

Corti Srl for Milano Cortina 2026: flame-retardant plastic components for the safety of the Olympic Village

On the occasion of the Milano Cortina 2026 Winter Olympic Games, Corti Srl contributed to the construction of the new Olympic Village, designed to host approximately 1,400 Olympic and Paralympic athletes.

The facility was designed with a long-term vision: at the end of the event, it will be converted into a student residence for university students in the Lombardy capital. A concrete example of urban regeneration and the enhancement of services for the academic community.

Our contribution: technology and safety for controlled access

Thanks to our experience in the field of technical plastics, we were selected by a leading company in the building systems sector to supply plastic components for a security and access control system for the Olympic Village.
