Sustainability is **SustainabITALY**

The Italian Maritime sector generates a yearly turnover of 6.1 billion Euros – a true representation of the excellence of “Made in Italy” production. Italian boats are characterized by their aesthetic refinement, from their elegant design to the attention to detail in the finishes, to the interior design, not to mention the in-depth technological research made for each construction, the materials used, the paints and the seafaring solutions.

The development of quality materials and products, the application of methodologies and techniques aimed at applying a sustainable design, calibrated over the entire life cycle of the product, as well as its innovation and production process, in addition to its sustainability are all elements of the strategies pursued today by the maritime supply chain sector. The new environmental requirements of the research and innovation process are as follows: the reduction of consumption and emissions, a view to transition towards future decarbonization, the study of new materials and finally the application of innovative “nautical 4.0” approaches.

Recognizing the issue of sustainability as an absolute priority, The Italian Marine Industry Association (Confindustria Nautica) has assigned a Sustainability Committee, where representatives of all maritime product categories attend these meetings and discuss topics such as decarbonization, innovative materials, digitalization and the end-of-life are discussed by experts in the field.

It is essential for companies in the maritime sector to allow them to benefit from advantages designed for internal research and development to encourage investments in innovation and sustainability and to direct entrepreneurial management systems according to the ESG (Environmental, Social and Governance) criteria.

The goal is to adopt increasingly sustainable strategies and to alter business models, exploit new opportunities and better respond to the challenges of the future. In addition to following the ESG certification required by the companies, which will be essential for new investments in the future.

Moreover, on the international front, the Association is committed resolving sustainability issues through its contribution to the European Industry Federation (EBI) and the Global Federation (ICOMIA). Lobbying actions on these issues are crucial to guarantee companies in our sector an adequate transition towards the new environmental requirements. This will allow decision-makers understand the specifics of our sector (which is a small industrial niche, but with high complexity), as well as it’s necessary to find the best answers to an ecological transition which will undoubtedly be more complex for the marine economy compared to other sectors, primarily the automotive sector.

Italian Trade Agency - ITA

TRADE AND INVESTMENT

OPEN DOORS TO A WORLD
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

CONFINDUSTRIA NAUTICA – ITALIAN MARINE INDUSTRY ASSOCIATION

Confindustria Nautica (Italian Marine Industry Association) is a non-profit organisation founded in 1967 to promote maritime culture and tourism as well as develop the boating industry, a sector in which Italy plays an international role as a global leader that has consistently demonstrated its ability to grasp the state of the market and respond to its changing needs.

With its headquarters in Genoa and Rome, Confindustria Nautica is a member of Confindustria (the Federation of Italian Industry). It offers assistance, support, information and representation to its members operating across the various sectors of production, sales and services, while also providing consulting services of a technical and regulatory nature.

The Association interacts on a national level with political, social and governmental institutions, maintaining active relations with the Italian ministries for infrastructure, transport, economic development, the environment, economics and finance. At an international level, it plays an active role in ICOMIA (International Council of Marine Industry Associations) and EBI (European Boating Industry) by lobbying the EU institutions, international authorities and major global organisations.

As part of its institutional work in representing the Italian boating industry, the Association gathers and processes data on the sector's performance and trends in relation to both the domestic and international markets. It also encourages technical and economic development through market reports, research studies, debates and conferences.

The Association's international communications are supported by an intense marketing campaign that aims to promote Italian products worldwide, focusing on the stylish elegance, advanced technology and cutting-edge innovation that lie at the heart of the Italian boating industry.

Confindustria Nautica also organises the Genoa International Boat Show, the largest event of its kind in the Mediterranean, and the Satec Convention, a meeting point for member companies, stakeholders and operators in the sector.

ASCOM SPA

ASCOM group is one of the leading manufacturers of special cranes for launch, transport and retrieval of boats. The company dates to 1972, and, as of today, is able to serve an array of industries with the following product portfolio:

- Self-propelled Boat-Hoists
- Marine Jib Cranes
- Marine forklifts
- Boat Transporters
- Overhead Cranes
- Gantry cranes
- Self-propelled trolleys
- Custom solutions

At Ascom, we want to drive innovation and achieve our main goal: customer satisfaction, thanks to highly technological, yet sustainable solutions. Our company is recognized worldwide for the quality of our products, in terms of performance, reliability & technology, our unique know-how, experience and flexibility. Furthermore, as the world calls for a climate action, here Ascom supports the reduction of CO2 emissions, by means of environmentally friendly drives. Low or zero emission, zero noise and zero leaks while maintaining the performance is a huge advantage, thus, all our cranes are available:

EUTHALIA SRL

Euthalia Marine is part of Euthalia, the new benchmark company for consultancy, installation and the marketing of Ingelva systems protecting against lightning and power surges. Ingelva has for 70 years been a brand leader at the international level and a synonym of safety and innovation in the residential, company, commercial and public fields.

Owing to this patented technology, boats can also be protected preventively against lightning and surges to ensure the safety of people, the boat, and the systems on board.

Studying the features of the hull, materials and systems on board, we provide the boats with a customized solution that ensures complete and preventive protection.

The Euthalia Marine lightning protection system developed with Ingelva technology, reduces the probability that the boat will be hit by atmospheric discharge, avoiding drawing lightning upon itself. A very different approach from the traditional ones that attract it and dump it on the ground, trying only to contain the damage.

With our preventive technology we protect your sailboat or motor boat, ship or yacht, from: direct downward lightning with lightning conductors and air filters, products of the ENERG1CA® line; from upward lightning, indirect lightning and power surges coming from energy inputs, with high impedance ground (or sea) filter and Surge Protector Devices (SPD), products of the ARMON1CA® line.

