MESSAGES FROM THE ITALIAN TRADE COMMISSIONER, THE AMBASSADOR OF ITALY TO AUSTRALIA AND THE CONSUL GENERAL OF ITALY IN SYDNEY

ITALIAN TRADE COMMISSIONER

Welcome to the inaugural Italian Pavilion at IMARC 2026.

The Italian Trade Agency in Sydney is thrilled to host our first national participation at this prestigious event. As the Australian mining sector embarks on a monumental US\$42 billion execution phase, the need for robust and resilient infrastructure has never been greater. We understand that local operators are navigating complex supply chain challenges, extended lead times and the costly threat of unplanned downtime. More than ever, you need engineering partners you can truly rely on.

Italy is proud to be a global powerhouse in heavy industrial manufacturing. Our engineering heritage is built not just on strict safety compliance and exacting tolerances, but on a deep, passionate commitment to solving our clients' toughest challenges in extreme environments.

Here you will discover an exceptional group of Italian enterprises ready to offer end-to-end solutions. From durable super duplex pumps, advanced fluid filtration and robust demolition attachments to bespoke bulk conveyors, aerial ropeways and highly responsible ESG-compliant extraction models – our delegation is here to deliver.

We come to IMARC not merely as equipment suppliers but as dedicated partners. We are fully committed to keeping your projects on track, securing your supply chains and de-risking your investments for a sustainable future.

I warmly invite you to step into our pavilion, experience Italian excellence firsthand and connect with our exhibitors.

Alessandro Lamura

Italian Trade Commissioner for Australia and New Zealand

It is a great pleasure to be here with you today in the framework of IMARC 2026.

Italy's presence here in Sydney confirms the strategic importance of our partnership with Australia in the field of critical minerals.

In an international environment marked by uncertainty, volatility and increasing competition for resources, the MoU between EU and Australia signed in 2025 sets a framework for the creation of more secure, stable and sustainable supply chains for critical and strategic minerals.

Australia, with its abundant mineral resources, dynamic mining industry and stable and transparent regulatory framework, plays a central role in developing secure and sustainable critical-minerals supply chains. The mining sector accounts for approximately 12% of Australia's GDP, underlining its fundamental importance to the national economy.

Italy can contribute to this partnership through its internationally recognised expertise and technologies in engineering, advanced manufacturing, automation, digitalisation, energy efficiency and sustainability.

Our participation in IMARC 2026 is not simply an opportunity to showcase Italian excellence, but a platform to foster new partnerships, attract investment and develop resilient, sustainable and innovative value chains.

Nicola Lener
Ambassador of Italy to Australia

CONSUL GENERAL OF ITALY IN SYDNEY

As the Consul General of Italy in Sydney, I am particularly proud to see a growing Italian presence at such an important fair and exhibition event as IMARC.

This year we will have a group of companies, from different parts of our country, showcasing their know-how and technology.

We range from industrial fluid handling and water pumping to advanced belt conveyor and aerial ropeway solutions for bulk materials, to hydraulic fluid filtration solutions.

Italian companies have understood the importance of the Australian market, and they are trying to participate in the different opportunities that are available.

The Italian institutions in Sydney are always available to accompany them on this journey, which is becoming more and more promising every year.

THE ORGANISERS

ITALIAN TRADE AGENCY

The Italian Trade Agency (ITA) is the government agency responsible for promoting the internationalisation of Italian companies and the global image of Made in Italy. It operates under the supervision of the Italian Ministry of Foreign Affairs and International Cooperation, with headquarters in Rome and a global network of 72 offices and 18 liaison offices. ITA serves as a key reference point for Italian companies looking to export and expand abroad, with a particular focus on small and medium-sized enterprises. Its core activities include: market intelligence, tailored consultancy, training for companies and young professionals, promotion of Italian products and technologies, attraction of foreign direct investments into Italy.

The ITA Office in Sydney covers both Australia and New Zealand. It supports Italian companies in entering and operating in these markets by identifying business opportunities, interpreting local regulations, and establishing strategic partnerships. ITA Sydney maintains ongoing relationships with an extensive network of Italian companies with an established presence in Australia and New Zealand. It works closely with the Embassies of Italy in Canberra and Wellington, the consular network and other stakeholders of the 'Sistema Italia' present in the region. In 2026, ITA Sydney is implementing about 50 promotional initiatives, including national participations in major trade fairs, business missions, networking events and incoming delegations of buyers and journalists to leading Italian trade shows.

ANIMA

ANIMA Confindustria is the industrial trade association that, within Confindustria, represents companies in the diverse mechanical engineering and related sectors. The Federation is made up of 35 associations and product groups, and has over 1,000 member companies. The sector represented by Anima:

- Employees: 222,400
- Sales: €59.1 billion
- Exports on sales: 60%

ANIMA's strategic goals include providing companies with skills, knowledge and services of high added value.

