Home and building automation

Flexible, reliable, and easy-to-configure solutions. Intesis manufactures interfaces for climate control and advanced communication gateways for the integration of various systems. In 2016, it was acquired by HMS Networks, a market leader in industrial communication solutions and industrial Internet of Things.

Innovative designs and devices with exceptional technical capabilities. Zennio provides modern, functional, and customizable home automation devices to transform homes into smart, comfortable, and environmentally friendly spaces through energy-saving solutions.

Cutting-edge technology and a passion for innovation. Weinzierl develops components and tools for home automation development. At the heart of their offering are implementations of the stack for various standardized device models and specific communication types for KNX.

The brain of your home. Thinka is indeed the brain of the smart home. It securely and safely controls all your KNX devices and also allows you to manage KNX technology through Apple HomeKit, Siri, Google Home, and other leading home assistants.

Progress, tradition, and quality. Consistent in design and form, Jung systems provide the appropriate solution for every need. From light switches to security technology, from intercoms to wireless applications or home automation systems based on KNX standards.

Sophisticated design and advanced technology. Today, it operates in the fields of home automation, smart home, and home security and is a leader in the automation market. Its products are distinguished by advanced technology that allows for integrated management of the entire home.

Modern and secure: your home with Fibaro. Fibaro, part of the NICE S.p.a group, is a market leader in smart home solutions. Products like smart plugs, actuators, dimmers, etc., are designed based on Z-WAVE standards to ensure flawless wireless communication between various devices.

Flexible, simple, and design-oriented technical solutions. All Elsner products are developed and manufactured at the company's headquarters in Germany. Highly qualified personnel and the use of the latest technologies ensure a consistently high quality standard.

Modern, elegant, and secure. Satel provides professional, functional, and customizable protection for all needs. They specialize in the design, production, and sale of a wide range of modern devices for security systems, remote control, and building automation.

Customization, quality. 2N manufactures UMTS products, SM gateways, analog and IP intercoms and videophones. Their products are known for their high quality and extensive customization options.

Comfort and energy savings. Theben's extensive catalog offers systems for time control, lighting control, climate control, and building automation in KNX home automation.

Simple and customizable. ThinkKnx manages various home automation functions through a multi-platform interface that is simple, attractive, and highly customizable, capable of interacting directly and freely with Apple, Android, or Windows products.

Innovation, security, comfort: with Inim, you're in safe hands. Inim develops state-of-the-art systems in intrusion detection, fire detection, home automation, and emergency lighting. Integrated systems with a contemporary design that protect and automate residential, commercial, and institutional structures.

Where technology meets design. Ekinex devices are developed and manufactured in Italy. Ekinex home automation is supported and made possible by the KNX standard, which allows automated and decentralized management of technological systems of all types and sizes.

Creativity, innovation, and professionalism. Choosing Blumotix means seeking technological and stylish excellence, a brand that excels in technical sophistication, attention to detail, ease of installation, and user-friendliness, all while never compromising on design.

Design and technology. Basalte products are designed to keep things simple, intuitive, and elegant in both form and function. The systems are stripped down to their essence, offering improved device speed and modern home comfort.

Unique and smart products. Domotica Labs, an all-Italian company, specializes in the design and development of solutions for remote control and intelligent control, from individual power outlets to buildings and complex technological systems, operating with the most widely used standard protocols on the market.

KNX home automation and building automation systems. This renowned brand is recognized as one of the leaders in the KNX hotel market. It currently boasts over 28,000 installed rooms in 72 countries worldwide. Thanks to its significant references and a wide range of products.

Reliability and security. With its innovative and technically advanced products, DIVUS provides its customers with precisely the smart home technology they need. Their vision is to provide devices for a smart home system to ensure greater security, reliability, and comfort.

Easy and smart. Lingg & Janke provides innovative products and system solutions to enhance the security and adaptability of residential and functional buildings by creating intelligent spaces through the use of advanced technologies.

Smart and innovative. MDT Technologies is one of the leading manufacturers of KNX products in Germany. It offers a wide range of power supplies, binary inputs, actuators, buttons, presence and motion detectors, weather stations, touch panels, dimmers, and much more.

merten

by Schneider Electric

Innovation, quality, and design. Merten is synonymous with pioneering and well-designed solutions for smart buildings. The range includes switches, motion detectors, and intelligent building systems based on the KNX standard.

CONTROLtronic

Practical and elegant tools for support and integration. Controltronic products allow for the management of lighting, blinds, heating and cooling, multimedia technology, visualization, and facility management.

