## Creare insieme, per elevare il Made in Maniago

**MKM – Maniago Knife Makers** identifica commercialmente il **Consorzio Coltellinai Maniago**, che dal 1960 opera nella “Città dei coltelli”, in Friuli Venezia Giulia, a un centinaio di chilometri da Venezia. Il Consorzio raggruppa produttori di coltelli, forbici e affini e promuove nel mondo il *Made in Maniago*. A caratterizzare il marchio MKM è lo skyline simbolico delle montagne che dominano Maniago, accompagnato dal pay-off “Climb the Edge”: “scalare la vetta”. Un’aspirazione a conquistare i vertici della Qualità, che si arricchisce anche di un significato tecnico: “*cutting edge*” si traduce, infatti, “filo di taglio del coltello”. Mossi da questo spirito, con il marchio MKM firmiamo oggi **collezioni inedite, sviluppate dal Consorzio in collaborazione con le imprese locali**. Attraverso questi prodotti vogliamo esprimere la forza del nostro territorio: la propensione a creare **sinergie** produttive; la costante ricerca dell’**innovazione**; il valore dello stile conseguito col **design**. Soprattutto, la capacità di rinnovare una **tradizione** che continua ininterrottamente dal XV secolo. Questa filosofia prende forma concreta con i coltelli sportivi di **Mikita Collection**.

## *Working together, for a better Made in Maniago*

**MKM – Maniago Knife Makers** – is the commercial name of the **Maniago knife-makers’ consortium** which has been operating in the so-called hometown of knives since 1960. Maniago is located in the Italian region of Friuli Venezia Giulia, around 70 miles from Venice. The consortium brings together makers of knives, scissors and similar products to promote all things Made in Maniago around the world.

The MKM brand is represented by the symbolic mountainous skyline overlooking Maniago, accompanied by the slogan, “Climb the Edge”. The message is one of reaching the pinnacle of high quality, with a technical undertone that alludes to the cutting edge of a knife.

With this spirit in mind, under the MKM brand **the consortium today creates new collections in partnership with local businesses**. Through these products, the aim is to show off all the local community has to offer: a propensity to create production **synergies**, an ongoing quest for **innovation**, the value of style as created through **design**, and, above all, an adeptness at renovating a **tradition** that has been going strong since the 15<sup>th</sup> century. This philosophy comes to life in the form of the sporting knives in the **Mikita Collection**.

# mikita collection

## Mikita: la Collezione MKM che moltiplica l'eccellenza

La **Collezione di coltelli sportivi Mikita** è il frutto della collaborazione di **MKM** con la **Rete d'Imprese Mikita**, supportata dal Consorzio Industriale NIP, che sostiene lo sviluppo delle aziende del territorio, e nata nel 2018 dall'incontro di quattro eccellenze di Maniago affermate nel mondo: **Fox Knives, LionSteel, Mercury** e **Viper**.

Insieme contano 200 anni di storia nella produzione di coltelli e un centinaio di dipendenti. Insieme condividono know-how ed esperienze. Insieme operano come un'unica realtà industriale strutturata, capace di ottimizzare attività di produzione, marketing e promozione, pur con differenti specializzazioni e vocazioni.

Qualità ed efficienza consentono di creare prodotti unici e innovativi, con economie di scala derivanti da una filiera corta e da profonde sinergie nella progettazione e nella prototipazione.

## Mikita: the MKM collection adding excellence to excellence

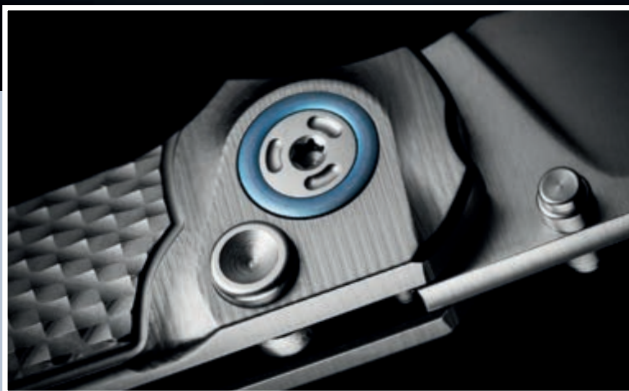

The **Mikita collection of sporting knives** is the fruit of **MKM's** collaboration with the **Mikita business network**, backed by industrial consortium **NIP**, which supports local business development. *Mikita* was founded in 2018 when four of Maniago's leading companies of global standing – **Fox Knives, LionSteel, Mercury** and **Viper** – joined forces.

