

Ridart is a well-known company experienced in the manufacture of safety valves for fuel and chemical storage tanks. Production originates and develops in the factory placed in northern Italy and inside it all processes are focused and controlled. For more than 50 years Ridart has been manufacturing valves with passion and competence and its success is mainly embedded in new technologies investments, cutting-edge processes, research and development combined with advanced measuring devices and accuracy testing tools. Moreover, the strong relation with customer is another milestone in our mission especially where a tailored solution could become a plus as well for his strategy. In fact, Ridart is equipped with a laboratory that in a few weeks may arrange for a prototype following to customer instructions. Finally Ridart is able to deliver product Certification where requested. All our products meet current legislation and standards: ATEX Directive 2014/34/EU covering all equipment used in confined areas including Flame Arresters: EN ISO 16852. We export our products to over 50 countries and our goal is to increase the global presence.

- **Forecourt Equipment:** Overfill Prevention Valves, Emergency Shear valves, Flame Arresters, Pressure Vacuum Vents, Vapor Recovery Couplings.
- **Tank Truck Equipment:** Dry Break Couplings, API Adaptors, Loading Valves and Couplings.
- **Mobile tank Accessories:** Adjustable Check Valves, Anti-Siphon Valve, Safety Valves.
