P6

## PRICE LIST 2025

E-BIKE SMART STATIONS

### PAYMENT MANAGEMENT

The owner of the charging station can control with our APP the power supply in the Schuko sockets for charging E-bikes. At the discretion of the charging station owner, the user will be able to access the charging service for free or by paying a fee, using an easily downloadable application via QR-CODE and pay, if requested, via credit card. The charging station owner will then be able to establish an hourly price for this service.

### ELECTRONIC SENSOR MANAGEMENT

a) PEOPLE COUNT sensor which counts the number of pedestrians and cyclists who pass in front of the station showing the data on the display.

b) sensor to detect AIR QUALITY and specifically the levels of PM1, PM2.5 and PM10 fine particles. Our APP provides both a daily and/or periodic value and an easy and intuitive interpretation of the data with respect to a pre-established tolerance range which tells us whether the value is within the norm or not.

c) sensor to CHECK the correct OPERATION of the ELECTRICAL SOCKETS. This allows the station manager to remotely monitor and discover any malfunctions of the station in the supply of electricity for charging the e-bikes.

### GEOLOCATION

Using our APP the installers can easily geolocate the stations in the exact point of their installation. At the same time the end user (the cyclist), via QR - CODE placed on the column, will be able to view the map of all ST&GO installations.

### LOCK-UNLOCK ELECTRICAL SOCKETS

The station manager can control the electricity supply by establishing, for example, a supply block in certain time slots.

**INT-ST&GO**  
5.150€ + VAT

**COLONNINA INTELLIGENTE**

PAYMENT RECHARGE SENSORS TOOLS

ADDITIONAL ACCESSORIES & SERVICES

Equipped with maintenance tools and tire inflation pump with universal connection and 2 Schuko sockets for charging E-Bikes. With on-board electronics that communicate with our APP to manage the blocking-unblocking of sockets in certain time slots and for the payment management of the charging service both with our card and with the most common credit cards via smartphone. With people counting sensor and detector of the main air pm (pm1, pm2 and pm10). Equipped with a display for viewing (at the owner's discretion) the data collected by the sensors and for managing the charging service. With integrated QR-CODE for GEOLOCATION of the station during its installation.

MODULAR RACKS

Modular racks in anticorodal aluminum that are easily customizable thanks to their predisposition for our accessories. It is possible to insert bike racks (see accessory: "PB-EXTRA-6") and Schuko sockets (see accessory "KEBP-EXTRA 6") on the BACK of the RACK effectively doubling their capacity (**therefore 12 bike racks and 12 charging sockets**); you can also insert the **brackets to accommodate electric scooters** to be recharged using the existing sockets on the rack (see accessory: "MP-5" and "MP-10"); you can insert the **safety brackets to fasten the bicycle frame to the rack** (see accessory: "STAFFA-RAS"); a maintenance-only column (for example the ST&GO or ST&GO-PLUS) can be inserted at the head of the rack, which replaces one of the 2 vertical legs of the rack and integrates perfectly with it.

**RAS-M-6 MODULAR RACK (PARKING ONLY)** 2.590€ + VAT

An aluminum modular grid, 2.7 meters long, compatible with our "ST&GO" maintenance stand. It includes an upright rack that can hold **up to six bikes**.

- Height: 790 mm

**P-D-FLY-EXTRA** 530€ + VAT **BUTTERFLY BIKE RACK MODULE - DOUBLE**

The price of P-D-FLY-EXTRA must be summed for each unit you wish to add to the basic P-D-FLY model. The measure of each P-D-FLY-EXTRA unit is 49.6 x 98.5 x 56.8 cm, which is added to the basic model P-D-FLY. For instance, the total width of a rack with 1 P-D-FLY-EXTRA would be 151,6cm (102 + 49.6).

- Length: 496 mm
- Width: 985 mm
- Height: 568 mm

- Length: 1516 mm
- Width: 985 mm
- Height: 790 mm

VERTICAL PARKING

**P-VERTICAL-ST&GO VERTICAL PARKING SOLUTION**  
544€ + VAT

The "P-VERTICAL-ST&GO" by Bike Facilities represents a universal vertical bike parking solution that maximizes space efficiency, accommodating both traditional and e-Bikes, with wide or narrow tires. Its innovative **non-electric** internal mechanism simplifies the process of lifting and parking bicycles vertically, resulting in space savings of up to **40%** compared to conventional floor bike racks. Crafted from anodized aluminum and zinc-coated painted steel, it is available in standard yellow with metallic finishes (see picture).

