ITA

ITALIAN TRADE AGENCY

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses.

Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

Bcodeautomation is an Italian company specialized in the design and development of advanced industrial automation and robotics solutions.

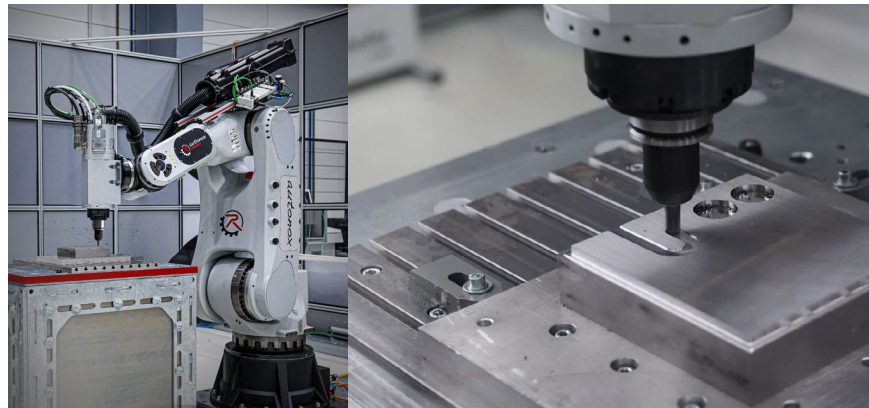

Our expertise focuses on controller-independent robotics, offering flexible and high-performance robotic systems tailored to modern manufacturing requirements. As part of the DCM Group in Italy, the exclusive Italian distributor of the Germany company Autonox Robotics, Bcodeautomation provides access to a comprehensive range of innovative 6-axis robotic solutions.

A key area of specialization is the integration of Autonox robots for robotic milling, turning and additive manufacturing applications, combined with Siemens SINUMERIK

CNC control technology. This approach enables manufacturers to integrate robotic flexibility with advanced CNC capabilities, creating efficient, scalable and highly adaptable production systems.

Bcodeautomation supports customers from engineering and system integration through commissioning, delivering customized solutions designed to improve productivity, flexibility and process performance.

CEMB S.p.A. is an Italian leading company in the field of balancing and vibration analysis.

Founded in 1946, CEMB stands out as a pioneer in the design, manufacturing, and global export of universal, automatic and customized

BALANCING MACHINES, providing comprehensive solutions.

Our balancing machines are designed for adaptability, accommodating a wide range of rotating components in different sizes, shapes, and weights, making them ideal for diverse industries, including: automotive, aerospace, power generation, railway, industrial maintenance, general manufacturing, paper industry, pumps, impellers, fans and agricultural machinery.

BALANCING MACHINES & SERVICES

With a strong heritage of innovation, CEMB is dedicated to deliver flexibility, accuracy, and efficiency to meet the specific needs of various industrial applications.

Dynamec is a Vicenza based company specialising in precision mechanical machining and the development of customised industrial solutions.

We support companies, technical departments and R&D teams in turning their ideas into functional components, prototypes and small to medium sized production runs, while also providing support throughout the industrialisation process.

Thanks to a modern CNC machine park, multidisciplinary technical expertise and the ability to work with a wide range of materials from metals to technical plastics and composite materials we manufacture complex, high precision components, with rigorous dimensional inspection and the possibility of managing complementary treatments, finishes and processes.

Our offering is complemented by the design and manufacture of automation and robotic systems, plastic mould components and accessories, as well as laser marking and welding machines and solutions, developed to meet specific customer requirements.

From concept to finished component, from prototype to production: a single partner to turn technical requirements into concrete solutions.

This advertisement block features a collage of images showing various precision-machined metal components, including flanges, brackets, and shafts. On the left, the Dynamec logo is displayed above the text 'CNC machining specialist for prototypes and small series' and 'Specialista lavorazioni CNC per prototipi e piccole serie'. Below this, a list of materials is provided in both Italian and English: 'ACCIAIO - ALLUMINIO - TITANIO - COMPOSITI' and 'STEEL - ALUMINIUM - TITANIUM - COMPOSITES'. In the bottom right corner, a location pin icon is followed by the text 'Provincia di Vicenza' and the Italian flag.

GLOBAL MARKETING ARCHITECTURE (GMA) is an international business consultancy specialized in HIGH-PERFORMANCE ENGINEERING, MOTORSPORT, AEROSPACE and MEDTECH.

We support companies in opening new international markets through tailored commercial strategies and direct B2B ACTIONS ON THE GROUND.

For GLOBAL OEMs AND TIER-1s, GMA creates high-value B2B networking platforms—such as the HIGH PERFORMANCE COFFEE CLUB—connecting major industry players with qualified suppliers, driving strategic business development, and building high-performance supply chain synergies.

GMA

Global Marketing
Architecture

For UK AND INTERNATIONAL COMPANIES targeting Italy, GMA acts as a STRATEGIC GATEWAY, providing direct market access, local commercial representation, and targeted introductions to key decision-makers across Europe's leading manufacturing and automotive hubs.

ProjectSoft is a technology-driven company delivering high-performance software solutions for the motor-sport, automotive and aerospace industries.

We support manufacturers and engineering organizations in managing complex product development and production environments through smart, scalable, and fully customized platforms integrated with AI.

Our solutions are designed to optimize engineering workflows, production processes, and data traceability, enabling companies to accelerate time-to-market while maintaining the highest standards of quality, compliance, and reliability.

PROJECTSOFT
ADVANCED SOFTWARE
SOLUTIONS

From project lifecycle management to ERP and MES integration, ProjectSoft bridges the gap between design, manufacturing, and digital operations.

With a strong focus on automation, interoperability, and real-time data management, we develop web-based and mobile applications that enhance collaboration across departments and suppliers.
