Sustainability is **SustainabITALY**

discover it at **The Big 5 2022**

5th- 8th December 2022

Trade Centre Arena

Dubai World Trade Centre, Dubai

Sustainability is **SustainabITALY**

The transition to a green economy and to a perfect balance between sustainability and competitive development is slowly involving all production sectors, including the construction industry.

The building sector affects the climate change: in Europe the urbanization is responsible for about 36% of CO2 emissions, and the construction industry energy consumption is 40%.

In order to promote sustainability in the construction industry, we need to focus on a better comfort of living, on the construction of new intelligent buildings and on the reduction of energy consumption and carbon emissions. A "smart home" allows you to live better and with low waste.

These changes require a profound knowledge and technologies in order to make urban contexts, study, life and workplaces more accessible, inclusive, less energy-consuming, suitable for the new climatic context, making them more people-friendly

In Italy the "Green Construction" market is increasing very quickly: it is supposed to reach a value of \$187.4 billion dollars by 2027 with an annual increase rate of 8.6%, (source: US survey by Research & Markets - Environmental Leader). The World Green Building Council is also foreseeing that infrastructure and buildings will aim to halve carbon emissions by 40% by 2030, and by 100% by 2050.

Italy is consolidating a leadership position in Europe in the field of sustainable construction and the Italian Government is incentivizing energy efficiency measures in existing private and public buildings with dedicated funds and a program which include, among others, fiscal facilities for green renewal of buildings and infrastructures (estimated value of fiscal benefits: almost 18 bln Euro¹).

"Green building revolution" has also generated an increase in employees in the first nine months of 2021 equal to 94 thousand units (+7.9%).

Over the last years, 46,537 companies in the sector (28.7% of the total) have made green investments to improve processes and products with a view to sustainability. A process that, if pursued and enhanced, could help the energy requalification of the national real estate assets, responsible for about 40% of CO2 emissions, reducing dependency on traditional fossil fuels and making the Italian building industry one of the most modern and competitive in the world.

For this reason we are presenting Italy at "The Big 5 2022" with the motto: Sustainability is Sustainab-ITALY!

Italian Trade Agency - ITA

ITALIAN TRADE AGENCY

TRADE AND INVESTMENT

OPEN DOORS TO A WORLD
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

CASEITALY

CASEITALY is a new and innovative format to promote the Italian companies of the building envelope and technical components. It has been developed by four benchmark Associations (ACMI, ANFIT, ASSITES, PILE), with the support and direction of FINCO Federation (Federazione Industrie e Costruzioni) and the decisive support of MAECI (Italian Ministry of Foreign Affairs and International Cooperation), through ITA (Italian Trade Agency).

CASEITALY symbolises the best of Italian production, values and qualities. It represents the sectors of windows, doors, gates, shutters, roofings, tinsmithery, technical curtains, flyscreens, sunscreen protection systems and components, safety harnesses and belts, façades and other sectors linked to construction.

With CASEITALY, the focus of the foreign operators attending BIG5 Dubai will be on the value of the "Made in Italy" of the building envelope, of thousands of companies and their operators that represent an excellence recognised (if not yet fully known) by the rest of the world.

ACMI – ASSOCOSTRUTTORI CHIUSURE E MECCANISMI ITALIA

ACMI is the Italian Association that gathers the manufacturers of technical doors, windows and shutters for every type of civil and industrial application, in any type of construction and regardless of the material used for their making, as well as components and accessories to complement and integrate them.

The Association offers support in the issues of specific interest to the represented the market sector, keeping relations with public and governmental organizations, testing and research laboratories, standardization and certification bodies, Italian and foreign, in charge of the areas of interest of its members.

ACMI prepares and offers business consulting services helping its associates to achieve the qualifications needed for the production and marketing of products of their interest.

ANFIT - ASSOCIAZIONE NAZIONALE PER LA TUTELA DELLA FINESTRA MADE IN ITALY

ANFIT's main purpose is to promote quality windows conceived, designed and crafted entirely in Italy by Italian companies, inspecting and ensuring that strict quality, safety, environmental protection and energy savings criteria are met for consumer satisfaction.

ANFIT's goal is to protect the Italian quality market and production chain in compliance with the regulations. ANFIT's commitment is to the technical and qualitative improvement and upgrade of manufacturing, regardless of the material used. ANFIT carries out promotional activities at public administrations, professional studies and media in general. Its main purpose is to protect the Italian quality market and production chain abroad as well.

With a clear procedure, ANFIT determines the origin and quality of the product, thus enabling the end user to decide, independently and for their sole interest, on the purchase of windows made in Italy.

This value must also be conveyed as best as possible to international markets, in order to support and increase the added value of such products.

ANFIT informs its Members of technical and regulatory updates, and takes part in the Italian and European decision-making processes that determine the rules of the market to protect Italian window manufacturers.

ASSITES – ASSOCIAZIONE ITALIANA TENDE, SCHERMATURE SOLARI E CHIUSURE TECNICHE OSCURANTI

ASSITES' role is to represent the knowledge of blinds in their entirety – including solar shading, shutters, outdoor blinds, indoor blinds, and insect screens – in the national market and consumer perception. It actively works to spread knowledge of industry issues and to monitor market requirements, helping companies to meet them.

Qualified companies of any size – that manufacture and supply products and/or raw materials in the sector of solar shading, shutters, indoor and outdoor blinds, and insect screens – can become members of the Association. Additionally, professionals (technicians, consultants and scholars), sales agents or representatives and associations or industry bodies can also be part of the Association, as associate members and supporters.

ASSITES offers day-to-day assistance on industry entrepreneurship, and constant updates through news, information capsules and internal communications, monitoring trends and market developments at the national and international level and offering support to companies that wish to undertake a process of internationalization.

