Ambassador of Italy to the Kingdom of Saudi Arabia

Dear Visitor,

I wish to warmly welcome you to the 2025 Big 5 Saudi fair and in particular to the Italian Pavilions.

Italy has traditionally been one of the most represented countries at Big 5 Saudi, which attracts thousands of international companies from all over the world. The Italian presence is growing year after year and we are very proud of this trend. Our companies are here to expose state-of-the-art technologies and very high quality products and to look for mutually beneficial collaborations with the Saudi counterparts.

The Italian industry is well-placed in many construction products, notably marbles, granites and natural stones, as well as machineries and complete plants to quarry and process natural stones. As far as the HVAC sector is concerned, our companies are well-known for their historical tradition of design, style and technological innovation. In the field of construction, a growing number of Italian SMEs are working hand in hand with many Saudi business partners on a wide array of projects, thus

contributing on a daily basis to the Kingdom's impressive urban, housing and construction projects.

The recently established strategic partnership between Italy and Saudi Arabia will serve as a basis for the work we have to do together in the coming years, also in view of the Vision 2030 and its ambitious objectives. Italian companies are willing to further contribute to the future of Saudi Arabia.

Enjoy your visit at the 2025 Big 5 Saudi fair! You can count on the support of the Embassy and other Italian institutions in the Kingdom in favor of successful collaborations between Italian and Saudi operators.

Carlo Baldocci

Director Italian Trade Agency

Dear Visitor,

On behalf of the Italian Trade Agency, I am delighted to welcome you to the Italian Pavilions at the Big 5 Saudi Exhibition. Here, you will have the opportunity to meet Italian companies specializing in the stone industry, as well as explore the HVAC R Expo Saudi Pavilion, showcasing a variety of exhibitors offering high-quality products and technologies. Additionally, you can visit the third Pavilion, which features Italian companies dedicated to construction, road and earthmoving machinery, mining machinery, quarry equipment, construction site machinery, and lifting and handling solutions.

Italy is a global leader in many sectors of the construction industry. Specifically, at the Big 5 Saudi Exhibition, we highlight our expertise in marbles, granites, natural stones, machinery, complete plants, tools, and complementary products for quarrying and processing natural stones, as well as the HVAC sector. Italian companies are renowned for their ability to meet the unique needs of their clients and partners, thanks to a long-standing tradition of craftsmanship, style, innovation, and research.

The Italian Trade Agency, in collaboration with key industry associations such as Confindustria Marmomacchine, UNACEA, and ANIMA Confindustria Meccanica Varia, has organized the participation of Italian companies at the Big 5 Saudi. With a network of offices in over seventy countries, the agency serves as the Italian government's platform to support business development abroad and foster collaboration with international partners.

We warmly invite you to visit our Pavilions and encourage you to reach out to our staff for any assistance. They will be pleased to introduce you to Italian companies and help you find a business partner that matches your specific needs.

Romano Baruzzi

finco@fincoweb.org

www.fincoweb.org

Presidente Drssa Carla Tomasi -Direttore Generale Angelo Artale

FINCO - Italian Federation of Industries for Products, Systems and Services for Construction, Maintenance, Mobility and Cultural Assets and Heritage

As Federation Finco is not directly related to firms but to National Associated Organizations of Construction Sector. At the moment it puts together 40 Associations representing, among the others, the following fields: historical and monumental restoration, renewable energies (e.g. biomass, geothermal and hydroelectricity), doors, overhead doors, shutters, roofings, technical curtains, mosquito nets, external and sunscreen protection systems and components, safety harnesses and belts, metal carpentry, fireplaces and stoves for interiors, safety fire systems, fastening tools, sound barriers, scaffoldings, geognosy surveys, accident prevention signs, façades with integrated sunshade systems, metal sheet building pieces, solar

shields, zenithal systems, curtain wall, aluminium and pvc windows, doors and gates, rolling shutter, loading systems, roofing systems, pluvial and gutters, condominium administration companies, remediation and asbestos removal services, parkland and landscaping companies (realization and maintenance), plant system suppliers, war mine clearance and other services sectors linked to construct.

The Federation aims to increase the value and the visibility of each Federated Association. FINCO mainly operates when its action can be more effective than the single Associations operating alone, helping firms to get in touch with the international market.