Efficient, secure, interactive. Spinetech is an integrated and modular home automation system. The supervision software allows for the management and monitoring of all devices and functions within the smart home.

steinel

Versatile and high-quality. Founded in Germany in 1959, Steinel is a leader in sensor technology for lighting control, boasting European-made production. Its products are known for their versatility.

The most advanced research in security systems. With MARSS IP Modules, it's possible to activate, monitor, and control any brand or model of alarm system, as well as create home automation and access control solutions, from any portable device, securely thanks to the SSL3 protocol.

arcus-eds

Practical and versatile. AArcus-eds is a leading German company in the production of components related to climate control. The catalog displays a very comprehensive range of KNX products and devices diversified for individual applications: environmental control sensors, for primary circuits, or for outdoor use

Freedompro

Connectivity between devices. The Easykon product range enables communication between home automation systems based on KNX or BTicino MyHome and voice control devices like Siri, Alexa, and Google Assistant

Video surveillance

skilleye

Support, reliability, compatibility. Skilleye is the solution from TKH Security Solutions dedicated to professionals, offering a comprehensive proposal for CCTV, ensuring product continuity and constant evolution while maintaining compatibility.

 **Hanwha**

Precision, freedom. All products are manufactured according to strict standards that reflect the tradition of precision engineering associated with the Hanwha brand. One of the pioneers in recognizing the importance of implementing software solutions like 'at the edge' video analysis directly onboard the camera itself.

WISENET WAVE

Infinite customization possibilities. The Wisenet WAVE VMS allows for easy viewing of up to 64 high-definition streaming videos. It is an IP Video Management Platform with limitless customization possibilities that enable users to create tailored IP video surveillance solutions.

Genetec

Simple and efficient. Genetec provides installers and system integrators with cloud-based video surveillance solutions, with a mission to enhance security and contribute to new levels of safety for public offices, businesses, communal spaces, and residences.

PELCO

Experts in security for over 63 years. Originally a manufacturer of analog cameras, Pelco has since expanded into IP cameras and now designs, develops, and manufactures predictive surveillance solutions, surveillance cameras, video recording and management systems, and CCTV software.

UNV

Professional, cutting-edge. UNV was the first to introduce IP surveillance in China, where it is currently the third-largest surveillance operator. In 2018, Uniview ranked fourth globally in market share and now offers complete product lines.

2N

An Axis company

Customization, quality. 2N has developed the world's first IP intercom and the first LTE intercom, producing UMTS products, GSM gateways, intercoms, and videophones, both analog and IP. Their products are known for their high quality and extensive customization options.

Automation

Nice

Sophisticated design and advanced technology. Today, it operates in the fields of home automation, smart home, and home security and is a leader in the automation market. Its products are distinguished by advanced technology that allows for integrated management of the entire home.

Reliability and expertise. An Italian company that manufactures automation systems and access control solutions in over 40 countries. Their knowledge and technical mastery are reflected in high-quality products and innovative, cutting-edge technological solutions.

Quality and security. Passion for innovation and simplicity: these are the secrets of its success. FAAC Simply Automatic includes gate and barrier automations, automatic entrances and doors, motors for shutters and awnings, parking solutions, and access control.

Originality and Italian tradition. Genius is a brand of the FAAC Group, which designs and manufactures automation systems focused on customer satisfaction. The products are easy to install, thanks to technologies like G-Way (Bus technology), and secure, thanks to devices like the virtual encoder.

Creatività, innovazione, personalizzazione. C.C.E. è specializzata nella costruzione di guarnizioni automatiche sottoporta e dispositivi di sicurezza per la protezione contro gli urti sulle porte automatiche. I prodotti sono personalizzabili ed ideabili dal cliente grazie all'ufficio tecnico in grado di produrre prototipi 3D.

Creativity, innovation, customization. C.C.E. specializes in the construction of automatic door bottom seals and safety devices to protect against impacts on automatic doors. The products are customizable and can be designed by the customer, thanks to the technical department capable of producing 3D prototypes.

Advanced technology designed for people. A company certified as 100% Original Italian Quality by the Italian Products Protection Institute (ITPI) and a member of UNAC, Came has been a leading brand in the Home and Building automation sector for over 60 years

Flexibility, precision, reliability. Allmatic designs and manufactures a complete range of automation systems in Italy, aiming to provide customers with maximum satisfaction and simplicity in the installation and programming process.

Creativity, foresight, excellence. Cardin offers automation and remote control solutions for closures and security systems, as well as electronic and electromechanical equipment for the automation and remote control of closures (gates and doors) and security systems.

