances.

The use of plant extracts, supported by scientific research and knowledge is a way free of side effects and with long lasting effects.

PHYTO-BIBLIOGRAPHY

Calendula officinalis: antifungal, anti-inflammatory and soothing properties

Echinacea angustifolia: immunostimulant, anti-inflammatory and antibacterial properties

Rosmarinus officinalis: useful to improve the vascularization, balances and detoxifies the liver in case of illness or stress

Eugenia caryophyllus (Clove): analgesic, antispasmodic and antiseptic properties

Mentha arvensis: refreshing, analgesic, antiseptic and antispasmodic properties

OLEA EUROPAEA^{*1}

EQUISTASI PLUS

CALM - ALERT

**Rich in synergistic plant extract
with soothing properties**

- **Complementary feed** made of natural synergistic plant extracts with **homeostatic** properties
- Helpful to restore **calm and balance**
- **It does not interfere with the alertness of the animal**
- Dye-free
- Animal extracts-free
- **It is not doping**

Recommended:

- During the pre-race phase, to calm the animal without an impact on its performance
- Calming for sinewy and aggressive animals, to allow a healthy human-animal relationship and avoid chronic stress, and systemic consequences
- Useful in case of colitis
- In case of hypersexuality and hyperexcitability, to avoid excessive reactions and constant stress
- Before, during and after traveling, to relax the animal

EQUISTASI PLUS can act alone or as booster of other remedies

INFORMATION - EQUISTASI

The performance and overall health are guaranteed by the body ability to maintain a constant balance, even in case of external environmental changes (homeostasis).

The failure to maintain the balance can lead the decline of the performance and the reduction of overall health.

