STAND H.26A

WELCOME LETTER OF AMBASSADOR OF ITALY TO LIBYA

It is a great pleasure to welcome you to the Italian Pavilion at the Libya Construction Expo in Tripoli.

For the first time, this important exhibition hosts an Italian Pavilion. Its presence is a clear sign of the growing interest of Italian companies in the Libyan market and of their confidence in the significant construction activity currently underway across the country's main cities.

Libya's construction sector is strategic to the country's future development. In this context, Italian companies are playing an important role, bringing to the Libyan market not only technical expertise, high-quality materials and innovative solutions, but also a strong commitment to partnership, reliability and mutual trust. Recent trade data, covering the first four months of this year, confirm Italy's position as Libya's leading trading partner. This strong and longstanding economic relationship is creating opportunities for cooperation in an increasingly broad range of sectors, alongside our traditional areas of partnership, such as oil and gas and energy.

Visitors to the Italian Pavilion will find a wide range of products and solutions, from construction machinery and equipment to high-end interior furnishings. Italian excellence continues to generate strong interest among both public and private Libyan operators, who recognize Made in Italy as a hallmark of quality, innovation and design.

The Embassy of Italy, together with the Italian Trade Agency and the other key actors of the *Sistema Italia*, works closely with our Libyan partners to further strengthen economic cooperation, support investment and contribute to a clear, stable and mutually beneficial business environment.

The presence of so many Italian companies is a concrete expression of our commitment to deepening economic ties between Italy and Libya. It is also a reflection of our shared belief that stronger commercial partnerships can contribute to sustainable growth and prosperity for both our countries.

I would like to wish all the exhibitors and participants a successful and productive experience at the Libya Construction Expo.

Gianluca Alberini

Ambassador of Italy to Libya

Ambasciata d'Italia Tripoli

WELCOME LETTER OF DIRECTOR OF TRIPOLI ITA OFFICE

On behalf of the Italian Trade Agency Office in Tripoli, I am pleased to welcome all Italian companies to the Libya Construction Expo.

Attending this exhibition is a strategic decision, as it provides an ideal platform to strengthen existing business networks and capture new commercial leads-both for companies that have established experience in Libya and for those entering the market for the first time.

The construction sector in Libya is dynamic and growing fast. Italian solutions are highly valued because they combine innovation, reliability, and high quality.

This year marks a significant milestone for the Italian Trade Agency as we celebrate our 100th anniversary. Over the past century, ITA's global network has supported Italian SMEs by promoting Made in Italy worldwide through targeted initiatives.

Global markets constantly change and evolve, yet worldwide appreciation for Made in Italy remains unchanged.

To fulfill our institutional mission of helping Italian firms succeed abroad, we actively identify new opportunities and promotional initiatives and setting up our first official Italian Pavilion at this Expo is a clear example.

Through our official national pavilion, we reaffirm

Italy's presence in Libya and our commitment to strengthening bilateral trade relations, in close and constructive collaboration with our Libyan partners.

I wish all Italian companies and visitors a very successful exhibition.

Libero Tessitore

Director

Italian Trade Agency Office - Tripoli

FINCO

Italian Federation of Industries for Products, Systems and Services for Construction, Maintenance, Mobility and Cultural Assets and Heritage

At the moment, FINCO Federation puts together 40 Associations representing, among the others, the following fields: historical and monumental restoration, renewable energies (e.g. biomass, geothermy and hydroelectricity), doors, overhead doors, shutters, roofings, technical curtains, mosquito nets, external and sunscreen protection systems and components, safety harnesses and belts, metal carpentry, fireplaces and stoves for interiors, safety fire systems, fastening tools, sound barriers, scaffoldings, geognosy surveys, accident prevention signs, façades with integrated sunshade systems, metal sheet building pieces, solar shields, zenithal systems, curtain wall, aluminium and pvc windows, doors and gates, rolling shutter, loading systems, roofing systems, pluvial and gutters, condominium administration companies, remediation and asbestos removal services, parkland and landscaping companies (realization and maintenance), plant system suppliers, war mine clearance and other services sectors linked to construction.

The Federation aims to increase the value and the visibility of each Federated Association.

FINCO mainly operates when its action can be more effective than the single Associations operating alone, helping firms to get in touch with the international market.

FINCO operates on behalf of its own Association through:

1. Parliamentary and Ministerial lobbying for the adoption of laws and decrees in order to help the represented sectors: providing amendments in the general legislative procedures (for example the Financial Law and related measures); following and stimulating the Public Administration work in significant issues (e.g. the Inter-ministerial Decree about the CE marking on the building products);
2. coordination and reinforcement of the Italian producers of materials, equipment and services inside the construction sector;
3. involvement in working groups on Ministerial issues, integrating and strengthening the weight of each Association;
4. collaborations with public and private national or international organizations belonging to the building and infrastructural sector;

5. organization and management of internal Working Groups to address the various issues of the Associations;

6. supplying the Associations with Counseling Services through experienced subjects in different

sectors;

7. promotion of events which allow to expand the market of the building materials, services and equipment .

CONFIMI

Confimi Edilizia: Building a Stronger Future for Construction

Confimi Edilizia is the division of Confimi Industria representing over 2,800 companies and 32,000 employees across construction, manufacturing, and related supply chains (timber, stone, marble, steel, and prefabrication). Its mission is to revitalize a strategic sector of the Italian economy through a practical approach, translating business needs into policy proposals and commercial opportunities.

The organization bridges construction and manufacturing by focusing on collective bargaining, workplace safety, public procurement, professional training, access to credit, and partnerships with institutions and universities. It is led by Renato Della Bella, entrepreneur and legal representative of IDB Srl.

The 2030 Manifesto: The vision is built on five pillars: sustainability, advanced industrial relations, private enterprise development, environmental protection, and innovation. To restore the sector's central role, Confimi Edilizia advocates for regulatory simplification and public procurement based on quality and expertise. Key priorities include modernizing infrastructure and redeveloping existing building stock.

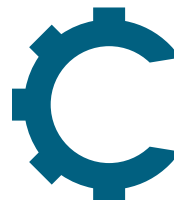

Innovation and the Role of SMEs: Digital transformation—from energy retrofitting to smart buildings and structural monitoring—is essential to renewing supply chains and processes. SMEs are at the heart of this evolution: Confimi Edilizia supports their growth in both domestic and international markets, serving as a platform for cooperation and development toward 2030.

ITALIAN-LIBYAN CHAMBER OF COMMERCE

The Italian-Libyan Chamber of Commerce promotes economic cooperation between Italy and Libya. It supports companies in both markets, especially SMEs.

The Chamber provides business matchmaking, market guidance, and administrative assistance, offering concrete and operational support to enterprises.

With offices in Rome, Tripoli, and Benghazi, it combines institutional coordination with local expertise.

As a bilateral and institutional body, the Chamber represents the interests of the Italian business community as a whole, facilitating structured engagement with Libyan authorities and economic stakeholders.

It plays a key role in mobilizing Italian companies across strategic sectors, supporting their participation in development and reconstruction initiatives in Libya.

Through high-level forums, partnerships, and targeted projects, the Chamber contributes to building a stable and long-term economic relationship between the two countries.
