WELCOME OF THE AMBASSADOR

On the occasion of Big 5 Saudi Arabia 2026, I am pleased to extend my warmest greetings to the many Italian companies participating in this important exhibition in Riyadh.

Italy's significant representation in this year's edition is particularly meaningful in the current regional context, and it once again reflects the depth and vitality of the longstanding partnership between our Country and the Kingdom. It also confirms the growing and committed dynamism of our bilateral economic relations and the increasing interest of Italian businesses in contributing to Saudi Arabia's ambitious development agenda.

As the Kingdom continues to advance its Vision 2030 transformation, the construction sector plays a pivotal role in shaping the Country's future. In this context, Italy is recognized not only as a trusted economic ally, but also as a source of excellence and partner in technology, engineering, design, sustainability, and advanced

manufacturing. Italian companies bring world-class expertise, high-quality solutions, and a strong commitment to innovation, making them valuable partners in supporting the Kingdom's strategic projects.

The Embassy of Italy remains fully committed to further strengthening bilateral economic, trade and industrial relations, working in close cooperation with Saudi Institutions, together with the Italian Trade Agency, the Italian business community, and the entire Sistema Italia.

I am confident that Big 5 Saudi Arabia 2026 will provide valuable opportunities to consolidate existing relationships, establish new collaborations, and create the conditions for long-lasting partnerships based on mutual trust, quality, innovation and shared prosperity.

I wish all exhibitors a productive and rewarding participation.

Carlo Baldocci

Ambassador of Italy
to the Kingdom of
Saudi Arabia

WELCOME OF DIRECTOR - RIYADH OFFICE

It is my pleasure to welcome you to the Italian Pavilions at the second edition of Big 5 Construct Saudi.

Italy is proud to support Saudi Arabia's transformation through advanced technologies, engineering excellence, and long-term partnerships. The strong Italy-Saudi relationship continues to create opportunities in construction, infrastructure, machinery, energy efficiency, and advanced manufacturing.

The Italian Trade Agency (ITA), with the Embassy of Italy in Riyadh, supports Italian companies in Saudi Arabia and promotes trade, investment, and cooperation.

This year's participation highlights two sectors: At HVAC R Expo Saudi, Italian manufacturers present innovative, sustainable HVAC and refrigeration solutions.

At the Construction Equipment Pavilion, visitors can explore advanced machinery for construction, earth-moving, quarrying, mining, and material handling.

Italian companies are known for quality, innovation, reliability, and tailored sustainable solutions, making them strong partners for the Kingdom's projects.

The participation is organised by ITA with ANIMA Confindustria Meccanica Varia and UNACEA.

We invite you to visit the Italian Pavilions and meet our exhibitors. The ITA team will be happy to assist you in finding suitable partners.

Thank you for your visit and enjoy the exhibition

ANIMA CONFINDUSTRIA MECCANICA VARIA

ANIMA Confindustria Meccanica Varia is a Federation within the Confindustria system made up of 35 associations and product groups which has over 1,000 associated companies, among the most qualified in their respective production sectors.

The Italian mechanical industry represented by ANIMA Confindustria is a sector that employs 224,000 people for a turnover of 60 billion euros and an export/turnover share of 60%.

Within ANIMA Confindustria there are 35 different vertical associations that identify B2B industrial supply chains crucial for the valorization of Made in Italy technologies involved in the supply and subcontracting of products, services and technologies in numerous fields in which Italian companies excel: from construction to infrastructure for water, gas and green hydrogen, from handling and logistics to food processing and water technologies; from energy production (from Oil&Gas to Nuclear and Hydrogen) to

technologies and products for the innovative development of the various industrial sectors, as well as technologies and products for safety and the environment.

LOXEAL®
ENGINEERING ADHESIVES

Loxeal Engineering Adhesives is an Italian chemical company specialized in the development and supply of high-performance adhesives and industrial bonding solutions. Serving customers worldwide, Loxeal combines innovative products, technical expertise, and reliable service to meet the demands of modern manufacturing.

Loxeal offers a complete portfolio of adhesive technologies, including anaerobic adhesives, cyanoacrylates, UV-curable adhesives, structural epoxy and acrylic adhesives, silicones and sealants, surface conditioners, and dispensing systems.

Loxeal's anaerobic adhesives include thread sealants, threadlockers, and retainers for sealing, locking, and securing metal assemblies. They provide reliable performance in hydraulic and pneumatic systems, protecting components against leakage, vibration, corrosion, and mechanical stress. Selected products are certified to internationally recognized standards, including DVGW, AGA, WRAS, BAM, and NSF.

The Instant Cyanoacrylate range delivers rapid bonding of a wide variety of substrates, including metals, plastics, rubber, wood, leather, and ceramics. UV-curable adhesives provide fast, transparent, high-strength bonding for glass, metals, and plastics where at least one substrate is UV transparent.

Loxéal's structural epoxy and acrylic adhesives are designed to improve manufacturing efficiency while delivering durable, high-strength bonding for metals, composites, and engineering plastics, even in demanding operating conditions.

Beyond its products, Loxéal is a trusted partner in developing customized bonding solutions, supported by expert technical assistance and a flexible, reliable supply chain that ensures consistent performance and customer satisfaction.

INDUSTRIAL TRADITION AND INNOVATION.

The history of Officine Rigamonti began in 1950 in Valduggia, the center of the Valsesian district of valves and taps. At first, the Company focuses on the production of cast iron material. The processing of brass is introduced in the 70s, specializing in the development and production of pressure reducing valves and heating products. Around the early 1980s, Officine Rigamonti's offer expands with the introduction of 2 new product groups, fittings and accessories for water supply systems. A further step towards innovation was taken in 2008, with the presentation of the Sunshine Solar Line, a line of accessories for solar heating. Over the years Officine Rigamonti has aligned itself to the strictest standards in force on National and International level, regarding quality, environment and safety management.

Officine Rigamonti proposes itself as a reliable Made in Italy partner who, in addition to ensuring high quality products, gets involved alongside its customers to grow together and turn our gaze towards new and increasingly ambitious and satisfying goals. Thanks to a supply chain completely handled internally - from the research laboratory to the forging, up to shipment - Officine Rigamonti is able to respond to all market needs, create flexible ad hoc solutions and produce in OEM optics.

Founded in 1947, Perissinotto S.p.A. is a leading manufacturer of heavy-duty slurry pumps, offering one of the industry's most comprehensive product ranges for demanding abrasive, corrosive, and acidic applications.

PEMO pumps are available in special alloys, hard metal, and rubber-lined versions, with customized solutions including single-stage, multi-stage, submersible, and vertical configurations to meet the most challenging process requirements.

Key product features include:

- Extended service life thanks to PEMO's proprietary designs and advanced materials.
- Outstanding corrosion resistance through the selection of the most suitable alloys for aggressive process fluids.
- Single, double, and cartridge mechanical seal options to ensure maximum reliability, minimize leakage, and prevent contamination.
- Flow rates up to 2,000 m³/h.
- Total Dynamic Head (TDH) up to 200 m.

PEMO pumps are successfully employed across a wide range of industries, including mining, quarrying, aggregate washing, industrial wastewater treatment, stone processing, ceramics, oil & gas, drilling and tunnelling, precious

metal refining, chemical processing, fertilizer production, pharmaceuticals, pulp & paper, distilleries, and the food & beverage sector.

With decades of engineering expertise, Perissinotto S.p.A. develops tailored pumping solutions for applications involving high-solid slurries, abrasive media, and highly corrosive fluids. Every project is engineered to deliver the optimal balance of material compatibility, wear resistance, operational reliability, and long-term performance."