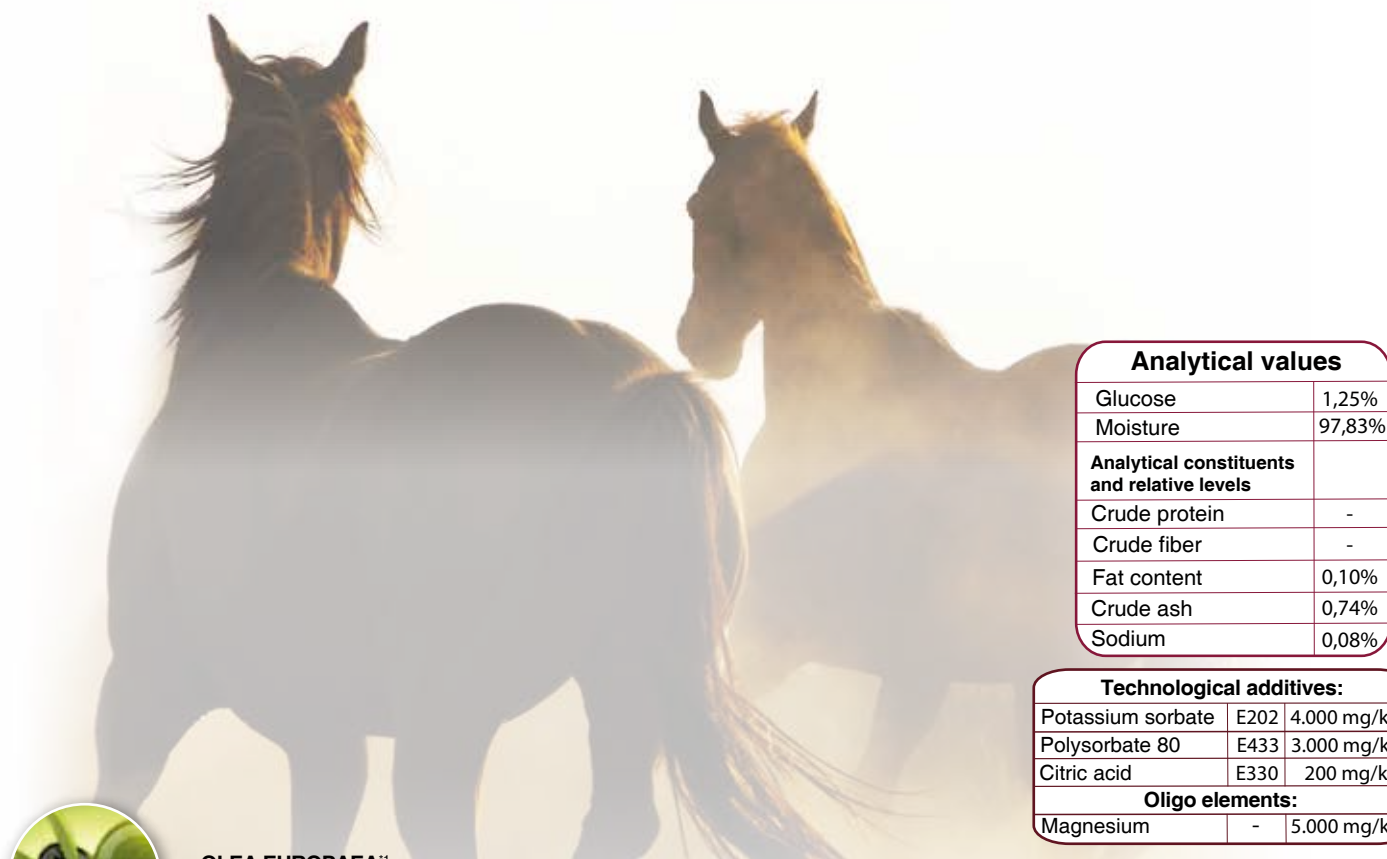

PHYTO - BIBLIOGRAPHY

The plant extracts are effective on the body performing an energizing action.

In a state of deficiency, the introduction of a portion of these nutrients is able to rebalance the body.

Lemon balm, hop, chamomile, hawthorn: calming, tranquilizer and anxiolytic properties

Linden, calendula and blueberry: antispasmodic, carminative, gastroprotective properties

OLEA EUROPAEA^{*1}
water extract

HUMULUS LUPULUS^{*1}

PNEUMO GO

HEALTH OF THE RESPIRATORY TRACT Rich in synergistic plant extract with natural balsamic, antiseptic and diuretic properties

- Natural **complementary feed** rich in synergistic vegetal extracts with hydrating, fluidifying and draining to support the equine in case of respiratory distress
- Helpful to raise oxygen levels supporting physical performances
- It supports the equine during great effort
- Animal extracts free
- Dye free
- It is not doping

Recommended to:

- Equine athletes as a supplement to the daily ration both during the preparatory phase and the race phase
- To support the endurance
- Elderly horses or equine with respiratory problems, thanks to its draining and immunostimulant properties

**PNEUMO
GO** can work alone or as booster of other remedies

INFORMATION

The respiratory rate at rest of the equine is between 8 and 16 breaths per minute. This frequency and the oxygen demand increase during exercise. The horse may suffer of hypoventilation with respiratory alkalosis and metabolic acidosis.

To preserve a correct homeostasis and a correct balance, the draining is an essential phase and a distinct phase from detoxification.

FITOBIBLIOGRAFIA

Taraxacum officinale: choleric, diuretic and laxative properties

Betula alba: diuretic, depurative, anti-inflammatory and digestive properties

Agropyron repens: diuretic and disinfectant properties

Juniperus communis (Juniper): diuretic, antiseptic and balsamic properties

Urtica dioica: depurative, diuretic, anti-inflammatory and hypoglycaemic properties

PNEUMO VENT

BALSAMIC BREATH
Rich in synergistic plant extract
with relieving properties

- **Complementary feed** with a natural **balsamic effect** made up of specific plant extracts to decongest the respiratory tract
- **Easy to administer**
- Animal extracts free
- Dye free
- **It is not doping**

Recommended to:

- Equine athletes to favour breathing
- Equine in case of cold, cough and sore throat

PNEUMO VENT can work alone or as booster of other remedies

INFORMATION – THE COUGH

The cough is a physiological act that clears the throat and breathing passage of foreign particles, fluids and irritants. The cough can be caused by allergies, mucus or pollution.

