

3-6 November 2025

Where Italian Engineering Powers Global Energy

ADNEC - Hall 1 - Stand n. 1160, 1256

3-6 November 2025

Where Italian Engineering Powers Global Energy

ADNEC - Hall 1 - Stand n. 1160, 1256

"The 45.9% increase in oil and gas equipment exports to the UAE reflects the remarkable momentum of our bilateral trade and Italy's growing contribution to the region's energy transformation. Through the Italian Pavilion at ADIPEC 2025, we are not only displaying the excellence of Italian engineering and manufacturing but also strengthening our long-term commitment to the UAE's vision for a diversified, low-emission energy future. Italian companies continue to play a pivotal role in supporting this transition by delivering technologies that combine innovation, efficiency, and sustainability - values that lie at the core of Italy's industrial identity."

Mr. Valerio Soldani

Trade Commissioner to the UAE and Oman
ITA - Italian Trade Agency

Italian Trade Agency - ITA

ITALIAN TRADE AGENCY

TRADE AND INVESTMENT

OPEN DOORS TO A WORLD
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

ADIPEC

ADIPEC is the world's meeting point for energy and technology leaders, convening in Abu Dhabi from 3–6 November to translate ambition into action across the entire value chain. Anchored by Strategic and Technical Conferences, it connects ministers, CEOs, engineers and innovators to build resilience today while scaling intelligent solutions that accelerate inclusive global progress.

As one of the largest energy exhibitions and conferences globally, ADIPEC brings together over 205,000 professionals and 2,250+ exhibitors across 30 country pavilions, creating a powerful marketplace for partnerships, procurement and technology adoption. From decarbonisation and digitalisation to maritime and logistics, its specialised zones spotlight solutions shaping the future of energy.

Hosted at ADNEC under the leadership of the UAE, ADIPEC showcases how energy, finance and technology can mobilise capital and capabilities at speed and scale. The programme explores the convergence of AI and energy, the next chapter of downstream, and the engineering breakthroughs driving operational excellence and net-zero pathways.

Across four days, attendees engage in high-level dialogue, technical deep-dives and curated networking designed to unlock market access and measurable impact. Whether a national oil company, technology disruptor, policymaker or industrial off-taker, ADIPEC is where strategies are shared, deals are done and cross-border collaboration takes flight.

By uniting producers, consumers, innovators and investors, ADIPEC powers progress—enabling secure, affordable energy, empowering people through intelligence, and delivering real-world impact for economies and the planet.

ANIE

Federazione ANIE, member of Confindustria, has been representing the Italian Electrical Engineering and Electronic industry for 80 years.

With over 1,100 member companies, the ANIE system supplies technologies for public and private infrastructures in strategic markets such as energy, industry, building, infrastructures and transport.

Electrical Engineering and Electronic technologies represent the heart of the twin transition – green and digital. They are drivers of innovation and are essential for the modernization of existing infrastructure.

ANIE INDUSTRY FIGURES:

- 112 billion Euros of total turnover
- 440,000 employees
- 4% intra-mural R&D expenditure on total turnover

ANIMA CONFINDUSTRIA

ANIMA Confindustria - Federation of Italian Associations of Mechanical and Engineering Industries - represents the Italian mechanical sector within Confindustria. Founded in 1914, ANIMA gathers 34 associations and over 1,000 companies, employing more than 220,000 people, with an overall production value of €55.5 billion and an export share exceeding 58% (2024 estimates).

The Federation covers a wide range of industrial supply chains, including:

- Energy Generation, Chemical, Oil & Gas, Green Hydrogen and Nuclear Technologies (machinery, plants, components)
- Building Technologies (HVAC, construction systems, infrastructures, water technologies, infrastrutture and water treatment)
- Logistics Technologies (lifting, elevation and handling equipment)
- Food Technologies (processing machinery and plants for the food industry)
- Safety, Security & Environment (environmental protection, firefighting and personal safety)
- General Industry (plants, components and products for various industrial sectors)
- ANIMA safeguards the interests of Italian mechanical engineering worldwide, supporting its member companies in technical, regulatory, and economic matters, and promoting their know-how in international markets.
- With a strong focus on sustainability and innovation, ANIMA member companies are actively engaged in the energy transition. A dedicated working group within the Federation is committed to the research and application of hydrogen and nuclear technologies for energy production, reflecting the strategic role of Italian mechanics in shaping the global energy future.

FEDERTEC

In the highly developed context where product technology tends to converge, FEDERTEC, the Association representing the Italian industry of Mechatronic Technologies and Components for Fluid Power, Power Transmission, Smart Automation and Control of Industrial Products and Processes, is the point of reference for the industrial automation sector, focused on the integration of the different technologies and aimed at representing the entire value chain.

The member companies of FEDERTEC represent a leading part of the Italian economy and together, they show very remarkable values, with a global sector turnover exceeding 13 billion euro and a national market value of 9.6 billion euro at the end of 2024.
