Ministry of Foreign Affairs
and International Cooperation

ITA®
ITALIAN TRADE AGENCY

THE BIG 5 SAUDI

Dear Visitor,

I wish to warmly welcome you to the 2023 Big 5 Saudi fair and in particular to the Italian Pavilions, located respectively in the areas dedicated to i) Stone & Surface and ii) Heating, Ventilation & Air Conditioning (HVAC).

Italy has traditionally been one of the most represented countries at Big 5

Saudi, which attracts thousands of international companies from all over the world. This year 50 Italian companies will attend this globally-recognized construction fair, exposing state-of-the-art technologies and very high quality products.

The Italian industry is well-placed in many construction products, notably marbles, granites and natural stones, as well as machineries and complete plants to quarry and process natural stones. With respect to the HVAC sector, our companies are well-known for their historical tradition of design, style and technological innovation.

Over time, Italy has become a key partner for Saudi Arabia's strategic investments under Vision 2030. Top Italian companies stand as major implementers of milestone initiatives, such as the development of the Diriyah Gate, Riyadh's Mega-Projects, Al Ula's

Master Plan and ultimately the smart-city of NEOM. In addition, a growing number of Italian SMEs are working hand in hand with hundreds of Saudi business partners on a wide array of projects, thus contributing every day to the Kingdom's impressive urban, housing and construction projects.

Saudi Arabia is therefore Italy's main economic partner in the Middle East and North Africa region and construction projects are among the most promising and steadily-growing areas of business. Building on past experience and sound knowledge of the Saudi market, Italian companies are willing to further contribute to upcoming projects in the Kingdom, as laid out in the Vision Realization Program for Housing.

The Embassy of Italy in Riyadh, the Consulate General in Jeddah and the Italian Trade Promotion Agency in Riyadh stand therefore ready to support Saudi businesses in dealing with their Italian counterparts with a view to achieving mutually and long-standing beneficial results.

Enjoy your visit at the 2023 Big 5 Saudi fair!

Roberto Cantone

Ambassador of Italy to the Kingdom of Saudi Arabia

A stylized, handwritten signature in white ink, consisting of a large 'R' followed by a series of loops and a long horizontal stroke.

Dear Visitor,

I am very glad to welcome you on behalf of the Italian Trade Agency to the Italian Pavilions at the Big 5 Saudi Exhibition - Stone & Surface, dedicated to the stone industry, and HVAC R Expo Saudi -, where you have the chance to meet with over 50 exhibitors, representing

high quality products and technologies:

Italian industry is leader worldwide in many products in the construction sector - and in particular, regarding the Big 5 Saudi, in marbles, granites and natural stones, machinery, complete plants, tools and complementary products to quarry and processing natural stones, and in HVAC sector - and is well known for its skills in satisfying the specific needs of its clients and partners, thanks to a historical tradition of craftsmanship, style, innovation and research.

The Italian Trade Agency - that has organized the participation of the Italian companies at the Big 5 Saudi in collaboration with the two important manufacturers associations Confindustria Marmomacchine and ANIMA Confindustria Meccanica Varia -, with a network of offices in seventy countries, is the government agency that supports the business development of Italian

companies abroad and promotes their collaboration with foreign partners.

You are therefore welcome to our Pavilions, and please don't hesitate to ask for the assistance of our staff, who will be glad to introduce you to the Italian companies and support you in finding an Italian partner matching your business needs.

Enrico Barbieri

Director

Italian Trade Agency

Riyadh Office

A handwritten signature in black ink, reading "Enrico Barbieri". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent. It is written on a light blue, textured background that resembles a map or a stone surface.

OMAG SPA

VIA STEZZANO NR.31 | 24050 ZANICA [BG]

☎ +39 035670070 | ✉ info@omagspa.it

🏠 www.omagspa.it

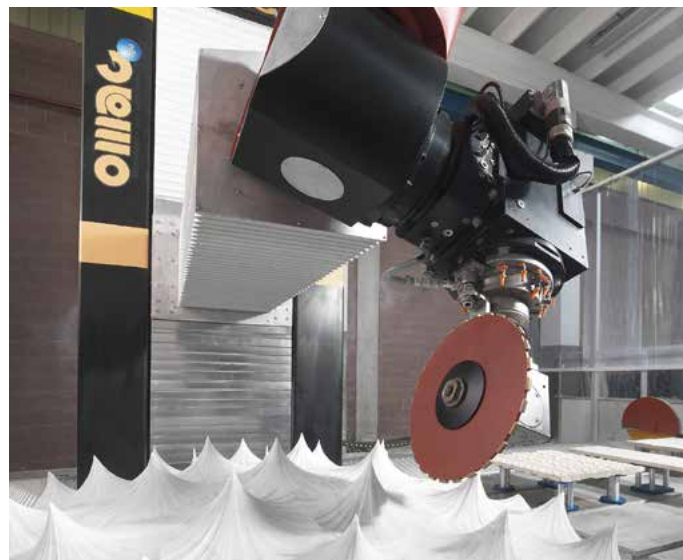

OMAG SPA, founded in 1979 by Angelo Albani has reached its second generation continuing with the development of an international company combining the past, present and future. OMAG Spa is one of the industry leaders in the production of machinery for processing marble, natural stone, quartzites, glass and ceramics. The recognized leadership in the sector is a position of merit due to a company concept that OMAG has set itself since the beginning of its industrial path.

