

# GARDEN TOPSOIL

## OPENING HOURS

Monday - Friday

7.00 - 12.00 am

1.00 - 6.00 pm

Saturday

7.00 - 12.00 am

italiana terricci

## PROCESSING

TOPSOIL IS ANALYZED AND SIEVED USING 0-15 mm GRIDS, THEN MIXED WITH COMPOST, SILICEOUS SAND OR OTHER PRODUCTS AS REQUESTED

## STORAGE

THE FINAL PRODUCT IS STORED IN HEAPS AND BIG BAGS INDOORS TO SHELTER IT FROM RAIN, WIND AND ATMOSPHERIC AGENTS

*Delivery service using tipper truck  
or truck with hydraulic crane  
with or without bucket*

# 1. UNIVERSAL TOPSOIL

*Gardening, garden design, green areas, vegetable gardens*

Italiana Terricci's cultivating topsoil is a selected soil mixed with an optimal amount of composted soil improver, ideal for the healthy and lush growth of different types of cultivations.

Content [1 m<sup>3</sup>] ≈ 1400 kg  
Particle size 0 - 50 mm  
pH 7,8  
EC 1,6 dS/m  
Absorption P 50 - 55 mg/kg s.s.  
Total N 1,2 g/kg d.m.  
Clay 115 - 120 g/kg d.m.  
Composition [v/v] 100% cultivating topsoil

# 2. SIFTED TOPSOIL

*Gardening, garden design, green areas, vegetable gardens*

Italiana Terricci's sifted cultivating topsoil is a selected and sifted soil, mixed with an optimal amount of composted soil improver, ideal for a healthy and lush growth of different types of cultivations.

Content [1 m<sup>3</sup>] ≈ 1400 kg  
Particle size 0 - 15 mm  
pH 7,8  
EC 1,6 dS/m  
Absorption P 50 - 55 mg/kg d.m.  
Total N 1,2 g/kg d.m.  
Clay 115 - 120 g/kg d.m.  
Composition [v/v] 90% sifted cultivating topsoil, 10% composted soil improver

# 3. pH-NEUTRAL TOPSOIL

*Gardening, garden design, green areas, vegetable gardens*

Italiana Terricci's pH-neutral cultivating topsoil is a selected and sifted soil, mixed with an optimal amount of composted soil improver and silica sand, ideal for the healthy and lush growth of different types of crops. The neutral pH favors the absorption of the most important nutrients for the healthy and lush growth of agricultural crops and excellent turf.

Content [1 m<sup>3</sup>] ≈ 1400 kg  
Particle size 0 - 15 mm  
pH 7  
EC 1,7 dS/m  
Absorption P 50 - 55 mg/kg d.m.  
Total N 1,23g/kg d.m.  
Clay 115 - 120 g/kg d.m.  
Composition[v/v] 60% sifted cultivating topsoil, 10% compost, 30% silica sand

## 4. GARDEN TOPSOIL

*Garden design, green areas,  
vegetable gardens, planting*

Italiana Terricci's garden soil is a selected and sifted soil mixed with an optimal amount of composted soil improver in such quantities to ensure the healthy and lush growth of different types of cultivations. The absorption of the most important nutrients for the growth of horticultural crops in all seasons is favored.

Content [1 m<sup>3</sup>] ≈ 1200 kg  
Particle size 0 - 15 mm  
pH 7,2  
EC 1,9 dS/m  
Absorption P 50 - 55 mg/kg d.m.  
Total N 2 g/kg d.m.  
Clay 115 - 120 g/kg d.m.  
Composition [v/v] 70% sifted cultivating topsoil, 30% composted soil improver

## 5. TURF TOPSOIL

*Garden design, green areas, lawns,  
golf courses*

Italiana Terricci's turf topsoil is a selected and sifted soil, mixed with an optimal ratio of composted soil improver and silica sand, ideal for fast rooting and healthy growth weeds-free. The neutral pH favors the absorption of nutrients from the early stages of the plant, accelerating the process and maintaining the quality of the lawn.

