# VISION: VISUAL MUSIC

## Music meets food

- Why do I imagine the machine? A different vision.
- I perceive sensations beyond the auditory one. Synesthesia. And I would like to let my audience taste it.
- Music and food share the concept of nourishment (food nourishes body, music nourishes soul), and music is as ephemeral as food.
- They are both nonverbal languages, bringing us back to primary relationships

# MUSIC MEETS FOOD

UNCONVENTIONAL MERCHANDISING  
BY SILVERSNAKE MICHELLE

Silversnake Michelle's sweet box sets produced by Snake Machine.  
The union of the pleasure of listening and the pleasure of the taste.

But how does one create such a special union?

Starting with art and always ending with Art as in a perfect circle. Because music is art and creating quality food products is art either.

We have made every effort to:

- embrace artistic/musical visions "out of the box"
- merge Silversnake music with ARTisans of taste who work with passion, meticulousness, and using only and exclusively genuine raw materials
- supporting Made In Italy

The result will be perceptible with your ears and your mouth, touching the NOTES of your heart.

A product available in stores that have as their strong point the quality and refinement of the product, and that, like us, have the courage to dare and make people appreciate the "taste " of art in a new way.

By purchasing this product you too will become a supporter of this art project, and part of the gears of the "machine."