A wide range of brands and products. Importing products from leading European companies for command and security accessories such as JCM, XPR, and WITT, AB TECNO introduced the ABEXO brand in 2015, under which internally developed products have been available since 2019.

Simplicity, imagination, and technology. Abexo's goal is to develop and provide the best solutions for signaling, command, and access control. The product catalog aims to be recognized as the most comprehensive, specialized, and innovative for automation and access control accessories.

Innovation at the forefront. JCM Technologies offers electronic solutions for the management and security of residential, industrial, and commercial building doors. Currently, it ranks among the most renowned brands in Europe and is present in more than 40 countries.

Design and technology. XPR produces a range of access control products, home automation solutions, and equipment for mechanical, electrical, electronic, and magnetic locks. XPR has partnerships and its own factories that enable production using state-of-the-art techniques.

Experience and concrete standards. The accumulated experience is reflected in a broad portfolio of products, including security sensors, accessories, and gate automations compliant with the latest technical standards. Great flexibility enables the continuous management of orders, both small and large in volume.

Cutting-edge technology, ease of use. Sesamo designs and manufactures innovative, high-quality automation systems. Its rigorous quality management system makes it an excellent supplier and a reliable consultant for the customer.

Engineering know-how and inventiveness. BFT develops advanced solutions with unique and exclusive features, yet they are simple, user-friendly, and close to people. Innovative and easy-to-use technologies that combine product robustness with application flexibility.

Elegance, innovation, functionality. Topp offers a wide range of systems for the automation of doors and windows designed to provide customers with the greatest possible freedom of movement. The service offered is comprehensive, starting from consultation and extending to installation, carried out by selected partners.

Consultation, assistance, availability. NoLogo manufactures high-quality accessories for automation and security. The complex nature of the automation sector, due to the various companies that have been involved over the years, makes it necessary to adopt products that are always compatible.

Guaranteed quality, modern design. Window Automation Industry is the result of the merger between Asa, specializing in the automation of roller shutters and awnings, and Mingardi, qualified in the automation of windows, domes, sun shading systems, and components for smoke evacuation systems.

Automation specialists. Benincà develops products that blend tradition and innovation by harnessing synergies and know-how. A group of companies capable of sharing expertise and experience to design solutions that enhance and secure automations and people.

One of a kind. The main feature that distinguishes a Fadini gate opener is the use of oleodynamic technology, which allows it to meet all installation requirements, minimize automation noise, and provide maximum anti-crushing safety.

Design performance. RIB is an Italian manufacturer of gate automation systems, barriers, roller shutters, and overhead doors. A leading presence in both the industrial and residential sectors, where expertise meets aesthetics. The company operates worldwide to provide peace of mind to installers and security to your customers.

Quality and comfort. The company offers a wide range of solutions to make daily life more comfortable. Conveniently open the gate with a remote control, turn the lights on or off, open the door: with Sommer solutions, attention to detail is a priority.

Fire detection

Innovation, security, comfort: with Inim, you're in safe hands. Inim develops state-of-the-art systems in the fields of intrusion detection, fire detection, home automation, and emergency lighting. Integrated systems with contemporary design that protect and automate residential, commercial, and institutional buildings.

Advanced technology and security. The knowledge transferred and consolidated in Elkron has allowed the company to develop a range of certified products that comply with the main European regulations, meeting the protection and security needs expressed by the market.

Certified quality, guaranteed reliability. Vimo designs and manufactures detectors for intrusion alarm systems, power supplies, and power groups for the fire detection sector, as well as relay interfaces and a range of accessories for fire detection systems.

Certified Security. Setronic is a company specialized in the design, production, and technical support of: linear fire detectors, opacity analyzers, instrumentation, and accessories.

Italian Reliability. Sensitron has achieved a leadership position in the gas detection market thanks to the continuous development of increasingly reliable sensors, the systematic use of microprocessor technology, compliance with European Standards, and the strict quality procedures adopted.

Expertise and Precision. Thermostick Elettrotecnica operates in the field of fire detection using unconventional technologies. Its application areas are diverse, including road and railway tunnels in high-risk areas, open-air storage facilities, the Oil & Gas market, and more.

Gas Detection. Oggioni is a reliable supplier of sensors for the detection of toxic or explosive gases and Fire & Gas safety systems. This specialization is complemented by efficient technical support and qualified after-sales service.

Access Control

An Axis company

Customization, Quality. A leading company in Europe in the development and production of products in the field of IP intercoms and access control, 2N has pioneered the world's first IP intercom and the world's first LTE intercom. 2N manufactures UMTS products, GSM gateways, analog and IP intercoms, as well as video intercoms.

