	Administration and Sales	Baccichetto Marco
Sales Departments	Wine	
Production per Year	200.000 bottles	
Description	As a family run business, our winery is focused on the quality of the product. We grow personally our 30 hectares of different grapes, therefore the process of quality check starts from the vineyards and it is kept until the bottle is sold. We are established in Treviso Province, Veneto. The core business here for the wineries is the Prosecco. Our winery can provide not only Prosecco: indeed with a large range of red and white wines, strongly autochthonous, our goal is to transmit the identity and the personality of the territory. The position between the Alps and the Adriatic sea creates a unique climate, driven by the winds, where the Piave river, originating from the Dolomites, has been carrying for long time precious limestone to mix with clay and silt. This terroir expresses itself in the glass with freshness and minerality All the aromas of the harvested grapes are preserved with low temperature maceration, and enhanced by fermentation in stainless steel tanks. Every wine expresses its own unique aroma and character. Since we can't provide big quantity to sell, we look for partner that acknowledge the effort we make day by day to improve our self in order to reach our purpose: healthy wine with a unique taste.
