Our offer

55 years of experience and innovation

In these pages you will discover how MG, throughout its long history, has become a point of reference for clients and distributors.

With MG you will find a wide catalogue, modular systems for workstations, new product lines, as well as expert assistance for your projects.

This is a family business whose values and excellence come from its land and people.

Since 1968, MG Magrini Srl specialises in the design and production of metal industrial furnishing and is currently one of the leading european brands in the field.

- 1968** Giuseppe Magrini opens this business in a small workshop in Casentino (Tuscany) and starts producing workbenches and carts
- 1980** The MG brand establishes itself on the Italian market of industrial furnishing
- 1995** The company grows and moves to its current 12.000 m² premises
- 1999** MG participates to its first international fairs and begins exporting
- 2002** It starts acquiring cutting-edge technologies and machinery
- 2013** Passes on to a young generation of Magrini women
- 2015** Is certified ISO 9001:2015
- 2019** Launches its SMART automotive furnishing line

2023

MG grows its production capacity and number of products in stock thanks to the increased productivity of certain departments and a new warehouse wing.

**We've been organising
people's work and ideas for
over 50 years**

2900+ Products

We organise your work and your ideas

MG products are modular, durable, ergonomic and can be built upon in time. They are completely made of steel sheet metal and come in demountable or monoblock versions.

PERSONALISED SOLUTIONS

Show us your project: we can make it happen with our wide range of products in 8 standard colors – or with custom furnishings and colors for your workspace.

MG system

Choose your best line

The MG system is based on 17mm units of measurement. The three lines Top, Midi, Basic distinguish themselves for certain structural features and the range of line products.

TOP

- Drawer with perforated bottom and side slotting where to arrange dividers
- Telescopic guide, total extraction and roll-over system
- Drawer capacity: 75, 100, 200 kg
- Aluminum head with tag holder

MIDI

- Drawer with side slotting where to arrange dividers
- Total extraction and roll-over system
- Drawer capacity: 70 kg
- Aluminum head with tag holder

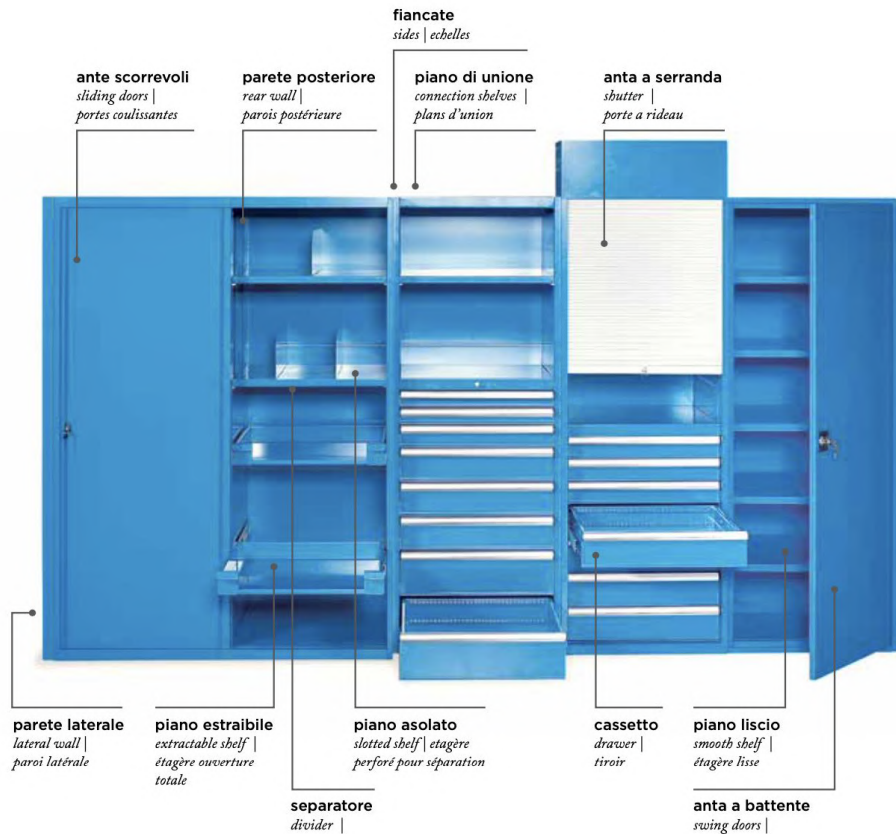

BASIC

- Drawer with smooth sides and bottom
- Total extraction
- Drawer capacity: 70 kg
- Front with sheet metal handle

Tireless research

Best sellers and new lines

EPSILON

A large industrial robotic arm, painted in a dark blue color, is positioned in a factory environment. The arm is mounted on a complex metal structure and is surrounded by various cables and hoses. In the background, a white machine with the brand name "salvagnini" is visible. The scene is brightly lit, with overhead industrial lights. A stack of dark-colored sheets is placed on a wooden pallet in the foreground. The overall atmosphere is one of a modern, automated manufacturing process.

