our STORY

A travel started in 1977 on board a train that left Bari and arrived, after more than 40 years, throughout Europe.

It has been a long and challenging journey, made up of ever bigger goals and increasingly ambitious challenges. In all this path we never stopped and never slowed down.

Even today, after all these years, we have the enthusiasm and courage
of those who want to change the world:
goods, transport and people.

GTS sustainable business model

environment, society and economy

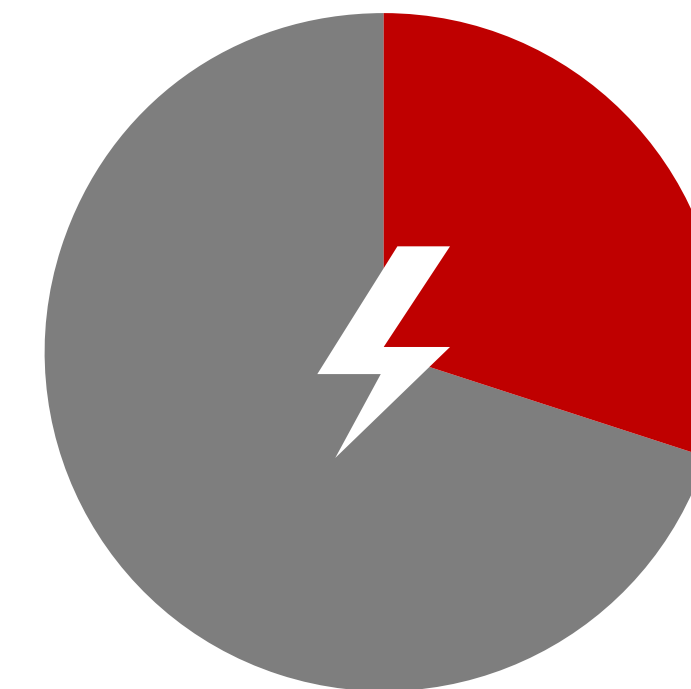

Environment, society and economy are sides of the same Medal of Sustainable Development, and transport are able to touch them all at once. GTS has been committed to for years with real activities within the SDGs: Sustainable Development Goals sustainable content set out in the 2030 Agenda.

Transport sector in Europe is responsible for a quarter of CO₂ emissions produced on the continent, and represents almost a third of total energy consumption. GTS concretely fights against climate change thanks to the average reduction of 70% of CO₂ consumption on each transport, and removing trucks from the road and from long distances. It helps to reduce the impact that transport has on people's lives.

COMPANY PROFILE

Door to Door INTERMODAL

**The transport service dedicated to the manufacturing industry,
for sustainable and efficient freight logistics.**

Door to door intermodal transports, thanks to a fleet of 3400 own containers 45' we are able to connect Italy;
France; United Kingdom; Ireland; Belgium; Netherlands; Germany; Greece; Turkey.

Direct management of the whole transports' chain and vertical production integration: dedicated transport units
for specific types of goods; multiple daily trains ; trucks and chassis for punctual collections and deliveries.

These are the elements of our door-to-door transport service (D2D), the GTS solution to replace all-road
transports, without changing the habits of customers, loaders and receivers,
shortening transit times and respecting the environment.

INTERMODAL TRANSPORT

COMPANY PROFILE

Terminal to Terminal THE RAILWAY SERVICE

The railway service dedicated to transport and logistics companies.

The railway service dedicated to companies with their own transport units (containers; swap bodies; semi-trailers) and that allows to transfer any UTI (Intermodal Transport Unit) thanks to the extensive GTS rail network.

The high frequencies of the circulations guarantee excellent transit times,
while the different types of wagons allow to accept the most diverse types of transport units:
semi-trailers; swap bodies; containers of all sizes.

full truck ROAD

The flexibility of road transport to go anywhere.