Macrosectors represented

- Construction equipment, machines and products
- Goods handling and logistics
- Technologies and equipment for food and water products
- Machines and plants for energy production and for the oil and chemical industry
- Technologies and products for industry
- Machines and systems for personal and environmental safety

Our mission

We protect the interests of the mechanical engineering industry in general, promote our member companies and their products, both in Italy and abroad, and support them in resolving their technical and economic problems.

In Italy

ANIMA is a founding member of UNI (Italian standardisation body). ANIMA Confindustria is also the majority shareholder of ICIM Group, a holding that includes ICIM SpA, OMECO, Consorzio PASCAL, TIFQ, TIFQlab.

In Europe

At the European level, ANIMA is a founding partner and an active member of Orgalim (European Federation of Mechanical Engineering).

Worldwide

ANIMA promotes Italian mechanical excellence by supporting internationalisation through trade missions, international trade fairs and strategic partnerships with global institutions. The Federation assists member companies in navigating international standards and expanding their export presence across key global markets.

THE ITALIAN MECHANICAL ENGINEERING INDUSTRY

THE ITALIAN MECHANICAL ENGINEERING INDUSTRY

The Italian mechanical engineering industry is a diverse and highly specialised sector, representing one of the principal strengths of the national manufacturing system.

Its companies operate across numerous fields, including machinery and equipment, energy technologies, household appliances, safety systems, lifting and handling equipment, plumbing and heating products, and industrial components.

A significant part of this industrial landscape is represented by ANIMA Confindustria, a federation of 35 industrial associations. ANIMA brings together enterprises that design and manufacture technologies essential to modern economic and social development. These companies range from small and medium-sized enterprises to internationally recognised industrial groups, combining advanced engineering skills with a strong tradition of craftsmanship.

The sector is characterised by innovation, reliability, customisation and attention to environmental sustainability. Italian manufacturers are increasingly investing in digitalisation, energy efficiency, automation, and circular production models in order to remain competitive in global markets.

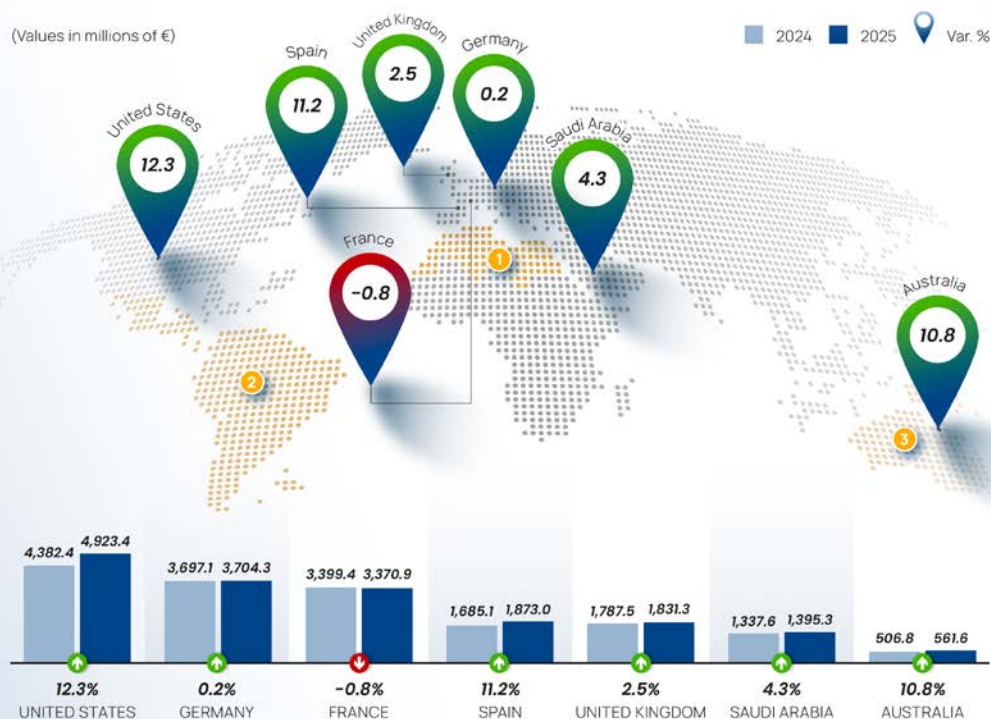

The Italian mechanical engineering industry has long been appreciated abroad. Indeed, the sector represented by Anima exports 60% of its products worldwide. Australia represents a market of interest, having seen growth of 10.8% in 2025.

