Ministry of Foreign Affairs  
and International Cooperation

# *Sustainability is SustainabITALY*

Italy is the 2nd largest manufacturing country among the 27 European countries and the 8th world exporter

Italian components and technologies for the energy industry are highly demanded all around the world and the country is the 4th supplier to the UAE of components for oil and gas industry with almost Euro 143 million worth of products exported in 2021 (+16% compared to 2020).

During the last period marked by the pandemic, a changed geo-political global scenario, and the consequent search for diversification of energy supply sources, the entire industry is experiencing a phase of reflection to intercept and face new opportunities, especially in the sector of Oil & Gas and more generally the energy landscape.

With a growing push towards renewable energies, greater hydrogen absorption and a zero-emission future, Italy's investments in research and development will allow the country to remain at the forefront in energy's multiple sectors.

Gas will be of great importance in managing the energy transition. Hydrogen will play a leading role: the Italian National Recovery and Resilience Plan allocated approximately 3,6 billion Euro to boost the development of the related supply chains. A path in which the big players will play a key role in planning not only the production techniques but above all the transport and use of these resources.

The transition to a low-carbon economy is urged by institutions at all levels and ESGs (Environmental, Social, and Corporate Governance, or the policies introduced by companies for the environment and the community) are increasingly influential factors in directing Italian future investments.

“Sustainability-SustainabITALY” is one of the mantras also for Italian companies manufacturing components and systems for traditional energy industries, oil and gas included.

Italian exhibitors at ADIPEC 2022 stand out for their technological leadership and are helping to identify opportunities that will create new value in an evolving energy landscape.

# Italian Trade Agency - ITA

TRADE AND INVESTMENT

OPEN DOORS TO A WORLD  
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

## FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

# ANIMA - Federation of Italian Associations of Mechanical and Engineering Industries

**ANIMA**<sup>®</sup>  
CONFINDUSTRIA  
MECCANICA VARIA

ANIMA - Federation of Italian Associations of Mechanical and Engineering Industries, represents within Confindustria companies of the mechanical sector (224.000 employees, 52,02 billion Euro production and 57.0% export share - estimates 2021). Established in 1914, ANIMA has 31 associations and 1,000 companies, highly qualified in their sectors.

Macrosectors and technologies represented: energy production and oil & gas industry; logistics and handling; water and food; industry; building; personal security and safety; metallic products. ANIMA safeguards interests of the mechanical industry, represents and promotes member-companies and their products in Italy and abroad, supports members both in technical and economic issues.

The companies joining ANIMA are strongly committed to promoting the energy transition in their business and production processes. A working group dedicated to research and application of Hydrogen for Energy Production is also active within the Federation.

Stand No. 1160 - 20

With a standard range of tried-and-tested gensets up to 3300 kVA, Ausonia, since 1932, designs and manufactures electric and thermal integrated energy generating systems for highly critical sectors such as Oil & Gas, Telecommunications, Utilities, Defense, Transport, Healthcare and Infrastructures.

Ausonia factory is equipped with the latest technology of automated machines for cutting, bending, welding, painting, assembling and storing manufactured goods, being capable of performing a 3-shifts production in order to meet Customers' specific requests for large volumes and fast delivery time.

Focusing on specific strategies for different industries, Ausonia is recognized as the main Italian player in terms of customized products and services, offering excellent quality standards and operational performances, being always leader in offering new solutions and products' configurations along its Customer-oriented approach.

Within its offer portfolio, Ausonia can also provide CHP/CCHP Power Plants, LPG Gensets, Medium Voltage Gensets, Diesel Rotary UPS and Mobile Generators on wheels.

# CDB Engineering SPA

Stand No. 1160 - 24

CDB Engineering is a dynamic, independent and consolidated Italian company, capable of the design, manufacture and supply of a wide range of products for the energy industry.

CDB Engineering was founded in 2000 and, located in the industrial area south of Milan, covers a total surface of 25,000 sq.m.

CDB can cover all phases of engineering: process and mechanical design, manufacturing, testing, painting and packing. All activities are carried out in-house. Full commitment in achieving and maintaining high quality standards in the management of these processes, enabled CDB Engineering to obtain the most important international certifications, including ASME "U" Stamp, PED, ATEX, API6D, API6FA and TR/CU, as well as accreditation from the main international EPC Contractors and End Users.