In addition to relieve a cough, it is essential to find the cause.

The Chronic obstructive pulmonary disease (COPD) is an inflammatory bronchiolitis result from hypersensitivity reactions to inhaled allergens, as well as non-allergic airway overreaction to inhaled irritants and other substances such as endotoxins. Its symptoms result from bronchospasm and accumulation of airway secretions, which also cause obstruction of the airways and often an increased respiratory rate.

COPD in horses is caused by irritants in the environment. When the allergens get down into the respiratory tract, they irritate the cells and cause mucus secretion, which will trigger a cough. Three major disease can arise as a result of COPD. The lesions in the lungs can cause bronchiolitis with emphysema, chronic bronchitis and chronic asthma.

In the long term, this disease seriously affects the respiratory tract, can undermine the cardiovascular system and endanger the life of the horse.

PHYTO-BIBLIOGRAPHY

The plant extracts work on the body integrating useful nutrients to balance deficiencies.

Eucalyptus globulus: balsamic, expectorant and antiseptic properties

Thymus vulgaris: antiseptic, balsamic and antispasmodic properties

Olea europaea: antispasmodic, antibacterial, antioxidant and immunostimulant properties

Nebulizer Compressor

Rich in synergistic plant extracts with balsamic, fluidifying and cough relief properties

- Natural solution rich in synergistic plant extracts, such as **Eucalyptus and Thyme** for an **immediate relief** and helpful in clearing blocked respiratory tracts, for a **long-lasting protection**
- **It soothes the irritation** and facilitates the expectoration
- The product acts directly on the respiratory tract
- **It is not doping**

SOLUTION FOR NEBULIZER

1° Immediate relief

2° Long-lasting protection

Recommended for:

- During season change
- In case of upper / lower respiratory diseases
- To reduce the abuse of allopathic drugs

INFORMATION - BREATHING THERAPY WITH NEBULIZER BENEFITS

- Fast action, effective treatment, the nebulizer delivers PNEUMO RESP right to the lungs, where it is most necessary
- Alternative to systemic treatments
- Easy to administer, even daily

PHYTO-BIBLIOGRAPHY

Olea europaea: aqueous extract

Melaleuca alternifolia: antiseptic and analgesic properties

Eucalyptus globulus: refreshing and decongestant properties

Betula alba: purifying properties

Taraxacum officinale: detoxifying and draining properties

Analytical values

Glucose	1,25%
Moisture	98,80%
Analytical constituents and relative levels	
Crude protein	-
Crude fiber	-
Fat content	0,60%
Crude ash	0,30%
Sodium	-

Technological additives

Potassium sorbate	E202	14.700 mg/kg
Polysorbate 80	E433	4.000 mg/kg
Citric acid	E330	200 mg/kg

HOW TO USE:

It is recommended to administer 5 mL diluted with 5 mL of saline solution with the nebulizer machine once a day for at least three consecutive days or according to the Vet indication.

COMPOSITION:

Aqua, Aceto balsamico, Polysorbate 80, Potassium sorbate, *Eucalyptus globulus*, *Thymus vulgaris*, *Olea europaea*, *Melaleuca alternifolia*, *Taraxacum officinale*, *Betula alba*, *Agropyron repens*, Citric acid, *Juniperus communis*, *Urtica dioica*

Keep in a cool and dry place away from heat and light sources.