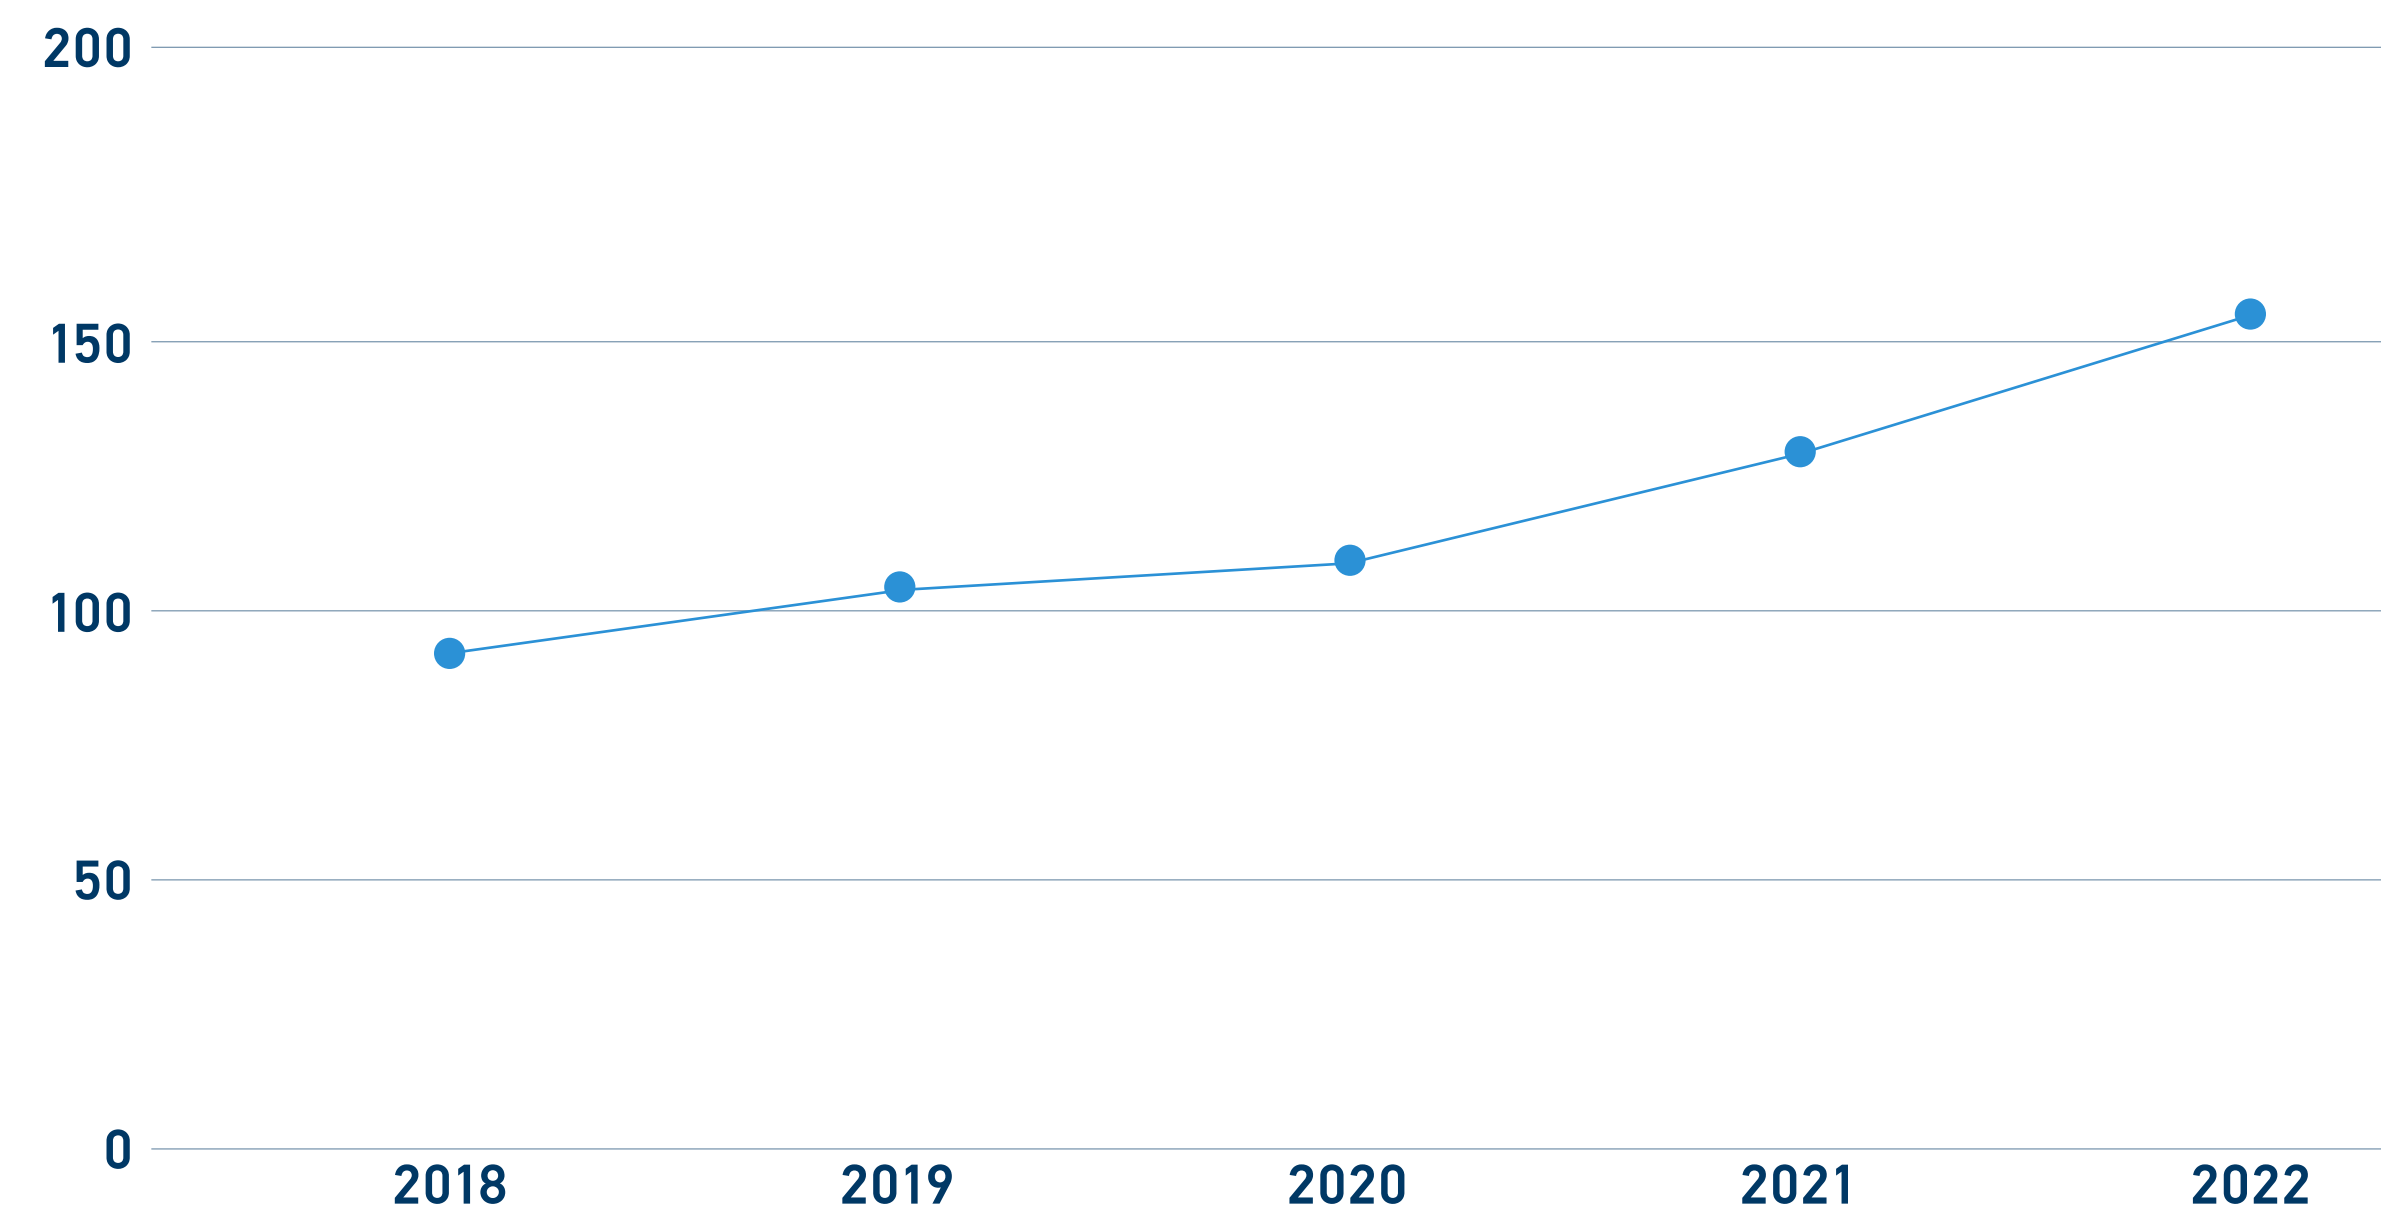

FTR is the road service thanks to which it is possible to ship an FTL , LTL , groupage, temperature controlled or exceptional transport, by road. Carriers operating under GTS's responsibility are subject to strict and constant monitoring of quality standards and compliance with road traffic regulations.

GTS GO To support this activity, GTS created its market place GTSGO , a free platform online to manage in full the available loads. Access to this information is reserved only to suppliers who adhere to strict parameters of safety and reliability.

economic data

2022 was a year of further growth and development for the GTS Group.

Confirming the positive trend that has characterized the last years, the 2022 financial year ended with a turnover of €155 million and Group profit of €14 million. The data is particularly important when compared to significant changes that have characterized the last years, confirming the Group's ability to operate within a context strongly influenced by the events that characterized the most recent past.

Gts Rail

RAILWAY TRACTION

Our railway company.

Thanks to GTS Rail, which is the group's railway company and with the help of the fleet of 38 locomotives, we can offer a full train freight service, for a single customer who needs to transport a high volume of goods in a short time.

We transfer your goods from point to point in the most sustainable and efficient way: the railway.
