# FAMIGLIA CASADEI

## Our Company

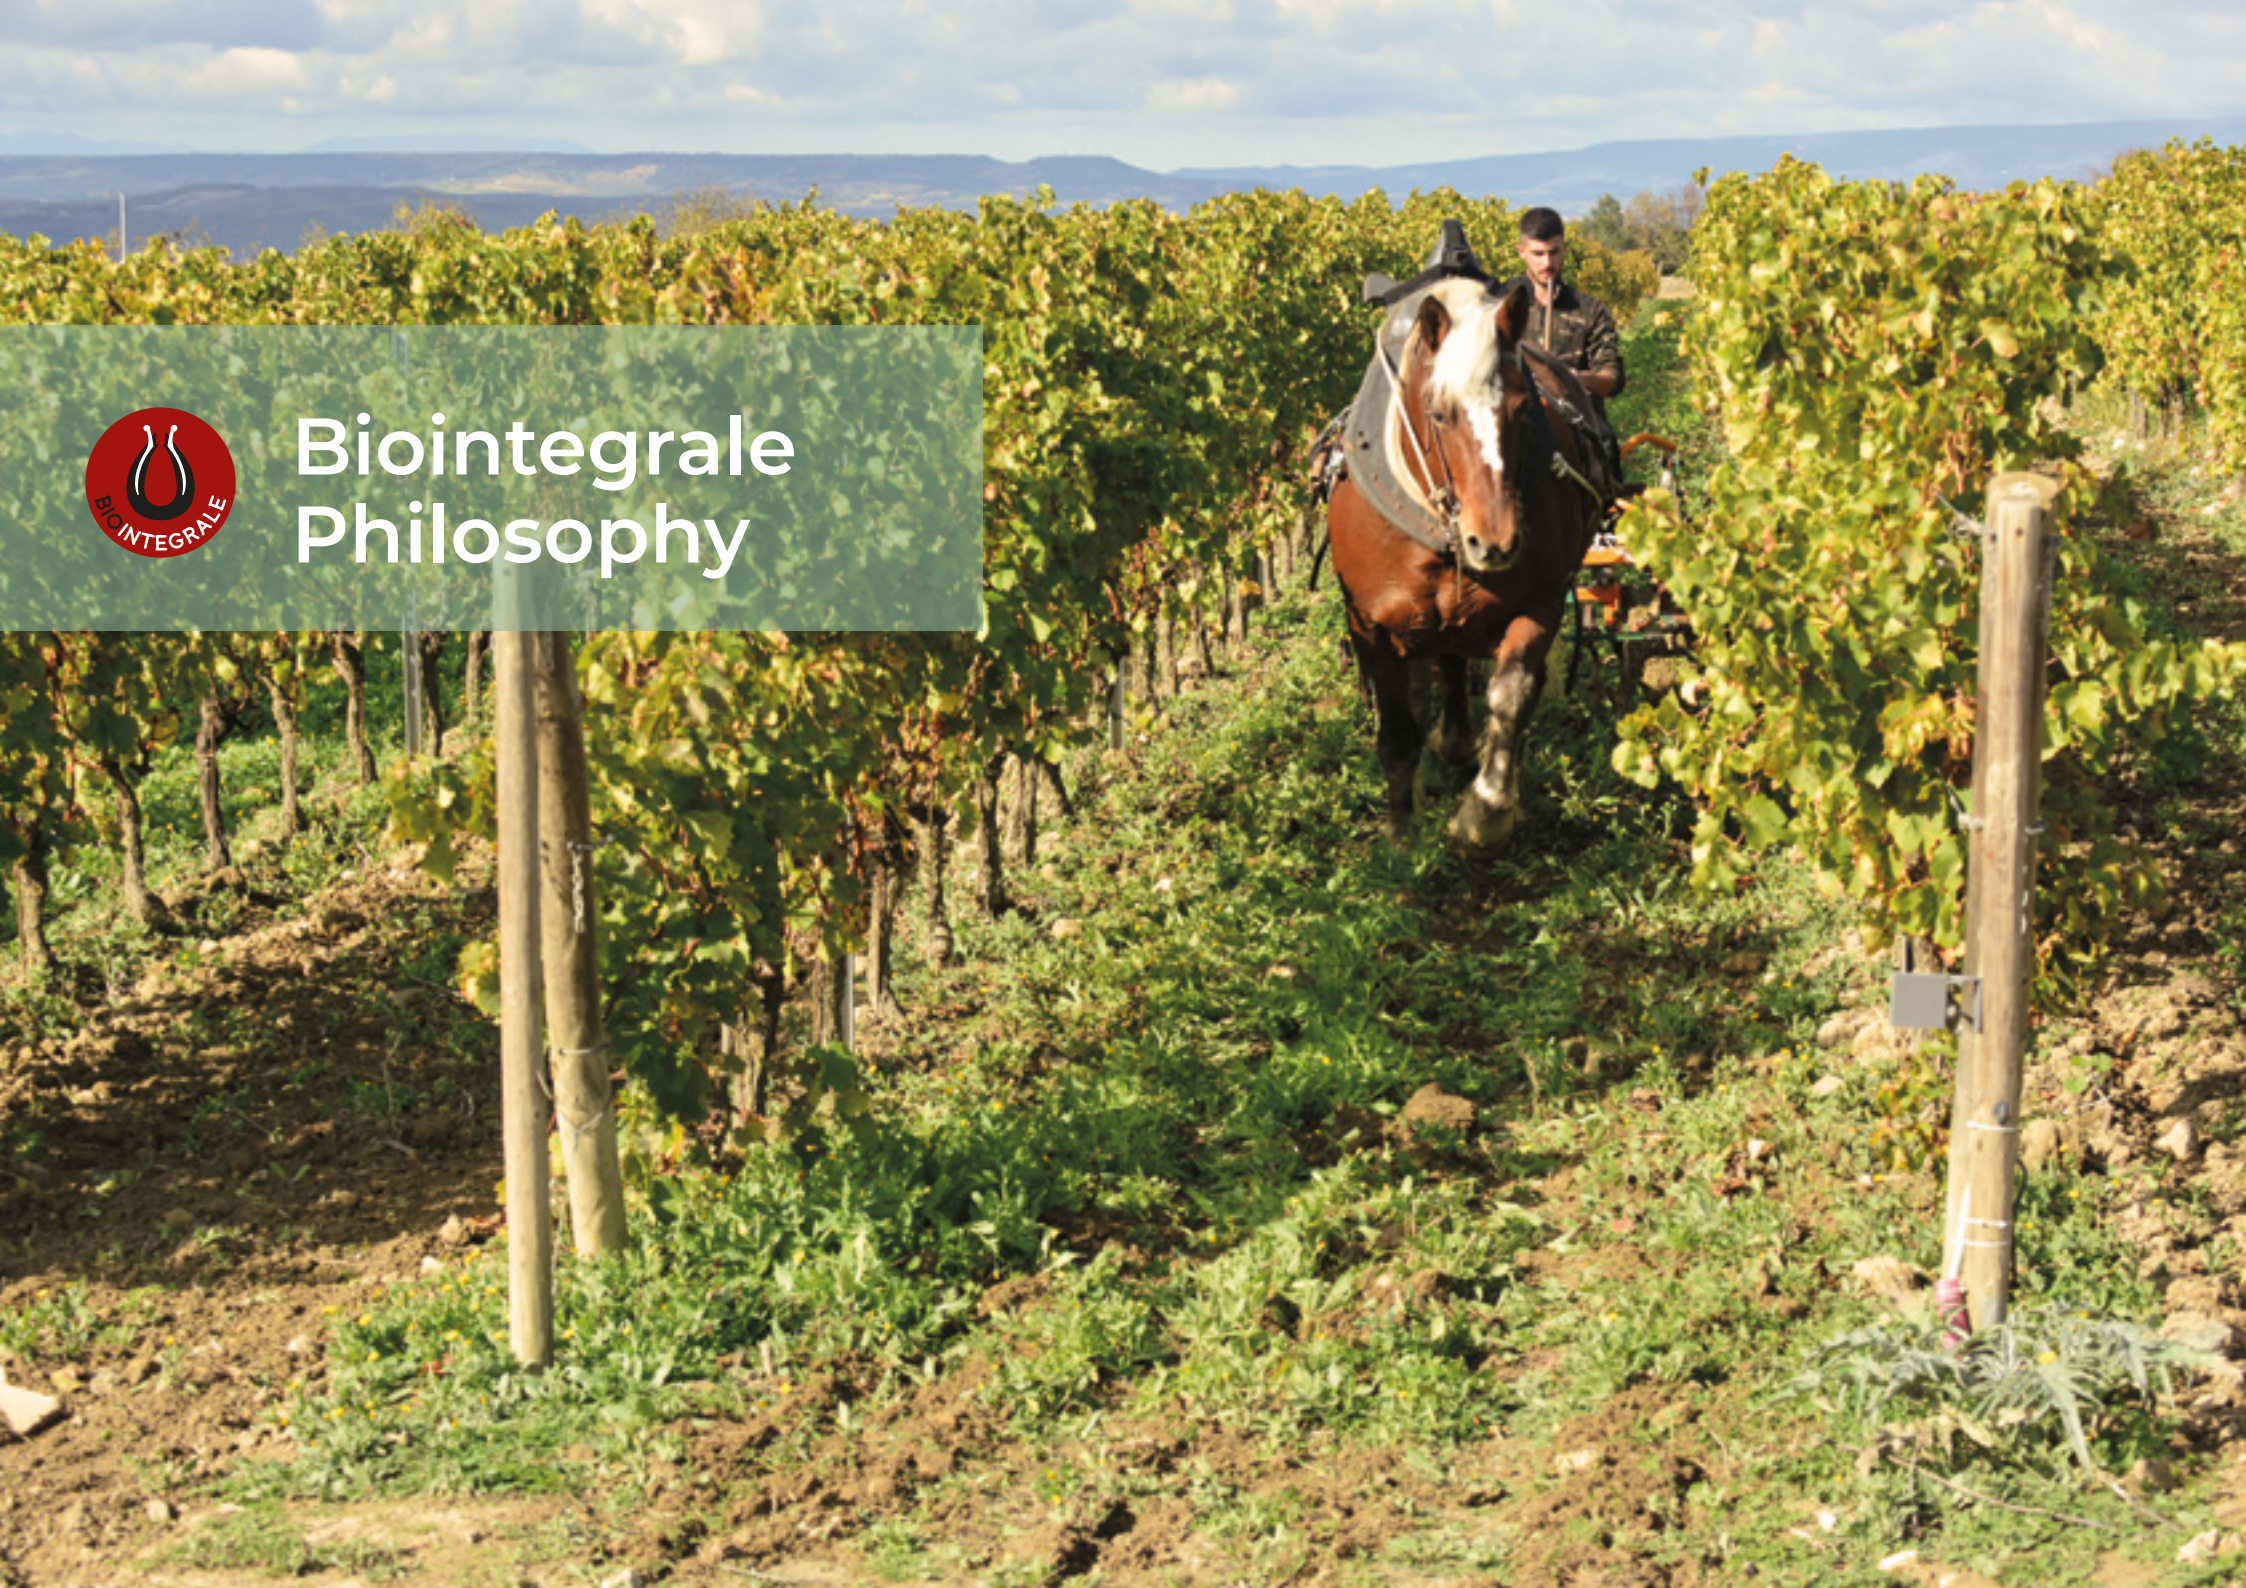

Our Company consists of three estates in Tuscany and Sardinia, managed with great passion and professionalism directly by the Casadei Family, with deep respect for Nature, according to Biointegrale dictates.

# Biointegrale Philosophy

# Biointegrale

Biointegrale is a method of farming that fosters a harmonious environment to live, work and grow. Biointegrale farmers have a moral obligation to be stewards of the land, using sustainable, organic and biodynamic methods with the end goal of quality today and balanced ecosystem for the next generations.

## The animals of Biointegrale

Biointegrale incorporates bees, cows, earthworms, geese, hares, horses, sheep and wasps as partners in farming. They all have an important role to play whether in grass/weed control, pollination, soil health, fertilization and zero emission ploughing.

FAMIGLIA  
CASADEI

*The Biointegrale<sup>®</sup> decalogue*

1.

Respect the fundamental principles of biodiversity.

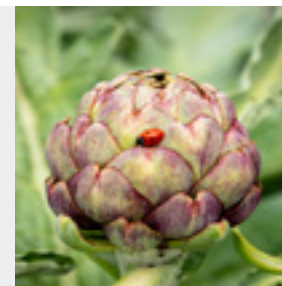

2.