SA.R.CO. PLANT

**Adjuvant for equine sarcoid
Revitalising skin cream**

- **Natural product** rich in synergistic plant extracts boosted by the **MATRICE U.B.®**
- **Bioavailable formulation** actively involved in the regeneration and restoration of the skin containing *Chelidonium majus*, **with natural antimetabolic properties**
- **Phyto-synergic product** helpful in case of **equine sarcoid** from the earliest stage
- Beneficial in the reduction of the **alopecia** related to the equine sarcoid
- The product creates a **breathable protective barrier** with healing properties

TREATMENT WITH SA.R.CO.PLANT

“ Aspetti macroscopici e istologici della risposta locale alla chelidonia nel sarcoide equino: risultati preliminari” - Tesi di laurea di Alessandro Allois - Università degli Studi di Padova - facoltà di Medicina Veterinaria A/A 2009/2010

[...] The equine sarcoid represents the most frequent skin cancer in Equidae, and while not being a lethal disease for the life of the animal, it can be responsible of aesthetic and functional damages that can compromise its work and decrease its worth in the marketplace. The major aetiological cause of this disease is the bovine papillomavirus and can manifest because of a genetic predisposition of some individuals. Many therapeutic strategies have been proposed, but have not been proved to be effective in all the cases of sarcoides. Furthermore, some of the most effective therapies are expensive or difficult to implement. The aim of tis paper was to test a new effective, safe and easy to administer therapy for the equine sarcoid. The therapy requires the topical application of an experimental phytoextract based on *Chelidonium majus*.

The study was conducted on 11 horses; after a biopsy, they were treated with the product under discussion and monitored for 4 months [...].

[...] In conclusion the experimental product was 100% effective on the 33% of the involved horses and it was equally effective on the 33% of the cases previously subjected to surgery to remove the mass in the control of the relapses. The efficacy of the therapeutic protocol was barely effective or not effective merely on the 33% of the cases.

The aesthetic results of the experimental therapy were more than satisfactory [...]

PHYTO-BIBLIOGRAPHY

Chelidonium majus: herbaceous perennial plant, with a caustic and vivid yellow latex and caustic, useful in case of warts thanks to its alkaloids

Echinacea angustifolia: immune booster able to activate the phagocyte and to induce the release of Interleukins that stimulates the activity of the T cells and B cells (lymphocytes)

MATRICE U.B.®¹
water extract of *Olea europaea*. Polyvalent phytocomplex

CHELIDONIUM MAJUS¹
exfoliant action

ECHINACEA ANGUSTIFOLIA¹
immune booster

HOW TO USE:

Wash thoroughly the affected area with sparkling water, apply the cream on the interested area, repeat the application even several times a day for 7 consecutive days. Do not use in combination with other local therapies.

COMPOSITION:

Helianthus annuus, Cera alba, Zinc chloride, *Aloe barbadensis*, *Chelidonium majus*, *Origanum vulgare*, MATRICE U.B.®, *Echinacea angustifolia*

Keep in a cool and dry place away from heat and light sources.

EQUIDERMA

Lozione cute

- Natural lotion rich in synergistic plant extracts
- **High absorption capacity**
- Helpful to **revitalise and normalise the skin**
- Restorative of the skin **elasticity, moisturizing and protective**
- **Long-lasting effect**
- Helpful in case of sensitised and damaged thanks to its **revitalising properties**
- Helpful **to soothe itchy skin** thanks to **Aloe** and to the natural healing properties of its ingredients

PHYTO-BIBLIOGRAPHY

MATRICE U.B.®: *Olea europaea* aqueous extract

***Aloe barbadensis*:** anti-inflammatory, soothing, calming, restorative and healing properties

INFORMAZIONI

In case of skin diseases, the loss of elasticity and collagen make the skin vulnerable thus it can be easily damaged and loses its protective action. **Equiderma** contains phenols, tannins and other natural active ingredients such as the extract of *Olea europaea* with a restorative action of the skin elasticity. Helpful to clean any injuries and to promote the healing process.

MICROBIOLOGICAL ANALYSIS

Equiderma is an adjuvant to restore the bacterial balance.

Tests conducted with sterile swabs before and after the treatment with **Equiderma**, demonstrate its efficacy on the bacterial balance.

