ITALIAN PARTICIPATION IN REBUILD UKRAINE CONSTRUCTION & ENERGY

Warsaw, 12–13 November
2026

1926 — 2026 ITA ITALIAN TRADE AGENCY

A CENTURY OF PROMOTING MADE IN ITALY WORLDWIDE

Message from the Ambassador of Italy to Poland

Ambasciata d'Italia
Varsavia

I am very pleased to welcome the Italian participants in the 6th edition of the *"Rebuild Ukraine"*, which has established itself as a major platform to garner international support for Ukraine.

I am pleased to note the constantly growing Italian presence in this event, which demonstrates our determination to sustain Ukraine's recovery through lasting partnerships.

This year, under the coordination of the Italian Trade Agency (ICE) and the Ministry of Foreign Affairs and International Cooperation, and with the Embassy's support, the participation of Italian companies and business associations has reached an all-time high.

Such large presence builds on the successful *Ukraine Recovery Conference* (URC) held in Rome in 2025 as well as the highly qualified Italian participation in the URC hosted by Poland last June in Gdańsk, and reflects the broad scope and multidimensional nature of Italy's support to Ukraine.

Italy's know how and entrepreneurship can be key factors to sustain the recovery and reconstruction process, while Poland, thanks to its geographical position, advanced infrastructural system and strong links with the Ukrainian economy, represents an essential partner. I am therefore convinced that *"Rebuild Ukraine"* offers a valuable opportunity to connect the Italian and Polish economic systems, leverage their complementarities and solidify partnerships which can bring concrete benefits for Ukraine's recovery.

I thank all Italian participants for their commitment and wish everyone a fruitful and successful event.

Luca Franchetti Pardo
Ambassador of Italy to Poland

Message from the Special Envoy of Italy for the Reconstruction of Ukraine

I am pleased to welcome the Italian companies and all participants to the 2026 ReBuild Ukraine Conference in Warsaw. The presence of nearly 100 Italian companies is a remarkable achievement: for the first time since ReBuild Ukraine began in 2023, our business community is represented on such a large scale, confirming Italy's strong commitment to Ukraine's recovery. With 40 company stands covering two halls, the Italian Pavilion is among the largest this year.

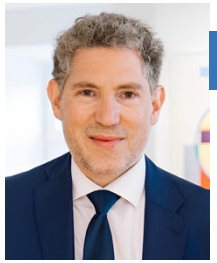

This strong participation confirms that the Italian business community has identified the reconstruction of Ukraine as one of its key future lines of activity. It also reflects the determination of our businesses to turn their expertise, innovation and industrial capacity into concrete opportunities for joint cooperation. Italy already contributes bilaterally to Ukraine's recovery for over 3.2 billion €, while our private sector, local authorities and civil society organizations are more and more engaging in direct partnerships with their Ukrainian counterparts. Italy remains firmly committed to supporting Ukraine's continued reforms and alignment with European standards, which will be crucial to strengthening investor confidence and advancing Ukraine's path towards EU membership.

Today's Conference follows the strong Italian participation in the Ukraine Recovery Conference in Gdańsk in June 2026 and comes ahead of the URC 2027, to be held in Tallinn in January, for which ReBuild Ukraine serves as a preparatory event. Our presence in Warsaw is the result of joint efforts by the Task Force for the Reconstruction of Ukraine established by the Vice President of the Council and Minister for Foreign Affairs and International Cooperation Antonio Tajani, our economic and development agencies—including the Italian Trade Agency, as well as SACE, SIMEST and CDP —and the Interministerial Working Group for the Reconstruction of Ukraine.

I wish our companies and all participants a productive Conference. May the partnerships built in Warsaw translate into lasting business opportunities and tangible results for Ukraine's recovery and future prosperity.

Davide La Cecilia
Italy's Special Envoy for the Reconstruction of Ukraine

Messages from the Directors of the Italian Trade Agency in Warsaw and Kyiv

ITA – Warsaw Office

The Italian Trade Agency – Warsaw Office is proud to coordinate Italy's collective participation in *ReBuild Ukraine 2026*, in close cooperation with our Kyiv office and under the guidance of the Embassy of Italy in Poland.

Our continued presence reflects the growing commitment of Italian companies to contributing to Ukraine's reconstruction through concrete partnerships with Polish and Ukrainian counterparts. Our role is to facilitate these connections — helping businesses identify reliable partners, understand local dynamics, and turn opportunities into lasting cooperation.

