Super Jin BIO Line

Super Jin is a brand of Divino Amore a young, dynamic and enterprising company, ready to seize every change and opportunity in the global market to offer the best of the Italian production scene. It was born from the passion of entrepreneur Barbara Grasselli for her country, her scent, her living soul with multiple expressiveness and her bond with the land that tells the story of man and his traditions.

A Graduate in Economics and Commerce, Barbara has lived many years abroad, in France, Britain and Spain, acquiring a perfect command of, English, French and Spanish languages. Barbara's professional activities focused on export, have gained extensive experience on which she has founded a solid foundation for the company

" Divino Amore"

Made in Italy, the variety of products is one of the sources of pride of the “Bel Paese” country where the history of the territories is closely linked to good food and good drink, which for Barbara are the fabric of daily life.

Focused on premium quality products, giving a special attention to important parameters such as flavour and nutritional characteristics is the goal to be achieved entering into the concept of respect for the environment.

From this basis the idea of developing a new project regarding two Sicilian Organic teas, conceiving and designing a special label for children with a new brand

Super Jin "The Children's Aperitif."

A special organic tea for children is born, from the fusion of Sicilian Organic fruits and natural Sicilian spring water.

It is a new and novel idea for children to be able to share with their families and a new possibility to expand markets and open new ones with these unique Sicilian Organic Tea's.

The world of children's drinks can be healthy, tasty and above all fun.

That is why a different brand was created:

Super Jin "The Children's Aperitif."

The choice was made starting from a careful examination of foreign market trends, different but precise in terms of predominant tastes albeit in the variations of current fashions. This was followed by a thorough search for products and raw materials of guaranteed quality capable of coping with the selective demands of the overseas market.

The idea behind Super Jin is to produce and propose an outstanding, relevant, “Made in Sicily” lifestyle product for children, while assuring parents of a delicious, all-natural, Organic and refreshing beverage by offering their children a drink linked to the concept of healthy drinking and designed to protect and save the environmental impact.