INGEMAR SRL

Ingemar was established in 1979 in Milan, Italy, with the specific aim of specialising in optimising layout designs for marinas and supplying floating structures and accessories for recreational yacht moorings.

Standard production consists of a large range of pontoons and floating breakwaters, fixed quays and service distribution pedestals.

The company's involvement may vary from simply supplying structures to turn-key customized projects for significant and complex assignments. Ingemar floating structures are reliable, robust and functional: as safe as fixed construction, but more economical and easy to install and relocate. Ingemar's prefabricated techniques have also been adopted for interesting applications with excellent results both in quality and for speed of construction and installation.

Today the Ingemar Group is one of the international sector's leaders, able to tackle all issues relating to the construction and installation of floating structures, moorings and harbour services, performing the role of qualified technical partner and reliable supplier.

RAZETO & CASARETO SPA

Since the foundation in 1920 F.lli Razeto e Casareto S.p.a. designs and makes exclusive marine locks, doors' and cabinets' accessories, with special consideration to designers' and boat owners' needs.

Well known for its stylish and artistic products, the Italian manufacturer has celebrated its 100th anniversary with a very modern product called Quadra5led.

Designer Giangi Razeto describes the Innovation as a smart integrated access system with "luminous antimicrobial handles, providing safety with an eye to beauty." Quadraled handles light up in critical conditions to address passengers to safe escape routes and can be used as a luminous signage on the door to give emergency or management information.

Quadraled also features esi antimicrobial system whose effectiveness against bacteria, fungi and viruses (CoronaVirus included) has been found and certified by the virology Lab of the University of Modena and Reggio Emilia, Siena and Genova, in compliance with RINA's additional note of Class Biosafe Ship, in reference with high utilization rate surfaces.

This is an excellent combination of opportunities to introduce in the Gulf regions the new lines of antimicrobial handles and the new smart integrated access system with luminous handles that lend themselves not only to use in the marine environment but also in the furnishing sector of public and private interiors.

SACE COMPONENTS SRL

The sustainable alternative to teak. Marinecork is the innovative solution for decking entirely cork boats with unique technical performances such as:

- Lightness
- Mechanical resistance
- Non-slip
- Stain resistant
- Longevity
- Fire resistant
- It's heat insulating
- It's soundproofing

Sustainability. MarineCork is a product with a marked green attitude. Cork is a 100% natural material, recyclable and does not require the plant to be cut down. It is obtained from the simple decortium of the bark which reproduces numerous times during the life cycle of the cork oak.

Easy to install. Marinecork can be installed to embellish or make life on deck more comfortable, in a very simple way, thanks to the different types of purchase. The material can be supplied in slats or panels with a maximum size of 300x90 cm, already equipped with comments (black, white or gray). Alternatively, they can be ordered on a template, already complete with frames, ready to glue.

SAIM SPA

Founded in 1951, SAIM S.p.A. became a reference point in the supply of large Italian automotive groups as well as several companies in the marine and industrial sector.

SAIM has always associated top-level products with first-class service and a trained service network in the whole area, with the mission of being a reliable partner for its customers.

SAIM Marine, one of SAIM Business Units, was born in 1993, just before the Italian shipbuilding industry was booming.

Today SAIM Marine imports and distributes high-tech equipment to the most famous shipyards. Its products and services are targeted both to pleasure crafts and to professional boats.

SAIM Marine supports the shipyards in the projects development and has a direct service network along the coasts of Italy, Europe and all over the world.

QS Seamaster and Waveless are the two brands, among those distributed by SAIM, which will be exhibited at Dubai Boat Show 2023.

SANGUINETI CHIAVARI SRL

Sanguineti Chiavari is the world leader in the design and manufacturing of nautical products for yachts, pleasure and patrol boats.

Our staff consists of more than thirty people specialized in various sectors: commercial, technical and mechanical. A complete internal management and processing of the product, from the raw material to the final delivery to the customer.

The quality, the attention to details and the possibility to make each product “custom”, represent our trademark. The customer who chooses Sanguineti Chiavari relies on the experience of designers and craftsmen who follow each stage of production, creating unique products and not just simple objects.

The use of an advanced technology and craftsmanship enables Sanguineti Chiavari to manufacture: gangways, ladders, tender handlings, handlings (light masts, platform and balcony, hard top, hatch and aft doors), deck equipment, furniture line.

SCHIAVETTI ENZO SAS DI E. SCHIAVETTI & C.

Schiavetti's company was founded in 1870 and it soon specialized in the manufacturing of hardware accessories, for the Cruise Line and Marine industry: we have now reached the fourth generation, still working in the naval and marine field.

Our product range varies from locks and hinges to coat hooks and many other items, all made of stainless steel and brass.

A strengthened partnership with important brands, together with our long experience, completes our selection of products.

SELEKT MARINE

Tribale Yachts specialize in building unique and innovative crossover yachts: vessels that give you the freedom and range to explore remote regions of the world, without compromising on comfort or style.

Designed and constructed in Italy, Tribale Yachts integrate the strength and autonomy of explorer or expedition yachts with the sculptural lines and elegant design of traditional flybridge motor yachts.

Tribale Yachts' range of crossover yachts is built to handle rough seas and engineered for optimal fuel efficiency, enabling long-distance cruising.

Large enough to accommodate owners, guests and crew comfortably, yet small enough to access secluded bays and ports, these yachts embody the spirit of adventure.

Inside, the sophisticated, expertly-designed interiors ensure absolute comfort and an unparalleled lifestyle at sea. Generous volumes and a carefully considered configuration create spacious, flowing interiors filled with natural light.
