FOR 150 YEARS IN THE HEART OF SALENTO

Pimar stands out for its unique tradition in the extraction and shaping of natural stone through production processes that, for 150 years, have embodied the essence of Italian manufacturing skills in the treatment of a material with a history that goes back to the dawn of civilisation.

The limestone extracted from the quarries is used in countless areas of design and construction, from architecture to restoration works, from furniture to works of art.

THE VALUE OF THE QUARRIES

Pimar's activity begins with the extraction of natural stone from the company owned quarries that extend over an area of approximately 40 hectares.

Pimar's age-old limestone is a natural resource processed and transformed thanks to the expertise of master craftsmen and the use of state-of-the-art machinery.

CORE BUSINESS

The experience acquired over more than a century has enabled Pimar to build up its' unique know-how in the extraction and processing of natural stone.

Over the years, Pimar has gained a dominant position in the market through the unrivalled quality of its product and its capacity to manage major architectural projects at national and international level. As well as offering efficient and highly professional consultancy services, Pimar ensures control throughout the entire process, from the initial concept to on-site management.

STRENGTHS

Pimar boasts a portfolio of national and international projects, from which it has acquired great experience in a variety of sectors. Thus, Pimar is able to meet the most complex requests, in any field of application.

- 40 hectares of quarries owned on an exclusive basis
- Technical consultancy and in-house design services at the hands of highly skilled professionals.
- Manufacture of products in line with customers' design and specification.
- Cutting-edge stone cutting and shaping machinery.
- An international network of installers.
- Profound industry know-how.
- Multi-sectorial experience: architecture, constructions, interior design, restoration, design, major residential and commercial projects.

PIMAR'S PRODUCTION LINES

Thanks to its ductility, Pimar natural stone is ideally suited for use in a variety of design contexts and in countless applications: façades of buildings, hotels, design elements, and furnishing elements for indoor and outdoor use.

There are six production lines that identify the world of Pimar, a benchmark for architects, designers and companies.

