

Cozzolino Group Company Profile

The Company

Since 1997, **Cozzolino Group** has produced and sold textile products for dance, theater, clothing and furniture.

The company combines a **noble Italian tradition of textile production** with an **obsessive attention to design** and **high-level technical services**.

20 years performing with us

We have been working for over 20 years with companies and small producers that specialize in making clothes for the world of sports and entertainment.

Our fabrics, thanks to their **flexibility** and **quality**, become dramatic elements themselves, strengthening athletic movement, accompanying the shapes and lines of dancers and highlighting theatrical performance.

We link tradition and innovation

Our yarns are born of **extensive experience** and **continuing material research**. We face this challenge because we know that only through constant improvement can we offer a **high quality product** that is always contemporary.

The line of yarns with a **Lycra core** is the best expression of **our philosophy: high performing, a refined finish and extremely light**.

The role of Beauty

Our Style Center creates new lines every year; these fresh and modern collections anticipate industry trends and offer a wide range of solutions.

All our products are designed and manufactured to combine **high-quality woven technical performance** with **modern colors** that can adapt to any need.

**Spread beauty
by protecting quality**

Some views

Our idea of how to grow internationally

Where quality finds a home

We believe in the value of an international context of quality that can put supply in contact with demand with the intention of continuing to develop and spread excellent products.

The value of “touching by hand”

Fabric expresses all its feeling only through touch. This is why the exhibition takes on a strategic role for our business proposal.

Beauty has no boundaries

We believe in the Italian quality of our product and that's why we want to show it off beyond our country's borders.