FINCO operates on behalf of its own Association through:

- parliamentary and Ministerial lobbying for the adoption of laws and decrees in order to help the represented sectors: providing amendments in the general legislative procedures (for example the Financial Law and related measures); following and stimulating the Public Administration work in significant issues (e.g. the Inter-ministerial Decree about the CE marking on the building products);
- coordination and strengthening of the Italian producers of materials, equipment and services inside the construction sector;
- involvement in working groups on Ministerial issues, integrating and strengthening the weight of each Association; collaborations with public or private national or international organizations belonging to the building and infrastructural sector;
- organization and management of internal Working Groups to deal with the considerable issues of the Associations;
- supplying the Associations with Counseling Services through experienced subjects in different sectors;
- promotion of events which allow to expand the market of the building materials, services and equipment.

Tel: +39 0532 473492

info@anfit.it

www.anfit.it

Presidente Marco Rossi - Direttore Generale Laura Michellini

www.facebook.com/associazioneanfit/

www.linkedin.com/company/anfit

ANFIT's main purpose is to promote quality windows conceived, designed and crafted entirely in Italy by Italian companies, inspecting and ensuring that strict quality, safety, environmental protection and energy savings criteria are met for consumer satisfaction.

ANFIT's goal is to protect the Italian quality market and production chain in compliance with the regulations. ANFIT's commitment is to the technical and qualitative improvement and upgrade of manufacturing, regardless of the material used. ANFIT carries out promotional activities at public administrations, professional studies and media in general. Its main purpose is to protect the Italian quality

market and production chain abroad as well.

With a clear procedure, ANFIT determines the origin and quality of the product, thus enabling the end user to decide, independently and for their sole interest, on the purchase of windows made in Italy. This value must also be conveyed as best as possible to international markets, in order to support and increase the added value of such products.

ANFIT informs its Members of technical and regulatory updates, and takes part in the Italian and European decision-making processes that determine the rules of the market to protect Italian window manufacturers.

Services provided include: the use of the QUALITY ANFIT marking and Energy Label; issuance of certificate of origin; special rates for laboratory tests; technical information with respective seminars and training courses; insurance policy for manufacturers, installers and consumers.

ANFIT participates at events, fairs, conferences, and fosters promotional campaigns with press articles to disseminate the Italian-made ANFIT window. The top companies in the sector of window and window frame production and installation operate within this Association. The window frames sold in Italy are required to bear the CE marking, but manufacturing the window frame in Italy requires higher standards. The designer is required to verify that, before they are installed, window frames comply with a number of features such as wind resistance.

The NPD value (No Performance Determined) does not discharge either the window-maker nor the designer from liability: ANFIT helps reduce risk and liability ensuring window frames perform according to national and international regulations. ANFIT arose from the need to defend and enforce compliance with regulations that differ

very much from one another due to the distinctive features of our country. The obligation for the CE marking for window frames arose to protect the consumer and standardise production processes, but does not eliminate the obligations and responsibilities of manufacturers. The window frames manufactured by ANFIT members bear the Numbered Energy Label and the Installation Label, to make the whole production chain traceable.

ANFIT is the first association in Italy to have stipulated two insurance policies with "Reale Mutua Assicurazioni" to protect and guarantee manufacturers/installers and consumers..

@Assites15

@assites_associazione_tende

www.linkedin.com/in/assites-associazione-italiana-tende-schermature-solari-e-chiusure-tecniche-b554a3282/

ASSITES' role is to represent the knowledge of blinds in their entirety - including solar shading, shutters, outdoor blinds, indoor blinds, and insect screens - in the national market and consumer perception. It actively works to spread knowledge of industry issues and to monitor market requirements, helping companies to meet them.

Qualified companies of any size - that manufacture and supply products and/or raw materials in the sector of solar shading, shutters, indoor and outdoor blinds, and insect screens - can become members of the Association. Additionally, professionals (technicians, consultants and scholars), sales agents

or representatives and associations or industry bodies can also be part of the Association, as associate members and supporters.

ASSITES offers day-to-day assistance on industry entrepreneurship, and constant updates through news, information capsules and internal communications, monitoring trends and market developments at the national and international level and offering support to companies that wish to undertake a process of internationalization.
