

HANDMADE GLOVES SINCE 1923

# ABOUT US

Some Italian cities are historically associated to the traditional art of craftsmanship, and Naples is the capital of gloves.

The history of gloves production starts in one of the oldest neighbourhoods of the city, known as 'Sanita'.

This tradition has lasted now for over two centuries and saw its golden era under the Kingdom of Bourbon.

It's exactly during this time that our story was born.

In 1923 Gennaro Squillace founded Omega Gloves, led today by Alberto Squillace, fifth generation "maitre gantier".

Our creations are made with the finest leathers, locally produced, and lined with pure silk and cashmere from Biella.

It is not by chance that the greatest house of haute couture in the world are Omega's affectionate clients.

The entire production process, including the tanning, the colouring and the treatment, belong to the craft tradition since the Romans times, and is conducted nowadays under the close supervision of Alberto.

The making of a single Omega glove counts no less than 25 production stages, each of them carried out strictly by hand by artists with 'lifelong' experience in this area.

During the creation process, the aspiring glove passes through hands, experiences and traditions that enrich with history the most beautiful fashion stores of the world.

Choosing an Omega Glove means choosing a part of Italian tradition and authenticity, which still lives in the heart of Naples...

Therefore, we thank you for choosing and for supporting us !