**Dimensions:**

- Height: 170 cm
- Width (front view): 12 cm
- Depth (from wall): 34.5 cm

**Compatibility:**

- Tire width: fino a 3" (7.6 cm)
- Wheel diameter: a partire da 24" in poi
- Maximum bike load: fino a 30 Kg

**INTERNATIONAL SHIPPING**  
Installation not included

Prices on demand

**PACKAGING SIZE**  
172 x 33 x 31 cm

**WEIGHT**  
8 Kg

**DELIVERY OF ACCESSORIES**

If purchased together with the vertical bike rack, the shipping costs for accessories are included with the shipping of P-VERTICAL-ST&GO.

**BARRA-2-ST&GO**  
250€ + VAT

**ACCESSORY**

**Anticorodal aluminum charging bar** (20cm L, 15cm H, 10cm D) featuring **two adjacent Schuko sockets**, a magnetothermic circuit breaker, and a 5-meter power cable with a top-side outlet.

SHIPPING Prices on demand

**COLOR:**  
white  
RAL 9010

**P-SAFE-ST&GO**  
121€ + VAT

**ACCESSORY**

"P-SAFE-ST&GO" is anchored to the ground at the base of the vertical bike rack "P-VERTICAL-ST&GO" and serves both to secure the bicycle frame and to prevent bicycles with tires larger than 3 inches (7.6 cm) in width from approaching the vertical bike rack. It is made of stainless steel.

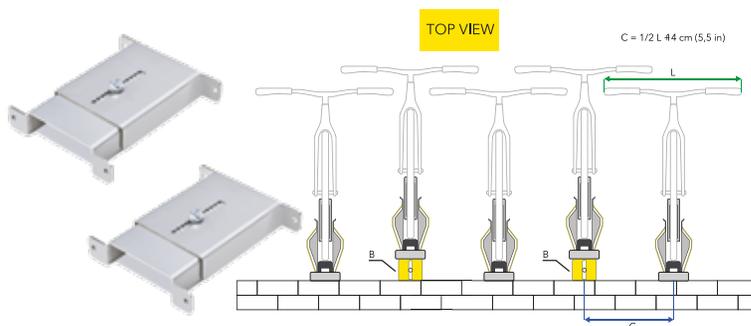

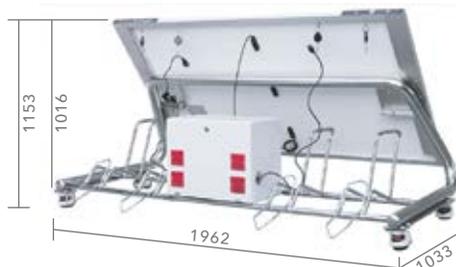

**P-EXTENSION-ST&GO**  
84€ + VAT

**ACCESSORY**

"P-EXTENSION-ST&GO" allows the installation of the bike rack detached from the wall (the installation protrudes from 13 cm to 20 cm from the surface of the installation wall); this way, it's possible to install another vertical bike rack beside it (P-VERTICAL-ST&GO) without handlebars colliding, enabling easy bike retrieval. This accessory provides **additional space-saving opportunities**.

"P-EXTENSION-ST&GO" is made of stainless steel. The set includes 2 units of "P-EXTENSION-ST&GO" along with all necessary screws and installation guide.

**TUBE S-A      TUBE SOLAR**  
**10.340€ + VAT      STAND ALONE**

Rack with solar panels for parking and charging E-Bikes. **STAND ALONE** model, **not connected to the electricity**, ideal for areas not covered by the electricity (shelters, mountain pastures, parks, cycle paths, etc.).

**TECHNICAL FEATURES:**

- 1 monocrystalline PV module of 380 Wp with 45° inclination - charge up to 4 E-Bikes simultaneously.
- 2.0 kW Power Station Bluetti (photo 2), cap.2.0 kWh, lithium phosphate battery-fast charging 3.5 hours, 230V.
- 2 integrated chargers (at choice: Bosch, Yamaha, Shimano, Brose). Possibility of 2 additional ones.
- 2 of 230V SCHUKO IP55 sockets (photo 1) for charging E-Bikes.
- 4 bike racks STABILUS BY PAROLIN.
- Tubular structure in electro-polished scratch-resistant AISI 304 stainless steel (steel color only).
- Retractable steel cable to connect and accompany each plug of the chargers integrated into the bicycle (photo 3)

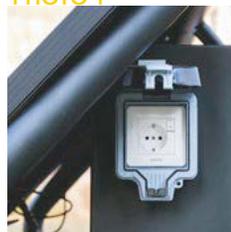

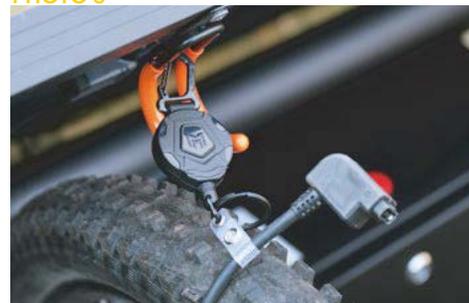

PHOTO 2

PHOTO 3

**TUBE S-R      TUBE SOLAR**  
**7.750€ + VAT      E-GRID CONNECTED**

This system allows the electricity produced and not used by the solar panel for e-bikes to be reintroduced into the grid and used immediately for other domestic needs (without the possibility of accumulation). The average annual saving, considering a typical family of 4 elements that consumes approximately 2300 kWh/year, is approximately 470 kWh/year, equal to **20% of domestic electricity consumption**.

