ITALIAN TRADE AGENCY

Messages from the Italian Trade Commissioner, the Ambassador of Italy to Australia and the Consul General of Italy in Melbourne

ITALIAN TRADE COMMISSIONER

Welcome to the Italian Pavilion at All Energy Australia 2026.

The Italian Trade Agency in Sydney is incredibly proud to host this national participation for the third consecutive year. As Australia accelerates its bold energy transition, the demand for reliable infrastructure and circular economy solutions has never been more urgent. From overcoming global transformer supply bottlenecks to addressing impending e-waste mandates, local developers need trusted engineering partners.

Italy proudly stands as Europe's second-largest electrotechnical production hub. Our manufacturing heritage is built on bespoke innovation, agility and an unwavering commitment to quality.

Here you will discover six pioneering Italian companies offering end-to-end solutions. Whether you require custom high-voltage transformers, switchgear and modular eHouses to secure grid connections – or turnkey solar recycling lines and advanced decarbonisation systems for heavy industry – our delegation delivers.

We are here not just as technology suppliers but as dedicated partners eager to help keep your projects on schedule, de-risk investments and build a sustainable future together.

I warmly invite you to explore our stand and connect with our exceptional exhibitors.

Alessandro Lamura

Italian Trade Commissioner for Australia and New Zealand

I am very glad to see Italy represented at All Energy Australia 2026, an important international platform for innovation, cooperation and investment in the clean energy transition.

This year, an Italian delegation of six companies, supported by our Embassy, the Italian Trade Agency, ANIE and the Italian Ministry of Foreign Affairs, participates in All Energy Australia.

Although geographically distant, our two countries face many of the same challenges: accelerating the deployment of renewable energy, modernising energy infrastructure, developing storage solutions and supporting industries and communities through the transition to a low-carbon economy.

Australia's renewable energy sector is experiencing rapid growth, with renewables accounting for 39.5% of total electricity generation in 2025. Solar represented 19.6% of generation, while wind contributed a further 14%.

This remarkable expansion creates significant occasions for Italian companies, whose expertise in renewable energy, smart grids, energy storage, energy efficiency and other clean-energy technologies is highly complementary to Australia's ambitious energy transition.

Our presence at All Energy is an opportunity for a growing partnership at many levels between institutions, businesses, researchers and investors. By sharing knowledge, technologies and experience, we can create new opportunities and contribute to a resilient and sustainable energy system.

Nicola Lener

Ambassador of Italy to Australia

CONSUL GENERAL OF ITALY IN MELBOURNE

It is my pleasure to welcome the Italian companies taking part in the 2026 edition of All Energy Australia, now firmly established as the leading fair for renewable energy and clean technology across the Asia-Pacific region.

As Australia continues to build a more resilient and diversified energy mix, Italian industry brings proven expertise across solar, wind, energy storage and electric mobility, developed through decades of applied research and refined in some of the world's most demanding operating conditions. Over these past few years, that expertise has met growing recognition here: what began as a first outreach has become a recurring appointment and a partnership between our two countries built on shared projects and mutual trust rather than one-off transactions.

To all the Italian companies exhibiting this year, I extend my warmest welcome and best wishes for a successful fair, confident that Italian technology and expertise will continue to be a reliable choice for stakeholders across the region.

Chiara Mauri

The Organisers

ITALIAN TRADE AGENCY

The Italian Trade Agency (ITA) is the government agency responsible for promoting the internationalisation of Italian companies and the global image of Made in Italy. It operates under the supervision of the Italian Ministry of Foreign Affairs and International Cooperation, with headquarters in Rome and a global network of 72 offices and 18 liaison offices. ITA serves as a key reference point for Italian companies looking to export and expand abroad, with a particular focus on small and medium-sized enterprises. Its core activities include: market intelligence, tailored consultancy, training for companies and young professionals, promotion of Italian products and technologies, attraction of foreign direct investments into Italy.

The ITA Office in Sydney covers both Australia and New Zealand. It supports Italian companies in entering and operating in these markets by identifying business opportunities, interpreting local regulations, and establishing strategic partnerships. ITA Sydney maintains ongoing relationships with an extensive network of Italian companies with an established presence in Australia and New Zealand. It works closely with the Embassies of Italy in Canberra and Wellington, the consular network and other stakeholders of the 'Sistema Italia' present in the region. In 2026, ITA Sydney is implementing about 50 promotional initiatives, including national participations in major trade fairs, business missions, networking events and incoming delegations of buyers and journalists to leading Italian trade shows.

Federazione ANIE, member of Confindustria, has been representing the Italian Electrical Engineering and Electronic industry for over 80 years.

With over 1,100 member companies, the ANIE system supplies technologies for public and private infrastructures in strategic markets such as energy, industry, building, infrastructures and transport.

Electrical Engineering and Electronic technologies represent the heart of the twin transition – green and digital. They are drivers of innovation and are essential for the modernisation of existing infrastructure.

ANIE INDUSTRY FIGURES:

- 118 billion Euros of total turnover
- 480,000 employees
- 4% R&D intensity

The Italian Electromechanical Industry

THE ITALIAN ELECTROMECHANICAL INDUSTRY

The Italian electromechanical industry supplying technologies for the energy sector and green transition, represented by ANIE Confindustria – the National Federation for Electrical Engineering and Electronic Industry – reported an aggregate turnover of 25.8 billion Euros in 2025, consolidating a strong performance both domestically and internationally. Italy reaffirms its position as Europe's second-largest manufacturing hub, as national solutions and know-how reach more than 100 countries each year.