The level of specialization and experience acquired allows it to achieve projects beyond production standards to meet the personalized needs of its customers. OMAG does not limit itself when designing and building its own machinery, but has concentrated satellite companies in its production area to cover competencies in synergy with each other for global quality control.

The seriousness, professionalism and support of competent and punctual after-sales assistance is a strong point for OMAG, an assurance for the customer. After choosing and installing the machine, the relationship with OMAG continues: OMAG provides the customer with a perfect mastery of each function of the machine and of all the particular processes.

Thanks to its organizational structure, OMAG guarantees its constant support in any need of maintenance and technical advice, including updating of technologies and constant training of the user.

OMAR CRANE SRL

Via Del Ferro, 554033 Carrara [MS]

☎ +39 0585 857455 | ✉ omargru@hotmail.com

🏠 www.omarcrane.it

OMAR CRANE Srl is a family-run Italian cranes manufacturer based in Carrara, Italy. With around ten full-time employees and a working culture built on mutual respect and trust, the company has been able to build up a name which has continued to grow over the years. And the history of OMAR CRANE Srl began many years ago. It was the 1950s when Romano Ribolini started to work in the heavy machinery industry, during the particularly difficult and stagnant postwar period in Italy. Ribolini learned how to repair tractors, trailers and other machineries, despite the difficulties in finding materials and spare parts. At the same time, realizing the importance of both small- and large-scale industry by simple, solid and reliable lifting equipment. Ribolini started up a small, custom made mobile crane production company.

SLAB THICKNESS
1.2 x 2 x 3

JUPITER TECH12 is a state-of-the-art multirive machine that effectively cuts 12mm-thick granite slabs, considerably increasing the block yield to 55,5 m² for each m³.

Equipped with 6 patents, it stands out for its reliability and extremely high production capacity.

Pedrini's new multirive is part of a project started in 2019 to industrialize the processing of thin slabs, starting from the blocks curing to the creation of a more versatile and lighter finished product.

☎ +39 0423 7351 | ✉ info@simec.it

🏠 www.simec.it

SIMEC is in the natural stone processing, ceramic and composite stone sectors, manufacturing complete machinery and plants which are appreciated all over the world for their quality, for more than fifty years. With 28000 square metres of covered production areas, SIMEC can boast an added value of very high level guaranteed by exclusive use of its specialized staff in designing, constructing and assistance of the entire range of products. Designing machines which are competitive in performance without disregarding the reliability of each single detail is the industrial philosophy that SIMEC applies in realizing all its products, from large plants to economical machines, achieving quality which has become by now a real reference point for the market.

STILMARMO

Via Thaon de Revel, 34 | 71011, Apricena [FG]

☎ +39 0882 645452 | ✉ importexport2@stilmarmo.it

🏠 www.stilmarmo.it

Founded in 1990, Stilmarmo is a leading company in the extraction, production and commercialization of Apricena Stone, also known as Trani Stone.

Stilmarmo is made up of its own quarries and two factories covering a 40,000 m2 area.

Apricena Stone includes four main groups of materials: Serpeggiante, Fiorito, Bronzetto and Biancone.

Traditionally vein cut, Serpeggiante marble reveals its characteristic veins and its beige colour, that make its texture so similar to wood that it is also known as wooden marble.

Fiorito and Bronzetto are characterized by a colour range going from the light to dark beige tones, and patterns changing according to the different types, presenting in some cases pinkish veins, in other types cloudy patterns.

All of our materials are suitable for both internal and for exterior applications.

Stilmarmo is able to supply blocks, slabs, tiles, finished products and cut to size in all the available finishes.

TENAX SPA

Via I° Maggio 226 | 37020 Volargne di Dolcè (VR)

CSG Engineering

Know how for precast

We design with passion and for over 30 years we have been partners of various buildings and precast companies in Italy and in the rest of the world.

We have explored the world of construction at 360 degrees.

Our staff is a mix of professionals who come from business, design and consultancy who have worked both in Italy and many other countries, gaining experience throughout the construction chain, building both with traditional and precast techniques, for residential, industrial and infrastructure sectors.

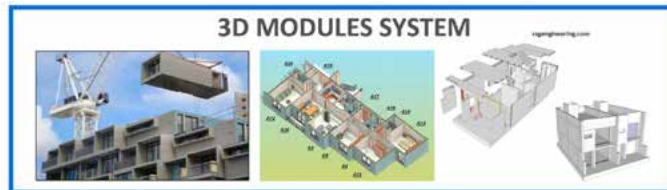

CSG Engineering has significant experience in design, production, planning, automation, cost control, new precast construction systems, new factories. We propose ourselves as a reliable point of reference for those who are working - and for those who are planning to enter - in the precast business, being at their side and helping them to face all their needs.

