ITALIAN TRADE AGENCY

ITA - Italian Trade Agency is the Governmental Agency that supports the business development of Italian companies abroad and promotes foreign investments in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Furthermore, ITA assists foreign investors to establish or expand their operations in Italian economy, guiding them throughout the full investment life cycle. ITA acts in accordance and under the aegis of the Italian Ministry of Foreign Affairs and International Cooperation.

FIND YOUR ITALIAN PARTNER

Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

UNIDI

UNIDI – The Italian Dental Industries Association – gathers most of the Italian manufacturers of equipment and consumables for dentists and dental technicians, more than 130 companies providing all the guarantees to the users of their products, by complying with the safety and performance requirements laid out by the EU legislation. In 50 years of activity, UNIDI has actively contributed to the growth of the Italian dental industry. Today the association is one of the world leaders, regarding business volumes, technological innovation and exports.

UNIDI promotes Made in Italy through two important events: Expodental Meeting in Rimini, the most relevant international trade-show for the dental sector in Italy; and IDEA – International Dental Exhibition Africa, the only international exhibition for dental professionals in all African Countries. Moreover, UNIDI sustains Italian companies export strategies, by organizing Italian pavilions, creating business matches, and drafting an important internationalization plan in cooperation with ICE – the Italian Trade Agency - in both emerging and industrialized Countries.

88dent by 8853 SpA

8853 S.p.A., historical Italian company in the precious metals and dental technologies trade, thanks to its know-how always focused on innovation, is a permanent presence in the national and international dental market with the 88dent brand. Assistance and efficiency are the objectives that led to the creation in 88dent of:

- the LAB line, aimed exclusively at the dental technician world
- the CLINICAL line dedicated to dentistry

88dent LAB allows dental technicians to discover how to go digital, while maintaining the aesthetic personalization that has always characterized the profession. 88dent CLINICAL provides the dentist with the latest technologies, such as diode laser, intraoral scanner and CAD-CAM system. The novelty of 2021 is the CAD Lynx Evolution software. The two lines allow you to improve the work and communication between dentist, dental technician and patient. Fewer appointments, in less time, maximum quality. For a solution that will bring advantages in everyday work!

ANDREW MEDICAL SRL

Andrew Medical is an innovative start-up company that invested its resources in research, development and production of Dental Implants with a "bone-clone" or "osseo-inductive" surface capable of increasing the bone volume within the implant and stimulating the regeneration of soft tissues. Through a special Laser Micro-melting process we create an implant that appears to the bone cells and soft tissues as a volume of spongy bone that imitates nature and not just as a simple rough surface: we are talking about a "mimetic" structure. Andrew Medical offer the most effective shape that is Morse Connection implant with a five-degree inclination, with the following features and advantages:

- High precision between abutment and implant
 - No micro-movement
 - Excellent long-term tissue stability
- Perfect internal seal that prevents bacterial infiltration
- Better distribution of lateral loads within the system
 - Avoid bone retraction
 - Better aesthetic results

CO.N.CE.P.T. SRL

CONCEPT produces zirconium oxide discs under trade name Zyttria®, combining Italian know-how and German technology to obtain high quality dental prostheses.

Made in Italy is an added value also in dental technologies: the production of Zyttria® discs made in Italy using exclusively the "single cip" isostatic technology in order to obtain products with high technical and aesthetic performance.

In addition to classic, white and pre-colored zirconia, Concept has developed new lines of multi-layered, six-layer zirconia characterized by progressive color intensity, translucency and mechanical resistance from dentin to enamel, as occurs in natural tooth tissue. With the 3D multilayer Zyttya®, the technician is able to create highly aesthetic dental prostheses with more ease and fewer steps, saving labor, time and production costs. There are three types of multilayer: Zyttria® Z Multicolor Anterior (900-600 mpa) with very high translucency, Zyttria® Z Multicolor Super-Translucent (1000-600 mpa) with high translucency; Zyttria® Z Multicolor Extra-Plus (900-1200 mpa) for complicated works.