Minimize the handling of the raw material to preserve the purity and wholesomeness of the finished product. And its flavor.

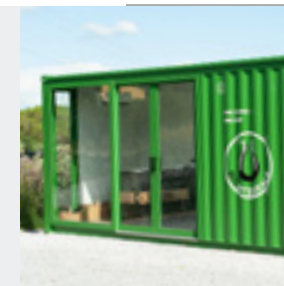

3.

Favor time-honored farming practices backed by modern technology.

4.

Preserve the link between the organoleptic properties of the products and the land they come from without impacting quality.

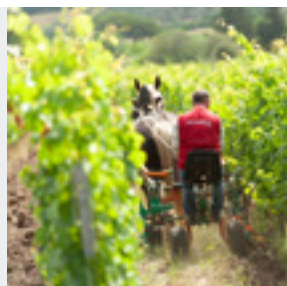

5.

Sustainable architecture: devise eco-friendly spaces powered, wherever possible, by renewable energy.

6.

Employ local labor, use local products, redistribute wealth across the local area. And maintain it over time.

7.

Minimize the use of mechanical field equipment, preferring animal traction.

8.

Nourish the soil, rather than the vines, to enhance its vigor.

9.

Eliminate synthetic chemicals.

10.

Limit human intervention on the vines favoring rational agronomic practices.

## The Amphorae

True to the Biointegrale philosophy, amphorae are the means used to characterize the wines made in all the Famiglia Casadei estates. They originate from an idea of natural enology and the desire to create authentic wines that recount and reflect the distinctive characteristics of the different terroirs and grape varieties.

Some of our terracotta amphorae come from Georgia (Caucasus) and are ovoid, while others are Tuscan and have a classic jar-like shape. They rest both above ground and under, for natural temperature control.

## CASTELLO DEL TREBBIO

---

[www.castellodeltrebbio.com](http://www.castellodeltrebbio.com)

## The Property

---

Located in Chianti Rufina, region outside of Florence, in Tuscany. 865 acre estate, 148 acres dedicated to vineyards, an active, with a production of 320,000 bottles.

## Varietals of wine

---

## Elena Casadei's Amphorae

The project stems from the passion and efforts of Elena Casadei. The meticulous selection of grapes carried out, year after year, in the Famiglia Casadei estates leads to identifying only a few, select, vineyards; using a unique type of vessel, the amphora, these become extraordinary wines.

## Varietals

Cannonau, Sangiovese, Trebbiano, Syrah, Semidano, Ansonica, Moscato, Malvasia, Nasco.
