Seven Stars

Founded in February 2018 from an experience created in the field directly with the companies that have made the history of moving worldwide, exploring the strengths of each of them to come up with a revised version to suit today's needs.

Seven Stars specialise in several Core Businesses such as moving, logistics and transport and fine art moving solutions. We operate nationwide and internationally, managing to cover anywhere across Europe and beyond relying on our vehicles only.

We aim to provide only quality services to companies, private individuals and organisations, focusing primarily on their specific requirements, and supported by our professionalis and the expertise of each of them while maintaining a high quality of service.

We are the owner of one of the first Sicilian self-storage facilities located in Messina, a warehouse where any customer can be free to access independently - without having to make an appointment with our staff.

As Seven Stars, we are committed to growing as a dynamic and sustainable company, while maintaining a reputation for reliability and passion in our daily work.

Logistics

We use an integrated logistics system to optimise costs and improve services. Concretely, we manage the various logistics phases by considering them interconnected rather than separate processes. This approach allows us to reduce costs and offer a specialised and personalised service.

We develop innovative logistics strategies supported by a highly competent team operating throughout Italy. We have three logistics warehouses in Sicily specialising in the management and distribution of various goods. We manage logistics transport from factories in Northern Italy to the port of Palermo, passing through one of our three points located right in Palermo and sorting for the rest of Sicily and throughout Calabria.