PARTICIPATING ITALIAN COMPANIES

AGUDIO

Agudio is the brand of Leitner dedicated to material transportation system on ropes, solution able to reduce the distances and overfly obstacles such as valleys, rivers and protected areas. Our product range includes Material Ropeways, Cable Cranes and the Flyingbelt, a rope suspended conveyor belt. Agudio is a world leader in bulk material transportation and single loads using cableway technology. Flyingbelt technology allows the design of 'hybrid overland-rope' conveyor belts, eliminating the need for intermediate material transfer points and optimising both project CAPEX and OPEX. Material ropeways are versatile system for the transport of bulk materials over steep gradients. This technology, developed from passenger transport, offers the highest level of safety available on the market.

CAPRARI

Caprari brings decades of expertise in designing and manufacturing efficient, sustainable water pumping solutions. With a global footprint and a deep understanding of diverse customer needs, we are uniquely positioned to anticipate and respond to challenges in water management. Our extensive range of fully Made in Italy products embodies flexibility, innovation and exceptional quality. This dedication ensures our solutions are tailored to meet the highest standards of performance and sustainability.

GREEN MINING ITALIA

Green Mining Italia is an Italian mining company operating where geology, people and industry meet. It develops responsible mining models designed not simply to extract resources, but to connect mineral potential with local knowledge, appropriate technologies and international value chains. Active across Africa and Latin America, the company combines multidisciplinary scientific expertise, direct field presence, ESG principles and institutional dialogue in projects involving gold, heavy mineral sands and critical minerals. A central focus is artisanal and small-scale mining (ASM), approached as a productive ecosystem capable of generating inclusion, traceability and shared economic value by recognising and enhancing the knowledge, capabilities and productive potential already present within mining communities. Its field-driven approach shapes each project around its geological, social and regulatory context, creating transparent, scalable and long-term opportunities.

IDROMECCANICA RAMTEC

Idromeccanica Ramtec is a Southern Italy-based manufacturer specialising in high-quality demolition attachments. With years of expertise in the industry, the company produces a comprehensive range of equipment designed to meet the demanding needs of construction and demolition professionals.

Their product line includes hydraulic breakers, hydraulic plate compactors and pile drivers, hydraulic shears, crushers, pulverisers, demolition grabs and magnets. Idromeccanica Ramtec also offers effective dust suppression cannons to support cleaner and safer job sites.

In addition to manufacturing complete attachments, the company supplies over 6,000 replacement parts compatible with leading brands of hydraulic breakers on the global market. This extensive catalogue ensures that clients receive reliable support for both Ramtec equipment and other top-name products.

Combining innovation, durability and Italian engineering, Idromeccanica Ramtec is committed to delivering robust solutions that maximise performance and efficiency across a wide range of demolition and construction applications.

SAER ELETTROPOMPE

SAER Elettropompe is a leading Italian manufacturer with over 75 years of experience in the design and production of high-quality electric pumps and motors. Renowned for its engineering excellence and Made in Italy production, SAER offers a wide range of solutions for water handling across multiple sectors, including industrial and mining applications. A key area of specialisation for SAER is the development of corrosion-resistant pumps for demanding environments. The company provides advanced solutions in super duplex stainless steel, ideal for reverse osmosis (R.O.) systems and seawater desalination. SAER also excels in the manufacturing of pumps for wastewater and water treatment plants. From submersible sewage pumps to vertical multistage, split casing and end-suction models, SAER ensures optimal efficiency, reliability and durability, even in aggressive environments. Thanks to its Italian production, SAER guarantees exceptional lead times and fast, reliable delivery worldwide.

STM INDUSTRIALE

For 40+ years, STM Industriale has been globally recognised as a trusted partner in delivering reliable and innovative belt conveyor solutions.

We design and supply advanced material handling systems for a wide range of applications worldwide, including mining, tunnelling, dam construction, general handling and complex industrial projects.

Our approach combines standard engineering excellence with full customisation to meet the specific requirements of each project, such as location, materials and customer needs.

From feasibility studies to commissioning, STM stands by your side every step of the way. All equipment is designed and manufactured in our own workshop in Italy, ensuring complete control over quality and precision.

We handle every stage in-house: structural components, walkways, drums, stations and access systems are produced in our facilities, followed by pre-assembly, packaging and shipping management, guaranteeing efficiency and reliability from start to finish.

UFI FILTERS HYDRAULICS

Founded in 1992 in Northern Italy, UFI Filters Hydraulics is the UFI Group's business unit specialising in hydraulic filtration solutions. The hydraulic division designs, manufactures and markets a comprehensive range of high-performance hydraulic filters for mobile and industrial applications worldwide. Engineered to provide maximum protection and reliability, UFI filtration solutions combine high-efficiency filtration with consistent performance in demanding operating conditions. Leveraging advanced materials and state-of-the-art microfibre filtration media, UFI filters optimise hydraulic system efficiency, extend component life and reduce maintenance costs. With a commitment to continuous innovation and quality, the UFI Hydraulic Division delivers solutions that meet the evolving requirements of modern hydraulic systems and the latest technological and market demands.