Poland's proximity to Ukraine and its experience in infrastructure, logistics, and energy transition make it a natural bridge for Italian expertise and technology. The steady growth of Italian–Polish trade relations, approaching €37 billion in 2025, confirms the strength of this partnership and its potential to contribute to Ukraine's recovery and reconstruction.

ICE Warsaw remains fully committed to supporting companies engaged in this process — providing market intelligence, institutional coordination, and promotional tools aimed at fostering a common path of reconstruction, innovation, and sustainable growth.

Roberto Cafiero
Director – ITA Warsaw

ITA – Kyiv Office

Italy confirms its strong commitment to Ukraine's reconstruction at ReBuild Ukraine Construction & Energy 2026, ranking as the second-largest international presence.

Organized by the Italian Trade Agency (ITA), the Italian Pavilion occupies approximately 450 sqm across Halls 1 and 3, bringing together 40 Italian exhibiting companies showcasing the excellence, innovation and reliability of Made in Italy.

From architecture and engineering to construction materials, energy, infrastructure, environmental technologies and advanced building solutions, Italian companies offer high-quality expertise, cutting-edge technologies and sustainable solutions to support Ukraine's reconstruction and modernization.

Building on Italy's industrial heritage and technological excellence, the Italian Pavilion provides a dynamic platform for connecting businesses, developing commercial partnerships and identifying new opportunities for investment and cooperation. The Italian Trade Agency actively supports these connections, helping Italian and Ukrainian companies turn shared ambitions into concrete projects.

Italy stands ready to contribute its expertise, creativity and industrial capabilities to rebuilding a safer, more resilient and modern Ukraine.

Discover Italian solutions, meet our companies and build Ukraine's future together.

Fabrizio Giustarini
Director – ITA Kyiv

ITA – ITALIAN TRADE AGENCY

1926 — 2026 ITALIAN TRADE AGENCY
A CENTURY OF PROMOTING MADE IN ITALY WORLDWIDE

ITA headquarter in Rome

ITA – Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

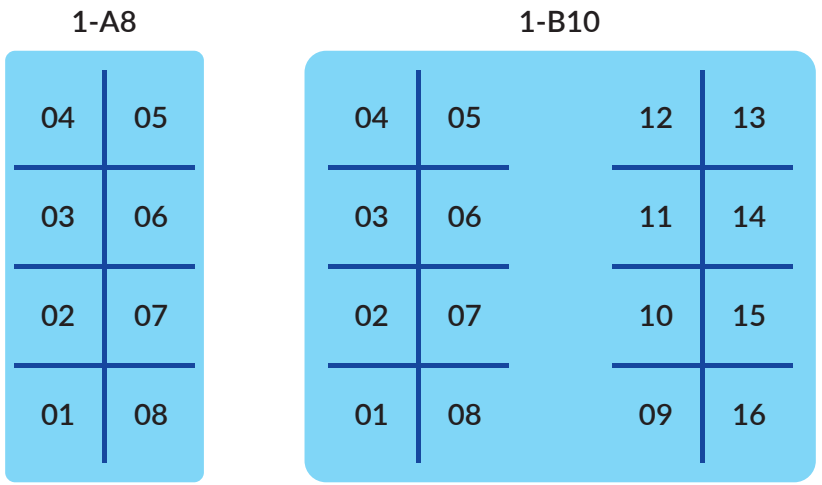

In 2026, ITA celebrates its 100th anniversary, marking a century of commitment to supporting Italian companies in international markets, adapting to global economic transformations while remaining faithful to its original mission: promoting Italian excellence worldwide.

CED ITALY TRANSFORMERS

STAND 3-C12-01

C.E.D.

Since 1960, CED has been shaping the future of electrical transformers, combining decades of expertise with a constant drive for innovation.

Our extensive product range includes low-voltage transformers, medium-voltage transformers, cast resin transformers, isolation transformers, transformers for medical rooms, autotransformers, and wound components.

We deliver high-performance solutions, from fully bespoke transformers to large-scale production, tailored to the needs of companies worldwide.

CED offers unique value points which give it a distinct edge in the sector.

Salient among our distinguishing features are custom-made transformers and our commitment to fast delivery times.

FABBRICADIGITALE

STAND 3-B8-02

fabbricadigitale is an Italian software company and an enabler of Italy's National Strategic Hub (Polo Strategico Nazionale). For the energy sector, it has developed Energeea, a domain-specific agentic AI platform. Energeea creates a regulatory and market digital twin of the energy system by integrating regulations, data, and models to simulate the impact of decisions on power grids, renewables, energy storage, tariffs, and investments. Its AI agents turn complex scenarios into traceable evidence and actionable insights for utilities, grid operators, public authorities, and investors.
