

**HUBZERONET**

# HUBZERONET

*All green fuels and Guarantees of Origin  
in one single payment tool for you and your Clients.*

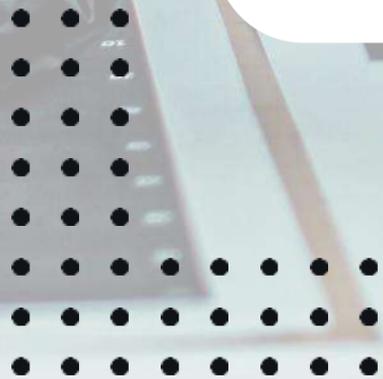

HUBZERONET

**01 About Us**

**02 An Overview of Our Fuel Card**

**03 Guarantees of Origin:  
Transparency and Opportunities**

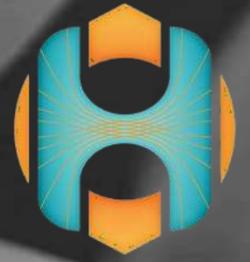

HUBZERONET

# Our *Mission*

*“**Supporting** transport companies in their strategic choices and **guiding** them towards a **Net Zero** approach, with extensive network coverage across (BIO) L-CNG and electric.”*

HUBZERONET

# Our *Vision*

*“Decarbonizing the transport industry and enabling it to achieve Net Zero in Europe and worldwide. Wherever **alternative and sustainable fuels** are available, HubZeroNet is there.”*

# OUR STRATEGY

HUBZERONET

Creating market demand for gas suppliers by offering a modern **fuel card system**.

Connecting Customers who need to decarbonize their fleets with a broad **network of refueling stations at competitive prices**.

Bringing business to service stations, accelerating their return on investment through **Customer acquisition**.

Opening our **low-emission refueling network** to other fuel card systems.

# HUBZERONET CARD

HUBZERONET

Dedicated solely to today's and tomorrow's **sustainable fuels** (L-CNG, BIO L-CNG, Hydrogen and Electric).

**A single payment tool** for the entire network.  
Agreements with each station operator are finalized directly by HubZeroNet.

**Guarantees of Origin (GO)**

Payment available through **mobile app**.

# OUR NETWORK

HUBZERONET

*A growing network: **45 LNG and CNG stations** already up and running across Italy.*

*Network HubZeroNet LNG*

*Network HubZeroNet & SNAM CNG*

*Expansion goals also at the international level*

# Guarantees of Origin: Transparency and Opportunities

HUBZERONET

The **GO** (Guarantee of Origin) is an electronic certificate issued by the GSE (Gestore dei Servizi Energetici – the Italian Energy Services Operator, guarantor and promoter of sustainable development in Italy). **It certifies the renewable origin of the biomethane molecule**, corresponds to 1 MWh of biomethane (approximately 72 kg), and can be used for sustainability reporting (today) as well as for ETS2 compliance (from 2027).

Compliant with **European regulation**: introduced in Italy in 2023, valid across the EU under the RED Directive. **A single certificate recognized by the GSE.**

**Decoupling between the physical molecule and its certificate**: to be certified, it is not necessary to refuel at a station that sells biomethane, but only to purchase the certificate (even when refueling with natural gas).

**Usable for sustainability reporting and, in the future, for ETS2**: in the transport sector, they make it possible to certify the use of biomethane and reduce Scope 1 emissions (for transport companies) and Scope 3 emissions (for shippers/clients), thanks to the unique identification of the user within the certificate.

The screenshot shows a document titled "Cancellation Statement" from GSE. It includes the following information:

- Cancellation Statement**: This cancellation statement provides the proof of origin for 556 MWh consumed energy. This cancellation statement proves that 556 Guarantees of Origin has been cancelled in the Italian Energy Certificate System powered by GSE.
- Sector**: Gas Transport, End Consumer Type: Logistic, Sub-Sector: Heavy Road Transport, Gas Usage: Transport.
- Performed by**: Account Holder Name, Account Holder Code, VAT Number, Account, Domain, Street, Postal Code, City, Country.
- On behalf of**: Name of Beneficiary, Beneficiary VAT Number, Consumption Start, Consumption End, Country of Consumption, Location of Beneficiary, Usage Category, Type of Beneficiary.
- Transaction Information**: Transaction Date: 2024-09-26 15:24, Transaction Number, Cancellation Purpose: Annullamento Garanzie d'Origine per XXX per il mese di XXX per XXX kg, Volume Cancelled (sum): 556.