Simple, Reliable. The solutions offered by HID enable a straightforward and worry-free identity verification experience, with a simple touch, rotation, tap, push, swipe, or just through the proximity of the chosen device.

Integration, Professionalism. With Plexa, you can identify individuals or vehicles using various technologies such as RFID with tags or transponders, biometric recognition through fingerprint or facial recognition, rolling-code radio controls, license plate reading, or simple magnetic card readers and keypads.

A Wide Catalog of Brands and Products. AB TECNO is an importer of products from leading European companies specializing in control and security accessories, including JCM, XPR, and WITT. In 2015, AB TECNO registered the brand ABEXO, under which internally developed products have been available since 2019.

Simplicity, Imagination, and Technology. Abexo's goal is to develop and provide the best solutions for signaling, command, and access control. The product catalog aims to be recognized as the most comprehensive, specialized, and innovative for automation and access control accessories.

Innovation at the Forefront. JCM Technologies offers electronic solutions for the management and security of residential, industrial, and commercial building doors. It currently ranks among the most well-known brands in Europe and operates in over 40 countries.

Technology and Aesthetic Care. XPR manufactures a range of access control products, home automation solutions, and equipment for mechanical, electrical, electronic, and magnetic locks. XPR has partnerships and its own factories that enable production using the most modern techniques.

Experience and Tangible Standards. The accumulated experience is reflected in a broad portfolio of products consisting of security sensors, accessories, and gate automations that comply with the latest technical standards. Great flexibility allows for the continuous handling of both small and large volume orders.

Flexibility and Reliability. IGTEK can guarantee professional products with high modularity that allows for their use in various applications, from simple standalone door openers to complex and elaborate access control systems.

Refined Design and Advanced Technology. It currently operates in the Home Automation, Smart Home, and Home Security sectors and is a leader in the automation market. Its products are characterized by advanced technology that allows for the integrated management of the entire home.

Modern, Elegant, and Secure. Satel provides professional, functional, and adaptable protection for all needs. They specialize in the design, production, and sale of a wide range of modern devices for security systems, remote control, and building automation.

Security, Cutting-Edge. CDVI offers state-of-the-art solutions to ensure high levels of security. Their extensive range includes electric, electronic, and magnetic locks, fingerprint biometric readers, professional IP cameras for surveillance, and electronic locks for hotels.

Quality, Reliability. ITC is a reference point for designers and installers of audio systems and building management systems. From system specifications to final testing, ITC monitors every phase to ensure that Audio and Building Automation systems meet the requirements of their customers

Intrusion Detection

Innovation, Security, Comfort: With Inim, you're in safe hands. Inim develops state-of-the-art systems in the fields of intrusion detection, fire detection, home automation, and emergency lighting. Integrated systems with contemporary design that protect and automate residential, commercial, and institutional structures.

Easy, Secure. Daitem, a brand of the Hager Group, specializes in systems for the protection of residential and professional environments. It has significantly improved security levels by combining ease of use with greater ease and flexibility during installation.

Advanced Technology and Security. The know-how transferred and consolidated at Elkron has allowed the company to develop a range of certified products that comply with major European regulations, addressing the protection and security needs expressed by the market.

Refined Design and Advanced Technology. It currently operates in the Home Automation, Smart Home, and Home Security sectors and is a leader in the automation market. Its products are characterized by advanced technology that enables integrated management of the entire home.

Reliable, Practical. Ajax is the most awarded wireless security system in Europe. Its devices are designed to provide a pleasant user experience and are equipped with digital algorithms and models based on multiple factors for threat detection, making the likelihood of false alarms negligible.

Prevention through Security. Politec is an Italian company specialized in the design and production of active infrared perimeter intrusion detection systems. Their primary objective is to serve as a prevention system, which means stopping the intruder before they gain direct access to the protected area.

Expertise, Technology, Quality. DEA Security's perimeter intrusion detection systems detect attempts at intrusion and trespassing on the perimeter of a building or property. They are divided into external detection systems and internal detection systems.

Quality, Responsibility, Security. Eldes aims to facilitate installation while providing a product with a good price-quality ratio. Specialized in wireless alarm systems, their products offer a radio range of up to 3 km in open fields, ensuring usability stability and reducing false alarms.

Reliable, Affordable, Practical. The tools provided to partners can be summarized in one word: affordability. It combines the best technologies with an unbeatable range of services, enabling installers to be competitive in the market.

Unique Design and Unfailing Quality. Products for anti-theft and fire alarm systems, always up-to-date and certified according to the latest regulations. Wired or wireless alarm sirens, power supplies for various types of systems, relay boards, optical-acoustic panels, remote controls, and many other intuitive products.

