

HANDY, HARMONIOUS, INTUITIVE.

MCS MOBILI

Bedroom and living-room furniture,
designed and manufactured entirely in Italy.

HANDY, HARMONIOUS, INTUITIVE.

Who we are

MCS MOBILI S.R.L. is an Italian manufacturer of master bedrooms, children's and teens' bedrooms, wardrobes and living-room furniture. We are based in Mombaroccio, province of Pesaro and Urbino, in the Marche furniture district.

We are not a trading company: the entire production cycle is run in-house, from raw material processing to the finished, packed product. That integration is what allows us to combine consistent quality, reliable lead times and a competitive value for money.

We work mainly B2B, through a widespread network of retailers across Italy and customers abroad, and we manufacture semi-finished components and contract work for other furniture companies.

Our approach is make to stock: finished products are held in our warehouse, so the retailer can order what is needed, when it is needed - even a single component.

26,000 sqm

total surface

3

production plants

56

direct employees

8,000

pieces and components a day

1,500+

buyers served every month

100%

made in Italy

Integrated production

Eight operations, one integrated cycle, no step outside our control.

Panel cutting	Squaring	Shaping	Edgebanding
Drilling	Assembly	Packing	Shipping

We start from the raw panel and end with the packed carton ready to ship. Every stage takes place in our own plants, with up-to-date woodworking technology and people who, in many cases, have been with us for over twenty years.

Every package is tracked by barcode. The MES and WMS systems that govern production and the warehouse are developed in-house and give us real-time progress, consumption and yield for each stage.

Under normal conditions production takes around 15 days. Products held in stock are available for immediate delivery.

Our collections

Modular collections: the room is composed element by element, with the same care across every price range. The range is completed by the Easy and Easy18 lines, the Block24 children's bedroom and our living-room units and sideboards.

LYRA

Contemporary master bedroom. Warm neutrals, clean horizontal lines, a full-height wardrobe that becomes an architectural wall.

HYDRA

A warm contemporary bedroom: wooden headboards that carry the bedside units, slim elevated beds, matching wardrobes and dressers.

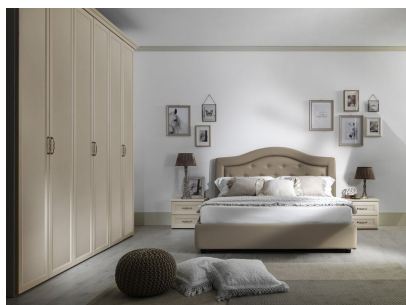

OMNIA

The modular kids and teens bedroom, the collection we are best known for: bridge units, wardrobes, pull-out and bunk beds, desks and bookcases.

AFRODITE

The classic children's bedroom: framed doors, soft profiles, antique-effect handles, white and ivory lacquered finishes.

DEMETRA

The classic master bedroom: hinged and corner wardrobes, upholstered beds with buttoned capitonne headboards, matching bedside tables and chests.

The 3D configurator and retailer services

Selling a room is easier when the customer can see it before buying it.

We license our partners the 3CAD 3D configurator: the retailer composes the room together with the end customer and shows a photorealistic render in real time, before the order is placed.

No minimum order

Thanks to our depot network and groupage shipments, a retailer can receive even a single component without having to fill a full truck.

Immediate delivery

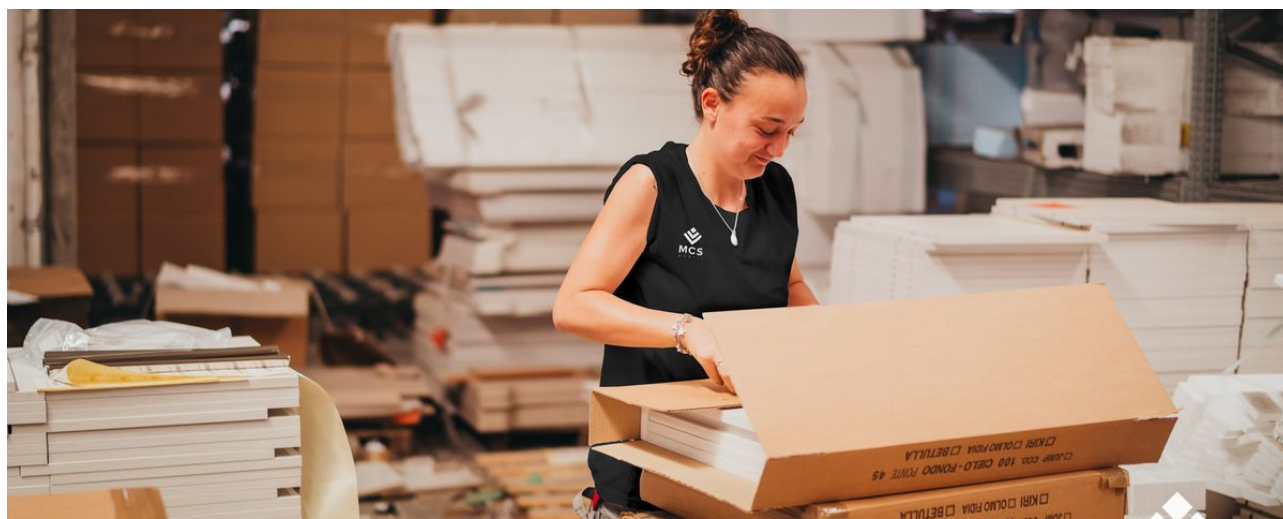

Our make-to-stock approach and finished-goods warehouse cut the waiting time for the end customer.

In-house after sales

A dedicated department analyses and solves every claim quickly, with fast supply of spare parts.

Flat-pack kits

Pre-assembled products with assembly manual; nightstands, chests of drawers, tallboys and mirrors are delivered fully assembled.

Sustainability

For us the raw material is a choice, not a cost item. All the panels we use are made of 100% FSC-certified post-consumer recycled wood, obtained without felling any tree, with low formaldehyde emission.

Our plants produce no emissions into the atmosphere. The paper, cardboard and plastic used for our packaging come from recycling. Part of the energy we consume is self-generated by our photovoltaic system.

Contract manufacturing and projects

The business we started from is contract panel manufacturing, and we still do it: we produce semi-finished components and machining for other furniture companies, with full respect for the intellectual property of their projects.

In the contract channel we serve residential, public and hospitality projects. For orders of 100 pieces and above we manufacture dedicated batches, with full container loads and just-in-time shipments.

International markets

Italy is our main market, served through a widespread network of retailers. Abroad we are present in Europe, Switzerland and the United Kingdom, in the Middle East, North Africa and the United States.

We normally work EXW and, on request, FOB, with full container loads and just-in-time shipments. We handle customs documentation, technical data sheets and custom export packaging.

OUR MISSION

To create warm, comfortable and highly personalised everyday spaces, following the principles that matter in today's society: value, durability, practicality and charm.