FAÇADES & THE OUTDOORS

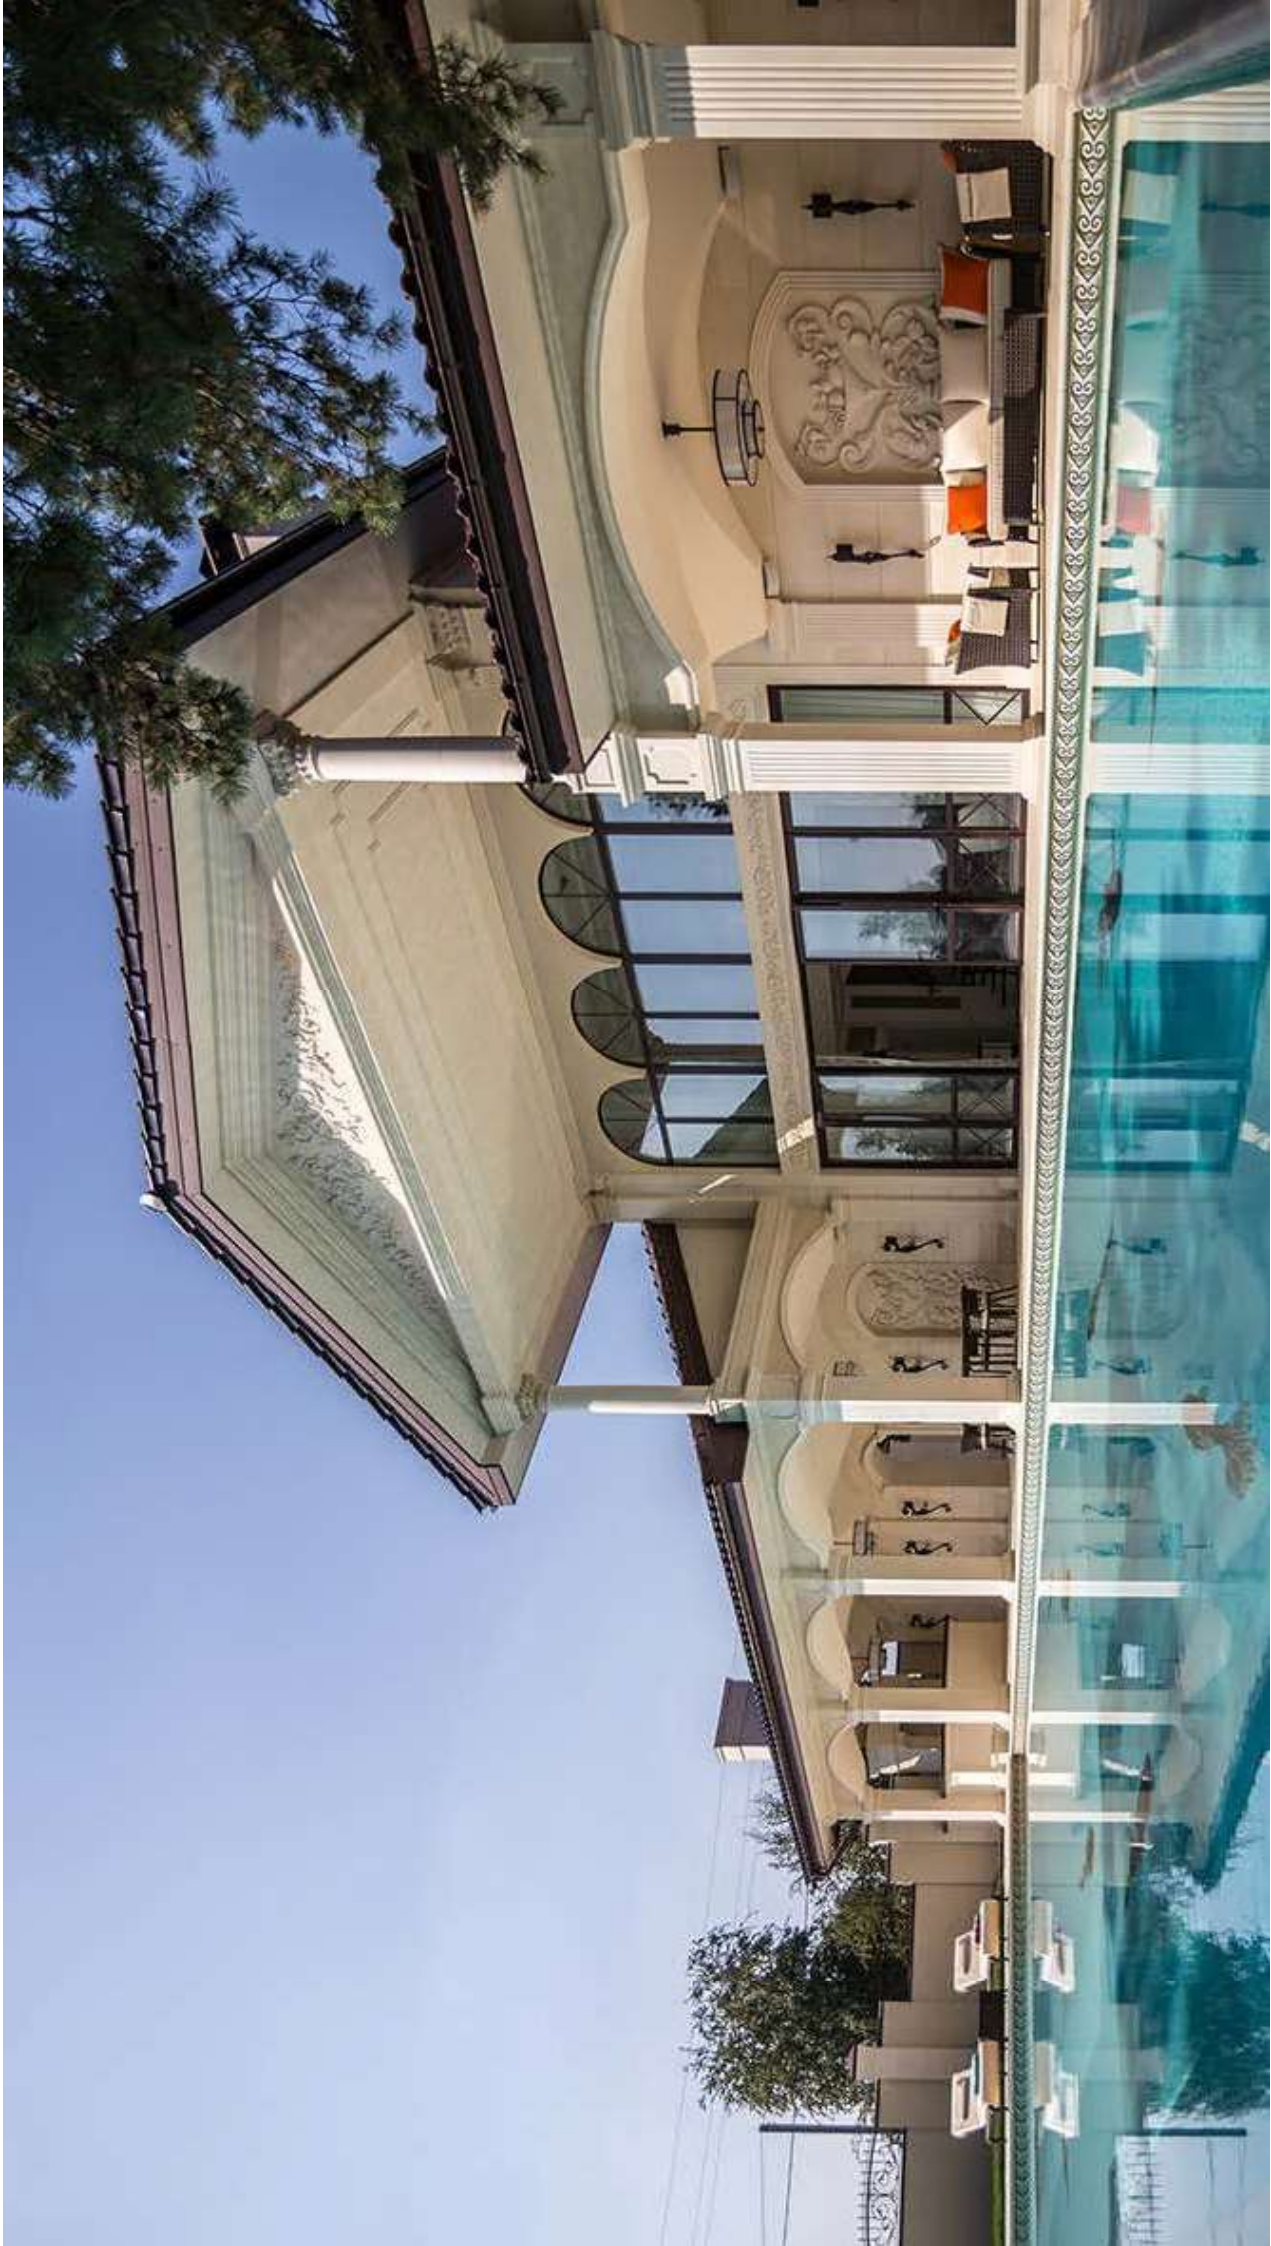

The attraction of Pimar's natural stone, with its extraordinary capacity to absorb and reflect light, finds expression in the realisation of elegant façades for public, commercial and residential buildings, as well as in giving shape to urban, residential and public installations.

The cladding elements produced by Pimar can be anchored by gluing and by mechanical means (ventilated façades). The great experience and know-how acquired over the years, along with a state-of-the-art technical office, enable Pimar to take up any challenge and meet any application requirement.