Certified Quality, Guaranteed Reliability. Vimo has designed and manufactured detectors for intrusion alarm systems, power supplies, and power groups for the fire detection sector, as well as relay interfaces and a range of accessories for fire detection systems.

Innovative Solutions, Easy to Use. Naria Security solutions utilize plastic optical fiber cables, a special type of optical fiber known for its durability and ease of use: a connector can be installed in less than a minute without the need for specific equipment.

A Reference Point in the Security Market. CIAS is known nationally and internationally for its outdoor barriers using microwave, infrared, triple technology, and fence protection systems. Their products are used in high-security perimeter protection, such as prisons or banks.

Precise, Effective. Cooper's products are used in the most demanding industrial, residential, and commercial environments, where they offer solutions for fire detection, intrusion protection, emergency lighting, and exit path marking.

Modern, Elegant, and Secure. Satel provides professional, functional, and adaptable protection for all needs. They specialize in the design, production, and sale of a wide range of modern devices for security systems, remote control, and building automation.

Security and Reliability for Dependable Detection. Bosch provides integrated security solutions based on award-winning technology and backed by superior quality support. Their user-friendly alarm systems seamlessly integrate with cameras and smoke alarm devices.

Experience, Technology, Research. Bentel Security systems can meet any installation requirement thanks to a wide range of wired and wireless solutions that guarantee extreme flexibility, high reliability, and functionality while ensuring ease of installation and maintenance.

Reliability, Quality, Innovation, and Customer Service. Pyronix has patented several technologies, winning numerous awards for innovation, and continues to invest in quality and technological innovation. The award-winning Pyronix range of wired, hybrid, and wireless systems now offers solutions for any need.

Expertise, Reliability. Expertise, reliability, and quality are the characteristics of this company capable of conceiving, creating, and marketing its products thanks to its mastery of electronic technologies and microprocessor logic, both in hardware and software.

The Right Accessory for Any Device. Unstab is a manufacturer of support accessories and anchoring systems, offering a wide range of sturdy, safe, and quality items. Unstab provides you with the right fixing accessory for any of your devices

The Future of Security. Risco security systems include wireless, wired, and hybrid solutions, all designed to adapt to various situations, with the capability to manage up to 512 zones that can be customized. These different systems cater to both industrial and residential environments.

Networks / Networking

Innovative, versatile. Ubiquiti is characterized by a wide range of products and versatile software, such as Unifi Controller, from Ubiquiti Networks. High reliability, innovation, and a high-quality price ratio are the ingredients that make Ubiquiti Networks products appreciated worldwide.

Versatile, affordable. A pioneer in long-range and wireless communication solutions, EnGenius offers a comprehensive product line for all wireless environments, including network servers, security products, and wireless mesh networks for urban areas with digital wireless networks.

Faster, more powerful, more affordable. MikroTik's mission is to provide the most powerful and affordable internet connection possible. Currently, its products are available in over 145 countries and are known for their high firmware layer configurability and outstanding price-to-quality ratio.

Flexibility, security. CISCO, founded in 1984, is headquartered in San Jose, California. A global leader in technologies that transform the way people connect, communicate, and collaborate through intelligent networks and architectures that integrate products, services, and software platforms.

Progress, quality. IBM produces and markets computer hardware, computer software, middleware, and information technology services, providing infrastructure, hosting services, cloud computing, artificial intelligence, quantum computing, and IT and strategic consulting.

Professionalism and a wide range. Hewlett-Packard (HP for short) is a US multinational company in the field of information technology, operating in both hardware and software markets, as well as internet-related services. Today, the group encompasses several brands, including DXC Technology, Micro Focus, and Broadcom.

Uncompromising reliability. QNAP is a computer hardware manufacturer based in Taiwan, specializing in network storage solutions (NAS) for individuals and businesses. It provides comprehensive solutions, ranging from software development to hardware design and construction.

Wide selection, high quality. WP RACK & CABLING, a high-tech company that develops and manufactures rack cabinets, PDUs, cables, and accessories. Over the years, the company has accumulated extensive experience in design and production, establishing itself as a leading brand in the market.

Ease of configuration and high performance. Aruba is an Italian company that offers products for data centers, networking, web hosting, and domain name registration. The products are suitable for installers not particularly experienced in networking who want to get closer to this world.

Reliable, easy. D-Link designs, develops and manufactures innovative high-performance products for individuals and businesses. In particular, production takes the form of networking products for professional video surveillance, enterprise security, Wi-Fi for business, and LAN and storage networks.