NATURAL
PROTECTION

It is recommended in combination with:

MATRICE U.B.^{®1}
water extract of
Olea europaea.
Polyvalent
phytoextract

**ALOE
BARBADENSIS¹**
anti-inflammatory
and soothing
properties

HOW TO USE:

Spray or dab on the skin, insisting on the affected areas. Apply several times a day.

COMPOSITION:

Aqua, MATRICE U.B.[®], *Aloe barbadensis*, *Melaleuca alternifolia*, *Robinia pseudoacacia*, *Lavandula hybrida*, *Origanum vulgare*, *Rosmarinus officinalis*.

Keep in a cool and dry place away from heat and light sources.

SKINCUT

Skin repair cream
Breathable barrier

- **Natural composition** rich in synergistic natural plant extracts boosted by the **MATRICE U.B.®** to promote the **skin repair**
- Helpful to avoid the formation of **keloids and eschars**
- **It creates a breathable protective barrier**
- With a nice fragrance of **Citronella**
- **Fast absorption** capacity

The phases of the healing process

● INFORMATION

The horse is commonly susceptible to traumatic events evolving in several types of injuries. This may be due to its temper, the kind of work (jumping, endurance, reining, trekking, etc.) and the environment where the horse lives.

Every wound has a natural tendency to heal through a process called cicatrizing.

The alteration of the cicatrizing process can lead to keloid formation, embossed and extensive scar tissue. As well as being an aesthetic problem, the keloid can determine a functional limit with inadequate movement (if an articulation is interested), because of the hardening of the tissue and the loss of elasticity.

A good rule to prevent the formation of keloids is to act swiftly and effectively cleansing the area by applying natural treatments to promote the healing process and to avoid contaminations.

PHYTO-BIBLIOGRAPHY

MATRICE U.B.®:

Strengthen and restructuring gel

- **Strengthen and restructuring gel** for mane and tail
- Restorative **for damaged and opaque horsehair**
- Helpful in case of **dandruff**
- **It soothes itchy skin** in the hairline
- **Softening and detangler**
- Fast results

INFORMATION

In case of **Summer Equine Dermatitis**, disease mainly due to the hypersensitivity of the animal to the bite of the culicoids. The horse suffering severe itching began rubbing against trees, fences or rolling on the ground, all these reactions can cause excoriations, thickening of the skin and hair loss in the mane and in the tail. **EQUILUX** is helpful to soothe the itching, to restore the skin and to thicken the horsehair thanks to its natural ingredients.

INTIMA HORSE

Intimate wash for horse

The itch is one of the main causes of stress, it can lead to decreasing performances and a decline in general health, which can be causes of hypofertility.

INTIMA HORSE

is a formulation rich in synergistic plant extracts boosted by the **MATRICE U.B.®**, which thanks to its properties triggers eubiotic processes making the genital environment unfavourable to allergens that can cause unpleasant discomfort

NATURAL - SAFE - EASY TO USE

- Its use **reduces bad smells and itching**, and consequently the animal is **calmed down**
- It allows a deep mucosal wash, **no need to rinse**
- Useful for **daily or periodic cleansing of female and male genitals**
- Compatible with oral therapies
- Useful **to preserve the balance of the vaginal flora**
- Delicate composition**
- pH-balanced**
- It can be used diluted for a **long-lasting soothing and refreshing effect**

● INFORMATION - INTIMA HORSE

Intima Horse has a long-lasting protective effect able to establish a balance and to pass from a *dysbiosis* (dysbacteriosis, microbial imbalance) to *eubiosis* (microbial balance) essential for the efficiency of the immune system. This competitive process stabilizes the microbial balance and a healthy condition.

We recommend the application of **Equinofly Soft** after the wash with Intima Horse to create a physical barrier to flying insects.