**TECHNICAL FEATURES:**

- 1 monocrystalline PV module of 380 Wp with 45° inclination - able to charge up to 4 E-Bikes
- Inverter certified CEI 0-21 Standard.
- 2 integrated chargers (at choice: Bosch, Yamaha, Shimano, Brose). Possibility of 2 additional ones.
- 2 of 230V SCHUKO IP55 sockets (photo 1) for charging E-Bikes.
- 4 bike racks STABILUS BY PAROLIN.
- Tubular structure in electro-polished scratch-resistant AISI 304 stainless steel (steel color only).
- Retractable steel cable to connect and accompany each plug of the chargers integrated into the bicycle (photo 3)

PHOTO 4

PHOTO 5

**ADDITIONAL ACCESSORIES & SERVICES FOR BOTH MODELS**

- 880€ + VAT • Color available: steel only (included in the price).
- 440€ + VAT • 2 additional integrated chargers (total 4 chargers / rack)
- 440€ + VAT • Insertion of side panels with customisation. graphics with wrapping method (photo 4)
- 440€ + VAT • Customizable graphics with front case wrapping method (back of the panel photo 5)
- 440€ + VAT • Predisposition for fixing to the ground (included in the price).
- 440€ + VAT • Wheels to move the rack (equipped with a stabilizer or brakes).

## SHELTERS FOR PARKING/CHARGING BIKES & E-WHEELS

The ST&GO line of shelters allows you to park your bicycles while sheltering them from the weather. It is a very versatile line which presents a model with a "Stand Alone" photovoltaic system with accumulator and not connected to the electricity grid (**PENS-S-ST&GO**), a model with a charging bar to be connected to the grid (**PENS-E-ST&GO**) and a "basic" model for parking bicycles (**PENS-B-ST&GO**). All models are compatible with other accessories from the ST&GO line (see the brackets for parking scooters MP-5, the safety brackets for securing the frame of the bicycle to the shelter **STAFFA-RAS** and charging bars with integrated chargers **M-6-MIX** and **M-6-C**).

STAND ALONE SOLAR SHELTER

**TECHNICAL SPECIFICATIONS:**

- **Aluminum structure** made up of aluminum tubes (diameter 200 and 100 mm, thickness 3 mm). The roof is made of an aluminum structure strengthened by tubular crosspieces measuring 80x80 mm, thickness 3 mm. In the upper part there is a sheet metal structure where the solar panels are housed (**exclusively relates to the photovoltaic model**). In the rear part of the roof there is a channel for water drainage.
- **Mono crystalline solar panels:** panels from 435 W / panel.
- **Powder coating:** resistant to atmospheric agents and UV rays.
- **Electric rack for charging e-bikes and scooters** made up of a tube with a 150 x 100 mm section, 3 mm thick, containing 6 recessed Schuko sockets with 230V IP54 protection and 50 Hz frequency and 6 vertical bike racks. **Equipped with a 2.3 Kw/h and 100Ah lithium storage battery.**
- **Integrated safety system:** the PENS-M-ST&GO shelter is equipped with 3 Id 0.003mA thermomagnetic differentials. Features: • Trip delay time: INSTANT • Rated current: 25/22A • Complies with the standard: CEI EN 61008 • Indicator light: voltage present for each Schuko socket.

SHELTER FOR BIKES & SCOOTERS

# BIKE FACILITIES

*keep on moving*

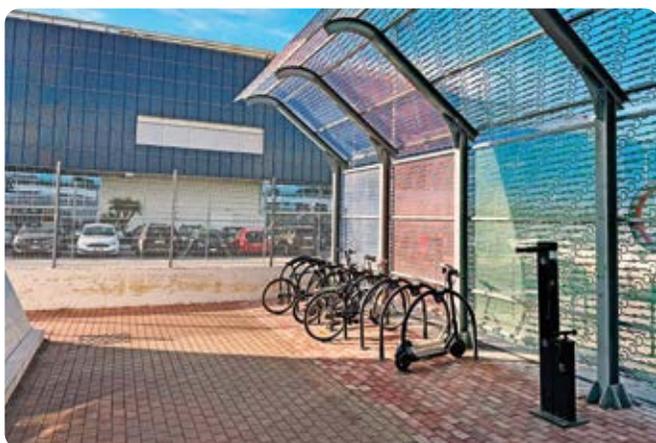

## EXAMPLES OF ON-SITE INSTALLATIONS

Today, **Bike Facilities** boast over **1,000** installations located in Italy alone, with a noticeable presence in public spaces such as squares, bike paths, trails, schools, universities, etc.