All this because we were lucky enough to start professionally in the italian precast industry, which is one of the most advanced in

the world for type and quality of products, production automation, effectiveness of the whole business process.

The application of the precast can be a very good solution for industrial, commercial, residential buildings, schools, hospitals, public buildings, agricultural, railways, stadiums, sports centers, car parks, bridges, airports, infrastructures.

ELKE SRL

☎ +39032296217 | ✉ info@pettinaroli.com

🏠 www.pettinaroli.com

Born in 1938 and still family owned, Pettinaroli is a Group of eight companies operating in over 60 countries all over the world in the field of production of components for engineering plant applications (plumbing, gas and HVAC).

The Group vision focuses on designing and developing devices that make building systems more reliable, efficient and sustainable.

Pettinaroli believes that through continuous research and development it is possible to obtain products with an everincreasing level of energy saving and efficiency.

For this reason the utmost attention is paid to quality testing, internal control, process innovation and training of dedicated human resources.

Therefore, Pettinaroli's mission is providing customers with the best solutions for plant engineering applications covering heating, air conditioning, sanitary installations and gas management sectors.

To do so, the Group works daily to create and promote systems that integrate with plants and manage them, constantly improving their performance.

GIELLE DI GALANTUCCI LUIGI

Via Ferri Rocco, 32, Z.i. 70022 Altamura [Ba]

☎ +39 0803118998 | ✉ info@gielle.it

🏠 www.gielle.it

With over 55 years of experience, Gielle is the specialist in fire safety. Whether you need portable fire equipment, service and maintenance, or large-scale fire suppression systems for mining, marine, industrial, commercial and retail use, Gielle has got you covered.

Gielle offers the services of recovery, regeneration and disposal of exhausted products in according with rules and regulation.

Infact, holder of a Program Agreement with the Ministry of the Environment, Gielle collects exhausted refrigerant and extinguishing gases throughout the country and then proceeds with recycling and regeneration.

Our team of experts is able to ensure to you not only the supply of gases, but also the management of any problems you could have.

Gielle offers a complete range of refrigerant fluids and gases for each need and for all purpose, becoming a role model for many of the operators in the refrigeration and air conditioning sector. In these fields Gielle provides: R134a, R404a, R407a, R407c, R410a, R417a, R417b, R507, R508a, R32, R125. From the consolidated R134a or R404a, with high impact in terms of GWP, to the latest products with lower GWP such as R1234y or R1234ze.

GIELLE
INDUSTRIES

Gielle, which has always been committed to protecting the environment, offers more sustainable solutions in addition to traditional hydrofluorocarbons (HFCs): new low gwp blends, based on hydrofluor olefins (HFO), and natural refrigerants.

The supply is available in the widest variety of packaging: for example in bulk isotank and in cylindersfor.

GRUPPO STAMPLAST SPA

Frazione Tornello 120 | 27040, Mezzanino, [PV]

☎ +390385938020 | ✉ info@remotair.com

🏠 www.remotair.com

Remotair is the world's first patented solution for real time monitoring of HVAC hygiene.

Remotair uses cameras and sensors with an innovative cloud software to provide users the complete hygiene status of HVAC systems in real time. The product is easy to install and configure, and it utilizes adaptive machine learning capabilities to notify the user when cleaning of the ducts and air handling units should occur before contamination inside the systems reaches dangerous levels. With this advanced hygiene monitoring, Remotair offers its users the world's best protection from HVAC contamination. When a system is measured with Remotair, duct cleaners, IAQ professionals and maintenance managers can perform targeted maintenance actions to prevent their HVAC systems from reaching unhealthy levels of contamination. Remotair monitors your HVAC system 24 hours a day, 365 days a year: predictive maintenance is the future of the HVAC sector!

SEITRON SPA

Via del Commercio 9/11 | 36065 - Mussolente (VI)

☎ +39 0424.567842 | ✉ info@seitron.it

🏠 www.seitron.com

Since its inception (1981), Seitron has been active in thermoregulation, with regulators for solar systems and wireless thermostats. Over time, it has extended its scope to the field of gas safety and portable instrumentation, becoming the first Italian manufacturer of combustion analysers.

The secret behind Seitron's expansion and its affirmation is encapsulated in the constant investment into research and development, in the desire to propose continuously-innovative products that are high-performance but also environmentally compatible and energetically competitive, flanked by the ability to oversee the entire production process, whilst directly handling the design, production and sales phases. Finally, studies in design also play an increasingly important role in ensuring a perfect pairing of functionality and aesthetics.

Strongly rooted in Italy, Seitron is also present throughout Europe, Asia, America and Oceania. Around 50% of the company's turnover is achieved through exports to more than 60 countries around the world, thanks to its extensive network of agents and distributors.