Content [1 m<sup>3</sup>] ≈ 1400 kg  
Particle size 0 - 15 mm  
pH 7,2  
EC 1,7 dS/m  
Absorption P 50 - 55 mg/kg d.m.  
Total N 1,3 g/kg d.m.  
Clay 115 - 120 g/kg d.m.  
Composition [v/v] 70% sifted cultivating topsoil, 10% compost, 20% silica sand

## 6. COMPOST

*Gardens, stable lawns,  
increase in organic matter*

Italiana Terricci's compost is an excellent natural fertilizer obtained from the organic waste transformation process. It can be used in pots, vegetable gardens, gardens, nurseries, and open-field agriculture.

Content [1 m<sup>3</sup>] ≈ 700 kg  
Particle size 0 - 15 mm  
Moisture < 30%  
pH 8  
EC 3,0 dS/m  
Organic N 87,2% d.m. di N<sub>tot</sub>  
C/N ratio 12

## 7. ROUND GRAVEL 7/15

*Garden staging, rock gardens,  
flower beds, walkways*

Italiana Terricci's round gravel is suitable for the composition of modern and refined green areas. The 7/15 mm particle size can be used for multiple applications ensuring a high drainage capacity in any season.

Features: water drainage  
Content [1 m<sup>3</sup>] ≈ 1500 kg  
Particle size 7 - 15 mm

## 8. CRUSHED STONE 7/12

*Garden staging, rock gardens,  
flower beds, walkways*

Italiana Terricci's crushed stone is suitable for the composition of green areas and gardens, particularly areas dedicated to trampling. The particle size of 7/12 mm is used as a stabilizer and drainer for walkways, ensuring a high capacity of water outflow in any season.

Features: water drainage,  
ground stabilization  
Content [1 m<sup>3</sup>] ≈ 1400 kg  
Particle size 7 - 12 mm

## 9. CRUSHED STONE 3/6

*Garden staging, rock gardens,  
flower beds, walkways*

Italiana Terricci's crushed stone is suitable for the composition of green areas and gardens, particularly areas dedicated to trampling as well as for laying of self locking. The particle size of 3/6 mm is used as a stabilizer and drainer for walkways, ensuring a high capacity of water outflow in any season.

Features: water drainage,  
ground stabilization  
Content [1 m<sup>3</sup>] ≈ 1400 kg  
Particle size 3 - 6 mm

## 10. LIMESTONE 0/20

*Rock gardens, walkways, cycle paths, sports fields*

Italiana Terricci's Moregallo limestone is suitable for the composition of paths, cycle paths, and sports fields in areas dedicated to frequent trampling. The particle size used stabilizes and drains the bottom, ensuring a high capacity for water outflow in any season.

Features: water drainage, ground stabilization  
Content [1 m<sup>3</sup>] ≈ 1800 kg  
Particle size 0 - 20 mm

## 11. CALCAREOUS SAND 0/3

*Intervention on site, background for roadbeds*

Italiana Terricci's calcareous sand is used for the production of unbound mixtures with excellent bearing capacity and for the correction of very acidic soil (brings the pH level close to neutrality). Thanks to the excellent compressive strength, it is a product appreciated for its frost resistance.

Features: correction of acidic soils, roadbeds  
Content [1 m<sup>3</sup>] ≈ 1500 kg  
Particle size 0 - 3 mm  
pH 9  
Carbonates (CaCO<sub>3</sub>) 23,8 g/g  
Chlorides 22 mg/g  
Water-soluble sulphates - mg/L

## 12. SILICA SAND 0/1

*Garden design, stable lawns, golf courses*

Italiana Terricci's silica sand is humid, extra-fine, and top-quality sand, with a particle size from 0,1 mm to 0,9 mm. It is used in floriculture, nurseries, and for sandblasting the lawn; it is intended to level the surface, improve water drainage, facilitate the rooting of new sowing, and the renewal of turf.

Features: water drainage, surface levelling  
Content [1 m<sup>3</sup>] ≈ 1500 kg  
Particle size 0 - 1 mm  
pH 7,5  
Nitrates < 1 mg/L  
Chlorides 1,2 mg/L  
Cadmium < 0,5 µg/L