REAL-WORLD APPLICATIONS

### BIKE TO WORK CONCEPT

Recharging and maintenance stands at workplaces ensure reliable commutes, reduce downtime, and promote a healthy, eco-friendly workforce.

### BIKE HOTELS

For owners, these bike stands increase guest satisfaction, differentiate the property, and encourage longer stays, boosting revenue.

### CYCLING PATHS

Installing recharging and maintenance stands on cycling paths ensures convenient, continuous rides and promotes eco-friendly commuting.

### COUNTRY SIDE ROUTES

The BIKE FACILITIES stands also enhance safety, attract more cyclists, and boost local tourism by making rural areas more accessible.

# BIKE FACILITIES

*keep on moving*

## EXAMPLES OF ON-SITE INSTALLATIONS

We not only supply big companies by promoting a "Bike to Work" program, but also many bike-friendly accommodations (hotels, bike coffee shops, B&Bs, mountain lodges, and private properties).

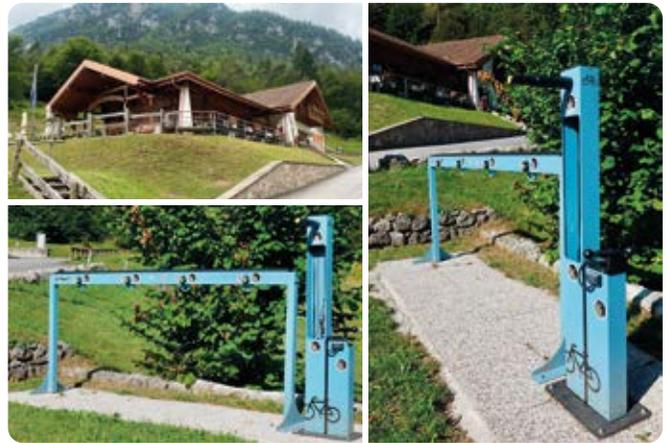

### URBAN PUBLIC SPACES

Promote sustainable transport, reduce the need for car travel, and create cyclist-friendly environments that attract residents and tourists alike.

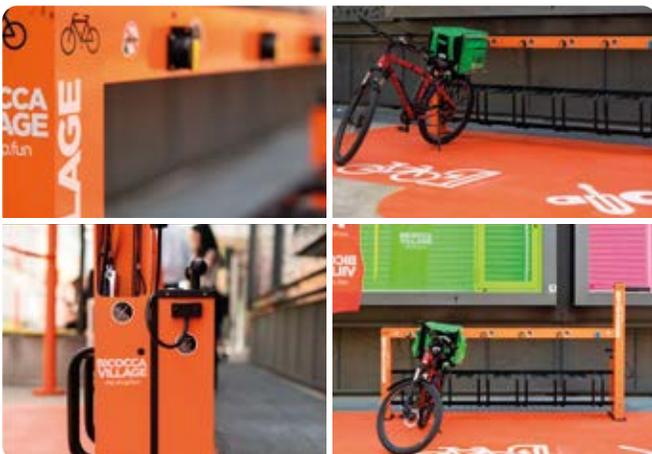

### MOUNTAIN HUTS AND SHELTERS

Encourage sustainable practices, reduce parking congestion, and provide a competitive edge by catering to the growing number of e-bike users.

### SHOPPING CENTERS

Enhance eco-friendly shopping habits, boost foot traffic, and position the mall as a cyclist-friendly destination, leading to customer loyalty.

### ACADEMIC AND CAMPUS

Reduce transportation costs for students, decrease campus traffic, and contribute to any university's sustainability initiatives and reputation.

REAL-WORLD APPLICATIONS

## A WIN-WIN SOLUTION!

### TOURISM

**Go the extra mile** to welcome biker guests, they will appreciate the attention given to the cycling community.

**A compact** stand easily integrated into the building's spaces and customization to maximize image consistency.

### LOCAL AUTHORITIES

**Low investment** highlighting the area's focus on sports, even where it's an urban environment.

**A structure** that can blend in perfectly with the surroundings.

**A sustainable** and inclusive solution: the charging point can also be used by disabled electric wheelchair users.

### APARTMENT BLOCKS

**An ideal product** providing tenants with a mini-workshop and boosting the use of bicycles around town or for getting to work.

### BUSINESSES

**An increasingly** sought-after service that can improve employees' quality of life.

**Many companies** have already provided their employees with bike charging and maintenance stands by inspiring the "Bike to Work" concept. The program is also driven by government benefits.
