

SUN PROTECTIVE CREAMS SPF 15, SPF 30, SPF 50+

ACTIVE INGREDIENTS	FEATURES
Complex of active ingredients to repair DNA damage	Active complex designed specifically to treat skin subjected to UV rays, protecting DNA and stem cells from damage caused by them. In particular it contains a natural antioxidant with UV absorbing properties that reduces the dose of UVA and UVB that penetrate the skin. It works against free oxygen radicals which are the main cause of DNA damage by rapidly regenerating the skin. It also contains a nucleotide precursor that increases the reparative action of the DNA double helix. Finally, it reduces the appearance of skin rashes.
18-beta Glycyrrhetic acid from Licorice	Active composed of a mixture of starches, sugars including glucose, sucrose, flavonoids, isoflavonoids and saponosides extracted from the Glycyrrhiza Glabra plant. On the skin plays a anti-reddening action favoring the activity of the immune system.
Biomimetic lipid concentrate	It contains a mix of fatty acids, cholesterol, ceramides and phytosphingosines that mimic the natural formation of the lipid barrier of the skin restoring the natural skin protection and repairing the barrier. Ideal for the treatment of dry and sensitive skin, it also has an anti-age effect and acts in the treatment of acne and dermatitis.
Aloe Vera	It has a moisturizing, soothing, anti-inflammatory and nourishing action.
Vitamina E	It has a soothing and antioxidant action protecting the skin from skin aging due to the formation of free radicals.

TANNING INTENSIFIER

ACTIVE INGREDIENTS	FEATURES
Potassium Caproyl Tyrosine	Active functional derivative ingredient of Tyrosine, activator of melanogenesis and tanning sublimer. Thanks to its activity on the production of melanin promotes a uniform and lasting color, able to increase the natural protection of sun exposure.
Hyaluronic Acid	It has a moisturizing effect. Leave the skin smooth, soft and compact. Helps fight the signs of aging.
Trehalose	Moisturizer with long lasting effect.
Allantoin	It has a soothing, astringent action and stimulating microcirculation.
Aloe Vera	It has a moisturizing, soothing, anti-inflammatory and nourishing action.
Vitamina E	It has a soothing and antioxidant action protecting the skin from skin aging due to the formation of free radicals.
Karitè butter	It is rich in healing properties. It has excellent anti-inflammatory properties and stimulates the production of collagen. Contains phytosterols and vitamins for an intense soothing and nourishing effect.
Rice bran oil	With emollient, moisturizing, smoothing and nourishing action.
