VALOS

Statistical solutions
for your clinical trial

VALOS provides comprehensive **data management, biostatistics, and statistical programming services** for Phase I-IV studies and retrospective analyses.

If you need to outsource a part of your clinical trial or drug development project, **VALOS** is the partner you can count on.

VALOS's professionals will communicate effectively and will meet project milestones using processes that match the Sponsor's systems.

VALOS ensures best quality and increases the success of your clinical trial.

Data Management Services

- Development of trial-specific Data Management Plan
- Gathering of requirements for EDC system set-up
- Building, validation, maintenance, and decommissioning EDC system components (eCRF, eConsent, ePRO, Randomization and Trial Supply Management, Medical coding, Data integration/export, eTMF, and Reports)
- Coordination of User Acceptance Testing (UAT)
- Devices (e.g. wearables) configuration, data collection, and analysis
- Data cleaning (automated, semi-auto, manual review)
- SAE reconciliation
- Thesaurus dictionaries coding
- External vendors' data integration and reconciliation
- Protocol deviation identification and reporting
- Clinical trial progress reporting
- (Blind) Data Review Meeting conduct
- Data lock and archival data transfer to the sites/sponsor

Our people

At VALOS all 80+ of our professionals hold a University degree in Mathematics, Statistics, Genomic Statistics or Informatics and have 10+ years' experience in clinical trials. The Data Management Team has 15+ years' experience in Clinical Trials.