Efficiency, quality. With products distributed in more than 170 countries, TP-Link emerges as the leading supplier of Wi-Fi devices globally. A key element of differentiation over the competition is the in-house production of products, which ensures high control over components.

Cambium Networks. Cambium Networks' wireless fabric enables network designers to choose the right technology to address their challenges, all without the hassle of integration. High-performance technology and centralized cloud management enable them to consistently deliver excellent experiences.

Scalability, precision, safety. PANDUIT is a U.S.-based component electronics company. Scalability, precision, safety, and reliability-these are the values that yield in infrastructure products and services for data networks and power applications.

Simple, convenient. Jeknet is a brand created by Elmat in 2002. It develops consumer wiring products, its pluses being ease of installation and high value for money. These peculiarities can be attributed to profique partnerships with qualified laboratories for the production of the products.

Innovation, possibility. Western Digital offers a broad portfolio of technologies, storage devices, systems and solutions for businesses and consumers. Its solutions include the Western Digital, G-Technology™, SanDisk and WD brands.

Customization, passion for challenges. At the end of the 1990s, Carmet became 4EMME to take up a new challenge and devote itself to the manufacture of cabinets and rack components. Today the company is on the market with 6 series of switchboards and cabinets for data network management.

Rugged, versatile. York Cabinets offers a wide range of rack cabinets: wall boxes, floor standing cabinets and mini LANs. All products are characterized by high quality, robustness, versatility.

Responsiveness, transparency, accountability. Seagate Technology is the world's second largest hard drive manufacturer, founded in 1979 and headquartered in Cupertino, California. Their hard drives are used in server, desktop, and handheld computers, as well as DVRs, Xboxes, and portable audio players