Focused on the continuous development and realization of customized solutions, CDB Engineering, ethical, responsible and customer-driven business approach is aimed at continuously improving the performance and reliability of the product.

# CELME SRL

Stand No. 1160 - 22

CELME has been an Italian producer of oil-insulated electrical transformers since 1964. Bespoke manufacturing is our core business.

With a production range reaching power and voltage of 63MVA / 132kV, thousands of our transformers are installed in more than 70 countries.

Our solutions comply with the most stringent technical specifications, serving three main sectors:

- Oil and Gas: upstream, midstream and downstream with ATEX and IECEx certified explosion-proof transformers, for low and high temperature environments;
- Industry and Power Supply: multipulse and statcom transformers for specific loads;
- Renewable Energy: transformers for large utility scale photovoltaic systems and for BESS storage systems, with integrated solutions in skids and containers.

CELME is ISO9001 and ISO140001 certified.

## BESPOKE MECHANICAL EQUIPMENT

FOR SUBSEA  
AND OFFSHORE  
OPERATIONS

De Pretto Industrie is a family owned company with around 200 employees and its operations are split between two Business Units: Turbomachinery and Special Projects.

The Turbomachinery Business Unit, which is the oldest, is an Original Equipment Manufacturer (OEM) of new steam turbine generator up to 50MW; it also specialized as an Independent Service Provider (ISP) providing service, maintenance and assistance to various types of steam turbines.

With more than 100 years of experience and 200+ turbomachines manufactured De Pretto delivers top quality, reliability and expertise making us the partner of choice for your turbomachines.

De Pretto Industrie Special Projects Business Unit specializes in the development (Design, Engineering, in-house Manufacturing and Testing) of tailor-made mechanical equipment for a wide range of industrial applications in the Oil and Gas, Renewable and Nuclear industries.

Our products include:

Vessels / FPSO /SPM:

- Swivels
- Refurbishment of Swivel Joints
- Pipe Laying & Pipe Handling Systems
- Mooring and Tensioning Systems
- Special Deck Equipment

Subsea Equipment:

- Subsea Bespoke Connectors
- Subsea Intervention Tools and Repair Modules
- Subsea Trenchers & Vehicle

Offshore Wind:

- Pile Gripper for XXL Monopiles
- Monopile Skidding System
- Jacket Pile Gripper
- Secondary Installation Tool

# Officine di Trevi

Stand No. 1160 - 14.

Officine di Trevi has specialized in the production of electric submersible pumps with OFT trademark since 1968. Nowadays OFT brand includes a wide choice of electric submersible pumps ranging from 3", 4" and 6" pumps. In recent years the company became European leader in the manufacture of submersible ATEX certified electric pumps, suitable for use in potentially explosive places, right for pumping contaminated liquids, landfill leachate and hydrocarbons.

Pumps are customized according to the liquid (up to 80°C) and the conditions of the installation site. In case of charged liquids, OFT proposes pumps equipped with floating impellers able to resist even the presence of solid particles suspended inside the liquid. The Maxifilter, an accessory that prevents clogging of electric pumps, is available with a slope riser for installation in oblique wells. Only one partner for All-in-One solutions, consisting of electric pump, control panels and accessories for liquid level control.

# Pegoraro Gas Technologies SRL

Stand No. 1160 - 02

Pegoraro Gas Technologies is a leading company for the designing and producing of gas equipment and solutions since 1992.

We provide filtering, heating, pressure reduction and metering high pressure stations for natural gas, LPG and CNG, for industrial and civil installations.

We are specialized on designing and production of CNG DAUGHTER STATIONS and equipment for VIRTUAL PIPELINE such as CNG HEAT EXCHANGERS PALLADIO SERIES.

We supply low and medium pressure PRMS and complete GAS TRAIN already assembled.

We have an exhaustive range of products: pre-heating, filtering, reducing, metering and control for Natural Gas, cartridge filters, SNG air/LPG mixing unit, metal cabinet, regulators, safety valves, ball valves, tailor-made pieces and others.

Besides we produce solutions for GREEN GASES such as hydrogen, ammonia and bio-methane.

We offer services to the customers such as mechanical maintenance on gas plants and equipment with selling of spare parts: we also have a remote monitoring solution for gas plants called PGT IoT inCloud.

# Primiceri SPA

Stand No. 1160 - 26

The Primiceri Company has been operating for more than 30 years in the field of planning and production for energy management and control systems for gas/steam turbines, compressors and electric generators.

