

A full bodied fresh high quality EVO Oil

Produced in southern Tuscany, on a traditional family owned farm, it is the result of state of the art organic farming and extraction technology. It expresses fully the “green” character of the Tuscan Olive Tree varieties, the wild aromas and the intensity of the Maremma Terroir.

Our Olive Oil is extracted from olives that we pick at the ideal point of ripeness on our farm. The reliance on our own trees forms the basis of the transparency, traceability and quality that we offer and stand for.

We also stand unconditionally for sustainability.

With our Oil representing the shared point of contact, we are developing a community of people who have interest in sustainable development and community values, people that endorse the replacement of socially and ecologically destructive system, and that do so with their actions, including personal consumption and nutritional habits.

Join US!

*Our Oil is divine, it is strong, it is aromatic, it is earthly
it is real!*

TOTAL POLYPHENOLS	815.60 mg/kg
K232	2.23
k270	0,17
DELTA K	0,0

The high content of polyphenols in our oil

Olive oil polyphenols contribute to the protection of blood lipids from oxidative stress. The beneficial effect is obtained with a daily intake of 20 g of Extra Virgin Olive Oil containing at least 5 mg of hydroxytyrosol and its derivatives.

EFSA approved health claim on olive oil polyphenols (commission regulation (EU) 432/2012) & regulation ec 1924/2006.

This is a direct consequence of the “cultivar” (varieties) of our trees, the climate of our region and of the cultivation and extraction techniques we use. We feel proudly part of a very select club of brands that are able to claim such high levels of this extremely beneficial natural component, that is also responsible for the stability and flavor of high quality olive oil.