Cables

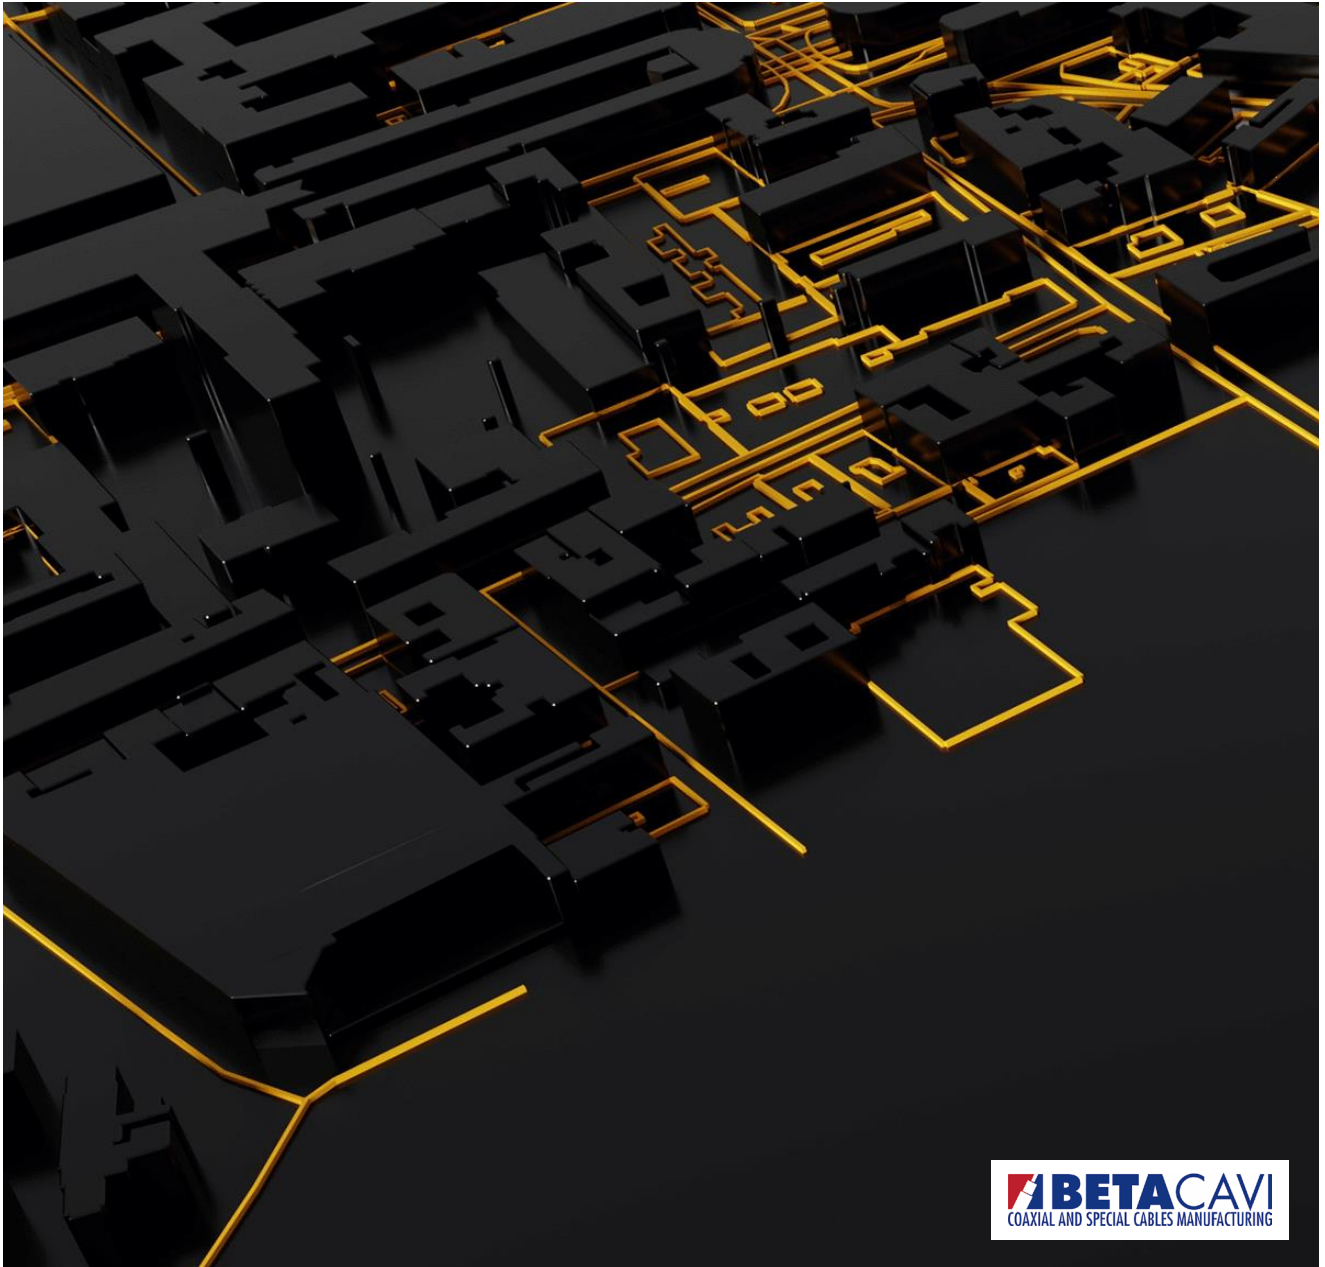

Cutting-edge technology. Involved in technical committees for the drafting of standards, it contributes in the dissemination of technical knowledge through educational seminars, in partnership with major international equipment players, held at the headquarters of the respective professional bodies.

Excellence, reliability. The range of products offered by Prysmian includes: single-mode fi bre; OM1, OM2, OM3, OM4 multimode fibers; fi bre for special applications; preconnected optical cables; and installation accessories and equipment: connectors, adapters, cable stripping tools

Scalability, precision, safety. PANDUIT is a U.S.-based component electronics company. Scalability, precision, safety, and reliability-these are the values that yield in infrastructure products and services for data networks and power applications.

UPS / Uninterruptible Power Supplies

Reliability, innovation. For more than 30 years, KERT has been designing and manufacturing its power and energy systems, and among them are power supplies, voltage stabilizers, UPS, and emergency and anti-flooding units. The products are guaranteed to be highly robust and reliable.

Quality, sustainability. A French industrial group specializing in electrical components, Legrand is the global specialist in electrical and digital infrastructure, offering high value-added products and solutions for commercial, residential and industrial buildings.

Data security. APC, continues its innovative journey with globally renowned infrastructure, management and data security solutions. In 2007 it was acquired by Schneider Electric, a European multinational company renowned worldwide for its expertise in power management and automation.

GRUPPI STATICI DI CONTINUITÀ

fino a 4,8 MVA

Telecommunications

Open, consistent, innovative solutions. Avaya, a specialist in digital communications software, services and devices, offers its transformative power to companies of all sizes. Through its open, consistent, innovative solutions, experiences are elevated to advanced levels, for customers and partners alike.

Efficient solutions for workflow management. Ascom Wireless Solutions is a provider of on-site wireless communications for market segments such as hospitals, manufacturing industries, prisons and retail stores, and hotels.

