FROM CONCEPT TO CONTROL

Esse Costruzioni Srl

Who We Are

Essentia Industrial Projects is a global provider of advanced climate-controlled environments, specialized in custom walk-in growth chambers, clean rooms and modular controlled-atmosphere solutions for research, industry and high-tech facilities.

With decades of expertise in HVAC integration and environmental control, Essentia combines engineering excellence with total flexibility to meet the exact needs of each client. Every installation is delivered turnkey — from design to commissioning — ensuring reliability, performance and compliance with international standards.

OUR SOLUTIONS

Controlled-Environment Room

Precision-controlled temperature and humidity for long-term stability testing, storage and conservation. Ideal for pharmaceuticals, food and beverage, cosmetics, archives, veterinary and more.

Custom Growth Chambers

Designed for laboratories, R&D, biotech and specialized industries requiring controlled atmosphere, air flow and climate stability, with modular rooms built to specification.

Data center and industrial

Solutions tailored for data centers, industrial HVAC environments, and major infrastructures, combining Ayris technical know-how and Essentia precision.

Why Choose Essentia

Precision, reliability and full custom engineering.

1. full custom engineering
2. precise climate control
3. modular and scalable design
4. turnkey project delivery
5. compliance and validation ready