Together, they boast 200 years of knife-making history and a hundred or so employees. Together, they pool their skills and experience. Together, they work as one structured industrial business, capable of optimizing production, marketing and promotional work, while keeping their individual specialist skills and artisan callings.

They offer quality and efficiency to create unique, innovative products, with economies of scale resulting from a short production chain and synergies in design and prototyping.

# THE MAGIC BUTTON FOR HAPPINESS

*Miura . News MK.22*

I always thought we can't get happiness by simply pushing a button... But I was wrong!

Miura is a unique product in the industry due to the combination of a button lock with an integral handle that have never happened before on factory knives.

These features together with its great design led the Miura to win 2022 Blade Show Imported Knife of the Year® award.

**Blade length:** 69 mm - 2.72 in

**Total length:** 169 mm - 6.65 in

**Blade thickness:** 3.0 mm - 0.12 in

**Opening system:** Thumb stud + button with ball bearing rotation mechanism

**Lock type:** Button Lock

**Weight:** 72 g - 2.54 oz

**Blade steel / Finishing:** BÖHLER M390 MICROCLEAN, satin finish, hardness HRC 58-60

**Packaging:** Ballistic nylon pouch with zip fastener and belt loop

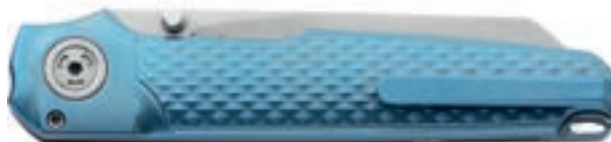

## MK MI-T

**Handle:** Integral bead blasted titanium

**Clip:** Solid reversible bead blasted titanium

**Screws:** Stainless steel with blue anodized titanium ring on pivot screw

## MK MI-TBL

**Handle:** Integral blue anodized titanium

**Clip:** Solid reversible blue anodized titanium

**Screws:** Stainless steel with titanium ring on pivot screw

# Mikita: quattro storie per tessere una rete d'impres

Fondata nel 1977 da Oreste Frati e dalla moglie Valnea Del Mistro, Coltellerie Fox si distingue da subito per carica innovativa e lungimiranza di visione. L'attenta scelta di materiali di qualità, gli investimenti tecnologici e la cura del dettaglio danno forma a prodotti vincenti, illuminati da idee di successo. Dopo la scomparsa del fondatore, Fox è guidata da Valnea e dal figlio Gabriele. Nel panorama nazionale e internazionale, il Gruppo Fox è apprezzato per la capacità di coniugare tradizione e DNA creativo, con prodotti di primordine in svariati settori: dallo sport alla caccia, dall'outdoor all'ambito milita-

re, dalla cucina all'agricoltura. Una qualità e una versatilità che hanno conquistato il mondo, anche grazie ai molti premi conseguiti e alle collaborazioni con marchi leader e top designer.

*Founded in 1977 by Oreste Frati and his wife, Valnea Del Mistro, Coltellerie Fox was different from the beginning. It had innovative drive and a far-reaching vision. Carefully chosen quality materials, investments in technology and meticulous attention to detail give form to its successful products, inspired by successful ideas. After the passing of its founder, Fox is managed by Valnea and son Gabriele. The Fox Group is admired on the national and international stage for its ability to combine tradition and creative DNA with first-class products across different sectors, from sports to hunting, the outdoors to the military, and the kitchen to agriculture. Its versatile, high-quality products have won over the world markets, as shown by its numerous prizes and awards, and partnerships with leading brands and top designers.*

Nata nel 1969 dalla passione di Gino Pauletta, sostenuto dalla moglie Cesarina Bazzo, LionSteel è inizialmente focalizzata sui coltelli da caccia per il mercato italiano. Alla fine degli anni '90, i figli di Gino – Daniele, Gianni e Massimo – portano idee e tecnologie all'avanguardia per la progettazione e la produzione. Col nuovo millennio si cominciano a realizzare coltelli EDC, per l'uso quotidiano, che diventano i prodotti di punta dell'azienda. Con la rivoluzione SOLID®, LionSteel inaugura una nuova era per i coltelli tascabili, con manici fresati da un pezzo unico, che raggiungono standard di resistenza mai

ottenuti prima. Pluripremiata ad Atlanta, impegnata con partner industriali e designer in ambito mondiale, LionSteel continua a mantenere quella sensibilità artigianale che rende speciale ogni prodotto.