Reliability, quality and very high flexibility. Snom directs its resources to designing professional VoIP phones based on open standards. Therefore, the products are compatible with the open SIP standard, ensuring interoperability with major SIP-based IP-PBXs, such as the KalliopePBX exchange.

Robust, reliable and cost-effective unified communication. Yeastar specializes in the development and production of IP PBXs and VoIP gateways and is engaged in the distribution of next-generation technology products in the field of business communications.

Efficient solutions for workflow management. The Yealink range has numerous models suitable for both the small office and all professional operator workstations. Compatibility with the SIP standard of Yealink equipment enables interoperability with SIP-based PBXs.

"Made in Italy" excellence. Esse ti provides the elevator industry with the most advanced communication technologies to guarantee alarm systems of the highest quality. TLC Division: The beating heart of esse-ti, the benchmark telecommunications division in Italy.

Continuity through quality. Cutting-edge telephony technology is supported by a community of partners who offer support to create a complete communications solution through a series of high-performance products.

Cutting-edge solutions. Jabra is the world's number one manufacturer of innovative audio and handsfree solutions, with its business and consumer divisions developing, manufacturing, and marketing a wide range of wireless and corded headsets, speakerphones, and headsets for mobile telephony.

Reliability, innovation. Poly was created in 2019 by Plantronics and Polycom. Poly headsets are widely used in applications such as Unified Communications, in contact centers, in the office and home, with mobile devices and Internet telephony, for gaming and other special applications.

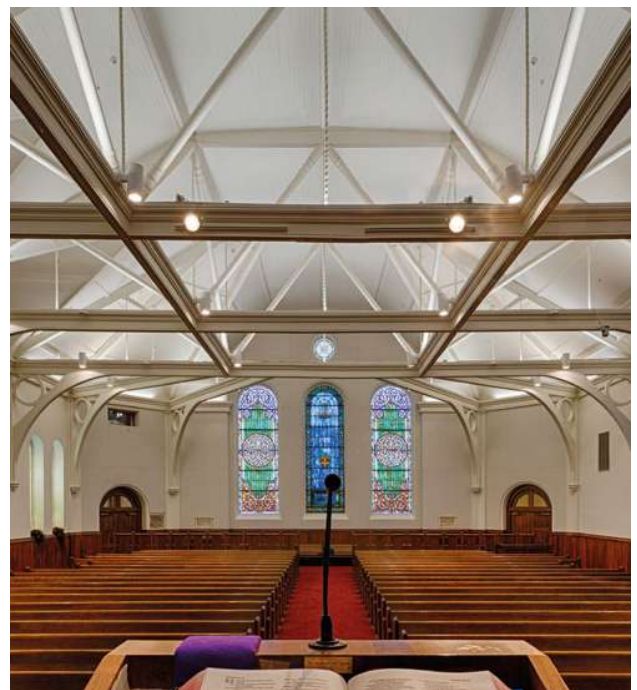

Audio & congress

Quality, reliability. ITC is a one-stop shop for designers and installers of audio and building management systems. From system specifications to its own testing, ITC monitors every step to ensure that Audio and Building Automation systems meet the needs of those who require them.

Experience, expertise and technique. PASO is a leading company in the public address and conference systems markets, highly regarded in Italy and abroad. Paso is supported by a catalog capable of meeting a wide variety of needs and a competent and professional sales structure.

Lighting technologies

Modern design. Many years of experience in the industry is embodied in the HARPER line, a line of LED technology emergency lighting and signaling lamps that can zero out glare while ensuring high brightness.

Versatile, intelligent. Stenel provides intelligent sensor and lighting solutions for private and commercial use. With revolutionary new sensors such as True Presence or the HPD2 optical sensor, it has laid the foundation for intelligence solutions.

A friendly and collaborative environment that ensures the utmost transparency and professionalism. This is why we have been chosen by national and international brands as official distributors

CAN I COLLABORATE WITH YOU EVEN IF WE ARE BASED OUTSIDE OF YOUR PROVINCE OR REGION?

Of course! We have professionals and partner companies throughout Italy, and we can deliver products **within 24 hours across the entire peninsula**. Thanks to digital tools, we can also provide certified technical **support** over the **phone** or **online**.

24-HOUR DELIVERY THROUGHOUT THE ITALIAN TERRITORY!

HOW CAN I CONSULT AND PURCHASE YOUR PRODUCTS?

Our website [mtdistribuzione.it](https://www.mtdistribuzione.it) is an **E-Commerce platform reserved for industry professionals**, with over **50,000 products available**. You can access product information with just a few simple clicks and make purchases independently. All you need to do is register on the website and wait for approval to see all the prices.
