

Barattieri Sinterizzati

It has established itself in the field of sintered products since 2010, from simple spacers to more complex shapes, from gears to lock systems, taking advantage of the **in-depth metallurgical knowledge** acquired by the management staff in 50 years of work in the heat treatment sector.

Strongly oriented towards **service** and close **collaboration** with the technical and commercial partner, with tailor-made solutions for each individual project.

Our strength is **flexibility** and **efficiency**, we are able to interface both, to small, medium-sized, to multinational companies and established brands in various sectors: from weapons to medical, from fitness to automotive.

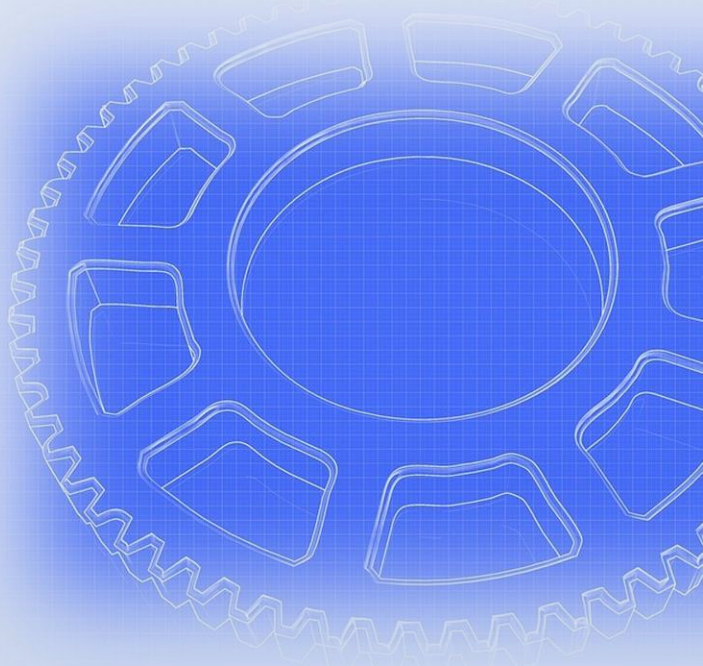

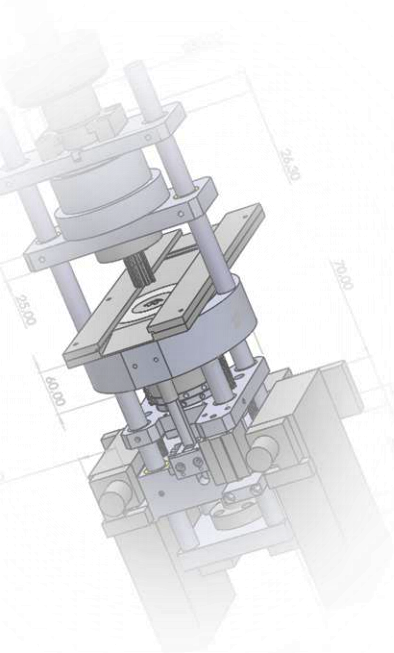

We obtained the **ISO 9001: 2015** certification in 2018 from the TUV NORD body with certificate registration number 44 100 21410089.

We would be happy to be able to evaluate possible projects with you, new parts and or components currently used, adopting **innovative design techniques** and introducing sinter technology into your reality to supply the components you need for.

The purpose that has always driven Barattieri Sinterizzati has always been to create **efforts** beyond the supplier-customer relationship, **collaborations** aimed to sharing the road together, united towards mutual satisfaction that looks beyond simple monetary gain.