EQUITRAUMA

Immediate RELIEF gel

- Useful cooling down treatment **after training and working**
- For **muscles, ligaments and joints**
- Fast acting on bruises
- For **frequent and lasting treatment**
- Easy to use and safe**

INFORMATION

Following physical exertion, it is useful to massage the horse to improve an efficient cooling down and to clear the lactic acid from the body and to relax the tendons.
A good cooling down can involve a slow walk or exercise and gentle massages of muscles.
Equitrauma is a gel rich in synergistic plant extracts with anti-inflammatory and soothing properties, which are beneficial during the cooling down phase.

PHYTO-BIBLIOGRAPHY

TRAUMA_{PLUS}

Immediate RELIEF gel

- Useful for **post-trauma treatment** of muscles, tendons and joints
- Fast acting on **bruises** and on **prostaglandins** to reduce the area of the trauma
- Helpful in case of **severe, chronic, arthritis and rheumatic pain**
- Easy and safe to use**
- It is **doping**, do not use before races

INFORMATION

A trauma causes small bloody vessels to leak, the subcutaneous spot of bleeding can be more or less severe and can cause swelling, colour, intense pain and partial/total loss of functionality. **TRAUMAplus** is a gel helpful for workhorses, elder horses, trekking horses whenever the horse needs relief. The presence of the *Harpagophytum procumbens* (Devil's Claw) presence leads to positive dope tests in case of races.

Warming gel TWO formulas

INFORMATION

The horses can often experience muscular overexertion, the symptoms appear usually as impair ambulation, fatigue, stiffness, swelling and pain.

- Thermo activator and warming ingredients
- It stimulates the muscular activity
- Useful to shorten the stretching time with a long-lasting effect
- Helpful to soothe muscular pain
- Ideal for workhorses and elderly horses and their warming-up

EQUISPRINT

NO DOPING

Gel for successful performance, ideal for the pre-race.

COMPOSITION:

Aqua, MATRICE U.B.®, *Cinnamomum cassia*, *Rosmarinus officinalis*.

SPRINT PLUS

DOPING

The presence of the *Harpagophytum procumbens* (Devil's Claw) and *Capsicum annuum* leads to a **positive dope test in case of races**. Ideal for elderly horses, with chronic arthritis and rheumatic pain.

COMPOSITION:

Aqua, MATRICE U.B.®, *Harpagophytum procumbens*, *Capsicum annuum*, *Cinnamomum cassia*, *Rosmarinus officinalis*.

EQUISAN

Phyto-sinergistic lotion for the hoof

- Adjuvant in the treatment of equine **onychomycosis and quittor**
- Natural product rich in synergistic plant extracts with soothing and restorative properties, such as **Aloe and Tea Tree**
- Helpful to **heal and regenerate the hoof**

INFORMATION - ONYCHOMYCOSIS

The term **onychomycosis** indicates a disease associated to fungi of the hoof. This is a very common disease amongst equine.

The keratinolytic fungi are the main cause: they attack the hoof resulting in secondary infections and damaged footholds.

In the long term, the presence of these fungi and the associated diseases can have severe consequences on the horse's health and of the hoof.

EQUIBOX

**Detergent
with hygienic action substances
for horse's box and litter**

- Helpful to **reduce odours, bad smell and exhalation** such as ammonia, indole and skatole
- **It promotes biological stability** slowing the biodegradation process
- **It maintains a balanced moisture content in the litter** to ensure a long-lasting effect for the horse's health and its hooves
- **It reduces the biodegradation process in the litter**, reducing the presence of dust, spores and pollen, to ensure a healthy environment also for its respiratory tract

ADVANTAGES

- Improvement of the general health of the animal
- Safe for humans and animals, ecofriendly
- Physical barrier against pollutants
- Cost reduction
- Easy to use

EQUIBOX is a natural formulation rich in **synergetic natural extracts** boosted by the **MATRICE U.B.®**. It is a natural detergent with a nice fragrance and sanitising natural properties to promote a healthy environment for the horses.

INFORMATION

Ammonia

The use of **Equibox** lowers the presence of ammonia promoting a healthier environment.

DUST

The use of **Equibox** lowers the presence of dust, pollens and pollutant promoting a healthier environment.