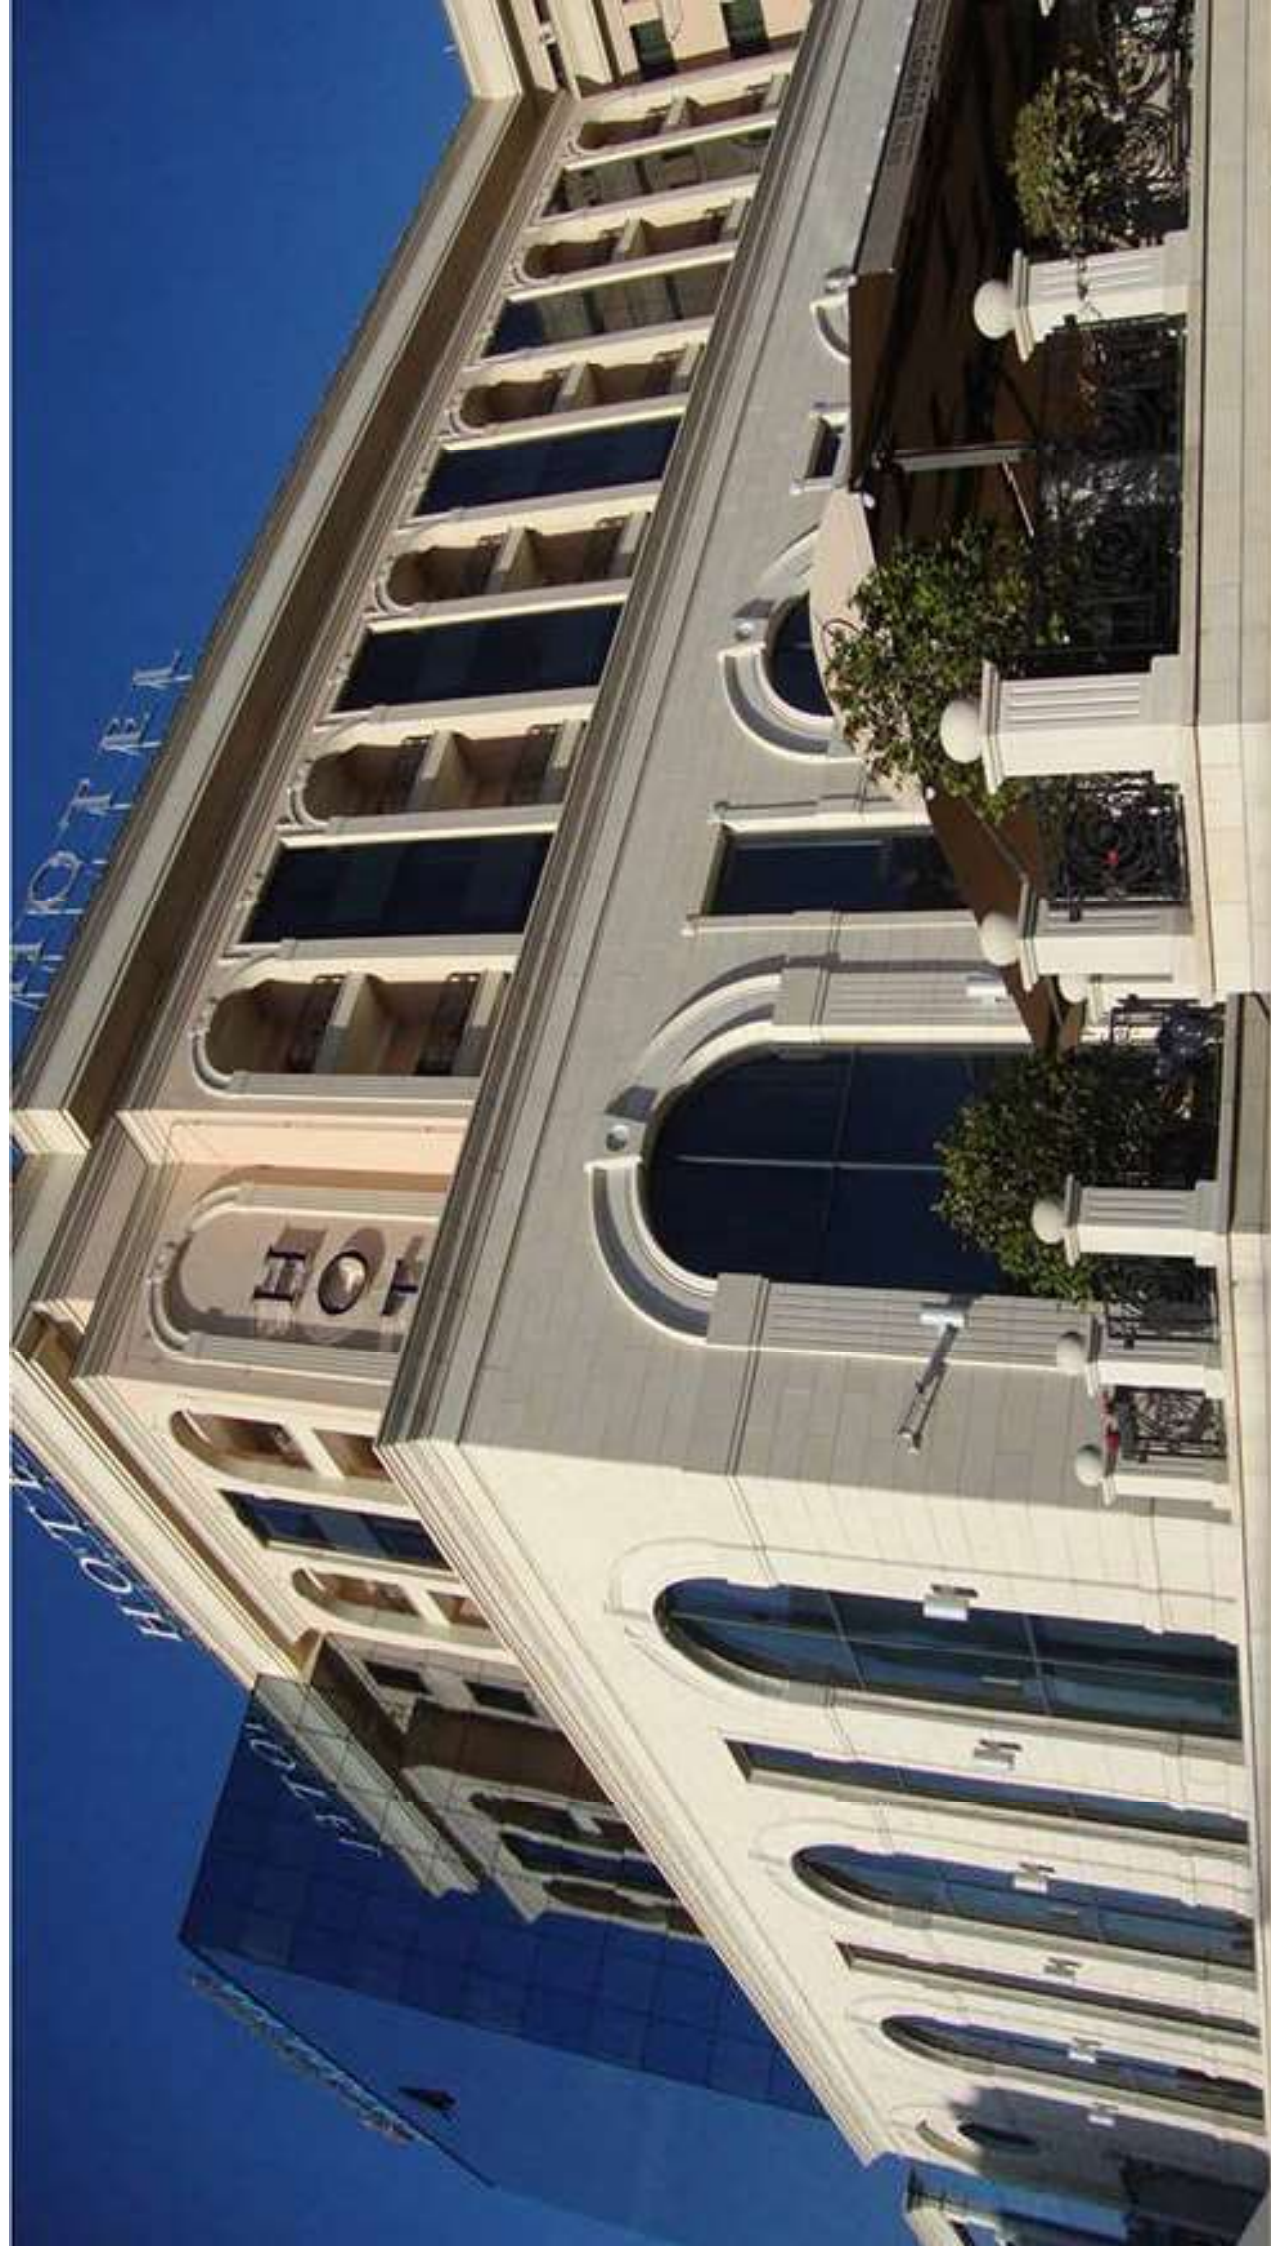

PRINCETON UNIVERSITY USA

ventilated façades.

CONTACT & LIGHTING

Thanks to its experience Pimar has an established relationship with the design world, enhancing the centrality of some technical and aesthetic aspects. Pimar offers its know-how for an accurate development of design projects starting from the first steps, through an attentive technical and logistic organisation that meets any request.

The variety of interventions and processes that Pimar applies on the natural limestone are synonymous with the company's creative potential. Pimar is able to create and manage extremely heterogeneous projects.