Euro Profile Sashlock Case

Product profile:

For residential, commercial and public buildings.

Features:

- According to EN 12209 - Grade 3
- Centre: 72 PZ
- Backset: 55 mm
- For wood or steel doors
- Suitable for external fire and smoke doors
- SSS 104 external and striking plates available square or radius
- Width: 24 mm
- Front thickness: 3 mm strike plate 1.5 mm
- SS 3 anti-cylinder
- Reversible: metal plate and steel latch left/right
- Double throw angled plated dead bolt
- Forced by accept bell through fixing rosette 38 mm

Supplied as standard:

- Strike plate, fixing screws for lock and strike plate and white box for strike plate

Finish:

- Satin Stainless Steel

Options:

- Polished brass front strike plated MQQ 500 pcs
- Backset: (60-65 mm MQQ 1000 pcs)

Quality and performance: Successfully tested to all the requirements of EN 1634-1:2014

Fire safety: Included in a successful fire test to EN 1634 Part 1. Approved for use on 30, 60, 90 and 120 minutes

under fire doors and 240 minutes on steel fire doors.

GRUPPO NORTON SRL

Gruppo Norton is an Italian company located in the industrial area of Altofonte, Palermo, Italy.

It was founded in 2007, from the idea of a group of Italian and Spanish entrepreneurs, who decide to combine their experiences and skills, got in over 30 years of activity, in access automation world.

Gruppo Norton is the ideal choice for those who want to automate shutters or gates, with a wide range of motors and accessories that allow you to easily find the simplest and most advantageous solution for your needs.

Our policy is based on the MADE IN ITALY quality, for this reason our automatisms (central motors for rolling shutters, gear motors for sliding gates and hydraulic actuators for swing gates) and electronic devices are conceived, designed, produced and assembled in Italy, allowing us to increase the quality standards of our products. These products, completely Made in Italy, are realized using highly technological machineries.

Furthermore, the company is present on all national and international markets, especially the Middle East, North Africa, the Eastern Europe and all the countries of South America.

IM.VA S.R.L.

In order to produce standard-sized industrial doors and large or very large folding and sliding doors, it is necessary to continuously invest in research and development and develop appropriate technical and structural calculations to meet every need.

The experience of more than 40 years of activity pushes us in search of solutions capable of further expanding the construction possibilities to meet new market needs. We have recently studied a new production line capable of manufacturing self-supporting insulated panels of 12.5 meters in height by 120 mm thick in a single solution.

This production technique opens up new perspectives which, we are sure, will be appreciated by professionals, designers and constructors.

NASTER SRL

#WeProtectYourSolutions

We believe in the value of the family, social inclusiveness, and strong ties with the local community.

We deeply believe in the values of trust and respect for our work, for people and the environment. To improve the sustainability of our operations, we have invested in the installation of a 150 kW PV system and LED lights in all our offices and production facilities, sparing no effort to ensure compliance with emission and noise limits in our activities.

Our production takes place entirely in Italy, strongly rooted in the Bergamo area and the values of tradition, but always looking to the challenges ahead and the evolving requirements of the international markets.

We develop solutions to protect your products and make high quality protective films and adhesive tapes that are sturdy and durable. But we are much, much more than this: flexibility, competitiveness and prompt response, teamwork to meet sustainability, efficiency and quality goals and hence be able to fulfill all customer requirements.

It is thanks to what we believe in that we have secured a solid and stable market share. Family, the team and team spirit, attention to details are the values that have guided us so far and we will draw inspiration from in future.

This is Naster and this is us.

O.C.M. Recanzone SRL

OCM proposes a wide range of products. We're specialized in high-speed vertical PVC doors, swing flex doors, partition walls, strip curtains and dock shelters equipment.

The fold-up door is a high-speed door that opens and closes using a vertical pack-away operation.

This type is ideal for large size openings and it's designed for prolonged everyday use both internally and externally with minimum maintenance. It reduces noise and eliminates dust from nearby working areas.

The high-speed roll-up door is suitable for both small and medium size openings, where heavy traffic is present. For a maximum safety, roll-up doors have a built-in safety edge.

The rapid zip self-repairing door: after a collision the flexible curtain exits from the runners and it's automatically restored during next operation.

A flexible swing door is suitable for pedestrian and vehicle traffic, it provides excellent protection against noise and heat loss.

RESSTENDE SRL

CUSTOM QUALITY AT THE SERVICE OF DESIGN

Resstende is a leading Italian company in the roller blind trade, esteemed by eminent international designers and architects.

The company was founded in 1975 and the experience gained in only a few years allowed us in 1980 to design and develop our first series of RESSTENDE black-out and shading blind systems.

During the years, a combination of research, quality and technology has contributed to the steady growth of the company, which now offers a range of over 1000 products which are sold in more than 30 countries worldwide.

Tenacity, passion and efficiency have always accompanied our presence on the market: essential qualities for the success of our business.

SERRAMENTI PISETTA

Serramenti Pisetta is an Italian window and door company run by Pisetta family.

The company was founded more than seventy years ago and since then has continued to pass on techniques and know-how in window processing. Over the last few years, the company has increasingly focused on a niche market involving high-end private homes.

The company's flagship product is IDEA LUX, a modern and performance window that perfectly reflects contemporary and future lifestyles and design. What makes the window unique is the coupling system that allows the interior part to be covered with refined materials such as precious wood finishes, leather, rare metals and exclusive wallpaper.

The goal of Serramenti Pisetta is to make the window a design complement in the living space. A complement that can interpret the personality of the person who chooses it.

We give value to the environment by offering a design jewel.