Primiceri is structured to offer turnkey solutions in industrial plants relevant to field engineering, supervision and control systems which take advantage of their experience in:

Packaged Substation and Control Cabins, Local Electrical Rooms, Metering and Supervisory Shelter, UL 508A Local Control Panel for US market, Unit Control System Panels, Motor Control Centers according to IEC, TEXAS, KC, ISO and UL, Power distributions and Switchgears, Generator Control Protection Panels.

Primiceri can offer consultation pertaining to the entire system. This ranges from: proposal engineering, project development, procurement, integration, commissioning, start-up, training and maintenance. Our products are designed and manufactured in accordance with customer requirements and also in compliance with main international standards (CE, UL, CSA, etc.).

# REPCo SRL

Stand No. 1160 - 05

REPCo is a comprehensive multisystem end-to-end process design house for the energy of today and tomorrow. Through its years of field experience, REPCo is able to provide in-house facilities that cover the wide process engineering needs of Multi-gas industries, all under one roof.

Based in Milan, the Italian company offers stand-alone equipment and modular process plants for energy and power projects of any size. In particular, it covers the design, supply and start-up site support of packaged gas, oil and power related systems, together with associated equipment for the international marketplace.

REPCo's knowhow enables overall flexibility to support the continuously developing needs of the energy transition and the ever-changing market conditions. As well as supplying various types of walled vessels in various thicknesses as the demands dictate, REPCo also provides immediate support on issues – such as mechanical, electrical, instrumentation, and control – by using established capabilities in both engineering and fabrication.

# Ronconi SPA

Stand No. 1160 - 03

Ronconi SpA has 80 years experience in the production of cold drawn precision seamless tubes. Ronconi SpA supplies tubes in Carbon and Medium/High Alloy and Stainless Steels grades.

Main applications are Energy&Process for Heat Exchangers, Condensers&Air Coolers, Boilers and Pressure Equipments for Refineries and Petrochemical plants for particular Equipment and maintenance.

Tubes can be supplied as U-bended&Finned. Point of strength is the extreme flexibility together with a production, supplying a good service together with product.

# SEIM SRL

Stand No. 1160 - 08

SEIM is an Italian twin and triple screw pumps manufacturer with millions of pumps delivered worldwide, specialized since 1975 in API design, custom and heavy duty pumping skids.

Since the very beginning SEIM has been constantly focused on research and development, willing to propose to all customers advanced solutions and product customization for specific applications.

The Seim Oil&Gas division was born in 2004 from the necessity to merge technical and commercial activities and concentrate them on customized products, dedicated to this demanding market.

The result is a wide range of twin and triple screw pumps including several models compliant to the most recent standards of this sector.

Upstream (Onshore and Offshore), Midstream, Downstream, Petrochemical as well as Power Generation services are more and more sensitive to efficiency, safety, reliability, repeatability of performances with variable operating conditions, continuous improvement.

SEIM is the best partner in the pump industry, with high technology products and worldwide customer service network.

# Solexy

Stand No. 1160 - 19

SOLEXY WIRELESS manufactures components enabling data transmission in hazardous locations (Atex, IECEx, Class & Division USA and Canada).

Products include intrinsically safe & explosion proof barriers for antennas (RF signals), and wired Ethernet connections. Those components led to our family of solution based products including explosion proof 3G/4GLTE routers/AP's, explosion proof WiFi Access Points, explosion proof VHF/UHF radio modems, explosion proof Bluetooth/RS485 converters and many other solutions upon request.

From our Italian and our USA operations we serve global requirements involving data transmission in explosion risk classified areas (Refineries, Chemical plants, Oil rigs, mines).

# T.M.E. Tecno Meccanica Emiliana SRL

Stand No. 1160 - 11

Tecno Meccanica Emiliana was founded in 1995.

The aim of TME is to provide to the customers a single interface that can do internally all the activities starting from the engineering to the finished product including metal carpentry and final assembling.

TME during the years became strong and powerful in the production of components for Mud Pumps, Drawworks, Crown and Travelling Block, Top Drive and other components related to the drilling.

Thanks to the achievement of API licenses for products and for quality systems and thanks to its Service Team TME is constantly doing Offshore and Onshore maintenance jobs all around the world, including CATIII and CATIV according to API RP and relevant ASTM on the drilling machines.

Prototyping and small quantity is the core business
