Ambasciata d'Italia
Riad

INTRODUCTION FROM THE AMBASSADOR OF ITALY TO THE KINGDOM OF SAUDI ARABIA, H.E. CARLO BALDOCCI

Mobility, transportation and infrastructures are pivotal aspects in the dialogue between Italy and Saudi Arabia. We just had proof of this during the recent Saudi-Italian Business & Investment Forum where the breakout session dedicated to this theme witnessed the participation of about 400 Italian companies.

In this context, Italy's leading role in innovation, efficiency and sustainability in aviation is highlighted by the increased presence of prominent Italian enterprises in the field of airport infrastructures and amenities at this year's Saudi Airport Exhibition (SAE).

The Italian participation in SAE underscores our long-standing expertise in the sector, showcasing cutting-edge technologies, advanced design capabilities and world-class engineering and solutions. The Italian companies present at SAE, valuably sup-

ported by the Italian Trade Agency's office in Riyadh, bring to Saudi Arabia a mix of technological excellence and refined operational know-how related to terminal architecture, air-traffic solutions, security systems and smart technological innovations.

The Embassy of Italy in Riyadh, together with all the actors of the Italian System present in the Kingdom, strongly support a fruitful cooperation between Saudi key stakeholders and Italian firms committed to implement efficient projects in the aviation sector, marked by the quality of Made in Italy.

Once again, the Italian presence demonstrates not only our commitment to contribute to the Saudi Vision 2030 goals and to support the Kingdom's ambitious aviation expansion to become a crucial regional and international hub, but also the strength of the strategic partnership between Italy and Saudi Arabia, which continues to grow as both countries work together to develop safer, innovative, more efficient and more sustainable routes that meet the demands of future global mobility.

Carlo Baldocci

ITALIAN TRADE AGENCY

Dear Visitor,

It is our pleasure to warmly welcome you to the 2025 Global Airports Forum, the Kingdom's premier event dedicated

to the transformative journey of Saudi Arabia's airport expansion and modernization. This year's edition represents the largest gathering of its kind in the region, offering a unique opportunity to witness cutting-edge innovations and technological advancements reshaping passenger experience, airport operations, and infrastructure development.

Focused on the pillars of Expansion, Innovation, and Collaboration, the Global Airports Forum serves as a vital platform to support the Kingdom's Aviation Strategy. Leaders, decision-makers, and professionals from around the world will come together to foster partnerships and strengthen the global supply chain necessary to advance Saudi Arabia's ambitious airport development goals. In doing so, the Forum drives forward the Kingdom's vision for economic growth, diversification, and international connectivity.

We invite you to make the most of this extraordinary networking environment. Explore new technologies, engage with top industry experts, and meet potential partners committed to excellence in aviation. Your participation will not only broaden your perspective but also contribute significantly to the continued advancement of Saudi Arabia's dynamic aviation sector.

Welcome to the 2025 Global Airports Forum, and in particular to the Italian Pavilion, which brings together 25 leading Italian companies and is organized in collaboration with Air Tech Italy with the support of OICE. We look forward to a productive and inspiring experience together.

The presence of these companies represents a unique opportunity to showcase Made in Italy excellence in the aviation sector and to develop strategic collaborations with local and international partners. We are confident that this edition will provide concrete business opportunities and lasting synergies between Italian enterprises and Saudi stakeholders.

Warm regards,

Romano Baruzzi

Director

Italian Trade Agency

Riyadh Office

AIR TECH ITALY

Air Tech Italy (ATI) is the leading Trade Association representing Italian companies specialized in supplying products, technologies and services for airports, civil aviation authorities and air navigation service providers.

The organization is the first point of contact for international clients looking for top-quality Italian companies. The main goal of the Association is to support airport operators, civil aviation organizations and air traffic service providers with the right solutions "Made in Italy" to cover their aviation needs.

The organization was founded in July 2020 under the institutional patronage of ENAC (Italian Civil Aviation Authority) to bring together leading Italian suppliers of solutions for the aviation industry in one strong organization.

Internationalization, Digitalization, Innovation and Sustainability are the main drivers of ATI members.

ATI supports its Members in networking and establishing collaborative relationships, providing them with practical assistance for business intelligence, business meetings, participation in business missions and international trade fairs.

OICE is the employers' Association, belonging to Confindustria (the Confederation of Italian Industry), which represents Italian engineering, architectural and technical economic consulting organizations.

Founded in 1965 OICE unites all the major Italian engineering and architecture companies and most of the best qualified small and medium firms in the sector.

OICE operates in 4 major areas: representing and safeguarding category interests, promoting the culture of organized engineering, providing services for members and promoting internationalization of Italian Engineering.

OICE is member of FIDIC - International Federation of Consulting Engineers and EFCA - European Federation of Engineering Consultancy Associations.

OICE participates to the international activities and Italian Institutional missions, promotes special partnerships, sustains the participation of the Italian Consulting companies to the tenders organized by the International Financial Institutions (WB, EBRD, AfDB, ADB, IDB etc...).

Areas of specialization are urban and territorial planning, architecture and cultural heritage, real estate, civil engineering, transports, environment, energy, agriculture and rural development.