*Founded in 1969 out of Gino Pauletta's passion, and supported by his wife, Cesarina Bazzo, LionSteel initially targeted the Italian market, making hunting knives. In the late 1990s, sons Daniele, Gianni and Massimo brought new ideas and cutting-edge technology to the design and production process. With the turn of the millennium, LionSteel began making EDC knives for everyday use. These were to become the company's core product. The SOLID® revolution marked the start of a new era for LionSteel and its pocket knives, with handles milled from a single piece, offering a level of resistance never seen before. As it continues to win numerous awards in Atlanta, and collaborate with industrial partners and designers around the world, LionSteel has not lost its artisanal touch that makes every product special.*

# Mikita: four tools carving out a business network

Nel 1950 Attilio Del Ben fonda la coltelleria Mercury, che si specializza in una delle produzioni più particolari e complesse: la fabbricazione di coltelli da tasca chiudibili e multiuso. Dopo alcuni anni, ad Attilio si affiancano i figli Franco e Sergio, attuali titolari e gestori dell'azienda. Alla produzione originaria, che ancora oggi occupa un posto importante nell'attività di Mercury, nel 1999 si aggiungono nuove lavorazioni nel settore della coltelleria da cucina professionale. Al primo posto tra i valori aziendali è la volontà di accompagnare con estrema cura i singoli processi, per mantenere un

livello di qualità inconfondibile. Per questo Mercury impiega personale qualificato, formato all'interno dell'azienda. Il tocco artigianale e il dettaglio delle rifiniture sono così diventati la firma dei coltelli e delle lame Mercury.

*In 1950, Attilio Del Ben founded Mercury, specializing in one of the most specific and complex types of knife-making: folding, multi-purpose pocket knives. Some years later, Attilio was joined by his sons, Franco and Sergio, who today own and run the company. The original production line, which still represents an important part of Mercury's business, was expanded in 1999 to include new production of professional kitchen knives. At the top of the company's list of values is its desire to see through each individual process with a great deal of care, to maintain its unmistakably high levels of quality. This is why Mercury employs professional staff, trained in-house. The artisanal touch and detailing when it comes to the final finishes have become the mark of all Mercury knives and blades.*

Fondata nel 1987 da Giovanni Miniutti, Tecnocut si afferma negli anni come produttore di coltelli sportivi. La missione di creare gioielli per gli appassionati, trova matura espressione nel marchio Viper, capace d'imporsi nel mercato mondiale. Pioniera nel Maniaghese della lavorazione industriale delle lame di acciaio damasco, Viper -Tecnocut sa imprimere ai propri prodotti uno stile inconfondibile, che nasce dall'incontro tra forme sinuose e materiali preziosi, alta tecnologia e stile improntato da grandi designer. Temprata da solide collaborazioni industriali con marchi leader, l'azienda si

distingue per una particolare versatilità, concedendosi incursioni nel settore della cucina, con coltelli e sciabole Champagne: nel 2018 un suo modello è premiato al Blade Show di Atlanta come "coltello da cucina dell'anno".

*Founded in 1987 by Giovanni Miniutti, Tecnocut has made its name over the years as a maker of sporting knives. Its mission to create gems for sector enthusiasts came to fruition late on with the brand Viper, which took its place on the world stage. As a pioneer in Maniago when it comes to the industrial working of Damascus steel blades, Viper-Tecnocut successfully creates an unmistakable style for its products, which is formed by a fusion between supple shapes, valuable materials, hi-tech and the style of great designers. Strengthened by steadfast industrial collaborations with leading brands, the company is exceptionally versatile, also branching out into the culinary sector with kitchen knives and Champagne sabres. In 2018, one of its models won the "Kitchen Knife of the Year" award at the Blade Show in Atlanta.*