We constantly invest in new technologies that make our production processes as sustainable as possible.

Look inside

Efficiency, solidity, and know-how

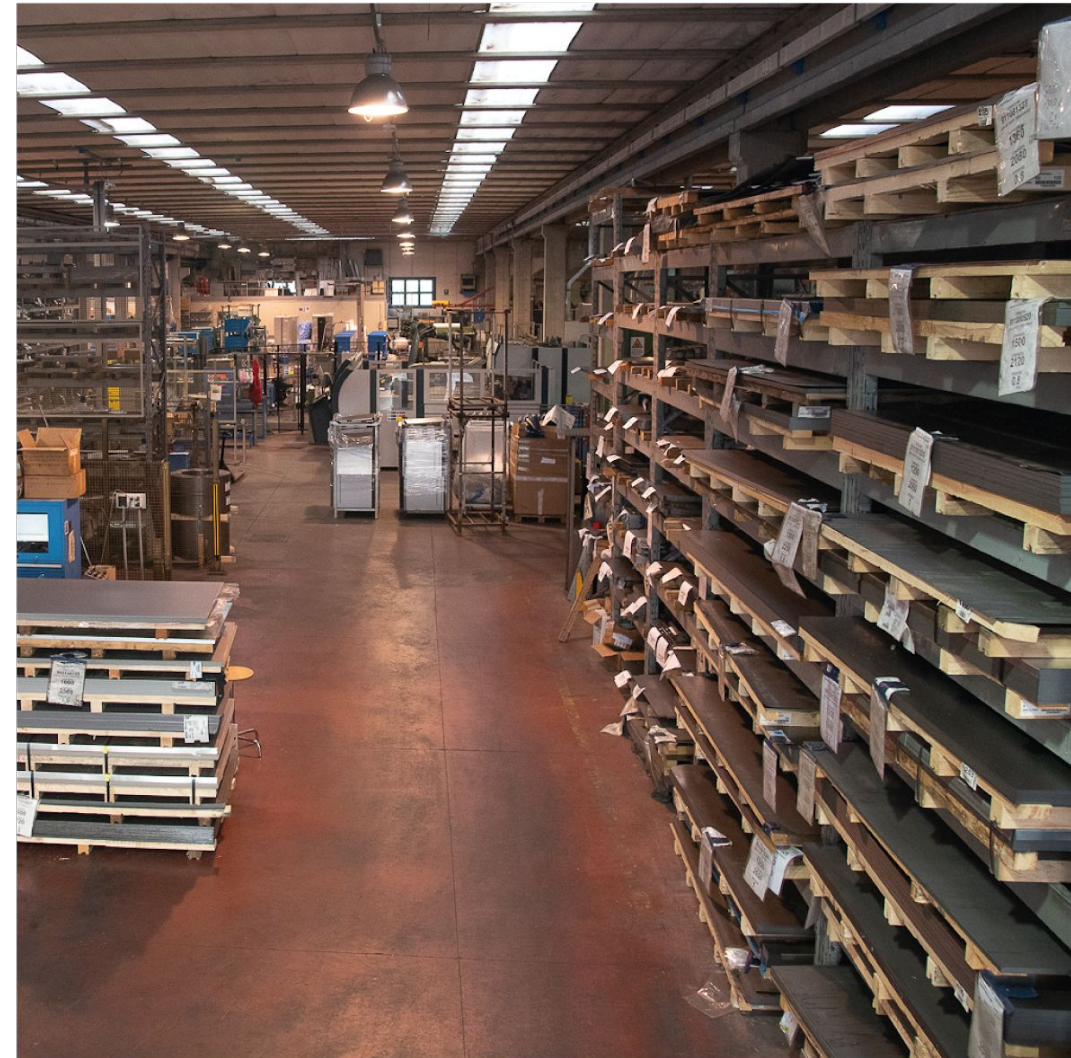

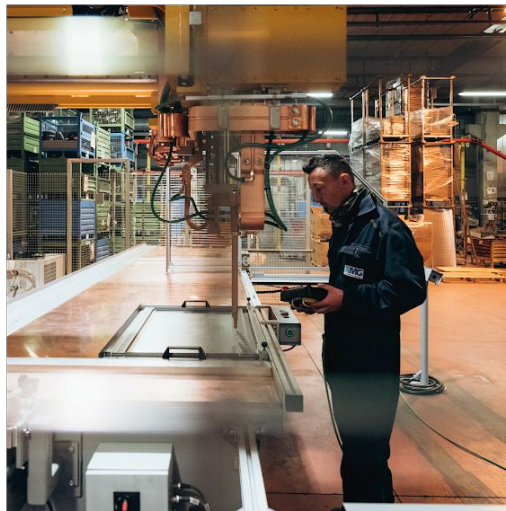

The best craftsmanship meets cutting-edge technology, in a vast space for research and production.
