# *Sustainability is* **SustainabITALY**

Italian orthodontics manufacturers are among the first supplier to the UAE dental market with nearly 30 million euro worth of dental products exported to the Emirates between January and September 2022 only.

The Italian dental industry is one of the most important in the world in terms of annual turnover – 1.2 billion Euro–, technological innovation and export. Exports are estimated at around 742 million euro (2021) with an average annual growth rate of 6%, and an overall development of exports of 80% from 2011 to 2021.

The Italian dental industry has confirmed its leadership on the international markets thanks to a production appreciated throughout the world for the reliability of its components, the cutting-edge technological solutions and the very pleasant design.

Oral health professionals around the world are increasingly recognizing the need to provide care in a manner that minimize the impact on the environment and are already making sustainability a high priority by using more environmentally friendly dental supplies and equipment, or by making structural, energy-efficient changes to their clinics.

CO2 emissions, plastics use, waste generation and other environmental impacts are major challenges at all levels of the dental resource supply chain as well as in care delivery.

Dental manufactures are developing solutions to help reduce the environmental impact of dentistry including the creation of biodegradable disposable products or of products that can be easily reused or recycled.

The Italian Trade Agency (ITA) together with UNIDI (Italian Dental Industries Association) is presenting a selection of Italian dentistry manufactures at AEEDC with the motto "Sustainability is SustainabITALY". ITA wants to lead the change and invite the Italian exhibitors hosted in the Italy Pavilion to take action towards a more eco-conscious approach.

# Italian Trade Agency - ITA

ITALIAN TRADE AGENCY

## TRADE AND INVESTMENT

OPEN DOORS TO A WORLD  
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

## FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

# UNIDI

## Italian Dental Industries Association

UNIDI – The Italian Dental Industries Association – gathers most of the Italian manufacturers of equipment and consumables for dentists and dental technicians, more than 130 companies providing all the guarantees to the users of their products, by complying with the safety and performance requirements laid out by the EU legislation.

In 50 years of activity, UNIDI has actively contributed to the growth of the Italian dental industry. Today the association is one of the world leaders, regarding business volumes, technological innovation and exports.

UNIDI promotes Made in Italy through two important events: Expodental Meeting in Rimini, the most relevant international trade-show for the dental sector in Italy; and IDEA – International Dental Exhibition Africa, the only international exhibition for dental professionals in all African Countries.

Moreover, UNIDI sustains Italian companies export strategies, by organizing Italian pavilions, creating business matches, and drafting an important internationalization plan in cooperation with ICE – the Italian Trade Agency - in both emerging and industrialized Countries.

# ADVAN IMPLANTOLOGY

## ADVAN – Implantology Reinvented

ADVAN pursues an innovative vision of implantology: placing implant systems at the heart of the digital workflow, as the dental team's imperative and essential requirement to address patient needs in the best possible way.

ADVAN offers a complete range of dental implantology products and services, updating them continually to meet the manifold needs of physicians and patients.

Our solutions designed specifically for immediate loading and our innovative GFA (Gingival Former Abutment) bank on all the elements that have projected ADVAN into the era of digital technologies in dentistry.

Activation of Advan Service provides professionals with an integrated offer of products and services that enable applying the most advanced level of digital workflow to implantology treatments, thus anticipating the kind of evolution that processes currently viewed as conventional will eventually undergo.

We are all personally accountable and aware of how the quality of our products and services influences the quality of everyday life for thousands of people.

## CONCEPT

CONCEPT produces zirconium oxide discs under the trade name Zyttria®, combining Italian know-how and German technology to obtain high quality dental prostheses.

Made in Italy is an added value also in dental technologies: the production of Zyttria® discs made in Italy using exclusively the "single cip" isostatic technology in order to obtain products with high technical and aesthetic performance.

In addition to classic, white and pre-colored zirconia, Concept has developed new lines of multi-layered, six-layer zirconia characterized by progressive color intensity, translucency and mechanical resistance from dentin to enamel, as occurs in natural tooth tissue. With the 3D multilayer Zyttria®, the technician is able to create highly aesthetic dental prostheses with more ease and fewer steps, saving labor, time and production costs.