TAKE-A-WAY

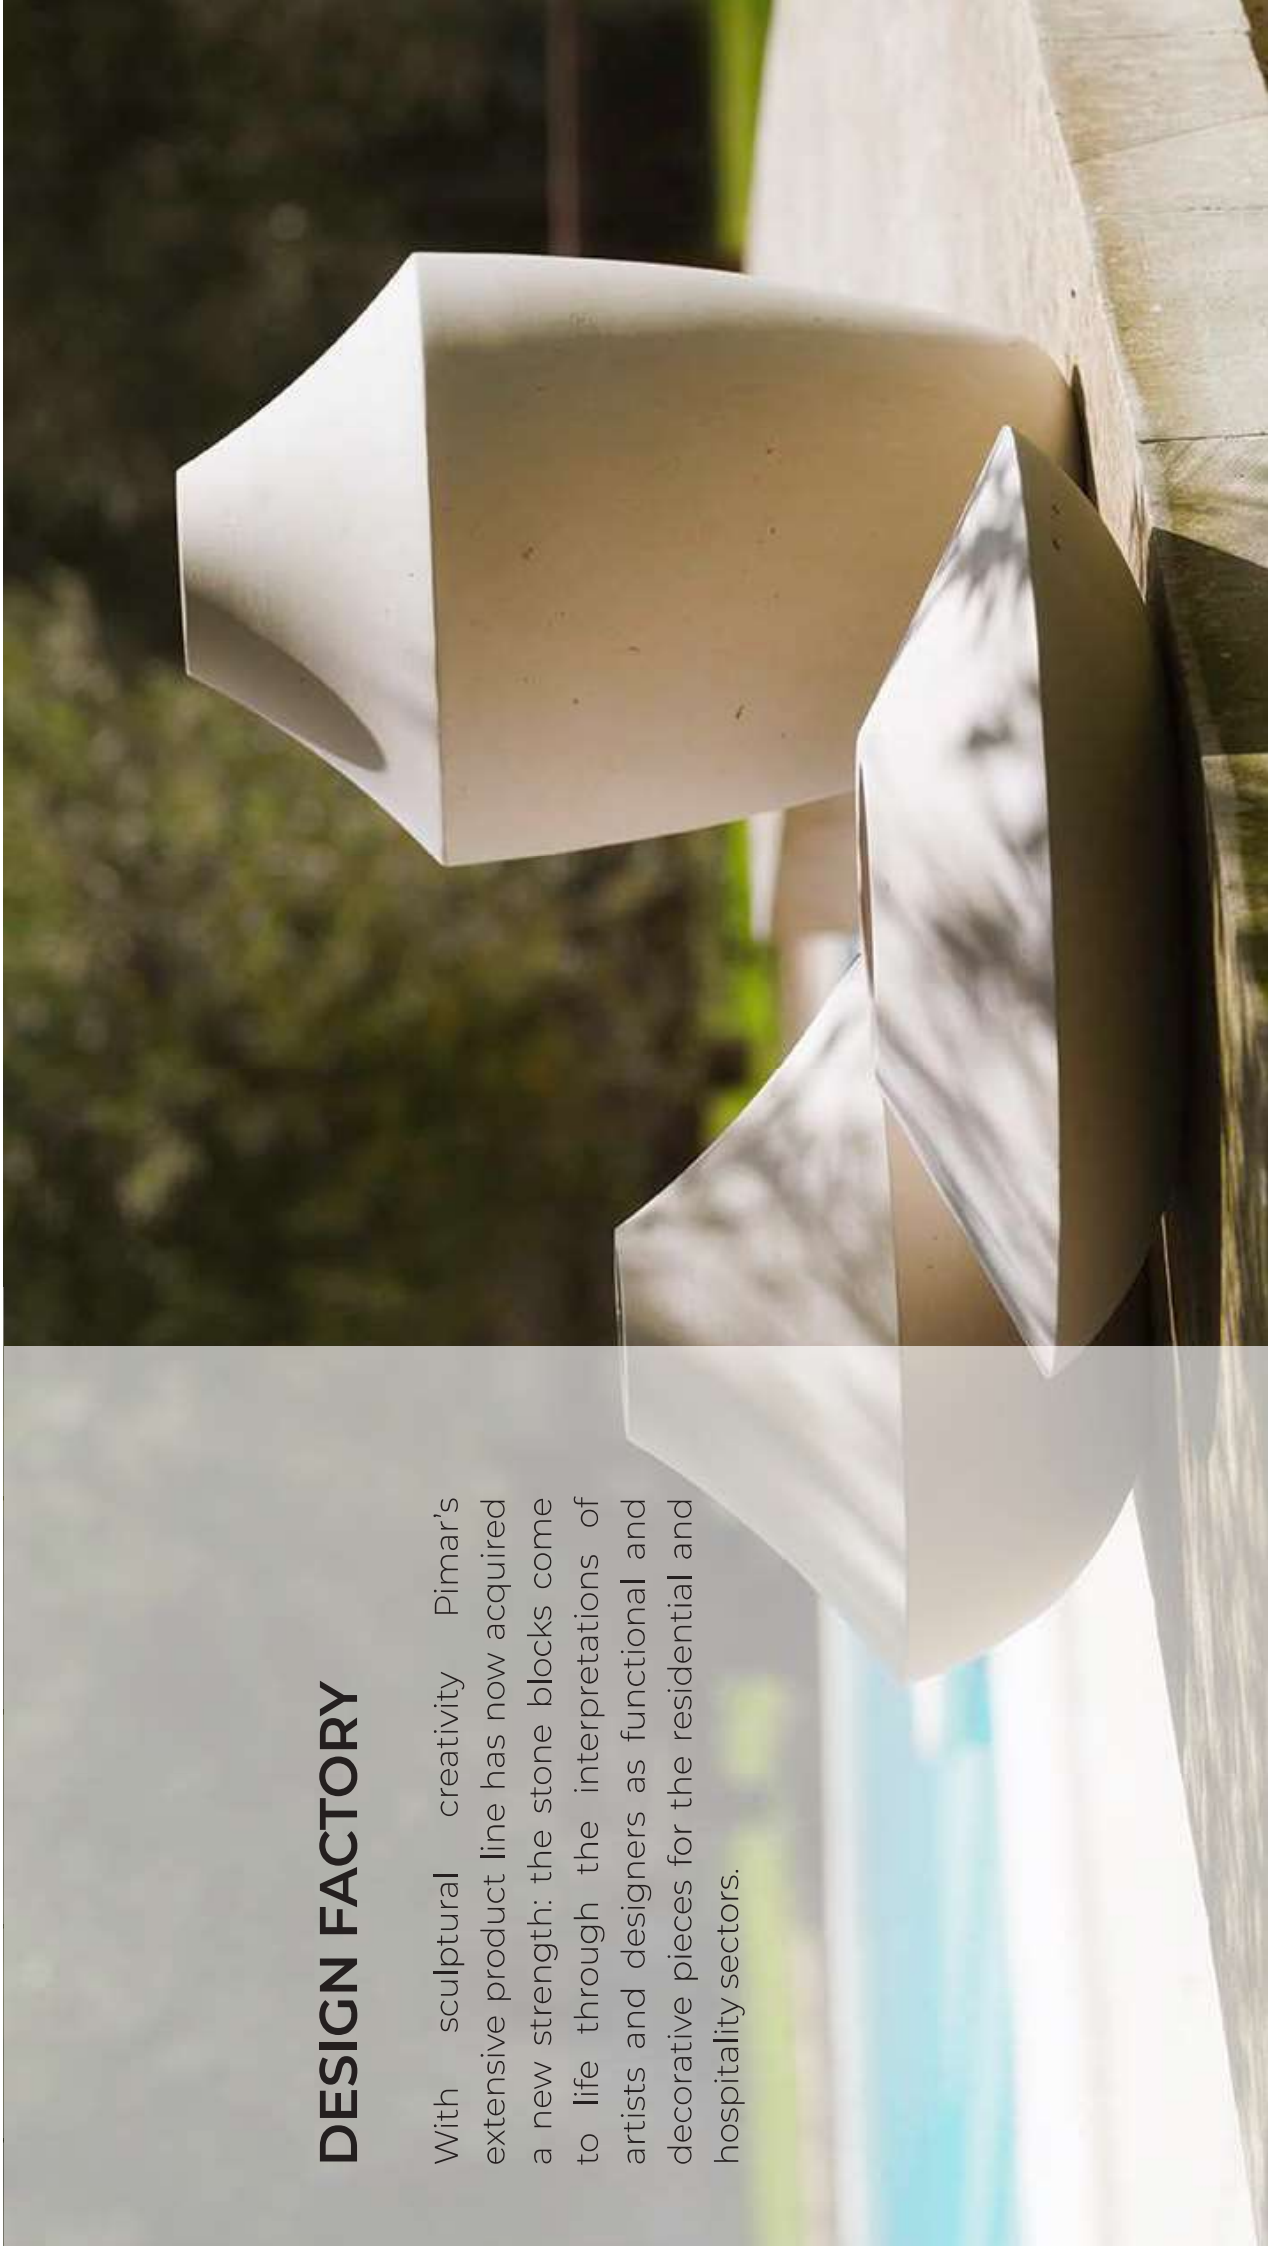

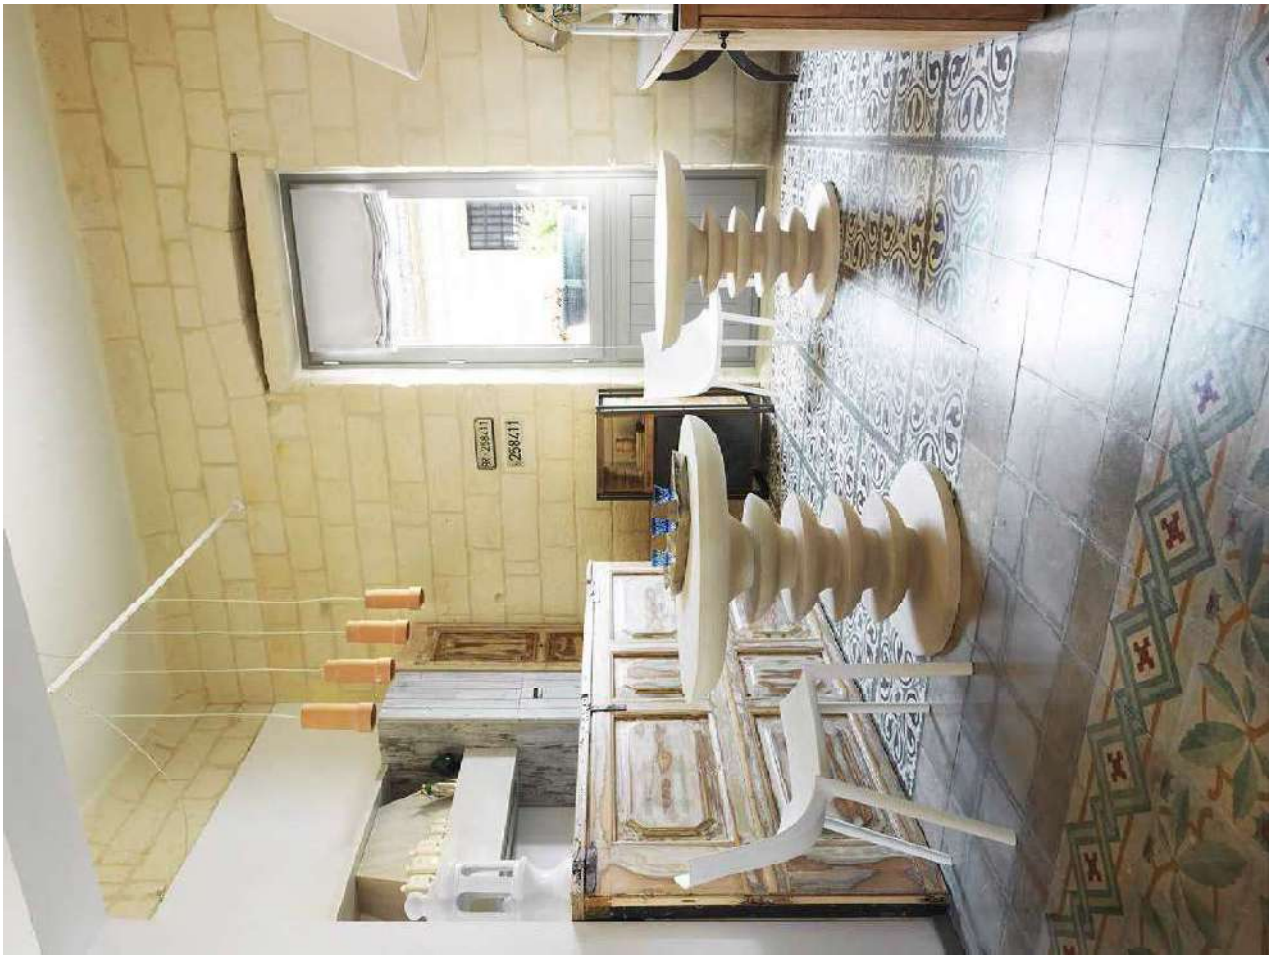

DESIGN FACTORY

With sculptural creativity Pimar's extensive product line has now acquired a new strength: the stone blocks come to life through the interpretations of artists and designers as functional and decorative pieces for the residential and hospitality sectors.

PIMART

Pimar is at the forefront in the field of monument restoration works, with stone integration interventions, and replacement or reconstruction of architectural and sculptural elements.

