

MANUFACTURE OF MACHINERY FOR

CAPPING

FILLING

LABELLING

Innovative systems that allow the remote control and analysis of your production through our cloud.

FOOD AND BEVERAGE INDUSTRY

Our assortment for the food and beverage industry includes:

- tabletop filling machines
- semi-automatic filling machines
- automatic filling machines

The food and beverage industry comprises products with a wide range of consistencies and textures and it also requires field-specific processes. **CM3 Engineering** machines provide all equipment to handle the products properly. For example, our machines allow the **control of the product temperature** in each step of the process and the **security seal labelling**, specifically for jams, preserves or similar products.

COSMETIC INDUSTRY

Our assortment for the cosmetic industry includes:
-tabletop filling machines
-semi-automatic filling machines
-automatic filling machines

Cm3 Engineering machines are suitable for the cosmetic industry. Our machines are specifically designed for the dosing of **foaming products**. Our lines are equipped with anti-drip nozzles and plunging dosing nozzles. The filling phase takes place simultaneously with the rinsing of the nozzle, avoiding the formation of foam during the entire process.

PHARMACEUTICAL INDUSTRY

Our assortment for the pharmaceutical industry includes:

- tabletop filling machines
- semi-automatic filling machines
- automatic filling machines

Cm3 Engineering manufactures monoblocks and complete lines for the filling, capping and labelling of liquid and powder products. In the pharmaceutical and para-pharmaceutical industry, our machines are designed to mix powders **reducing** the problem of **powder segregation**. Moreover, the dosing can be done through **load cells**.

CHEMICAL INDUSTRY

Our assortment for the chemical industry

includes:

- tabletop filling machines
- semi-automatic filling machines
- automatic filling machines

Detergents, solvents and varnish are just some of the products that can be processed with **Cm3 Engineering** machines. We design and manufacture specific systems for the dosage of **aggressive products.**