SISMA SpA

SISMA, since 1961, designs and produces in Italy a futuristic selection of production solutions, specifically studied for the dental field: LM-D manual laser welding systems and EVERES, the new range of professional DLP 3D printers.

A fully digital workflow is finally reality! The clinician, the dental technician and, most importantly, the patient, can rely on predictable treatments, allowing a reduction in time and costs, assuring the best quality and accuracy.

Within this workflow, the role of our EVERES 3D printers assumes a considerable importance for the production of artifacts such as models, gingiva, dentures, surgical guides, crowns and bridges for temporary and permanent restorations.

SMILER PRO SRL

SmilerPro is an innovative Italian start-up with high technological content manufacturing Hardware and Software for dentistry and medicine. Born from an idea of the founder turned into a patent first, then in a company, and finally in an innovative product. Smiler Pro is now launching a creative "augmented reality" device, thought for the dental industry. Its high-resolution camera keeps the vision of the mouth always in the foreground and with a static mode during the visit and dental treatments. This important feature allows the dentist to evaluate the proportions of the teeth and their respective aesthetic symmetries, facilitating the operative procedures and doctor-patient communication.

SmilerPro is attending AEEDC in Dubai, looking for new markets and possible distribution partners.

SWISS & WEGMAN SRL

Swiss & Wegman is an Italian company, based in Padua, leader in the design, production and supply of electromedical devices, in particular devices for dentistry. What distinguishes us, in addition to the high technological level of our products, is the high reliability and the fast delivery. Our goal is to design our devices in such a way that the professionals who buy them achieve clinically superior results compared to those obtained with traditional instruments. We therefore aim to expand this opportunity to all countries in the world.

TEETHLINE SRL - LEONARDO

After a careful analysis of the dental technicians' needs and 10 years of studies and research, LEONARDO is born. We produce high quality acrylic teeth and metal free arches for long term prosthesis. LEONARDO® 3-4-5 layers acrylic teeth PMMA-DCL Unique on the market with the innovative "Ceramic Stratification".

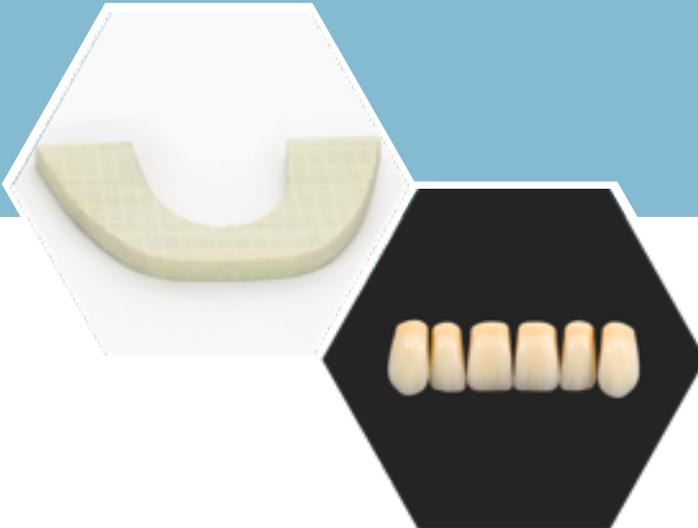

The tooth looks like a latest generation ceramic with the same light refraction of the natural dental enamel.

The special layering combined with an innovative PMMA with high molecular weight (DCL – Double Cross Link), prevents the abrasion caused by the grinding process.

LEONARDO METAL FREE SYSTEM

With our METAL FREE SYSTEM, that consists of a high performance polymeric matrix reinforced with a 3D fiberglass mesh, we introduce the use of fiberglass in the dental field replacing the use of metals in the realisation of prosthesis' mesostructures.

Biocompatible and easily adjustable, offers freedom in customizing the design and the realisation phases.
