Italian Trade Agency - ITA

TRADE AND INVESTMENT

OPEN DOORS TO A WORLD
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

UNIDI

Italian Dental Industries Association

UNIDI (Italian Dental Industries Association), a founding member of FIDE (European Federation of Dental Industries), brings together the best of the Italian dental industry: over 110 companies producing equipment and materials for dentists and dental technicians.

The association represents the excellence of Italian dental manufacturing—innovative and constantly evolving—renowned worldwide for the reliability of its components, cutting-edge technological solutions, and modern design. This sector is among the global leaders in terms of business volume, technological innovation, and exports.

UNIDI carries out various activities aimed at protecting the rights of its members in their relationships with institutions and other key sector associations. Its expertise in regulations, trademarks, patents, and the protection of medical devices is recognized and appreciated both nationally and internationally.

Since its foundation, UNIDI's primary goal has been the international promotion of Italian dental companies through numerous initiatives both abroad and within Italy. Thanks to long-standing collaborations with ITA (Italian Trade Agency) and other relevant institutions, the association successfully organizes an increasing number of trade missions, group exhibits, and Italian pavilions at the most prestigious international trade fairs, contributing to the global spread of "Made in Italy."

Among its other activities, the association, through its Academy, offers training courses on regulatory topics as well as specific seminars on marketing and communication in the dental sector. Its expertise serves both companies and professionals, with particular attention to emerging and essential topics linked to current emergencies.

Since 1969, UNIDI has owned and organized Expodental Meeting, the leading dental trade show in Italy. This event is a must-attend gathering, even on an international level, and serves as a crossroads of experience, innovation, and tradition in the dental industry.

ANDREW MEDICAL

Andrew Medical, a forward-thinking company, focuses on the research, development, and production of 3D-printed dental implants using titanium Ti6Al4V-ELI. These implants feature a dense core and a porous outer layer, replicating the structure of natural bone. The 3D-printed design promotes Dental Pulp Stem Cell adhesion and osteoconductivity, supporting bone integration while studies suggest the implant's surface may limit bacterial growth.

DENTALMEDTV

Turin, 2026

ART AND SCIENCE OF PERIODONTAL AND PERI-IMPLANT PLASTIC SURGERY FOR OPTIMAL SOFT TISSUE ESTHETICS
Three-day full immersion course with Dr. Roberto Abundo
Dr. Abundo is the main force of contemporary dentistry. Theoretical scientific training with those courses will ensure optimal dentition and correct implants is the goal of any comprehensive esthetic treatment. In this program, several of the most advanced courses from the knowledge of periodontology and implantology will be presented, with a focus on how to perform up-to-date surgical techniques for achieving maximum esthetic and functional emergence.
Tips and tricks will be highlighted, and four live sessions will be directly performed for the participants on simulation models.

FUNCTION AND AESTHETICS IN PROSTHETIC REHABILITATIONS ON TEETH AND IMPLANTS
Three-day intensive seminar in Fixed Prosthodontics with Dr. Stefano Lombardo
The seminar focuses on prosthetic rehabilitation on implants. The course will explore the selection of the best prosthetic design, prosthetic management and fixed implantation using the simulation using models and the most advanced digital in the light of the latest technologies. Researcher's scientific data design through the management of multiple three-dimensional digital data to design a new smile for both teeth and implants. This results in a fully functional dental preparation and prosthetic fully guided implant treatment and soft tissue, with a new esthetic approach, which includes high-resolution CBCT and computer-aided surgery software, using 3D visualization and simulation approaches to each individual treatment plan. A series of step-by-step clinical cases will be discussed over the three days, covering both clinical and laboratory aspects.

LEONARDO DENTAL SOLUTIONS

The graphic is a product catalog for Leonardo Dental Solutions. At the top left is the company logo. Below it, the text 'State of art in dental laboratories' is followed by a vertical list of four product lines: '50 PLATINUM', '40 GOLD', '30 SILVER', and '20 BRONZE'. Each line shows a set of teeth and a corresponding 'LEONARDO' disk. To the right, there are two main sections: 'Zirconia Disk' and 'PMMA Disk'. The 'Zirconia Disk' section shows five types of disks labeled HT, ST, CHT, EST, and 3D-PRO. The 'PMMA Disk' section shows various disk types with icons for 'PROSTHESIS', 'WITH ADHESIVE', and 'WITH CEMENT'. Below these are images of different disk colors and finishes: Monolayer, Multilayer, Clear, Coating Wax, Pink, and Full Denture. At the bottom, the website 'www.leonardodental.com' is displayed above a row of hexagonal patterns.

After a careful analysis of the dental technicians' needs and 10 years of studies, research and technical assessments, LEONARDO® is born.

The products that LEONARDO® is presenting to the laboratories include all the technical features used in mobile and combined prosthesis, granting maximized functionality and excellent aesthetic features durable in time.
