WELCOME OF AMBASSADOR

On the occasion of Big 5 Saudi Arabia 2026, I am pleased to extend my warmest greetings to the many Italian companies participating in this important exhibition in Riyadh.

Italy's significant representation in this year's edition is particularly meaningful in the current regional context, and it once again reflects the depth and vitality of the longstanding partnership between our Country and the Kingdom. It also confirms the growing and committed dynamism of our bilateral economic relations and the increasing interest of Italian businesses in contributing to Saudi Arabia's ambitious development agenda.

As the Kingdom continues to advance its Vision 2030 transformation, the construction sector plays a pivotal role in shaping the Country's future. In this context, Italy is recognized not only as a trusted economic ally, but also as a source of excellence and partner in technology, engineering, design, sustainability, and advanced manufacturing. Italian companies

bring world-class expertise, high-quality solutions, and a strong commitment to innovation, making them valuable partners in supporting the Kingdom's strategic projects.

The Embassy of Italy remains fully committed to further strengthening bilateral economic, trade and industrial relations, working in close cooperation with Saudi Institutions, together with the Italian Trade Agency, the Italian business community, and the entire Sistema Italia.

I am confident that Big 5 Saudi Arabia 2026 will provide valuable opportunities to consolidate existing relationships, establish new collaborations, and create the conditions for long-lasting partnerships based on mutual trust, quality, innovation and shared prosperity.

I wish all exhibitors a productive and rewarding participation.

Carlo Baldocci

Ambassador of Italy
to the Kingdom of
Saudi Arabia

WELCOME OF DIRECTOR

It is my pleasure to welcome you to the Italian Pavilions at the second edition of Big 5 Construct Saudi.

Italy is proud to support Saudi Arabia's transformation through advanced technologies, engineering excellence, and long-term partnerships. The strong Italy-Saudi relationship continues to create opportunities in construction, infrastructure, machinery, energy efficiency, and advanced manufacturing.

The Italian Trade Agency (ITA), with the Embassy of Italy in Riyadh, supports Italian companies in Saudi Arabia and promotes trade, investment, and cooperation.

This year's participation highlights two sectors: At HVAC R Expo Saudi, Italian manufacturers present innovative, sustainable HVAC and refrigeration solutions.

At the Construction Equipment Pavilion, visitors can explore advanced machinery for construction, earth-moving, quarrying, mining, and material handling.

Italian companies are known for quality, innovation, reliability, and tailored sustainable solutions, making them strong partners for the Kingdom's projects.

The participation is organised by ITA with ANIMA Confindustria Meccanica Varia and UNACEA.

We invite you to visit the Italian Pavilions and meet our exhibitors. The ITA team will be happy to assist you in finding suitable partners.

Thank you for your visit and enjoy the exhibition

Simona Autuori

Director
Italian Trade Agency
Riyadh Office

ITALIAN TRADE AGENCY

Italian Trade Agency
Trade Promotion Section of the Italian Embassy

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses.

Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

ANIMA

Federation of Italian Associations of Mechanical and Engineering Industries, represents within Confindustria companies of mechanical sector, which employs 225.000 employees, with 54,6 billion Euro production and 57,0% export share (estimates 2022).

Established 1914, ANIMA numbers 34 associations and 1,000 companies, highly qualified in the sectors represented:

- Energy production and Oil & gas
- Gas industry
- Logistics and Handling
- Water Treatment & Food Processing
- Industry
- Building
- Personal Security and Safety

UNACEA

Unacea - Italian construction equipment association, founded in 2010, counts more than 85 member companies and a rate of representativeness in terms of turnover of 80%, both in producing and importing of all types of equipment: earthmoving, road, concrete, drilling, attachments, and tower cranes. The industry has a manufacturing turnover of 2.5 billion euros and an employment volume of 36 thousand workers, including related activities. Unacea represents the Italian industry in Cece - the Committee for European construction equipment, based in Brussels. Unacea represents the interests of the industry before the Italian Ministries, Authorities and public bodies that deal with construction equipment and promotes the internationalization of Italian companies organizing national pavilions.

☎ +39 0355 290389

✉ info@neron.it

🌐 www.neron.it

The development of a new concept hydraulic high pressure pump by Italian pumps manufacturer Neròn Pumps promises to make hydro cleaning a simpler process.

The Neron pump, designed for efficient installation on mobile machines, is developed to solve the problems arising from high pressure pumping applications.

The Neron hydro cleaner with integrated hydraulic motor is designed to plug directly into a hydropower unit on a mobile machine or vehicle and eliminates the need for an electric motor or adjacent power source. The machine connects directly to a hydraulic circuit. Traditionally hydro cleaners run off an electric motor that needs to be plugged into a main power source. If you have hydropower on a vehicle you just plug the device into the hydropower on the circuit.

The water pump is designed for simple connectivity and application since it is driven directly off a hydraulic supply unit, compact and lightweight and the power to weight ratio is added advantage, it is self-priming, can be installed in any position, silent, versatile and simple to install, unloader and safety valves built in that guarantee risk free operation and reliability."

The small dimensions makes the pump suitable for installation on tractors, excavators, concrete trucks, concrete pumps, fire fighting vehicles, drilling machines, vacuum trucks, urban cleaning machines and shipping vessels.

SEA-LAND
