ABOUT US

SACAU was founded over 40 years ago and company has been manufacturing and sharpening of tools for different industries: graphic, mechanical, plastic and wood.

SACAU manufacturing special parts, HSS or Widia steel, for cutting (cutting knives, trimmer knives, knife/bottom sets, circular knives, milling, linear or circular saw blades). Provides technical expertise and experience of the tool and its applications, advanced technology and product quality.

Equipped with top-of-the-line equipment is, in fact, able to meet all the needs of sharpening, grinding, turning and milling which is submitted.

SACAU offers competitive prices and prompt delivery thanks to a direct logistics service.

Delsar Lame is a company born over 30 years ago that supplies products and services in the field of industrial cutting. The experience of one of the founders, Mr. Pietro Sarni, combined with the technology and the new organization due to the acquisition by the company leader in the printed media industry Sacau Sr.l., made Delsar Lame one of the most important company in the cutting sector.

Relying on solid knowledge and experience, Delsar Lame manufactures a vast range of products that goes from circular blades and counter blades for shear cutting systems up to straight cutting knives.

Delsar Lame also manufactures pneumatic knife holders and pneumatic wheel holders as well as products suitable to suite any specific cutting solution for the customer's need.

The main fields of Delsar's applications are flexible packaging, tissue, nonwovens and paper production and transformation. The working process starts from the technical office, goes through the internal production department equipped with control machines that allow high precision parameters and an excellent finish of the cutting edges; up to the internal quality department that emits the final declaration of conformity.

Today the company is managed by the Simone's brothers, who have created a group that boasts over 20 employees and 40 numerically control machine tools.

The experience of these two companies, Delsar and Sacau, has given both the opportunity to develop new products and projects including an automatic cutting system which is among the most technologically advanced on the market.

The goal today is to grow in the Italian market, also making use of trained external distributors, and to organize a high-level foreign sales network that can bring the products of both companies anywhere in the world.

Those who choose Delsar Lame and Sacau does not choose a supplier but a partner who follows step by step the customer in all its needs or cutting problems.

Adequately trained personnel are able to give precise and punctual answers giving a service that makes the customer sure he has chosen the right partner for his business.

Reliability, competence, product quality and competitive prices are the founding principles of DELSAR LAME and SACAU

PRINTING TOOLS

KNIVES, BOTTOM KNIVES AND CARBIDE INSERTS FOR TRIMMERS LIKE **GAMMERLER, CIVIEMME, ROTASCHNEIDER, RIMA**: production and grinding service

For printing industry, in particular, we offer:

- **CUTTING SYSTEM FOR ROTARY PRESS MACHINES**
- Grinding service for any kind of circular knife, circular trimmer knives like **GAMMERLER, CIVIEMME, MÜLLER MARTINI, ROTASCHNEIDER, RIMA**, etc.;
- Production of carbide insert for circular knives **GAMMERLER, CIVIEMME** and **MÜLLER MARTINI**;
- Production of bottom carbide knives for **ROTASCHNEIDER** and **GAMMERLER**.
- **CUTTING AND PERFORATION SYSTEM FOR ROTARY PRESS MACHINES.**

We can produce steel and carbide knives and perforating knives of any kind used on rotary press during the printing process.

72x14x4 mm radius

72x14x4 mm radius

63x14x4 mm radius

CARBIDE INSERT for **GAMMERLER**
circular knives: production service

CARBIDE KNIFE AND BOTTOM KNIFE FOR MAN ROLAND CUTTING SYSTEM:
production and grinding service

Bottom knife diam. 150X100X10/5

Circular knife diam. 140x70x2

**BOTTOM STEEL KNIFE FOR
MAN ROLAND MADE IN 2 PARTS**

CARBIDE KNIFE AND BOTTOM KNIFE for ROTASCHNEIDER, CIVIEMME and RIMA SYSTEM:
production service

Circular knife diam. 308x225x8 dx/sx z60

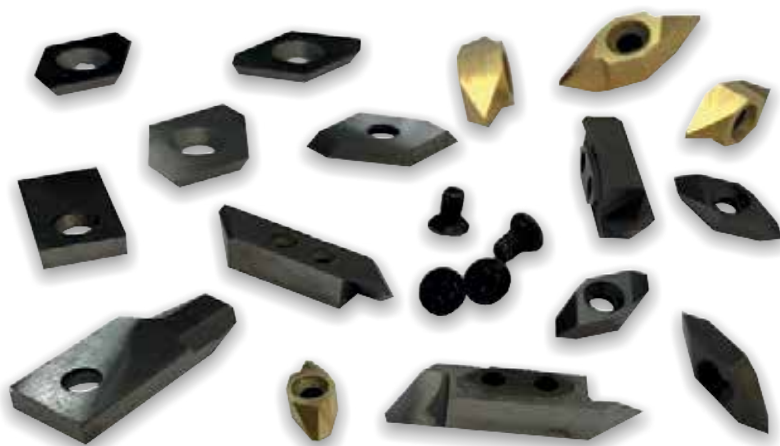

Bottom knife diam. 150x110x5

PRINTING TOOLS

MILLING CUTTER, ROUGHING BLADE, BOTTOM KNIFE AND SPARE PARTS FOR MÜLLER MARTINI, KOLBUS, HORIZON, WOHLBERG BOOK BINDING MACHINES

- Milling cutter knives (**MÜLLER MARTINI, KOLBUS, HORIZON, HARRIS, WOHLBERG**, ecc.);
- Roughing blade;
- Bottom knives for milling cutter;
- Saw blade for every kind of machine;
- Knives and perforating knives for every kind of folding machines (**MBO, Stahl, Bonelli, Herzog, Guk, Shoei**, ecc.);
- Bottom knives made of steel or nylon for folding machine;
- Production and sale services for cutting trimmer knives;

CARBIDE INSERTS FOR MILLING CUTTER **MÜLLER MARTINI CORONA, BOLERO, ACORO, ALLEGRO, PANTERA**
diam. 250-320 Z24 – Z30 – Z32

MILLING HEAD FOR MÜLLER MARTINI CORONA, BOLERO, ACORO diameter 250-320 Z24 – Z30: production

**BOTTOM KNIFE FOR MILLING CUTTER
BOOK BINDER MACHINE MÜLLER
MARTINI: ACORO, CORONA, BOLERO,
ALLEGRO, PANTERA etc.:**

Production and reconstruction service

KNIVES AND PERFORATING KNIVES for every
kind offolding machines **MBO , Stahl, Guk,
Herzog, Shoei** etc.:

Production service: **SACAU** produces standard
knives with the original code or special knives
with teeth and measure required

STEEL AND CARBIDE TRIMMER KNIFE

production, sale and grinding service