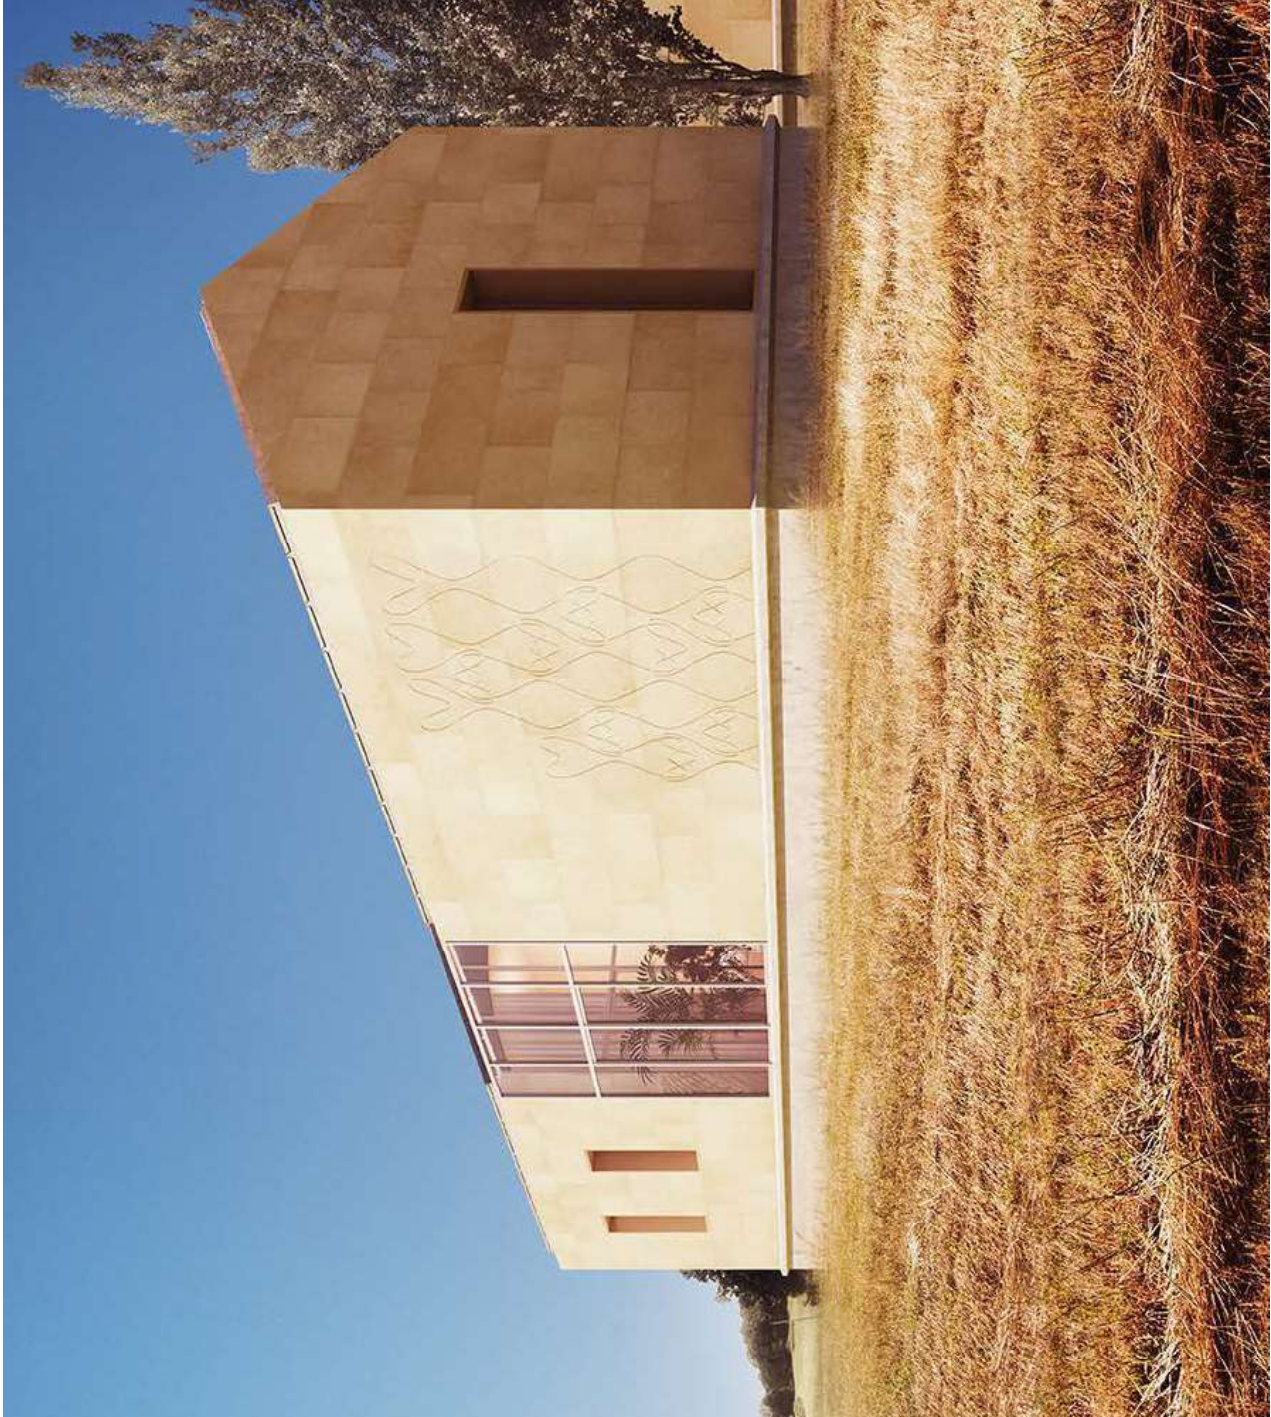

PIMAR COMFORT

Pimar offers thermal insulation with the stone on ventilated façades and the innovative SOOD module made by Pimar.