There are three types of multilayer 3D: Zyttria® Z Multicolor Anterior (900-600 mpa) with very high translucency, Zyttria® Z Multicolor Super-Translucent (1000-600 mpa) with high translucency; Zyttria® Z Multicolor Extra-Plus (900-1200 mpa) for complicated works.

## DENTAL TECH

Dental Tech is an Italian Company that has always been linked to the Cavallet family; first with Mr. Gaetano and now with his sons Graziano and Gabriele.

Our long history begins in 1977 and today we are an established and constantly growing reality both in Italy and abroad in the field of dental implantology.

We are specialized in the design, production and marketing of our dental implants and we have a technical staff constantly employed in the research and development area with the aim of creating tomorrow's standards and improving existing ones.

All the work revolves around some fixed points, such as the quality of our products and the enhancement of Made in Italy.

The wide implant line, available to our professionals, includes conical and cylindrical implants, short implants, tissue level implants and one-piece implants, available in lengths from 6 to 16 mm and in different diameters.

All you need to be able to satisfy any clinical need.

## FIFTHINGENIUM

FifthIngenium is a company focused on developing Mixed Reality solutions for the Education and Dentistry industries.

ObiScanner is a new generation Face Scanner, specifically designed for Digital Dentists looking for a way to acquire a 3D model of the patient's face in just 10 seconds.

Furthermore, the technology is completely safe, unarmful and the output is compatible with any dental CAD software.

HoloDentist allows doctors and professionals to recreate the Virtual Patient by combining all the 3D data in a fully 3D environment. Using holograms and Mixed Reality, doctors can display, manipulate, share files locally or remotely and make real-time video calls, in a fast, realistic and simple way.

With voice commands, gesture recognition and holographic projection, using HoloDentist and Augmented Reality is easy. The operator can handle tools while projecting on a virtual layer the patient's 3D information, such as CBCTs, intra-oral scans, face scans, implants, bones, etc.

## GCOMM

G.COMM designs, manufactures and distributes professional lighting systems for dental and medical practices, as well as bleaching lights, simulators, support arms and components.

### What sets us apart?

We are close to doctors: thanks to our personal interaction with dentists, we have been able to incorporate in our products the needs and desires of professionals. In 2007 we developed our Light Polaris to prevent eye strain thanks to the light settings that can be adjusted according to the practice needs.

Choice of materials, product specifications and style are also inspired by our customers' requirements. We are proud of being a manufacturer, we run the whole production cycle in our facilities. G.COMM has an international calling.

Our worldwide customers appreciate the attractive design of "Made in Italy" products and our concepts, which combine innovation with strong expertise in optics, electro-mechanics and digital technology.

The revolutionary Iris View, our lamp with built-in video-camera, stems from these values.

## MGF COMPRESSORS

MGF has produced high quality air compressors and dental suction systems for more than 30 years.

The continuous growth over the years has enabled constant improvement in both its products and production processes, to the extent that, today, the company's products are respected in Italy and the world for the reliability of its products and services.

MGF has constantly invested in the evolution of its projects, with particular attention to oil free piston compressors, high pressure compressors for heavy duty cycle, IoT solutions and dental surgical suction, air treatment and silence throughout this period.

Today, MGF designs, develops and produces his products with a fully market-oriented construction philosophy with concern for understanding the real needs, trends and requirements of tomorrow, starting from the customer's point of view.

## REDDISH STONE

The MANFREDI brand has been the backbone of Made in Italy laboratory equipment manufacturing since 1934.

REDDISH STONE is one of the worldwide leading companies for the production of silicone and elastomer-bound abrasives, polishers and fiberglass cutters, based on proprietary formulas since 1968.

Manfredi and Reddish Stone joined forces in 2014, combining more than a century of manufacturing experience and becoming the ideal one-stop provider, capable of satisfying all the needs of a hi-tech laboratory.

The incessant research and adoption of new technologies delivers a complete range of machines: from casting to laser welding to the latest 5 axis digital CAD/CAM system, and the latest addition: the REVOLUTIONARY ZIRCONIA 3D PRINTER.