Based on a strong industrial tradition and combining innovation and reliability, Italian companies stand at the forefront of the global energy transition. They have developed significant expertise across the entire electricity value chain, from traditional and renewable generation to transmission and distribution, providing resilient and efficient energy systems. The strength of the Italian electromechanical industry lies in a competitive ecosystem bringing together multinationals and dynamic SMEs, with the ability to combine manufacturing, engineering, innovation and system capabilities. This enables companies to offer integrated technological solutions and expertise, rather than individual products alone. Supported by continuous investment in R&D, this ability to integrate different skills is increasingly valuable as energy systems become more interconnected and digitalised.

Participating Italian Companies

CELME TRANSFORMERS

At Celme, we've been industry pioneers since 1964. With over 60 years of experience, our transformers are trusted by customers across the globe on nearly every continent.

We specialise in renewable energy, including photovoltaic, wind and hydrogen power, providing innovative solutions for a sustainable future. We also excel in power conversion, enhancing efficiency across various applications.

Our products play a crucial role in the oil and gas industry and meet the demanding conditions of mining environments.

We're dedicated to continuous improvement and innovation, delivering high-quality products and building strong client relationships. Our vision is to lead advancements in technology and sustainability, contributing to a greener world.

C.R. TECHNOLOGY SYSTEMS

From 1985, we provide advanced energy solutions, specialising in MV switchgear up to 40.5kV and fully equipped eHouses (including SCADA, protection panels and sensors). Our products serve renewable and conventional energy sectors, focusing on PV plants and BESS. We offer complete, grid-ready and customised solutions, managing every phase: from feasibility and design to manufacturing, commissioning and after-sales support.

We work side by side with our customers, turning their needs into connection-ready solutions. Through our Engineering Hub, we anticipate market trends with cutting-edge technology. With a strong global footprint, our export expertise ensures seamless and sustainable management of complex projects worldwide.

ECOPROGETTI

Ecoprogetti is a European leader in the design and manufacture of machinery and turnkey production lines for solar panel manufacturing, testing and recycling. Founded in Italy in 1998, the company combines solid industry experience with Italian engineering excellence to deliver high-quality solutions for photovoltaic module assembly and quality control. Ecoprogetti supplies flexible, fully automated lines tailored to both emerging and established PV manufacturers worldwide, supported by training, consultancy and after-sales services. In addition, the company offers dedicated solutions for EPC contractors, including advanced testing systems for photovoltaic panels prior to installation, ensuring performance, compliance and long-term reliability.

Ecoprogetti also develops state-of-the-art recycling plants for end-of-life and defective modules, supporting circular economy principles. With more than 150 lines delivered globally and offices in India, the UAE, the USA and the Philippines, Ecoprogetti is recognised for its in-house technology, process know-how and commitment to sustainable solar production.

GBE

GBE S.p.A. is an Italian company and the market leader in the production of cast coil, VPI and liquid-filled transformers and reactors for a wide range of applications. We offer standard, special and customised solutions. Our complete product range includes:

- Cast resin transformers from 100 kVA to 30 MVA (46 kV)
- VPI transformers from 50 kVA to 30 MVA (46 kV)
- Liquid-immersed transformers from 50 kVA to 50 MVA (145 kV BIL 650)
- Cast resin, VPI and liquid-filled reactors up to 5000 A/46 kV

Based in Orgiano (Vicenza), GBE S.p.A. can boast 40 years of technical experience and knowledge. The company has experienced constant growth, expanding its original plant, which is still the headquarters, into its current four manufacturing facilities, which are fully equipped with testing rooms and offices. The entire production process complies with ISO 9001:2015, ISO 14001 and ISO 45001 standards.

All products can be designed according to various international standards including IEC, UL, ANSI and IEEE. GBE S.p.A. offers excellent-quality products manufactured with state-of-the-art technology, competitive quotations, flexible delivery terms and technical support to guide clients in choosing the best available standard or tailor-made solution.

MABRE

Since 1972, our core expertise is in biomass-fired Air Heaters and Boilers: systems that turn wood chips, sawdust, pellets, shavings, olive husks, olive/peach/apricot pits, macadamia/nut/almond shells and similar by-products into clean, low-cost thermal energy.

Typical applications: grain and timber drying, greenhouse and poultry house heating, industrial process heat and general space heating.

Best materials available on the international market, extensive automation in component production, quality control at every stage of manufacturing and final performance testing make Mabre a brand that guarantees consistently high quality and reliability. We export to 40 countries and provide after-sales service and technical support worldwide.

REDECAM GROUP

Redecam Group S.p.A. is a leader in the Air Pollution Control Industry with innovative solutions executed around the world. Headquartered in Milan, Italy, Redecam delivers engineering, equipment and service for flue gas treatment and waste heat recovery and solutions to the industry with references in 6 continents and more than 3,300 solutions to all the major players in all the industrial fields (Cement, Metals, Power, Waste to Energy, Biomass, Maritime, Carbon Black, Chemicals, Oil & Gas), most of them realised on a turn-key basis.

Our expertise is Air filtration (Electrostatic Precipitators, Bag Filters, Cyclones, Spark Arrestors); Air Cooling (Heat Exchangers, Quenching Towers); Flue Gas Treatment (DeSox dry and Semi Dry Systems, SNCR & SCR DeNox, Hg and Heavy Metals abatement, Dioxin and VOC removal); Heat recovery (Economisers, Diathermic Oil Heat Exchangers, Oil-water heat exchangers, Steam Rankine Cycle Turbine and Organic Rankine Cycle Turbine).
