

HAND MADE SOAP WITH OLIVE OIL

Hand Made Cold Process

Why we produce hand made soap with olive oil, only with cold process?

OLIVE OIL

Industrial soap is made from tallow, palm oil and coconut oil. Olive oil is very difficult and slow to work, but produces the best soap, very delicate even on sensitive skin.

In our soaps you will find only the best olive oil, organic medicinal herbs and essential oils or natural fragrances. You will never find preservative agents, petrolatum and paraffin as in industrial soaps. We are also in progress to obtain the Halal certification.

COLD PROCESS

Making cold process soap means making a product totally different from the industrial one, both the appearance and the consistency. The old hand process preserves inside the glycerin. The industrial process must separate glycerine to work the soap in the machines. The soap that contains naturally produced glycerine is much more emollient to the skin. We use the ancient Italian technique working by hand to get the best soap.

ON CUTTING SOAP

You can choose to buy packaged soap bars or large bars of soap to cut with the kitchen knife. It is possible to do it just because our soaps are made with olive oil without paraffin. Even after many years from the production date you can continue to use the knife.

People are very intrigued by the idea of buying cut soap. You can touch it and smell it without plastic packaging. You can decide whether to sell it by weighing it or by piece.

PRODUCTION

- Owner label Sapone Antichi Ricordi

- Private label with CPNP transcription

- Biodegradable packaging according to the distributor

OUR PLUS *We are an artisan company. All our product are handmade. This allows us to increase or decrease production simply based on the number of workers employed for manual operations. We have large spaces available for product storage and skilled workers able to manage the work teams during the production phases. Ten people work permanently in our factory, to which are added 8 seasonal workers during production peaks. Our company size allows us to easily meet the specific requests of our customer.*