## RHEIN83

Rhein83 is highly specialized in the production of dental attachments. Currently offering the widest range of solutions in overdenture on natural teeth, partial denture, implantology and cad-cam.

The versatility of the new OT Equator System allows the dentist and dental technician to work with all different implant brands and systems spacing from removable to fixed prosthesis protocols.

Rhein83 presents the Ot Bridge technique. For all types of dental implants, including unknown ones!

The real innovation behind the technique is the adaptability of the OT Equator abutment as a MUA component. The versatility of this solution is the chance to treat both removable and fixed restorations with the same narrow profile titanium abutment.

This allows the professional to save materials, reduce the number of tools and working times both with traditional and digital techniques.

# RUTHINIUM

RUTHINIUM® is an all Italian brand founded in 1965 from the will of its founding fathers of creating a manufacturing plant for the manufacture of dental products.

In 1967, further to the excellent results achieved, the Company enlarged the range of products and started the production of what will become later the core business of the Group; the manufacture of acrylic resin teeth.

We changed the rules, innovating with our premium teeth ACRYSMART. 50 years of experience in Dental Field, the best world technologies in the production system, strong energy in research and development have enabled RUTHINIUM Group Dental Manufacturing Spa to claim the coveted position of premium Italian manufacturers and invest in the future: education, trainings and new lab products development and complete full denture Digital Flow.

## SISMA

SISMA is a worldwide reference in the design and production of extremely high precision machinery and laser systems.

Established in 1961, today SISMA offers a wide-ranging and futuristic selection of production solutions, specifically studied for the dental field: manual laser welding systems and professional DLP 3D solutions using resin polymerization by means of light projection.

The SISMA products intended for the dental field are designed on the basis of the specific needs of those in the industry, with particular attention to the creation of economic advantages in terms of productivity and user experience.

EVERES ZERO and UNO are professional 3D Printers based on DLP technology, designed to offer a unique user experience thanks to the self-alignment of the building platform, high printing speed and open material system.

## SMILER PRO

Smiler Pro is an innovative Italian start-up with high technological content manufacturing Hardware and Software for dentistry and medicine. Born from an idea of the founder turned into a patent first, then in a company, and finally in an innovative product.

Smiler Pro is now launching a creative “augmented reality” device, thought for the dental industry. Its high-resolution camera keeps the vision of the mouth always in the foreground and with a static mode during the visit and dental treatments.

This important feature allows the dentist to evaluate the proportions of the teeth and their respective aesthetic symmetries, facilitating the operative procedures and doctor-patient communication.

SmilerPro is attending AEEDC in Dubai, looking for new markets and possible distribution partners.

# TOOTOR

TOOTOR is the first online clinical training distribution platform for dentistry, offering unlimited access to training content for dentists, dental hygienists and dental practice assistants.

TOOTOR is a multi-channel platform accessible from computer, smartphone, tablet and smart TV. The contents consist of original videos created by TOOTOR video makers with support of professional dentists.

All videos are of very high quality. Content quality and relevance are ensured by a scientific board of university professors, reviewing and approving each video.

Contents are of three types: clinical videos, in-depth videos and talk shows.

Over 15 new videos are published monthly, to offer subscribers a continuous update on new techniques and the use of new materials.

The platform currently gives access to +300 videos. TOOTOR is accessible via a monthly (19.8 €) or yearly subscription (198 €) and is in 3 languages: English, Italian and Spanish.

# TRESSIS ITALIA

Tressis Italia promotes the Italian style in dental ceramics.

Tressis Italia srl produces the Natural Ceramic System.

Natural Ceramic System allows the dental technician to work on precious and non-precious alloys, zirconia, lithium silicate and even monolithic structures with the same layering technique regardless of the type of structure used.

The absolute star of the Natural Ceramic System is CRYSTAL, a complete set of ceramic pastes for micro-layering on zirconia, lithium silicate and even metal-ceramic, even after the glazing firing.

Natural Crystal allows the dental technician to micro-layer any material, recreating the effect of layered ceramic in a very small space, easily and in one firing.

Natural Ceramic System, dental ceramic italian style!