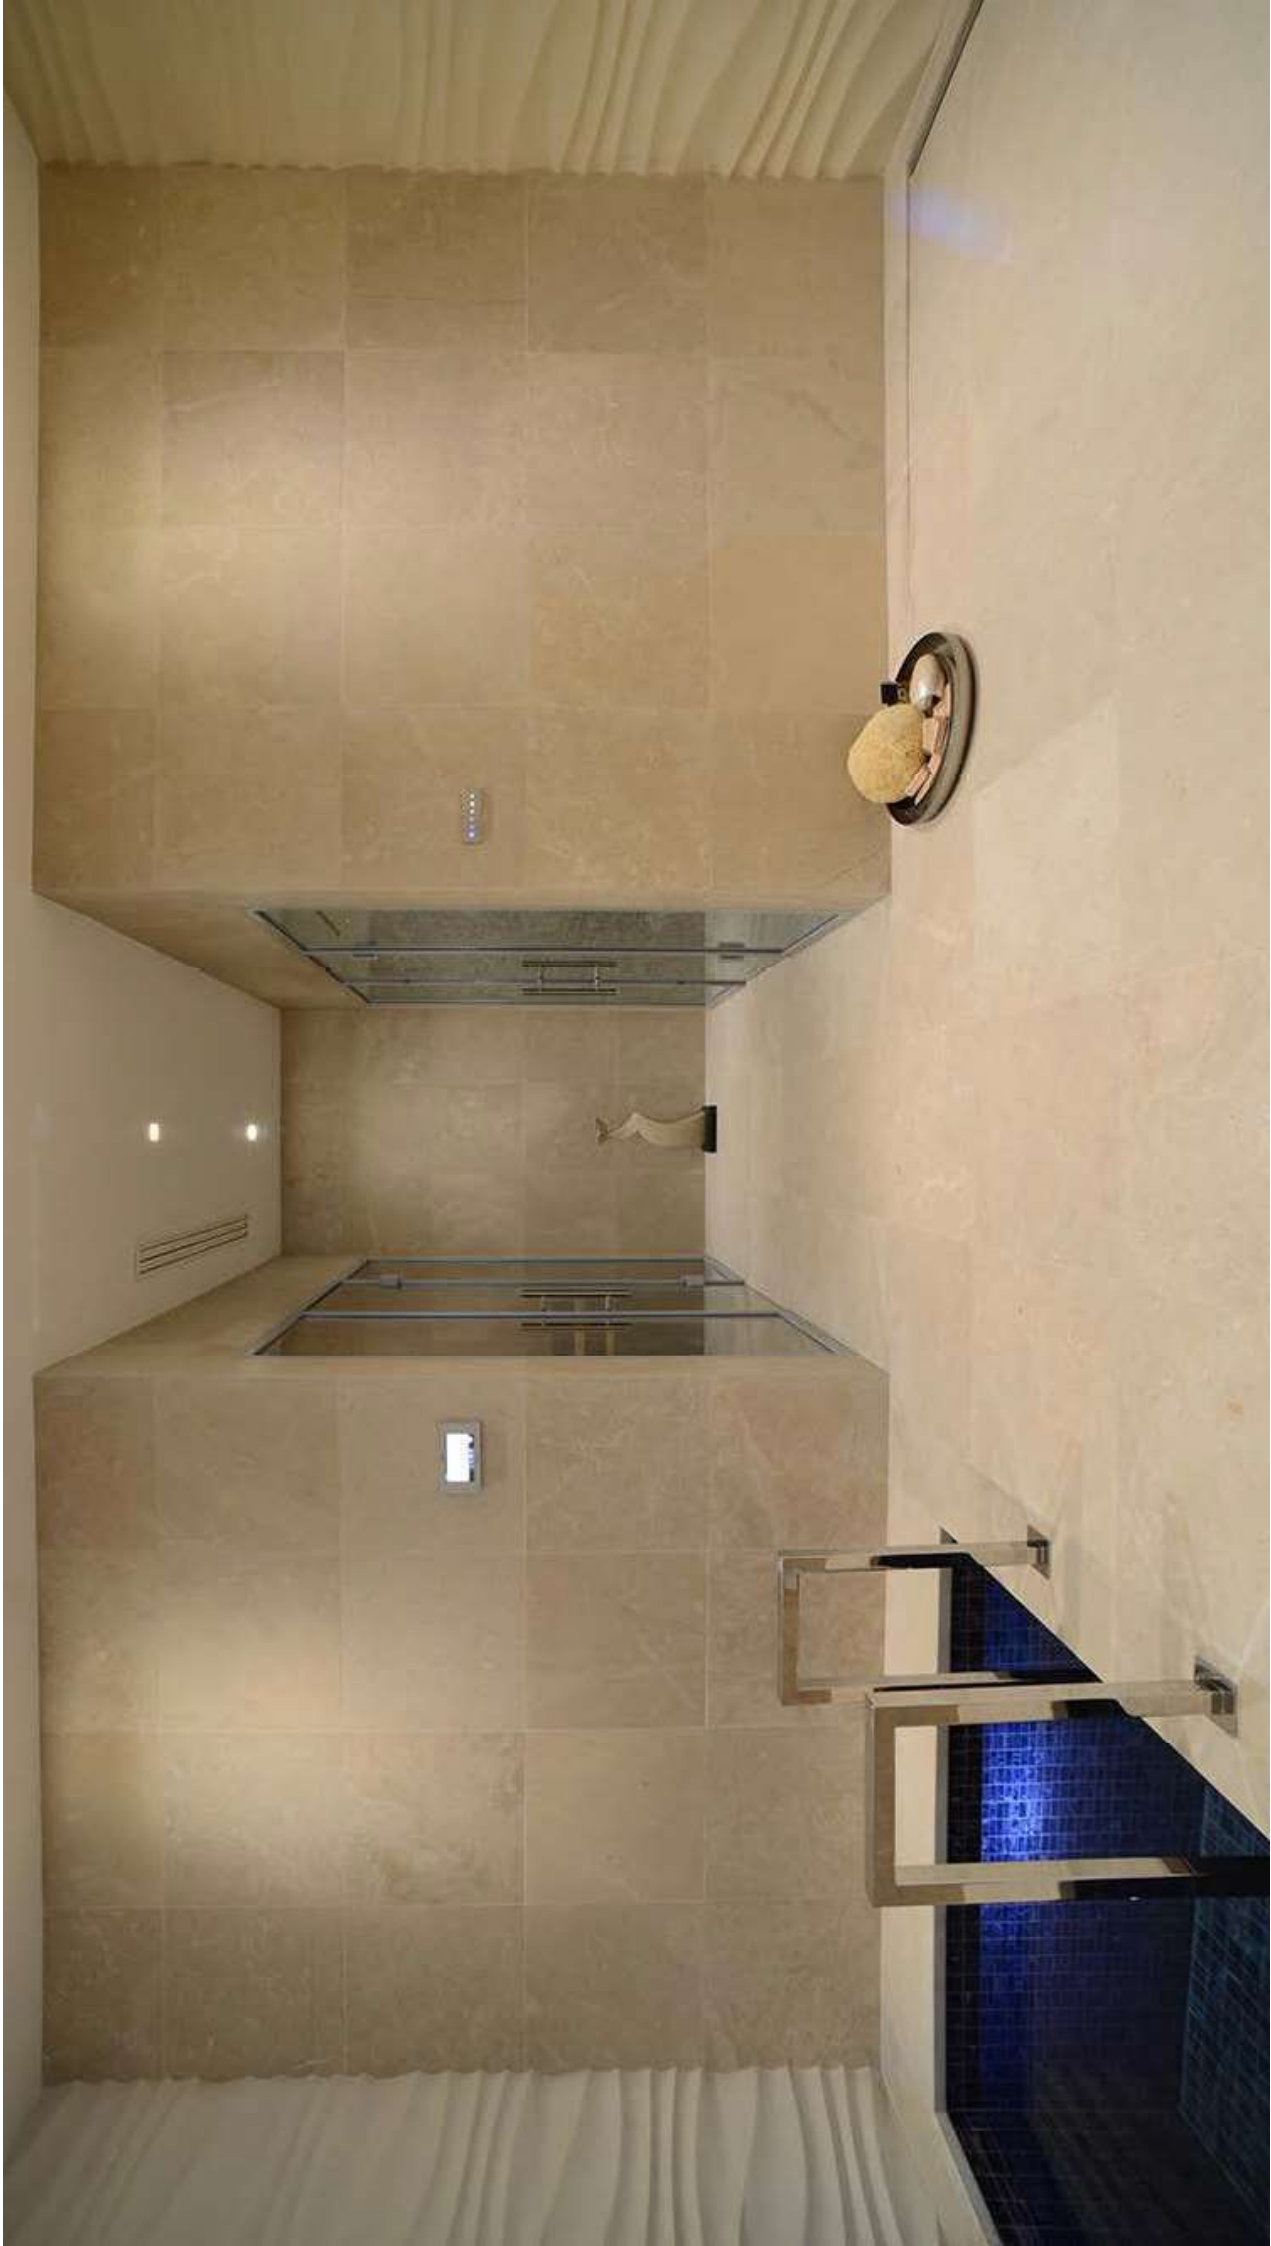

WATER-SIDE

Water and stone, two natural elements that have always been present in architecture. An indissoluble relationship that takes shape in Pimar's creations: swimming pools, spas, fountains.
